PREFACE

It is now a recognized fact that generalized preferences constitute one of the essential features of any practical, concerted action in the field of development cooperation. The then Secretary-General of the United Nations, U Thant, commenting on the Commission's Decision of 30 March 1971 to fix 1 July of that year as the date for the entry into force of its generalized tariff preferences scheme for the Third World, said that this was the first practical, concerted step in the field of aid to industrialization and one that would set an example for the other industrial powers.

It took many years of discussion, particularly at the United Nations Conference on Trade and Development, for the idea of tariff preferences for exports of semi-finished and manufactured articles from the developing countries to mature and finally become reality.

The Community and its Member States—and the Associated African States and Madagascar (AASM) — originated the idea of tariff preferences as early as 1963. Since then, the Community and its Member States have persevered in their efforts to have the idea adopted and applied. Following in the Community's footsteps, other donor countries implemented their own schemes: Japan on 1 August 1971, Norway on 1 October 1971, Sweden, Finland and New Zealand on 1 January 1972, Switzerland on 1 March 1972, Austria on 1 April 1972, Canada on 1 July 1974 and the United States on 1 January 1976; special mention should be made of Australia, which introduced a special system of preferences as long ago as July 1963 and replaced this on 1 January 1974 with a new, much more generous scheme, which is closer to the generalized system of preferences adopted by the other donors.

I — The objectives pursued by the Community and its Member States

One of the fundamental objectives of the European Community is to promote a more balanced distribution of the world's riches and one that is more suited to our times. This objective is of prime importance for the developing countries in the context of a process which started some ten years ago and which is an attempt to re-arrange the economic and, in particular, trade relations between the industrialized countries and their less developed partners in such a way as to favour the development of the Third World.

In addition to this fundamental objective, a whole range of considerations militate in favour of tariff preferences.

First of all, the actual idea of preferences was born of experience with European integration, which is based in particular on the principle of Community preference. The integration of the Six, and subsequently of the Nine, the attraction they exert over the rest of the world and their contribution to the development of international trade and to world economic expansion make the instrument of tariff preferences a very effective one.

Secondly, the European Community and its Member States were the first group of industrialized countries to use tariff preferences as a means of cooperating in the development of the Third World. Part four of the Treaty of Rome, the two Yaoundé Conventions and the two Lomé Conventions—not forgetting the Agreements with the Maghreb and Mashreq group of countries—have established the institutional framework for this cooperation: trade based on preferences constitutes one of the fundamental aspects of this novel form of association, which has proved its worth and which has

been one of the successes of the development cooperation policy followed by the Community during the first eighteen years of its existence.

Thirdly, the idea of preferences arose quite naturally out of the fact that the tariff instrument has been one of the main vehicles through which the Community has been able to express itself in its external relations. Under the Treaty of Rome, the Community has had the privileged use of one particular instrument to improve its relations with non-member countries—the Common Customs Tariff. This has been widely used in the negotiation of bilateral agreements or multilateral reductions within GATT. However, the fact that the Community applied the tariff instrument *vis-à-vis* other countries on a non-discriminatory basis meant there was a risk that only the developed non-member countries would benefit. To lessen this disadvantage, the Community decided, in agreement with its partners (both industrialized and developing) to relax for the exclusive benefit of the Third World countries the rule on non-discrimination in tariff matters.

Lastly, the fact that development problems could not be solved by aid alone but that trade was important too was made increasingly clear during the sixties in the major GATT negotiations and more especially in the context of UNCTAD and subsequently at the Conference on International Economic Cooperation. It is for this reason that the Community has made the greatest possible use of its tariff policy in cooperating in the development of the Third World.

All these factors combined, therefore, to make the Community a driving force in the elaboration of a generalized system of preferences for the developing countries' exports.

II — The European Community's generalized system of tariff preferences

At first sight, the Community system seems very complicated and, because of this, inflexible in its application. However, appearances are deceptive. The Community system reminds one, in fact, of a self-regulating mechanism which keeps itself operating smoothly. Above all, it contrives to strike a balance between a number of requirements that may conflict with each other, for the

Community's offer was designed to give the biggest possible advantages to the beneficiary countries without jeopardizing the interests of industry in the Community and the States associated with it.

Offering advantages tailored to the needs and export capacities of the developing countries, while being careful to avoid widening the gap between the most and the least advanced, is indicative of a responsible attitude.

Offering advantages which necessitate tolerable sacrifices on the part of Community industry and which are compatible with the undertakings entered into *vis-à-vis* the Associated States is indicative of a realistic attitude.

The setting of the initiatives in the framework of concerted action at international level which preserves the sovereignty and the discretionary power of all parties and which leads to evenly-balanced commitments is to show faith in international development cooperation.

The Community's scheme can be understood and assessed more easily if all these considerations are borne in mind.

1. *The characteristics of the Community's offer*

The preferential treatment granted under the Community's offer varies according to whether the products in question are (a) processed agricultural products or (b) finished or semi-finished industrial products.

(a) *Agricultural products*

Tariff advantages are granted for some 320 agricultural products, the margins of preference amounting generally to a partial lowering of the customs duty and even, in a number of cases, to exemption.

With the exception of tobacco, preserved pineapples, cocoa butter and soluble coffee, there are no quantitative restrictions on imports under the system of preferences.

A safeguard clause, based on Article XIX of GATT, enables the duty to be partly or wholly reintroduced should products be im-

ported under the system of preferences in such quantities or at such price as to cause or threaten to cause serious injury to Community producers of like or directly competitive products. The clause can be applied selectively, i.e. only to the country or countries causing the disruption; the aim of this is to make the safeguard mechanism more flexible and to protect the other beneficiaries.

In 1979 and 1980 the Community also took special measures in agriculture to help the least-advanced countries by granting them exemption for all the products covered by its system (three of which, namely green coffee, raisins and clover seeds, are included for their sole benefit). Furthermore on the six products otherwise subject to preferential limits, these limitations have also been lifted as regards soluble coffee and cocoa butter.

(b) *Industrial products*

1. Other than textiles

In accordance with Resolution 21 (II) of the Second UNCTAD Conference, primary industrial products are not covered by the Community system. The Community's decision to exclude these products has only a very limited impact, however, since almost all imports of industrial raw materials already enter the Community duty-free.

As regards finished and semi-finished industrial products, the Community system has three features between which a fundamental balance is maintained: a ceiling system, duty free entry and no exclusion of products.

The ceiling system limiting the volume of preferential imports so as to adapt them to what the Community markets can take is counterbalanced by completely duty-free entry, the fact that no product is excluded, and the absence of any safeguard clause.

Each calendar year a quantity is fixed for imports of each product under the preferences scheme. Generally speaking, this quantity is calculated according to the following formula:

$$\left. \begin{array}{l} \text{fixed basic amount (value of} \\ \text{imports, cif EEC, from ben-} \\ \text{eficiary countries during a} \\ \text{given reference year)} \end{array} \right\} + \left\{ \begin{array}{l} \text{variable additional amount} \\ \text{(generally 5\% of the value of} \\ \text{imports, cif EEC, from non-} \\ \text{beneficiary countries, i.e. the} \\ \text{industrialized countries, in the} \\ \text{latest year for which statistics} \\ \text{are available).} \end{array} \right.$$

The quantity is always expressed in terms of European units of account (see definition p. 318) except as regards textiles, petroleum products and plywood, where it is expressed in specific units (tonnes, cubic metres). The reference year for the calculation of the basic amount does not change for three successive years. For 1978 and 1979 the reference year used for calculating the basic amount was 1974, and the years used for calculating the additional amount 1975 and 1976 respectively. For the 1980 scheme, 1977 has been taken as the reference year for the calculation of both amounts. This method of calculation was designed to enable the quantity of preferential imports for each product to be increased every year, through the operation of the additional amount, which is a genuine indicator of the acceleration in trade between the Community and its industrialized partners. There have been a number of exceptions to this rule in recent years, however.

The second feature of the Community's offer is exemption from duty. The Community allows preferential duty-free entry for all finished and semi-finished products.

The last feature is the fact that no product is excluded. The Community scheme, unlike all others, makes no exceptions.

The ceiling system calls for some comment. Technically, all finished and semi-finished industrial products covered by the Community scheme are subject to ceilings. In practice, however, the ceiling system is applied in different ways according to the economic sensitivity of the products involved.

In the case of sensitive industrial products other than textiles, which are few in number (fifteen products, three of which are ECSC products), the system used is that of tariff quotas. This method of administration is based on the advance allocation of each tariff quota among the Member States of the Community. Certain tariff quotas include a reserve share designed to enable the allocation to be adjusted in relation to the actual amounts used.

The semi-sensitive products, if textiles are excluded, are subject to ceilings which are not shared out in advance among the Member States but are subject to surveillance, which makes it possible to monitor utilization at Community level.

For roughly 1700 non-sensitive products, which represent the vast majority, ceilings can only be applied if the category of sensitivity of the products is changed.

The system of ceilings answers several requirements. First of all, putting a limit on the quantity of preferential imports means that it is not necessary to have recourse to safeguard clauses. These would be very difficult to operate, particularly in respect of sensitive and semi-sensitive products, since they could well be disputed by the developing countries, which are worried that they may be applied unilaterally or even arbitrarily. The existence of such clauses, whatever form they may take, tends to create an atmosphere of uncertainty for both importers and exporters. Exporting developing countries need to have a certain amount of security, as regards advantages and markets over a sufficiently long period of time to enable them to plan and invest. It is mainly for these reasons that the Community has preferred ceilings to safeguard clauses for industrial products, which represent the bulk of the products covered by its offer.

From the point of view of Community industry, the system of ceilings makes it possible to work out in advance the pressure of preferential competition and the size of the sacrifices that will have to be made. For the beneficiary developing countries, it represents a guaranteed outlet for preferential sales.

The use of ceilings also means that the advantages can be distributed more evenly among the beneficiary countries, more particularly by limiting the share of the ones that are most competitive on the preferential markets. The Community offer stipulates, that under the ceiling system no beneficiary country can as a general rule go beyond 50% of the tariff quota or ceiling for a given product (30%, 20% or 15% in certain cases). This arrangement, known as the maximum country amount ('butoir') is designed to give the least competitive countries a fair chance, ensure that preferential advantages are evenly distributed and to limit the pressure exerted by the most advanced suppliers.

