# COMMISSION OF THE EUROPEAN COMMUNITIES

COM(91) 27 final

Brussels, 8 February 1991

Modified proposal for a

3

ì

# COUNCIL DIRECTIVE

# 

(presented by the Commission pursuant to Article 149, paragraph 3 of the EEC Treaty)

#### EXPLANATORY MEMORANDUM

1. On September 16, 1988 the Commission presented to the Council a draft Directive on the protection of natural and semi-natural habitats and of wild fauna nad flora, as adopted by the Commission on July 26, 1988. The missing annexes were transmitted to the Council on March 14, 1990.

On November 19, 1990 the European Parliament adopted with a large majority <u>53</u> amendments to the Commission's proposal.

- 2. <u>29</u> of these amendments are at least partly acceptable to the Commission as far as they include improvements or clarifications of the initial text.
- 3. To that effect the Commission has decided, in accordance with the third paragraph of the article 149 of the Treaty, to amend the proposal of the initial draft Directive.

Amended text

# Title

Proposal for a Council Directive on the protection of natural and seminatural habitats and of wild fauna and flora

Proposal for a Council Directive on the conservation of natural and seminatural habitats and of wild fauna and flora

# Article 1

The aim of this Directive is to conserve natural and semi-natural habitats and wild fauna and flora in the European territory of the Member States to which the Treaty applies, including maritime areas under the sovereignty or jurisdiction of the Member States.

The aim of this Directive is to conserve natural and seml-natural habitats and wild fauna and flora at a satisfactory conservation status in the European territory of the Member States to which the Treaty applies, including maritime areas under the sovereignty or jurisdiction of the Member States.

#### Article 2

Member States shall take the requisite measures to maintain the abundance and diversity of wild flora and fauna at a level which corresponds particular In to ecological, scientific and cultural requirements and the needs of subspecies, varieties, forms and populations at risk locally, while taking account of economic and recreational requirements.

Member States shall take 1.

- the regulaite measures to maintain the abundance and diversity of wild flora and fauna at a level which particular corresponds in to ecological, scientific and cultural requirements and the needs of subspecies, varieties, forms and populations at risk locally, while taking account of economic and recreational requirements.
- Member States shall take appropri-2. ate steps to monitor the conservation status of species and habitats mentioned in Article 1 in all the regions of their territories where they occur, taking particular account of :
  - (a) the need to monitor the status of threatened species and habitats, and
  - (b) the need to monitor the effectiveness of measures undertaken pursuant to paragraph 1 of the present\_Article.

# Article 3 (ea) (new)

- 2 -

(ea) "conservation status" means : the sum of the influences acting on a species that may affect its long term distribution and abundance or the sum of influences acting on a habitat which may affect its long term distribution and integrity.

> <u>Conservation status will be</u> taken as "satisfactory" for a species when :

- 1. population dynamics data Indicate that the species is maintaining itself on a longterm basis as a viable component of its ecosystems:
- 2. the range of the species is neither currently being reduced, nor is likely to be reduced on a long term basis;
- 3. there is, and will be in the foreseeable future, sufficient habitat to maintain the population of the species on a long term basis.

The conservation status of a species will be taken as "unsatisfactory" if any of the conditions set out in sub-paragraphs (1)-(3) is not met.

<u>Conservation status will be taken</u> <u>as "satisfactory" for a habitat</u> <u>when :</u>

- 1. the extent of a habitat is neither currently being reduced nor is likely to be reduced on a long term basis:
- 2. the habitat is not currently undergoing degradation, nor is likely to become degraded on a long term basis, within the areas where it currently exists:

3. the distribution and abundance of the habitat is being maintained at a level which is consistent with long term resource management.

The	cons	ervati	on	stat	tus	<u>of a</u>
habit	tat	WILL.	b	0	taken	as
<u>"unfa</u>	avorab	1e"	if	any	of	<u>the</u>
cond	itions	se	t	out	in	the
subpa	aragra	ohs (	1)-(	3) at	ove	is not
met.						

# Article 3 (eb) (new)

# (eb) "Special Protection Area" means :

Any area notified to the Commission as an area which is important to maintain or achieve a satisfactory conservation status for any threatened species mentioned in Annex 1 or threatened habitat mentionned in Annex IV.

Special Protection areas thus notified shall contribute to the network as envisaged in article 6. of this Directive: and the Member States shall be responsible for the precise form of protected status to be applied and the conservation measures to be applied within SPA's in order to maintain or to enhance the conservation status of. In particular, those species and habitats for which the areas are important.

