COM(80) 531 final

EXPLANATORY MEMORANDUM

Following a scientific recommendation from the ICES to increase the TAC for herring in the Skagerrak and Kattegat, consultations took place between the Community, Norway and Sweden, and between the Community and Sweden.

During these consultations, the delegations undertook to recommend to their authorities that the TAC in the Skagerrak and Kattegat should be increased and that their respective catch quotas for this stock should also be increased.

The objective of the proposed regulation is to modify the herring quota allocated to Swedish vessels, which can be caught in the Community zone in conformity with what was agreed during these consultations.