However, in order to take into account the special interests of the least-advanced countries (in accordance with Resolution 96 (IV) adopted by UNCTAD in Nairobi in May 1976), as early as 1977 the Community exempted these countries from the reintroduction of the duty under the maximum country amount system as regards semi-sensitive and non-sensitive products, and subsequently, in 1978, under the ceiling system. Under the 1979 scheme, the least-advanced countries also enjoyed total exemption for all finished and semi-finished industrial products other than textiles, throughout the

preferential period, even after the ceilings or quotas had been used up (in the case of textile products, exception from reintroduction of the duty was linked to the maximum country amount system); from 1980, these countries enjoy total exemption without any limitations for textiles as well.

2. Textiles

Under the Community's GSP scheme textile products have always been subject to special arrangements as regards both the list of beneficiary countries and the method used for calculating the preferential volume.

The discussions concerning the formulation of the 1978 system were held while the negotiations were in progress for the renewal of the Arrangement Regarding International Trade in Textiles (MFA) and the conclusion of bilateral textile agreements. Pending the outcome of these negotiations, the 1977 arrangements were extended on a six-monthly basis with the same preferential volume as for the preceding year. The application of the results of the textiles policy pursued under the MFA is a fairly complex operation necessitating a detailed study of the specific rules to be implemented and their effect on trade. The Council was therefore obliged in 1979 to renew the 1978 scheme (in two six-month instalments each including a tonnage increase of 5% over the preceding period) to give the Community authorities time to work out the technical details of a new scheme. This came into effect on 1 January 1980, and is based on the product classification (by category) used in the bilateral agreements on trade in textiles concluded by the Community with its main suppliers. As regards MFA products, the GSP is open only to developing countries and territories having concluded agreements with the Community under the renewed MFA. These beneficiaries—twenty-one countries in all—enjoy total exemption from customs duties up to the limit of an individual quota worked out on the basis of their 1977 textile exports to the Community and their level of development and competitiveness. For other products the scheme applies to all beneficiaries, and the preferential advantages offered correspond to 55% of their exports to the Community in 1977 (provided that amount is not in excess of 125% of the 1978 offer for the products concerned). The least-advanced countries enjoy total exemption for all their textile exports without limitation.

(c) *The beneficiary countries*

At the date the system was first brought into effect, the Community admitted all the member countries of the UNCTAD Group of 77 and the dependent territories as beneficiaries.

In dealing with subsequent applications from other countries wishing to benefit from the preferences, the Community's policy has been to take decisions on the basis of a case-by-case examination of the applicant countries' merits.

III — Use of the European Community's generalized tariff preferences

Actual utilization has increased substantially, particularly since 1974, when the system started to be applied by the enlarged Community. From 44% in 1971 and 41% in 1972, it rose to over 60% for the years 1975 to 1978, though this is still well below the level of the ceilings as shown in the following table.

Average rates of use of the preferences			
Categories of products	1976	1977	1978
Industrial products ¹			
Sensitive	80.5%	65.0%	91.0%
Semi-sensitive	129.9% ²	107.5% ²	118.3% ²
Non-sensitive	47.5%	47.3%	36.0%
Textile products			
Sensitive	69.0%	86.0%	77.7%
Semi-sensitive	53.0%	57.7%	74.3%
Non-sensitive	130.6%	130.3%	50.8%
Agricultural products			
Subject to ceilings	74.0%	74.3%	63.9%
Other products	45.7%	55.3%	52.3%
All products ³	66.7%	63.1%	59.6%

¹ Including ECSC products, but excluding textile products.

² This very high rate was due to the ceilings for petroleum products being substantially exceeded, the rates of use being 217% in 1976, 157.4% in 1977 and 206.6% in 1978; if these products are excluded, the rates of use for the three years in question fall to 75.3%, 79.6% and 92.7% respectively.

³ Including ECSC products, petroleum products and textile products.

One of the reasons the system is under-utilized is clearly that the beneficiary countries, and especially the economic and business circles concerned, do not know enough about the Community's generalized preferences scheme.

IV — Information on the European Community's generalized tariff preferences scheme

As early as 1971 the Commission of the European Communities started a campaign to provide information on generalized preferences.

During a first phase it organized seminars to inform the relevant authorities and business circles of the beneficiary countries of the existence of the Community system of preferences and to familiarize them with the implementing rules of the scheme, some of which are very complicated.

In a second phase the Commission made every effort to develop the campaign by getting through more and more directly to the producers and exporters in the beneficiary countries. After all, these are the people most immediately concerned and they should be made aware of the facts about the generalized system of preferences (GSP for short), the prospects it offers local producers as regards outlets on foreign markets, the problems it poses for producers and industry in the Community, its limitations—in short, how it could be put to better use.

This, then, is the background against which the 'Practical Guide to the Use of the European Communities' Scheme of Generalized Tariff Preferences' has been produced. It is intended for users of the GSP in the Community and in the beneficiary countries and, more generally, for all those interested in the GSP.

EXPLANATORY NOTES FOR THE RULES OF ORIGIN APPLICABLE TO THE COMMUNITY'S GENERALIZED SYSTEM OF PREFERENCES

Introduction

This set of notes sets out to explain how the concept of 'originating products' works and how it is controlled by the authorities. In order to benefit from the Community's Generalized System of Preferences the goods concerned have to be shown to originate in one of the countries to which the scheme applies.

Part 1 — The general concept of an originating product and the rule on direct transport

1.1. *The general concept of an originating product*

A product is an originating one if it has been entirely produced (wholly obtained) in the country concerned, for example flowers plucked from a plant growing in that country are originating flowers. In addition to this simple rule, if sufficient work is carried out on an imported product originating status can be obtained for the end product.

1.2. *The concept of a wholly obtained or entirely produced product*

This concept has been defined as follows:

- (a) mineral products extracted from the soil or from the seabed of a country;
- (b) vegetable products harvested in a country;
- (c) live animals born and raised in a country;
- (d) products obtained in a country from live animals;
- (e) products obtained by hunting or fishing conducted in a country;

- (f) products of sea fishing and other products taken from the sea by the vessels of a country¹;
- (g) products made on board the factory ships of a country from the products in (f) above;
- (h) used articles collected in a country which are only capable of being used for the recovery of the raw materials they contain;
- (i) waste and scrap resulting from manufacturing operations carried out in a country; and
- (j) any product produced in a country using only products which fall into categories (a) to (i) above.

1.3. *The concept of sufficient working or processing*

The concept of sufficient working or processing is defined as that amount of working or processing that places the final product in a different tariff heading under the Customs Cooperation Council Nomenclature (CCCN) than that of any of the imported ingredients. But there are exceptions to this general rule which are contained in Lists A and B annexed to Commission Regulation (EEC) No 3067/79,² pages 23 to 40. List A says that, for the final products listed there, in addition to the change of tariff heading condition the supplementary conditions listed also have to be met. List B on the contrary says that, for the final products it contains, the change of tariff heading criterion does not have to be satisfied if certain other conditions have been satisfied instead.

1.3.1. *The rules in Lists A and B can be either specific rules requiring that a particular kind of processing is carried out or that specific*

¹ The definition of what vessels belong to the country is contained in the 'Explanatory Notes' to Commission Regulation (EEC) No 3067/79 of 20 December 1979 (OJ L 349 of 31.12.1979).

² See OJ L 349 of 31.12.1979.

raw materials have to be used, or percentage rules requiring that a specific proportion of the value of the final product be attributable to the country concerned.

EXAMPLES

1. Change of tariff heading case (no rule in List A or B)

Scrap of unhardened rubber of heading No 40.04 imported from a third country is processed in a GSP-country into reclaimed rubber of heading No 40.03; the change of tariff heading confers on the reclaimed rubber the status of a product originating in the GSP country.

2. List A specific rule case

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
61.01	Men's and boys' outer garments		Manufacture from yarn

Outer garments of heading No 61.01 obtained in a country which is a beneficiary under the GSP can be considered as originating in that country only if they are manufactured from, say, third country yarn; if such clothing were manufactured from third country fabrics, it would not be considered as an originating product.

3. List A percentage rule case

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
71.15	Articles consisting of, or incorporating, pearls, precious or semi-precious stones (natural, synthetic or reconstructed)		Manufacture in which the value of the products used does not exceed 50% of the value of the value of the product obtained

Articles consisting of, or incorporating, pearls, precious or semi-precious stones, etc. of heading No 71.15 obtained by working in a country which is a beneficiary under the GSP can be considered as originating in that country only if the value of the third country products used does not exceed 50% of the value of the finished product.

4. List B percentage rule case

Products obtained		Working or processing that confers the status of originating products
Heading No	Description	
ex Chapters 28 to 37	Products of the chemical and allied industries excluding sulphuric anhydride (ex 28.13), tannins (ex 32.01), some products falling within heading No 33.01, preparations for tenderizing meat, clarifying beer and preparations for the desizing of textiles (ex 35.07)	Working or processing in which the value of the non-originating products used does not exceed 20% of the value of the product obtained

Natural boric acid containing more than 85% of orthoboric acid, calculated on the dry weight, of heading No 28.12 is imported from a third country and used in a GSP country to obtain orthoboric acid of heading No 28.12; the orthoboric acid obtained is an originating product on condition that the value of the third country natural boric acid does not exceed 20% of its value.

The use of percentage rules of value implies that the basis for determining the value has to be defined. Paragraph 1.5. below explains this.

1.3.2. However, some products are found in both List A and List B, in which case the conditions in both lists taken together must be fulfilled. But if both lists refer to a percentage rule the percentage of imported parts cannot exceed the higher of the two percentages. They can in no case be added together.

EXAMPLE

1. List A rule

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
38.15	Prepared rubber accelerators		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

2. List B rule

Products obtained		Working or processing that confers the status of originating products
Heading No	Description	
ex Chapter 38	Miscellaneous chemical products, other than refined tall oil (ex 38.05) and wood pitch (wood tar pitch) (ex 38.09)	Working or processing in which the value of the non-originating materials used does not exceed 20% of the value of the product obtained

Heading 38.15 'prepared rubber accelerators' has a 50% rule in List A and a 20% rule in List B. This means that, if all the raw materials are imported, only 20% of the value of the final product can be composed of imported products which were classified under heading 38.15 at import and that not more than 50% of the value of the final product can be made up of the imported products in total.

1.3.3. In Annex I to these notes there is a 'logical tree' designed to help you decide if your product is an originating product or not.