- 1. Habitats of the species specified in accordance with Annex I and the types of habitat specified in accordance with Annex IV shall be the subject of special conservation measures in order to ensure the maintenance of the concerned at species a satisfactory level in their area of natural distribution as well conservation of the as the habitats concerned in all the regions where they occur.
- Article 5.1
  - Habitats of the species specified 1. in accordance with Annex I and the types of habitat specified in accordance with Annex IV shall be the subject of special conservation measures in order to ensure the maintenance or re-establishment of the species concerned at а satisfactory conservation status in their area of natural distribution as well as the conservation of the habitats concerned in all the regions where they occur.

# Article 5.3

3. Within, at the latest, eight years after the expiry of the period laid down in Article 27, Member States shall classify as special protection areas territories sufficient in number and size to ensure :

i) the maintenance of the species specified in accordance with Annex I at a satisfactory <u>level</u> in all regions where they occur,

- 3. Within, at the latest, eight years after the expiry of the period laid down in Article 27, Member States shall classify as special protection areas territories sufficient in number and size to ensure :
  - i) the maintenance of the species specified in accordance with Annex I at a satisfactory <u>conservation status</u> in all regions where they occur,

# Article 12.1 (b)

- (b) deliberate disturbance, particularly during the period of breeding, rearing and hlbernation, insofar as disturbance would be significant in relation to the objectives of this Directive;
- (b) deliberate disturbance, particularly during the period of breeding, rearing, hibernation and <u>migration</u>, insofar as disturbance would be significant in relation to the objectives of this Directive;

# Article 12.1 (d)

- 2. Exploitation, whether commercial or otherwise, of the species accordance with specified In (a) should only be Annex III of species whose permitted population is shown to be stable or increasing and exploitation be sustainable. Such must exploitation shall be subject to a management plan with the aims specified in Annex VIII in order to keep wild populations of those species at a satisfactory level and to avoid causing local disappearance of or serious disturbance to populations.
- Exploitation, whether commercial or 2. otherwise, of the species specified In accordance with Annex III (a) should only be permitted of species whose population is shown to be stable or Increasing and exploitation must be sustainable. Such exploitation shall be subject management plan with to a the alms specified in Annex VIII in order to keep wild populations of those species at a satisfactory conservation status and to avoid causing local disappearance of or serlous disturbance to other populations or habitats.

#### Article 14.5

5. Member States shall, where appropriate, take other measures, in particular :

(a) closed seasons and/or other procedures regulating exploitation;

(b) temporary or local prohibition of exploitation, in order to restore satisfactory <u>population</u> <u>levels</u>;

(c) regulation of the sale, keeping for sale, transporting for sale or offering for sale of specimens. 5. Member States shall, where appropriate, take other measures, in particular :

(a) closed seasons and/or other procedures regulating exploitation;

(b) temporary or local prohibition of exploitation, in order to restore <u>the</u> satisfactory <u>conservation status</u>

(c) regulation of the sale, keeping for sale, transporting for sale or offering for sale of specimens.

#### Article 16

Member States shall take the requisite measures to ensure that <u>inshore</u> fishing and protection of crops with nets are not detrimental to the conservation of threatened species specified in accordance with Annex II, and, as far as possible, other species of wild fauna and flora.

......

Member States shall take the requisite measures to ensure that fishing and protection of crops with nets are not detrimental to the conservation of threatened species specified in accordance with Annex II, and, as far as possible, other species of wild fauna and flora. (e) to permit, under strictly supervised conditions, on a selective basis and to a limited extent, the taking or keeping of certain wild animals and plants in small numbers. (e) to permit, under strictly supervised conditions, on a selective basis and to a limited extent, the taking or keeping of certain wild animals and plants in small <u>and</u> <u>specified</u> numbers.

#### Article 17.3 (b)

(b) the means, arrangements or methods authorized for capture or killing; (b) the means, arrangements or methods authorized for capture or killing and why these form the most satisfactory solution.

#### Article 20.3

- 3. Member States and the Commission shall promote multi-disciplinary analysis and evaluation with a view to increasing scientifically-based knowledge to which the measures carried out under this Directive can be anchored. Such information <u>should</u> be made available to the public.
- 3. Member States and the Commission shall promote multi-disciplinary analysis and evaluation with a view to increasing scientifically-based knowledge to which the measures carried out under this Directive can be anchored. In particular the Commission shall undertake studies to draw up an inventory of sites meeting the criteria listed in Annex V(a) and V(b) and shall keep this inventory up to date. Such information shall be made available to the public.

