Brussels, January 1984.

GRANTS FROM THE REGIONAL FUND

Fourth allocation for 1983 (quota section) : 1 536 million ECU (1)

The Commission has approved the fourth allocation of grants for 1983 from the European Regional Development Fund (ERDF) : 1 536 million ECU for 2732 investment projects in disadvantaged regions. Of the total, 178 million ECU will go to investment projects in industry, craft industries and the service sector. These investments will maintain or create some 48 000 jobs. The bulk of the Community grants (1 358 million ECU) will go to infrastructure projects. The relevant investments directly create temporary jobs and prepare the ground for industrial and service activities which create permanent jobs.

This allocation is the largest in volume since the Fund was set up in 1975. The projects to be assisted are situated in almost all the Member States. The main beneficiaries are Italy, France, the United Kingdom and Greece. In the case of France, the present allocation represents the total assistance given to that country in 1983.

The projects assisted include the following : (2)

- (i) In the United Kingdom, assistance amounting to UKL 3.2 million has granted for the construction at Shotton in Wales of a new production unit by United Paper Mills Ltd. This new unit will have an annual production capacity of 180,000 tonnes of high quality newsprint and will enable 270 jobs to be created. The unemployment rate in the Shotton steel area currently stands at more than 20%.
- (ii) In Ireland, IRL 6.4 million have been allocated to investments in new technologies : in this case, the manufacture of computers and ancillary equipment by Storage and Technology Ltd at Finglas and Trilogy Ltd at Blanchardstown (both in the County of Dublin). A total of 1 200 jobs will be created by these extensions of production plant.
- (iii) In Denmark, all the assistance given under this allocation is intended for district heating and energy supply projects in Greenland.
- (iv) In Belgium, the ERDF is contributing BFR 108 million to the redevelopment of four disused industrial sites in Wallonia : the preparation of sites for small and medium-sized firms at Aubange, Marche-en-Famene and Vielsalm, and provision of an exhibition hall and the setting up of a cattle market at Bastogne.

-
- (1) The amount of each grant approved is denominated in the national currency of the country concerned. The amounts expressed here in terms of the ECU, which moves with day-to-day changes in exchange rates, are therefore only approximate. For 1983, all conversions were made at the rates obtaining in January 1983.
 - (2) Lists of all the projects assisted, broken down by country, may be obtained from the Commission's Spokesman's Group.

- (v) In the Netherlands, Community assistance is to be given for the extension of a quay in the Juliana port at Eemshaven.
- (vi) In Italy, the ERDF is contributing to the construction of an underwater aqueduct between the mainland and the island of Elba. This aqueduct will end the island's chronic shortage of drinking water, which, particularly in the summer, poses problems and hinders the expansion of tourism, the island's main source of income.
- (vii) In France, a radar station is to be built at Mindin (Loire region) with financial assistance from the ERDF. As the methane and coal terminals come into use, the number of large vessels using the lower reaches of the Loire will increase appreciably. These vessels should be able to use the river whatever the visibility and tidal conditions. The radar station at Mindin will help to improve the safety of navigation.
- (viii) In Germany, the ERDF is providing assistance for the development of a number of industrial estates, for example at Knetzgau in northern Bavaria in the extreme east of the Federal Republic. The unemployment rate in that region is well above the average for Germany. In order to create new jobs and stop skilled labour from moving away, it is necessary to attract new firms and to enable existing firms to expand by developing sites. The Knetzgau project consists in improving water supplies to the industrial estate and in extending two roads.
- (ix) In Greece, a hotel is to be built on the island of Evvia with financial assistance from the Fund amounting to DR 3 million. This island is a tourist area and already possesses good tourist infrastructure. After completion, the hotel will have a capacity of 64 beds. A total of 15 permanent jobs will be created, plus ten temporary jobs during the high season. It will be easy for subsequent extensions to be made to the hotel.

In 1983 the Fund has now allocated a total of 2 205 million ECU to 3 655 investment projects which the Commission has selected from the 5 162 submitted by the governments of the Member States. All the available appropriations have been used.

The amount of assistance given to some Member States in 1983 has been relatively slight, partly because of the lack of eligible applications submitted by the Member States concerned. This applies particularly to Belgium and Germany. Other Member States have therefore received a relatively high proportion of the total assistance given in 1983.

It should be noted that, since 1982, the ERDF Regulation no longer provides for national quotas. The quotas established at the end of 1980, prior to Greece's accession, were valid only for a year and the Council has not fixed new quotas. The Commission currently bases its aid decisions on the 1981 quotas. It is therefore now in a better position to assess the problems of the various regions, the quality of the projects submitted and their importance for the development of the regions concerned.