1.4. Minimal processing

However the rules on sufficient working or processing explained above do have the proviso or condition that, even if the work car-

ried out satisfies the change of tariff heading rule and/or the List A or B conditions as appropriate, if the work carried out consists only of a minimal process origin is *not* conferred.

The following are what are considered as minimal processes:

- (a) operations to ensure the preservation of products in good condition during transport and storage (ventilation, spreading out, drying, chilling, placing in salt, sulphur dioxide or other aqueous solutions, removal of damaged parts, and like operations);
- (b) simple operations consisting of removal of dust, sifting or screening, sorting, classifying, matching (including the making-up of sets of articles), washing, painting, cutting up;
- (c) (i) changes of packing and breaking up and assembly of consignments,
 - (ii) simple placing in bottles, flasks, bags, cases, boxes, fixing on cards or boards, etc., and all other simple packing operations;
- (d) the affixing of marks, labels or other like distinguishing signs on products or their packaging;
- (e) simple mixing of products, whether or not of different kinds, where one or more components of the mixture do not meet the conditions laid down to enable them to be considered as originating products;
- (f) simple assembly of parts of products to constitute a complete product;
- (g) a combination of two or more operations specified in (a) to (f);
- (h) slaughter of animals.

1.5. Values to be used in the case of percentage rules

The values to be used in the calculation of percentage rules are as follows:

For imported goods

Their customs value at the time of importation as defined in the convention concerning the Valuation of Goods for Customs signed in Brussels on 15 December 1950.

For goods for which it cannot be established whether or not they were imported (which must always be assumed to be non-originating goods)

The earliest price that can be traced which was paid for the goods in the country where they are used for further manufacture.

For final products

The ex-works price of the goods, which is understood as the price paid or notionally payable to the manufacturer in whose plant the last working or processing took place, provided the price includes the value of all the inputs. However the amount of local internal taxes paid (example — sales tax) which can be reclaimed at export shall be subtracted.

1.6. 'Direct shipment' or 'Direct transport'

In addition to being an originating product a product has to be shipped direct from the country of production to the Community. However, goods may go through another country if the crossing of, or entry into, that country is necessary for geographical reasons or because of transport requirements and then only under the following conditions:

- (a) that the goods do not undergo any operations other than transshipment or temporary warehousing. However, this does not exclude any process only intended to keep the goods in good condition;
- (b) that the goods do not 'enter into the commerce of the transit country'—that is, for example, that the goods are not bought or sold there;
- (c) that the goods do not enter into home use—that is the goods are not cleared through customs; and
- (d) that the goods remain under customs surveillance there.

If goods are passed through another country for geographical or transport reasons the fulfillment of the above four conditions must be demonstrated to the customs authorities in the Community. This can be done by submission of either:

- (a) a through bill of lading drawn up in the exporting beneficiary country covering the passage through the country of transit; or
- (b) a certification by the customs authorities of the country of transit:
 - giving an exact description of the products,
 - stating the dates of unloading and reloading of the products or of their embarkation or disembarkation, identifying the ships used,
 - certifying the conditions under which the products remained in the transit country; or failing these

(c) any substantiating documents that are acceptable to the customs authorities in the Community.

However, slightly different rules apply to goods sent to exhibitions in other countries. These are explained in Article 10 of Commission Regulation (EEC) No 3067/79.¹

Part 2 — What has to be done at export

2.1. *What documents are needed?*

After the origin of an export consignment has been established to the satisfaction of the exporter he has to consider how much it is worth and how it is to be sent in order to decide what documentation, if any, is to be used.

2.1.1. No documentation necessary

No documentation is necessary if:

- (a) the goods are sent as small packages to private persons and the value is not more than 90 European units of account (EUA)
- (b) the goods form part of the personal luggage of a traveller and the value is not more than 285 EUA.

However this concession is restricted to those imports which are occasional and are made up only of products for the personal use of the person to whom they are sent or the traveller or their families. It must be obvious from the nature and quantity of the goods that no commercial purpose is served. The customs authorities in the Community may require a declaration that the goods have originating status and the necessary conditions outlined above have been complied with.

2.1.2. Forms APR

If the consignment is by post, including parcel post, its value does not exceed 1 420 EUA the exporter may choose to use a FORM APR (see p. 41) which he fills in himself or allows his authorized

¹ See OJ L 349 of 31.12.1979, p. 5.

representatives to complete. The form may be completed in English or French: if it is done by hand, ink and block capitals must be used.

One APR form must be completed for each consignment.

In the case of consignment by parcel post the exporter attaches the form to the despatch note. In the case of consignment by letter post he encloses the form in the package.

2.1.3. Origin certificates Form A

For all shipments other than those mentioned in 2.1.1 and 2.1.2 above a Form A (see p. 45) must be filled out. The Form A origin certificate contains twelve numbered boxes to be filled in by the exporter and one un-numbered box which must contain the name of the issuing country. Boxes 1, 3, 4, 5, 6, 7, 9 and 10 call for no particular observation.

Box 2 does not have to be filled out if the consignee is not known. If it is filled in but the consignee is later changed this does not matter.

Box 12 contains the exporter's declaration as to the origin of the goods and must clearly indicate that the goods are for the European Economic Community or one of its Member States. The use of the word 'Europe' is *not* enough.

Box 8 ('Origin criteria') has to be filled out according to the code explained in Note 3 on the back of the form.

Box 11 ('Certification') is for the approved issuing authority to certify the form as correct, using the stamp designed for that purpose.

When the form is filled out and signed by the exporter or his authorized representative it must be taken to the authority authorized to issue Form A's by the Government of the country concerned. If it is incorrectly made out the customs authorities of the importing country may refuse to accept it.

Certificates issued retrospectively

In exceptional cases an origin certificate Form A can be issued after the export of the goods where it can be shown that a request was not made at the proper time because of an error, involuntary

omission or some other special circumstance. In such cases the Form A may be issued only if the issuing authorities are satisfied that the certificate of origin Form A corresponds to the goods sent on the basis of comparison with the export documentation, and that no certificate of origin Form A had already been issued.

A certificate so issued is marked 'ISSUED RETROSPECTIVELY' in box 4.

Duplicates

It is of course always possible that a certificate of origin Form A that has been issued is lost, stolen or destroyed. In these cases the exporter may ask the issuing authority for a replacement or duplicate. This is marked in box 4 'Duplicate' and is given the *same* date of issue as the original and is valid for the same period (see PART 3 paragraph 3.1).

2.2. Goods sent in instalments

Goods classified under Chapters 84 and 85 of the Customs Cooperation Council Nomenclature, that is 'Machinery and mechanical appliances; electrical equipment and parts thereof' which are imported by instalments may be considered as making up one whole only subject to the conditions made by the customs authorities of the country of importation and a certificate of origin Form A made out for the total may be submitted at the time of the first import to cover subsequent instalments as well.

2.3. Accessories, spare parts and tools sent with a piece of equipment, machine, apparatus or vehicle

These, if they are part of the normal equipment and are not separately invoiced or paid for, are regarded as part of the equipment etc. Naturally the rules of origin contained in PART 1 of these notes apply equally to the accessories, spare parts and tools but they are regarded as being classified under the same heading as the equipment etc., and their value must be included in any percentage value calculation carried out for the purposes of application of a percentage rule.

2.4. Sets

Goods put up in sets and classified in accordance with General Rule No 3 of the Customs Cooperation Council Nomenclature are

considered to have originating status if all the articles making up the set have that status.

A set made up of both originating and non-originating articles may be considered to have originating status provided the value of the non-originating articles does not exceed 15% of the total value of the set.

2.5. *Packing*

Packing, which is of the normal type for the article packed, and itself has no intrinsic utilization value of a durable nature except as packing is considered to be a part of the article packed. Again its value must be taken into account in calculation carried out in application of a percentage rule.

Part 3 — What has to be done at import into the Community

3.1. *Submission of certificates of origin Form A to customs*

In order to obtain GSP treatment a certificate of origin Form A has to be submitted to customs at the time of the import of the goods, within ten months of the date of issue. The customs authorities reserve the right to request the importer to produce a translation of the certificate into one of the Community languages and they may also require the importer to make and sign a declaration that the goods satisfy the conditions concerning origin and direct transport.

3.2. *Delay in submitting the certificate of origin Form A*

If something happens to prevent the certificate being presented within the appropriate period the customs authorities in the Community may accept the certificate afterwards provided they are satisfied that the delay was unavoidable or due to exceptional circumstances.

3.3. *Slight differences between the descriptions of the goods and the goods themselves*

The customs may ignore any small differences between the description on the Form A and the actual goods provided that they can be sure the certificate does in fact correspond to the goods.

3.4. *Treatment of Forms APR*

When a postal package arrives it will be seen by the customs authorities, who will check the contents and the Form APR.

Part 4 — When verification takes place

The Community customs authorities may request verification of certificates of origin Form A or Forms APR by the issuing authorities in the country concerned.

Part 5 — Regional Cumulation

5.1. *Who is concerned*

There are three special schemes, which are identical, for three regional groupings:

(a) ASEAN (Association of South East Asian Nations), comprising:

Indonesia	Singapore
Malaysia	Thailand
The Philippines	

(b) CACM (The Central American Common Market), comprising:

Costa Rica	Honduras
El Salvador	Nicaragua
Guatemala	

(c) The Andean Group, comprising:

Bolivia	Peru
Colombia	Venezuela
Ecuador	

5.2. *What is cumulation?*

Under the Communities' GSP scheme each developing country normally is considered in isolation and goods cannot be further worked in another country without losing the status of originating products nor can they go through another country unless geographical or transport requirements render this necessary (see Part 1 paragraph 1.6). Under the regional cumulation systems this is, under certain conditions, not the case. These conditions are explained below.

5.3. How cumulation works

- (a) If goods originating in one country in a regional grouping are not further processed after they have gone to a second country in the regional grouping, from which they are sent to the Community, then originating status is not lost.
- (b) If further working or processing of goods originating in one country of a regional grouping takes place in a second country of the same regional grouping using only products originating in the regional grouping, then originating status is preserved.
- (c) However, if further working or processing of goods originating in one country of a regional grouping takes place in a second country of the regional grouping, using products *not originating* in the regional grouping; then there are two different possibilities depending on whether
- (i) the final product is covered by a List A or B percentage rule or
 - (ii) the final product is covered by the change of tariff heading rule or a List A or B rule not involving percentages.