# Article 24.1

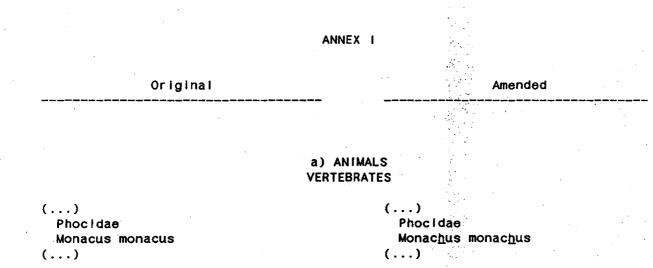

- 1. Member States shall take all necessary measures to ensure the monitoring of the biological communities and the populations species specified In of accordance with Annex I and In areas classified under the Article 5. Member States shall send the Commission the information resulting from monitoring, so that it may take appropriate initiatives with a the coordination view to necessary to ensure the fulfilment of the objectives of this Directive.
- 1. Member States shall take àll necessary measures to ensure the monitoring of the biological communities and the populations of species specified in accordance with Annex I and in the areas classified under Article 5. Member States shall send the Commission the information resulting from monitoring, so that it may take appropriate initiatives with a view to the coordination necessary to ensure the fulfilment of the objectives of this Directive. The Commission shall make the results from monitoring available on request.

Article 25 (b)

- (b) <u>ensure that</u> the introduction into the wild of any species which do not occur naturally in the wild state in that region <u>does</u> not prejudice the local fauna and flora or its natural habitats. In this connection they shall consult the Commission.
- (b) <u>forbid</u> the introduction into the wild of any species which do not occur naturally in the wild state in that region, <u>unless it is proved</u> <u>that it is necessary and will</u> not prejudice the local fauna and flora or its natural habitats. In this connection they shall consult the Commission.

#### Article 26

Application of measures taken pursuant to this Directive shall not lead to any deterioration in the present situation as regards the conservation of species and communities of wild fauna and flora referred to in Article 1. Application of measures taken pursuant to this Directive shall not lead to any deterioration in the present situation as regards the conservation of <u>habitats</u>, species and communities of wild fauna and flora referred to in Article 1.

# ANNEX VIII (ca), (cb) (new)

# 

(cb) that hunting regulations are strictly enforced;

#### COMPETITIVENESS AND EMPLOYMENT IMPACT STATEMENT

- 1 -

I. What is the main reason for introducing the measure ?

The 8 draft annexes aim to complete the proposal for a Council directive on the protection of natural and semi-natural habitats and of wild fauna and flora, for which the Task Force has already given its approval on 3/6/88 (note no. 001625).

#### II. Features of the businesses in question. In particular:

(a) Are there many SMEs ?

The enterprises concerned will be mainly agricultural ones, since the directive will deal essentially as it appears clearly from annexes IV and VII, with conservation of natural habitats in predominantly rural areas.

- (b) Are they concentrated in regions which are :
  - i. eligible for regional aid in the Member States ?
- ii. eligible under the ERDF ?

The regions most likely to be affected are objectives 1 and 5b regions.

- (III.What direct obligations does this measure impose on businesses ?
- (IV. What indirect obligations are local authorities likely to impose on businesses ?

The direct and indirect obligations will vary according to the type of measures to be taken with a view to ensuring maintenance or reestablishment of a avbourable conservation status for species or habitat types specified in annexes I and IV. For agricultural enterprises, this will mean avoiding or reducing to a minimum the use of chemical fertilizers, pesticides and herbicides; for crafts or industries, this will mean avoiding or limiting their pollution emission and waste dumping in the areas concerned. V. Are there any special measures in respect of SMEs ? Please specify.

Even though the major part of the industrial fabric in the main areas affected by annexes I, IV and VII are likely to be composed of SMEs, no <u>special</u> measure is foreseen in respect of SMEs.

VI. What is the likely effect on :

(a) the competitiveness of businesses ?

The likely effect of direct or indirect obligations following implementation of the directive and its annexes on the competitiveness of business will vary depending on provisions already taken by the SMEs. It is likely to be important in cases where the SMEs are allowed to operate according to norms that are less strict than those set in Community environmental legislation, in particular with regard to emissions in the air and water. The SMEs will also be affected, to a lesser degree, in cases where the principle laid down in the "impact assessment" directive (760/85) (760/85)foreseeing the definition of compensatory measures with to correcting negative effects view on the a environment of a determined project is applied.

(b) employment ?

The measures carried out to implement the directive and its annexes could create employment in the following fields :

Agro-tourism, creation and management of natural protected areas, promotion of productive and commercial businesses.

VII. Have both sides of industry been consulted ?

Please indicate their opinions.

Both sides of industry will be consulted within the framework of the Economic and Social Committee.

1

22

In general positive comments (unions, employers).