5.4. Application of percentage rules

In the case of the application of a percentage rule (see paragraph 5.3. (c) (i) above), those goods incorporated that originate in another country in the regional grouping are regarded as neutral, that is they are regarded as neither originating goods nor non-originating goods and they are left out of the calculation. For example, where the percentage rule to be applied is one which allows up to 40% of non-originating goods to be incorporated, if the imported products originating in another country in the same regional grouping have a value of 50 EUA and the value of the final product is 100 EUA, then non-originating parts incorporated in the country in the regional grouping where final processing takes place cannot exceed 20 EUA, that is 40% of the value added in this last country of processing (which is 50 EUA), if the final product is to have originating status.

EXAMPLE

List A limits the value of any non-originating products incorporated in products of Chapter 84 to 40% of the value of the finished product. By way of illustration, an incomplete machine has

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
ex Chapter 84	Boilers, machinery and mechanical appliances and parts thereof, excluding refrigerators and refrigerating equipment (electric and other) (heading No 84.15) and sewing machines, including furniture specially designed for sewing machines (heading No ex 84.41)		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

acquired the status of originating product of one country of the grouping in question through the use in manufacture of third country products to the value of 300 EUA, the cost of the processing and the use of originating parts amounting to 700 EUA and the machine being therefore worth 1 000 EUA. This machine is sent to another country of the grouping where it has added to it 200 EUA worth of third country non-originating parts covered by a tariff heading other than that covering the machine; as the cost of processing etc., amounts to 300 EUA the value of the machine after this operation is 1 500 EUA; it retains its originating status since the value of the third country parts incorporated in it (200 EUA) does not exceed 40% of the amount of the total value added in the second country in the regional grouping (500 EUA).

5.5. Application of non-percentage rules

In the case of the application of a non-percentage rule (see paragraph 5.3. (c) (ii) above), the goods retain originating status provided that in addition to the use of any products originating in the regional grouping the third country non-originating goods incorporated do not exceed 5% of the total value of the final product *and* provided that if these third country goods had been incorporated in the first country of the regional grouping the product obtained would not have lost its originating status when exported.

EXAMPLE

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of originating products when the following conditions are met
Heading No	Description		
55.09 ²	Other woven fabrics of cotton		Manufacture from products falling within heading No 55.01, 55.03 or 55.04

Cotton cloth of heading No 55.09 is manufactured in the first country of the regional grouping from imported carded cotton of heading No 55.04. This product, which has originating status by virtue of the rule in List A, is exported to a second country in the regional grouping where imported dye is used to dye the cotton cloth. The value of the dye being less than 5% of the value of the final product, the product retains its originating status upon export to the Community because:

- (1) the value of the dye is less than 5% of the total value; and
- (2) if the dye had been used in the first country of the regional grouping the product would not have lost originating status there.

5.6. Determination of the actual country of origin in the regional grouping

A product which obtains originating status by reason of the application of the cumulation rules as regarded as originating in the country which has contributed the highest percentage of the final value.

5.7. Special reference on certificates of origin Form A

If a product obtains originating status because of the application of the regional cumulation system then box 4 of the certificate of origin must contain one of the following as appropriate: 'Cumulation ASEAN', 'Cumulation CACM', 'Cumulation Andean Group'.

'LOGICAL TREE' TO ESTABLISH WHETHER A PRODUCT HAS ORIGINATING STATUS¹

Q1 Is your product 'entirely produced'?
YES — *originating product*
NO — Q2

Q2² Do the imported parts have a different 4 figure CCCN classification from that of the final product?
YES — Question 3
NO — Question 5

Q3 Is your product listed in List A?
YES — Question 4
NO — *originating product*

Q4 Does your product satisfy the additional criteria set out in List A?
YES — *originating product*
NO — non-originating product

Q5 Is your product listed in List B?
YES — Question 6
NO — non-originating product

Q6 Does your product satisfy the additional criteria set out in List B?
YES — *originating product*
NO — non-originating product

N.B. At the head of the last column in List B is a general 5% waiver for products of Chapters 84-92.

¹ This 'logical tree' does not take into account the possibilities available under the cumulation system (see PART 5).

² If your answer is YES and NO (that is, some imported parts are classified under the same heading as the final product and others are classified under a different heading) you have to follow through both the YES (Q 3) and NO (Q 5) possibilities, If all the answers come out as *originating product* then your product has originating status.

Notes to Lists A and B

- 1. The lists contain some products which do not benefit from tariff preferences but which may be used in the manufacture of products which do benefit.**
- 2. The description of the products in column 2 in the lists corresponds to that of the same heading number in the Customs Cooperation Council nomenclature.**
- 3. When a Customs Cooperation Council nomenclature heading number in column 1 of the lists is prefixed by 'ex', the corresponding rule applies only to the products stated in column 2.**

LIST A

List of working or processing operations which result in a change in the nomenclature heading without conferring the status of originating products on the products undergoing such operations, or conferring this status only subject to certain conditions

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
03.02	Fish, dried, salted or in brine, smoked fish, whether or not cooked before or during the smoking process	Drying, salting, placing in brine; smoking of fish, whether cooked or not

76.08	Structures, and parts of structures (for example, hangars and other buildings, bridges and bridge-sections, towers, lattice masts, roofs, roofing frameworks, door and window frames, balustrades, pillars and columns), of aluminium; plates, rods, angles, shapes, sections, tubes and the like, prepared for use in structures, of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.09	Reservoirs, tanks, vats and similar containers, for any material (other than compressed or liquefied gas), of aluminium, of a capacity exceeding 300 litres, whether or not lined or heat insulated, but not fitted with mechanical or thermal equipment		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.10	Casks, drums, cans, boxes and similar containers (including rigid and collapsible tubular containers), of aluminium, of a description commonly used for the conveyance or packing of goods		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.11	Containers of aluminium, for compressed or liquefied gas		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
76.12	Stranded wire, cables, cordage, ropes, plaited bands and the like, of aluminium wire, but excluding insulated electric wires and cables		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.15	Articles of a kind commonly used for domestic purposes, sanitary ware for indoor use, and parts of such articles and ware, of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
76.16	Other articles of aluminium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
77.02	Wrought bars, rods, angles, shapes and sections, of magnesium; magnesium wire; wrought plates, sheets and strip, of magnesium; magnesium foil; raspings and shavings of uniform size, powders and flakes, of magnesium; tubes and pipes and blanks therefor, of magnesium; hollow bars of magnesium; other articles of magnesium		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.02	Wrought bars, rods, angles, shapes and sections, of lead; lead wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.03	Wrought plates, sheets and strip, of lead		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.04	Lead foil (whether or not embossed, cut to shape, perforated, coated, printed, or backed with paper or other reinforcing material), of a weight (excluding any backing) not exceeding 1.7 kg/m ² ; lead powders and flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.05	Tubes and pipes and blanks therefor, of lead; hollow bars and tube and pipe fittings (for example, joints, elbows, sockets, flanges and S-bends) of lead		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
78.06	Other articles of lead		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
79.02	Wrought bars, rods, angles, shapes and sections, of zinc; zinc wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
79.03	Wrought plates, sheets and strip, of zinc; zinc foil; zinc powders and flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
79.04	Tubes and pipes and blanks thereof, of zinc; hollow bars, and tube and pipe fittings (for example, joints, elbows, sockets and flanges), of zinc		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
79.06	Other articles of zinc		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.02	Wrought bars, rods, angles, shapes and sections, of tin; tin wire		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.03	Wrought plates, sheets and strip, of tin		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.04	Tin foil (whether or not embossed, cut to shape, perforated, coated, printed, or backed with paper or other reinforcing material), of a weight (excluding any backing) not exceeding 1 kg/m ² ; tin powders and flakes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
80.05	Tubes and pipes and blanks thereof, of tin; hollow bars, and tube and pipe fittings (for example, joints, elbows, sockets and flanges), of tin		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
82.05	Interchangeable tools for hand tools, for machine tools or for power-operated hand tools (for example, for pressing, stamping, drilling, tapping, threading, boring, broaching, milling, cutting, turning, dressing, mortising or screw-driving), including dies for wire drawing, extrusion dies for metal, and rock drilling bits		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
82.06	Knives and cutting blades, for machines or for mechanical appliances		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
ex Chapter 84	Boilers, machinery and mechanical appliances and parts thereof, excluding refrigerators and refrigerating equipment (electric and other) (heading No 84.15) and sewing machines, including furniture specially designed for sewing machines (heading No ex 84.41)		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
84.15	Refrigerators and refrigerating equipment (electrical and other)		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
ex 84.41	Sewing machines; furniture specially designed for sewing machines		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: (a) at least 50% in value of the materials and parts ⁽¹⁾ used for the assembly of the head (motor excluded) are originating products, and (b) the thread tension, crochet and zigzag mechanisms are originating products
ex Chapter 85	Electrical machinery and equipment and parts thereof, excluding products falling within heading Nos 85.14 and 85.15		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

⁽¹⁾ In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
- (i) the value of imported products,
- (ii) the value of products of undetermined origin.

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
85.14	Microphones and stands therefor; loudspeakers; audio-frequency electric amplifiers		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: (a) at least 50% in value of the materials and parts ⁽¹⁾ used are originating products, and (b) all the transistors are originating products
85.15	Radiotelegraphic and radiotelephonic transmission and reception apparatus; radiobroadcasting and television transmission and reception apparatus (including receivers incorporating sound recorders or reproducers) and television cameras; radio navigational aid apparatus, radar apparatus and radio remote control apparatus		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: (a) at least 50% in value of the materials and parts used ⁽¹⁾ are originating products, and (b) all the transistors are originating products
Chapter 86	Railway and tramway locomotives, rolling-stock and parts thereof; railway and tramway track fixtures and fittings; traffic signalling equipment of all kinds (not electrically powered)		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
ex Chapter 87	Vehicles, other than railway or tramway rolling-stocks, and parts thereof, excluding products of heading No 87.09		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
87.09	Motor-cycles, auto-cycles and cycles fitted with an auxiliary motor, with or without side-cars; side-cars of all kinds		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products

⁽¹⁾ In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
- (i) the value of imported products,
- (ii) the value of products of undetermined origin

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
ex Chapter 90	Optical, photographic, cinematographic, measuring, checking, precision, medical and surgical instruments and apparatus and parts thereof, excluding products falling within heading Nos 90.05, 90.07 (except electrically ignited photographic flashbulbs); 90.08, 90.12 and 90.26		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
90.05	Refracting telescopes (monocular and binocular), prismatic or not		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
ex 90.07	Photographic cameras; photographic flashlight apparatus and flashbulbs other than discharge lamps falling within heading No 85.20, with the exception of electrically ignited photographic flashbulbs		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
90.08	Cinematographic cameras, projectors, sound recorders and sound reproducers but not including recorders of film-editing apparatus, any combination of these articles		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
90.12	Compound optical microscopes, whether or not provided with means for photographing or projecting the image		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products

⁽¹⁾ In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out,
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
- (i) the value of imported products,
- (ii) the value of products of undetermined origin

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
90.26	Gas, liquid and electricity supply or production meters; calibrating meters therefor		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
ex Chapter 91	Clocks and watches and parts thereof, excluding products falling within heading Nos 91.04 and 91.08		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
91.04	Other clocks		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
91.08	Clock movements, assembled		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
ex Chapter 92	Musical instruments; sound recorders or reproducers; television image and sound recorders or reproducers, parts and accessories of such articles, excluding products of heading No 92.11		Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained

⁽¹⁾ In determining the value of materials and parts, the following must be taken into account:

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
- (i) the value of imported products,
- (ii) the value of products of undetermined origin.

Products obtained		Working or processing that does not confer the status of originating products	Working or processing that confers the status of the originating products when the following conditions are met
Tariff heading No	Description		
92.11	Gramophones, dictating machines and other sound recorders or reproducers, including record-players and tape decks, with or without sound-heads; television image and sound recorders and reproducers		Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that:
			(a) at least 50% in value of the materials and parts ⁽¹⁾ used are originating products, and
			(b) all the transistors are originating products
Chapter 93	Arms and ammunition; parts thereof		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
ex 96.01	Other brooms and brushes (including brushes of a kind used as parts of machines); paint rollers; squeegees (other than roller squeegees) and mops		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
97.03	Other toys; working models of a kind used for recreational purposes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
98.01	Buttons and button moulds, studs, cuff-links, and press-fasteners, including snap fasteners and press-studs; blanks and parts of such articles		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained
98.08	Typewriter and similar ribbons, whether or not on spools; ink-pads, with or without boxes		Manufacture in which the value of the products used does not exceed 50% of the value of the product obtained

⁽¹⁾ In determining the value of materials and parts, the following must be taken into account.

- (a) in respect of originating materials and parts, the first verifiable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;
- (b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining:
- (i) the value of imported products,
- (ii) the value of products of undetermined origin.

List of working or processing operations which do not result in a change in the nomenclature heading but which do confer the status of originating products on the products undergoing such operations

Products obtained		Working or processing that confers the status of originating products	Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description		Tariff heading No	Description	
ex 21.03	Prepared mustard	Manufacture from mustard flour	ex 35.07	Preparations used for tenderizing meat, preparations used for clarifying beer, composed of papain and bentonite, enzymatic preparations for the desizing of textiles	Manufacture from enzymes or prepared enzymes of which the value does not exceed 50% of the value of the product obtained
ex 25.15	Marble squared by sawing, of a thickness of 25 cm or less	Sawing into slabs or sections, polishing, grinding and cleaning of marble, including marble not further worked than roughly split, roughly squared or squared by sawing, more than 25 cm in thickness	ex Chapter 38	Miscellaneous chemical products, other than refined tall oil (ex 38.05) and wood pitch (wood tar pitch) (ex 38.09)	Working or processing in which the value of the non-originating materials used does not exceed 20% of the value of the product obtained
ex 25.16	Granite, porphyry, basalt, sandstone and other monumental and building stone, squared by sawing, of a thickness of 25 cm or less	Sawing of granite, porphyry, basalt, sandstone and other building stone, including such stone not further worked than roughly split, roughly squared or squared by sawing, more than 25 cm in thickness	ex 38.05	Refined tall oil	Refining of crude tall oil
ex 25.18	Calcined dolomite; agglomerated dolomite (including tarred dolomite)	Calcination of unworked dolomite	ex 38.09	Wood pitch (wood tar pitch)	Distillation of wood tar
ex 25.19	Other magnesium oxide, whether or not chemically pure	Manufacture from natural magnesium carbonate (magnesite)	Chapter 39	Artificial resins and plastic materials, cellulose esters and ethers; articles thereof	Working or processing in which the value of the non-originating materials used does not exceed 20% of the value of the product obtained
ex 25.32	Earth colours, calcined or powdered	Crushing and calcination or powdering of earth colours	ex 40.01	Slabs of crepe rubber for soles	Lamination of crepe sheets of natural rubber
ex Chapters 28 to 37	Products of the chemical and allied industries excluding sulphuric anhydride (ex 28.13), tannins (ex 32.01), essential oils, resinoids and terpenic by-products (ex 33.01), preparations used for tenderizing meat, preparations for clarifying beer composed of papain and bentonite and enzymatic preparations for the desizing of textiles (ex 35.07)	Working or processing in which the value of the non-originating products used does not exceed 20% of the value of the product obtained	ex 40.07	Vulcanized rubber thread and cord, textile-covered	Manufacture from vulcanized rubber thread or cord, not textile-covered
ex 28.13	Sulphuric anhydride	Manufacture from sulphur dioxide	ex 41.01	Sheep's and lambs' skins without the wool	Removing wool from sheep's and lambs' skins in the wool
ex 32.01	Tannins (tannic acids), including water-extracted gall-nut tannin, and their salts, ethers, esters and other derivatives	Manufacture from tanning extracts of vegetable origin	ex 41.03	Retanned skin leather of crossed Indian sheep	Retanning of crossed Indian sheep skin leather not further prepared than tanned
ex 33.01	Essential oils (terpeneless or not), concretes and absolutes; resinoids; terpenic by-products of the deterpenation of essential oils	Manufacture from concentrates of essential oils in fats, in fixed oils, or in waxes or the like, obtained by cold absorption or by maceration	ex 41.04	Retanned Indian goat or kid skin leather	Retanning of Indian goat or kid skin leather not further prepared than tanned
			ex 44.22	Casks, barrels, vats, tubs, buckets and other cooper products and parts thereof	Manufacture from riven staves of wood, not further prepared than sawn on one principal surface; sawn staves of wood, of which at least one principal surface has been cylindrically sawn, not further prepared than sawn
			ex 50.09 ex 51.04 ex 53.11 ex 53.12 ex 54.05 ex 55.07 ex 55.08 ex 55.09 ex 56.07	Printed fabrics	Printing accompanied by finishing operations (bleaching, dressing, drying, steaming, burling, mending, impregnating, sanforizing, mercerizing) of fabrics the value of which does not exceed 47.5% of the value of the product obtained
			ex 67.01	Feather dusters	Manufacture from feathers, parts of feathers or down
			ex 68.03	Articles of slate, including articles of agglomerated slate	Manufacture of articles of slate

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description	
ex 68.04	Hand-polishing stones, whetstones, oilstones, hones and the like, of natural stone, of agglomerated natural or artificial abrasives, or of pottery	Cutting, adjusting and gluing of abrasive materials, which, owing to their shape, are not recognizable as being intended for hand use
ex 68.13	Articles of asbestos; articles of mixtures with a basis of asbestos or of mixtures with a basis of asbestos and magnesium carbonate	Manufacture of articles of asbestos or of mixtures with a basis of asbestos, or of mixtures with a basis of asbestos and magnesium carbonate
ex 68.15	Articles of mica, including bonded mica splittings on a support of paper or fabric	Manufacture of articles of mica
ex 70.10	Cut-glass bottles	Cutting of bottles the value of which does not exceed 50% of the value of the product obtained
ex 70.13	Cut glassware (other than articles falling within heading No 70.19) of a kind commonly used for table, kitchen, toilet or office purposes, for indoor decoration, or for similar uses	Cutting of glassware the value of which does not exceed 50% of the value of the product obtained
ex 70.20	Articles made from glass fibre	Manufacture from unworked glass fibre
ex 71.02	Precious and semi-precious stones, cut or otherwise worked, but not mounted, set or strung (except ungraded stones temporarily strung for convenience of transport)	Manufacture from unworked precious and semi-precious stones
ex 71.03	Synthetic or reconstructed precious or semi-precious stones, cut or otherwise worked, but not mounted, set or strung (except ungraded stones temporarily strung for convenience of transport)	Manufacture from unworked synthetic or reconstructed precious or semi-precious stones
ex 71.05	Silver, including silver gilt and platinum-plated silver, semi-manufactured	Rolling, drawing, beating or grinding of unwrought silver and silver alloys
ex 71.06	Rolled silver, semi-manufactured	Rolling, drawing, beating or grinding of unworked rolled silver
ex 71.07	Gold, including platinum-plated gold, semi-manufactured	Rolling, drawing, beating or grinding of unwrought gold, including platinum-plated gold
ex 71.08	Rolled gold on base metal or silver, semi-manufactured	Rolling, drawing, beating or grinding of unwrought rolled gold on base metal or silver
ex 71.09	Platinum and other metals of the platinum group, semi-manufactured	Rolling, drawing, beating or grinding of unwrought platinum and other metals of the platinum group
ex 71.10	Rolled platinum or other platinum group metals, on base metal or precious metal, semi-manufactured	Rolling, drawing, beating or grinding of unworked rolled platinum or other platinum group metals on base metal or precious metal

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description	
ex 73.15	Alloy steel and high carbon steel: — in the forms mentioned in heading Nos 73.07 to 73.13 — in the forms mentioned in heading No 73.14	Manufacture from products in the forms mentioned in heading No 73.06 Manufacture from products in the forms mentioned in heading No 73.06 or 73.07
ex 74.01	Unrefined copper (blister copper and other)	Smelting of copper matte
ex 74.01	Refined copper	Fire-refining or electrolytic refining of unrefined copper (blister copper and other), copper waste or scrap
ex 74.01	Copper alloy	Fusion and thermal treatment of refined copper, copper waste or scrap
ex 75.01	Unwrought nickel, excluding alloys	Retining by electrolysis, by fusion or chemically of nickel waste and scrap
76.16	Other articles of aluminium	Manufacture in which gauze, cloth, grill, netting, fencing, reinforcing fabric and similar materials (including endless bands) of aluminium wire, or expanded metal of aluminium are used the value of which does not exceed 50% of the value of the product obtained
ex 77.02	Other articles of magnesium	Manufacture from wrought bars, rods, angles, shapes and sections, plates, sheets and strip, wire, foil, raspings and shavings of uniform size, powders and flakes, tubes and pipes and blanks therefor, hollow bars, of magnesium, the value of which does not exceed 50% of the value of the product obtained
ex 77.04	Beryllium, wrought and articles of beryllium	Rolling, drawing or grinding of unwrought beryllium the value of which does not exceed 50% of the value of the product obtained
ex 81.01	Tungsten, wrought and articles of tungsten	Manufacture from unwrought tungsten the value of which does not exceed 50% of the value of the product obtained
ex 81.02	Molybdenum, wrought and articles of molybdenum	Manufacture from unwrought molybdenum the value of which does not exceed 50% of the value of the product obtained
ex 81.03	Tantalum, wrought and articles of tantalum	Manufacture from unwrought tantalum the value of which does not exceed 50% of the value of the product obtained
ex 81.04	Other base metals, wrought and articles of other base metals	Manufacture from other base metals, unwrought, the value of which does not exceed 50% of the value of the product obtained
ex 82.09	Knives with cutting blades, serrated or not (including pruning knives), other than knives falling within heading No 82.06	Manufacture from knife blades

Products obtained		Working or processing that confers the status of originating products
Tariff heading No	Description	
ex 84.05	Steam engines (including mobile engines, but not steam tractors falling within heading No 87.01 or mechanically propelled road rollers) with self-contained boilers	Working, processing or assembly using products, the value of which does not exceed 40% of the value of the product obtained
84.06	Internal combustion piston engines	Working, processing or assembly in which the value of the products used does not exceed 40% of the value of the product obtained
ex 84.08	Engines and motors, excluding reaction engines and gas turbines	Working, processing or assembly in which the value of the non-originating products does not exceed 40% of the value of the product obtained and provided that at least 50% in value of the materials and parts ⁽¹⁾ used are originating products
ex 84.41	Sewing machines, including furniture for sewing machines	Working, processing or assembly in which the value of the non-originating products used does not exceed 40% of the value of the product obtained, and provided that: (a) at least 50% in value of the materials and parts ⁽¹⁾ used for assembly of the head (motor excluded) are originating products, and (b) the thread tension, crochet and zigzag mechanisms are originating products
ex 95.05	Articles in tortoise-shell, mother of pearl, ivory, bone, horn, coral (natural or agglomerated) and other animal carving material	Manufacture from tortoise-shell, mother of pearl, ivory, bone, horn, coral (natural or agglomerated) and other animal carving material; worked
ex 95.08	Articles in vegetable carving material (for example corozo), meerschaum and amber, natural or reconstituted, jet (and mineral substitutes for jet)	Manufacture from vegetable carving material (for example corozo), meerschaum and amber, natural or reconstituted, jet (and mineral substitutes for jet); worked
ex 96.01	Brushes and brooms	Manufacture using prepared knots and tufts for broom or brush making the value of which does not exceed 50% of the value of the product obtained
ex 98.11	Smoking pipes including pipe bowls	Manufacture from roughly shaped blocks of wood or root

⁽¹⁾ In determining the value of materials and parts, the following must be taken into account

(a) in respect of originating materials and parts, the first ascertainable price paid, or the price which would be paid in case of sale, for the said products on the territory of the country where working, processing or assembly is carried out;

(b) in respect of other materials and parts, the provisions of Article 4 of the Regulation determining

(i) the value of imported products;

(ii) the value of products of undetermined origin

List of products excluded from the scope of this Regulation

Tariff heading No	Description
ex 27.07	Assimilated aromatic oils as defined in Note 2 to Chapter 27, of which more than 65% by volume distills at a temperature of up to 250 °C, including mixtures of petroleum spirit and benzol, intended for use as power or heating fuels
27.09 to 27.16	Mineral oils and products of their distillation, bituminous substances; mineral waxes
ex 29.01	
	Hydrocarbons:
	— acyclic
	— cyclanes and cyclenes, excluding azulenes
	— benzene, toluene, xylenes
	intended for use as power or heating fuels
ex 34.03	Lubricating preparations containing petroleum oils or oils obtained from bituminous minerals, but not including preparations containing 70% or more by weight of petroleum oils or of oils obtained from bituminous minerals
ex 34.04	Waxes with a basis of paraffin wax, of petroleum waxes, of waxes obtained from bituminous minerals, of slack wax or of scale wax
ex 38.14	Prepared additives for lubricants

1 Countries which accept this form for the purposes of the generalized system of preferences (GSP)

Austria	European Economic Community	Ireland
Finland	Belgium	Italy
Norway	Denmark	Luxembourg
Sweden	France	Netherlands
Switzerland	Federal Republic of Germany	United Kingdom

Details of the rules governing admission to GSP in these countries are obtainable from the customs authorities there. The main elements of the rules are indicated in the following paragraphs

2. Conditions. The main conditions for admission to preference are that goods sent to any of the countries listed above

- (i) must fall within a description of goods eligible for preference in the country of destination, and
(ii) must comply with the consignment conditions specified by the country of destination. In general, goods must be consigned direct from the country of exportation to the country of destination, but in most cases passage through one or more intermediate countries, with or without transshipment, is accepted provided that at the time they are exported the goods are clearly intended for the declared country of destination and that any intermediate transit, transshipment or temporary warehousing arises only from the requirements of transportation; and
(iii) must comply with the origin criteria specified for those goods by the country of destination. A summary indication of the rules generally applicable is given in paragraphs 3 and 4

3 Origin criteria. For exports to the abovementioned countries the position is that either:

- (i) the goods shall be wholly produced in the country of exportation, that is, they should fall within a description of goods which is accepted as 'wholly produced' under the rules prescribed by the country of destination concerned, or
(ii) alternatively, if the goods are manufactured wholly or partly from materials or components imported into the country of exportation or of undetermined origin these materials or components must have undergone a substantial transformation there into a different product. It is important to note that all materials and components which cannot be shown to be of that country's origin must be treated as if they were imported. Usually the transformation must be such as to lead to the exported goods being classified under a Customs Cooperation Council Nomenclature Tariff heading other than that relating to any of the above materials or components used. In addition, special rules are prescribed for various classes of goods in Lists A and B of certain countries' rules of origin and other subsidiary provisions and these should be carefully studied

If the goods qualify under the above criteria, the exporter must indicate in Box 7 of the origin criteria on the basis of which he claims that his goods qualify for the GSP in the manner shown in the following table

Circumstances of production or manufacture in the country named in Box 8 of the form	Insert in Box 7
(a) Goods, worked upon but not wholly produced in the exporting country, which were produced in conformity with the principles of 3 (ii), which fall under a CCC Nomenclature tariff heading specified in Column 1 of List A and which satisfy any conditions in Columns 3 and 4 of List A which are relevant to these goods.	«A», followed by the Customs Cooperation Council Nomenclature heading number of the exported goods example «A» 74 07
(b) Goods, worked upon but not wholly produced in the exporting country, which fall within an item in Column 1 of List B and which comply with provisions of that item	«B», followed by the Customs Cooperation Council Nomenclature heading number of the exported goods example «B» 73 15
(c) Goods, worked upon but not wholly produced in the exporting country, which were produced in conformity with the principles of 3 (ii), which are not specifically referred to in List A, and which do not contravene a general provision of List A	«X», followed by the Customs Cooperation Council Nomenclature heading number of the exported goods example «X» 98 02
(d) Goods wholly produced in the country of exportation (see 3 (i) above)	«P»

NOTE "List A" and "List B" refer to the lists of qualifying processes specified by the countries of importation concerned

(*) Subsequent verifications of forms APR shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubt as to the accuracy of the information regarding the authenticity of the forms and the true origin of the goods in question.

Instructions for the completion of form APR

1. A form APR may be made out only for goods which in the exporting country fulfil the conditions specified by provisions governing the **generalized system of preferences**. These provisions must be studied carefully before the form is completed. (See notes on part 2)
2. In the case of a consignment by parcel post the exporter attaches the form to the despatch note. In the case of consignment by letter post he encloses the form in the package. The reference APR and the serial number of the form should be stated on the **customs green label declaration C 1** or on the **customs declaration C2/CP3**, as appropriate.
3. These instructions do not exempt the exporter from complying with any other formalities required by customs or postal regulations.
4. An exporter who uses this form is obliged to submit to the appropriate authorities any supporting evidence which they may require and to agree to any inspection by them of his accounts and of the processes of manufacture of the goods described in **Box 11** of this form.

(3) Indiquer les pays, groupes de pays ou territoires concernés

NOTES

1. Pays qui acceptent ce formulaire aux fins du système généralisé de préférences (SGP):

Autriche	Communauté économique européenne	Irlande
Finlande	Belgique	Italie
Norvège	Danemark	Luxembourg
Suède	France	Pays-Bas
Suisse	République fédérale d'Allemagne	Royaume-Uni

Le détail des règlements concernant l'admission au bénéfice du système généralisé de préférences dans ces pays peut être obtenu auprès de leurs administrations des douanes. Les éléments principaux de ces règlements sont résumés dans les paragraphes qui suivent.

2. Conditions. Les principales conditions d'admission au bénéfice des préférences sont que la marchandise expédiée vers l'un quelconque des pays susmentionnés:

- (i) doit correspondre à la définition établie des marchandises pouvant bénéficier du régime de préférences dans le pays de destination, et
- (ii) doit satisfaire aux conditions d'expédition spécifiées par le pays de destination. En général, la marchandise doit être expédiée directement du pays d'exportation au pays de destination, mais dans la plupart des cas, le passage par un ou plusieurs pays intermédiaires avec ou sans transbordement, est admis, à condition qu'au moment où elle est exportée, la marchandise soit manifestement destinée au pays de destination déclaré et que tout transit, transbordement ou entreposage temporaire ne résulte que des besoins du transport, et
- (iii) doit répondre aux critères d'origine spécifiés pour cette marchandise par le pays de destination. Des indications sommaires sur les règles d'origine généralement applicables sont données aux paragraphes 3 et 4.

3. Critères d'origine. Pour les exportations vers les pays susmentionnés:

- (i) ou bien la marchandise doit être entièrement produite dans le pays exportateur, c'est-à-dire correspondre à la définition des marchandises considérées comme «entièrement produites» qui figure dans les règlements du pays de destination intéressé,
- (ii) ou bien si elle est fabriquée entièrement ou, en partie au moyen de matières ou de composants importés dans le pays exportateur ou d'origine indéterminée, ces matières ou composants doivent y avoir subi une transformation substantielle qui en fasse un produit différent. Il importe de noter que toutes matières et tous composants à propos desquels il est impossible de prouver qu'ils sont originaires dudit pays doivent être considérés comme importés. En général, la transformation doit être telle qu'elle ait pour effet de faire classer la marchandise exportée dans une rubrique de la nomenclature du conseil de coopération douanière différente de celle où seraient classés ces matières ou composants. En outre, des règles d'origine spéciales et des dispositions subsidiaires sont prévues pour diverses catégories de marchandises des listes A et B de certains pays, et ces règles et dispositions devraient être soigneusement étudiées

Si la marchandise satisfait aux critères ci-dessus, l'exportateur indiquera, dans la case 7 du formulaire, le critère d'origine en vertu duquel il demande, pour cette marchandise, le bénéfice du système généralisé de préférences, de la manière indiquée dans le tableau ci-après.

Conditions de production ou de fabrication dans le pays indiqué dans la case 8 du formulaire	Indiquer ce critère dans la case 7
(a) Marchandise, ouvrée, mais non entièrement produite dans le pays exportateur, qui a été produite d'une manière conforme aux principes du paragraphe 3 (ii), qui relève d'une position de la NCCD spécifiée dans la colonne 1 de la liste A et qui satisfait aux conditions des colonnes 3 et 4 de cette liste applicables à cette marchandise	«A», suivi de la position de la marchandise dans la NCCD Exemple: «A» 74.07
(b) Marchandise, ouvrée mais non entièrement produite dans le pays exportateur, qui correspond à une rubrique de la colonne 1 de la liste B et qui est conforme aux dispositions concernant cette rubrique	«B», suivi de la position de la marchandise dans la NCCD Exemple: «B» 73 15
(c) Marchandise, ouvrée mais non entièrement produite dans le pays exportateur, qui a été produite d'une manière conforme aux principes du paragraphe 3 (iii), qui n'est pas expressément mentionnée dans la liste A et qui n'est pas incompatible avec une disposition générale de la Liste A.	«X», suivi de la position de la marchandise dans la NCCD Exemple: «X» 98 02
(d) Marchandise entièrement produite dans le pays exportateur (voir le paragraphe 3 (i))	«P»

NOTE. La «liste A» et la «liste B» sont les listes des opérations requises par les pays d'importation intéressés.

(*) Le contrôle « a posteriori » des formulaires APR est effectué à titre de sondage ou chaque fois que les autorités du pays d'importation ont des doutes fondés en ce qui concerne l'authenticité du formulaire et l'exactitude des renseignements relatifs à l'origine réelle de la marchandise en cause.

Instructions relatives à l'établissement du formulaire APR

1. Peuvent seules donner lieu à l'établissement d'un formulaire APR les marchandises qui dans le pays d'exportation remplissent les conditions prévues par les dispositions régissant le système généralisé de préférences. Ces dispositions doivent être soigneusement étudiées avant de remplir le formulaire (voir les notes de la partie 2).
2. L'exportateur attache le formulaire au bulletin d'expédition lorsqu'il s'agit d'un envoi par colis postal ou l'insère dans le colis lorsqu'il s'agit d'un envoi par la poste aux lettres. En outre, il porte soit sur l'étiquette verte C 1, soit sur la déclaration en douane C 2/CP 3 la mention APR suivie du numéro de série du formulaire.
3. Ces instructions ne dispensent pas l'exportateur de l'accomplissement des autres formalités prévues dans les règlements douaniers ou postaux.
4. L'usage du formulaire constitue pour l'exportateur l'engagement de présenter aux autorités compétentes toutes justifications que celles-ci jugent nécessaires et d'accepter tout contrôle par lesdites autorités de sa comptabilité et des circonstances de la fabrication des marchandises désignées dans la case 11 du formulaire.

NOTES

1. Countries which accept this form for the purposes of the generalized system of preferences (GSP):

Australia*	Norway	European Economic Community:	Ireland
Austria	Sweden	Belgium	Italy
Canada	Switzerland	Denmark	Luxembourg
Finland	United States of America	France	Netherlands
Japan		Federal Republic of Germany	United Kingdom

Details of the rules governing admission to GSP in these countries are obtainable from the customs authorities there. The main elements of the rules are indicated in the following paragraphs.

- 2. Conditions.** The main conditions for admission to preference are that goods sent to any of the countries listed above
- (i) must fall within a description of goods eligible for preference in the country of destination, and
 - (ii) must comply with the consignment conditions specified by the country of destination. In general, goods must be consigned direct from the country of exportation to the country of destination, but in most cases passage through one or more intermediate countries, with or without transshipment, is accepted provided that at the time they are exported the goods are clearly intended for the declared country of destination and that any intermediate transit, transshipment or temporary warehousing arises only from the requirements of transportation; and
 - (iii) must comply with the origin criteria specified for those goods by the country of destination. A summary indication of the rules generally applicable is given in paragraphs 3 and 4.
- 3. Origin criteria.** For exports to the abovementioned countries, with the exception of Australia, Canada and the USA, the position is that either
- (i) the goods shall be wholly produced in the country of exportation, that is, they should fall within a description of goods which is accepted as 'wholly produced' under the rules prescribed by the country of destination concerned, or
 - (ii) alternatively, if the goods are manufactured wholly or partly from materials or components imported into the country of exportation or of undetermined origin these materials or components must have undergone a substantial transformation there into a different product. It is important to note that all materials and components which cannot be shown to be of that country's origin must be treated as if they were imported. Usually the transformation must be such as to lead to the exported goods being classified under a Customs Cooperation Council Nomenclature Tariff heading other than that relating to any of the above materials or components used. In addition, special rules are prescribed for various classes of goods in Lists A and B of certain countries' rules of origin and other subsidiary provisions and these should be carefully studied.

If the goods qualify under the above criteria, the exporter must indicate in Box 8 of the form the origin criteria on the basis of which he claims that his goods qualify for the GSP, in the manner shown in the following table:

Circumstances of production or manufacture in the first country named in Box 12 of the form	Insert in Box 8
(a) Goods, worked upon but not wholly produced in the exporting country, which were produced in conformity with the principles of 3 (ii), which fall under a CCC Nomenclature tariff heading specified in Column 1 of List A and which satisfy any conditions in Columns 3 and 4 of List A which are relevant to these goods	'A', followed by the Customs Cooperation Council Nomenclature heading number of the exported goods example: 'A' 74.07
(b) Goods, worked upon but not wholly produced in the exporting country, which fall within an item in Column 1 of List B and which comply with the provisions of that item	'B', followed by the Customs Cooperation Council Nomenclature heading number of the exported goods example: 'B' 73.15
(c) Goods, worked upon but not wholly produced in the exporting country, which were produced in conformity with principles of 3 (ii), which are not specifically referred to in List A, and which do not contravene a general provision of List A	'X', followed by the Customs Cooperation Council Nomenclature heading number of the exported goods example: 'X' 98.02
(d) Goods wholly produced in the country of exportation (see 3 (i) above)	'p'

NOTE: 'List A' and 'List B' refer to the lists of qualifying processes specified by the countries of importation concerned.

- 4. Origin criteria for exports to Canada and the United States of America.** For export to these two countries the position is that either
- (i) the goods shall be wholly produced in the country of exportation, that is, they should fall within a description of goods which is accepted as 'wholly produced' under the rules prescribed by the country of destination concerned or
 - (ii) alternatively, if the goods are manufactured wholly or partly from materials or components imported into the country of exportation or of undetermined origin, those materials or components must have undergone a substantial transformation there into a different product. It is important to note that all materials and components which cannot be shown to be of that country's origin must be treated as if they were imported.
 - (a) In the case of Canada the value of such materials and components (excluding any that are of Canadian origin) must not exceed 40 % of the ex-factory price of the exported article.
 - (b) In the case of the United States the cost or value of materials produced in the beneficiary country plus the direct cost of processing performed there, should not be less than 35 % for single countries, or 50 % when an association of countries is treated as one country, of the appraised value of such article at the time of its entry into the US. Materials imported into the beneficiary country and then substantially transformed into constituent materials of which the eligible article is composed may be included in calculating the minimum percentages. The phrase 'direct cost of processing' includes costs directly incurred in or reasonably allocated to the processing, such as: all actual labour costs; dies, moulds, tooling, and depreciation; research and development; inspection and testing, but does not include business overheads, administrative expenses and salaries, or profit.

If the goods qualify under the above criteria, the exporter must indicate in Box 8 of the form the origin criteria on the basis of which he claims that his goods qualify for the GSP, in the manner shown in the following table:

Countries applicable	Circumstances of production or manufacture in the first country named in Box 12 of the form	Insert in Box 8
Canada and United States	(a) Goods wholly produced in the country of exportation (see 4 (i) above)	'P'
Canada	(b) Goods which are covered by the value-added rule described in 4 (ii) (a) above	'Y', followed by the value of materials and components imported (excluding any that are of Canadian origin) or of undetermined origin, expressed as a percentage of the ex-factory price of the exported goods example: 'Y' 36 %
United States	(c) Goods which are covered by the value-added rule described in 4 (ii) (b) above	For single country shipments insert 'Y' or for shipments from an association of countries 'Z', followed by the sum of the cost or value of the materials and the direct cost of processing, expressed as a percentage of the ex-factory price of the exported goods example: 'Y' 38 % or 'Z' 52 %

5. Each Article must qualify. It should be noted that all the goods in a consignment must qualify separately in their own right. This is of particular relevance when similar articles of different sizes or spare parts are sent.

6. Description of goods. The description of goods must be sufficiently detailed to enable the goods to be identified by the customs officer examining them.

* For Australia, the main requirement is the exporter's declaration on the normal commercial invoice. Form A is an acceptable alternative, but official certification is not required. Direct consignment is not necessary.

NOTES

1. Pays qui acceptent cette formule aux fins du système généralisé de préférences (SGP) :

Australie*	Norvège	Communauté	France	Luxembourg
Autriche	Suède	économique européenne :	RF d'Allemagne	Pays-Bas
Canada	Suisse		Irlande	Royaume-Uni
Finlande	États-Unis d'Amérique	Belgique	Italie	
Japon		Danemark		

Le détail des règlements concernant l'admission au bénéfice du système généralisé de préférences dans ces pays peut être obtenu auprès de leurs administrations des douanes. Les éléments principaux de ces règlements sont résumés dans les paragraphes qui suivent.

2. Conditions. Les principales conditions d'admission au bénéfice des préférences sont que la marchandise expédiée vers l'un quelconque des pays susmentionnés :

- (i) doit correspondre à la définition établie des marchandises pouvant bénéficier du régime de préférences dans le pays de destination, et
- (ii) doit satisfaire aux conditions d'expédition spécifiées par le pays de destination. En général, la marchandise doit être expédiée directement du pays d'exportation au pays de destination, mais dans la plupart des cas, le passage par un ou plusieurs pays intermédiaires, avec ou sans transbordement, est admis, à condition qu'au moment où elle est exportée, la marchandise soit manifestement destinée au pays de destination déclaré et que tout transit, transbordement ou entreposage temporaire ne résulte que des besoins du transport, et
- (iii) doit répondre aux critères d'origine spécifiés pour cette marchandise par le pays de destination. Des indications sommaires sur les règles d'origine généralement applicables sont données aux paragraphes 3 et 4.

3. Critères d'origine. Pour les exportations vers les pays susmentionnés, à l'exception de l'Australie*, du Canada et des États-Unis d'Amérique,

- (i) ou bien la marchandise doit être entièrement produite dans le pays exportateur, c'est-à-dire correspondre à la définition des marchandises considérées comme « entièrement produites » qui figure dans les règlements du pays de destination intéressé,
- (ii) ou bien si elle est fabriquée entièrement ou en partie au moyen de matières ou de composants importés dans le pays exportateur ou d'origine indéterminée, ces matières ou composants doivent y avoir subi une transformation substantielle qui en fasse un produit différent. Il importe de noter que toutes matières et tous composants à propos desquels il est impossible de prouver qu'ils sont originaires dudit pays doivent être considérés comme importés. En général, la transformation doit être telle qu'elle ait pour effet de faire classer la marchandise exportée dans une rubrique de la nomenclature du conseil de coopération douanière différente de celle où seraient classés ces matières ou composants. En outre, des règles d'origine spéciales et des dispositions subsidiaires sont prévues pour diverses catégories de marchandises des listes A et B de certains pays, et ces règles et dispositions devraient être soigneusement étudiées.

Si la marchandise satisfait aux critères ci-dessus, l'exportateur indiquera, dans la case 8 de la formule, le critère d'origine en vertu duquel il demande, pour cette marchandise, le bénéfice du système généralisé de préférences, de la manière indiquée dans le tableau ci-après :

Conditions de production ou de fabrication dans le premier pays indiqué dans la case 12 de la formule	Indiquer ce critère dans la case 8
(a) Marchandise, ouvrée, mais non entièrement produite dans le pays exportateur, qui a été produite d'une manière conforme aux principes du paragraphe 3 (ii), qui relève d'une position de la NCCD spécifiée dans la colonne 1 de la liste A et qui satisfait aux conditions des colonnes 3 et 4 de cette liste applicables à cette marchandise	« A », suivi de la position de la marchandise dans la NCCD Exemple : « A » 74.07
(b) Marchandise, ouvrée mais non entièrement produite dans le pays d'exportation, qui correspond à une rubrique de la colonne 1 de la liste B et qui est conforme aux dispositions concernant cette rubrique	« B », suivi de la position de la marchandise dans la NCCD Exemple : « B » 73.15
(c) Marchandise, ouvrée mais non entièrement produite dans le pays exportateur, qui a été produite d'une manière conforme aux principes du paragraphe 3 (ii), qui n'est pas expressément mentionnée dans la liste A et qui n'est pas incompatible avec une disposition générale de la liste A	« X », suivi de la position de la marchandise dans la NCCD Exemple : « X » 98.02
(d) Marchandise entièrement produite dans le pays exportateur [voir le paragraphe 3 (i) ci-dessus]	« P »

NOTE. La « liste A » et la « liste B » sont les listes des opérations de transformation requises par les pays d'importation intéressés.

4. Critères d'origine pour les exportations à destination du Canada et des États-Unis d'Amérique. Pour les exportations vers ces deux pays :

- (i) ou bien la marchandise doit être entièrement produite dans le pays exportateur, c'est-à-dire correspondre à la définition des marchandises considérées comme « entièrement produites » qui figure dans les règlements du pays de destination intéressé,
- (ii) ou bien si la marchandise est fabriquée entièrement ou en partie au moyen de matières ou de composants importés dans le pays exportateur ou d'origine indéterminée, ces matières ou composants doivent y avoir subi une transformation substantielle qui en fasse un produit différent. Il importe de noter que toutes matières et tous composants à propos desquels il est impossible de prouver qu'ils sont originaires dudit pays doivent être considérés comme importés.
 - (a) Dans le cas du Canada, la valeur de telles matières et composants (à l'exclusion de ceux qui sont d'origine canadienne) ne doit pas dépasser 40 % du prix départ usine de l'article exporté.
 - (b) Dans le cas des États-Unis, le coût ou la valeur des matières produites dans le pays bénéficiaire, plus le coût direct de transformation qui y a été effectuée ne doit pas être inférieur à 35 %, quand il s'agit d'un seul pays, ou à 50 %, quand il s'agit d'un groupe de pays considéré comme un seul et même pays, de la valeur en douane d'un tel produit au moment de son entrée aux États-Unis. Pourraient être incluses dans le calcul des pourcentages minimaux les matières importées dans le pays bénéficiaire et ensuite transformées en matières intermédiaires dont est composé le produit pouvant prétendre aux préférences. L'expression « coûts directs de transformation » comprend les frais qui découlent directement de la transformation ou qui peuvent lui être raisonnablement attribués, tels que : tous les coûts réels de la main-d'œuvre ; les matrices et moules, l'outillage et l'amortissement ; les frais de recherche et développement ; l'inspection et l'essai, mais non les frais généraux ; les dépenses administratives et les salaires, ou les bénéfices.

Si la marchandise satisfait aux critères ci-dessus, l'exportateur indiquera, dans la case 8 de la formule, le critère d'origine en vertu duquel il demande, pour cette marchandise, le bénéfice du système généralisé de préférences, de la manière indiquée dans le tableau ci-après :

Pays	Conditions de production ou de fabrication dans le premier pays indiqué dans la case 12 de la formule	Indiquer ce critère dans la case 8
Canada et États-Unis	(a) Marchandise entièrement produite dans le pays exportateur (voir le paragraphe 4 (i) ci-dessus)	« P »
Canada	(b) Marchandise visée par la règle relative à la valeur ajoutée dont il est question au paragraphe 4 (ii) (a) ci-dessus	« Y », suivi de la valeur des matières et composants importés (à l'exclusion de ceux qui sont d'origine canadienne) ou d'origine indéterminée, exprimée en pourcentage du prix départ usine de la marchandise Exemple : « Y » 36 %
États-Unis	(c) Marchandise visée par la règle relative à la valeur ajoutée dont il est question au paragraphe 4 (ii) (b) ci-dessus	Pour les expéditions d'un seul pays indiquer « Y », ou pour les expéditions en provenance d'un groupe de pays « Z » suivi de la somme du coût ou de la valeur des matières et le coût direct de transformation, exprimée en pourcentage du prix départ usine des marchandises exportées Exemple : « Y » 38 % ou « Z » 52 %

5. Chaque article doit remplir les conditions prescrites. Il est à noter que chacun des articles d'une même expédition doit répondre aux conditions prescrites. Cela s'applique, en particulier, lorsque sont expédiés des articles analogues de dimensions différentes ou des pièces détachées.

6. Description des marchandises. La description des marchandises doit être assez détaillée pour que le fonctionnaire des douanes qui aura à les examiner puisse les identifier.

* Pour l'Australie, l'exigence de base est une attestation de l'exportateur sur la facture habituelle. La formule A peut être acceptée en remplacement, mais une certification officielle n'est pas exigée. L'expédition directe n'est pas nécessaire.

THE COMMUNITY'S GENERALIZED TARIFF PREFERENCES SCHEME FOR 1980

Because it is arranged systematically, following the classification of the Common Customs Tariff, the Guide enables users to find out straightaway, in respect of a product whose tariff heading is known, the following information:

- the normal tariff arrangements (CCT duties);
- if the product is covered by the 1980 GSP scheme, the tariff arrangements under that scheme, or more precisely:
 - the implementing regulation covering the product,
 - the GSP duty applicable for 1980,
 - the beneficiary countries and territories under the GSP,
 - any limits on preferential treatment,
 - the maximum country amount ('butoir'), i.e. the maximum amount of GSP imports that can be effected from a given beneficiary country or territory.

The Guide only reproduces the schedule of customs duties contained in the Common Customs Tariff; it is essential, therefore, to have the Common Customs Tariff to hand in order to be able to refer to all the explanatory notes included in it.¹

It should be stressed that the Guide is a tool designed to make it easier to consult the basic texts, but it does not replace them. Any reader wishing to keep his Guide absolutely up-to-date should, therefore, enter in it any change in the Common Customs Tariff or any amendment that might be made during 1980 to the regulations opening preferences.

For the products covered by Chapters 1 to 24 of the CCT, following the principle of case-by-case treatment agreed in UNCTAD, the Guide gives only those headings or subheadings in respect of which preferences are granted under the GSP. In order to give a more comprehensive view, however, it also shows products not covered by the GSP which are imported into the Community duty-free, including those in respect of which exemption is granted temporarily or within the limits of a tariff quota. These products are shown for information only and their inclusion does not imply any connection between the duration of the suspension of duty and that of the 1980 scheme.

¹ The Common Customs Tariff is published in OJ L 342 of 31 December 1979 as the Annex to Council Regulation (EEC) No 3000/79 of 20 December 1979 amending Regulation (EEC) No 950/68 on the Common Customs Tariff.

PRACTICAL NOTES ON THE SCHEDULES

Schedule of customs duties (CCT section)

In some cases, the GSP covers only part of a tariff heading or sub-heading; to take this into account, it has been necessary to give a more detailed description of the goods than in the CCT. These are definitions of products for GSP purposes only and they do not imply any change in the CCT itself. This is made quite clear in the schedules since the normal duties under the Common Customs Tariff are always shown opposite the description of the goods appearing in the CCT whereas the duty given alongside the more detailed descriptions is always the GSP duty.

1980 Scheme (GSP section)

The products covered by the GSP are marked with an 'x' in the appropriate column. For *agricultural products (Chapters 1 to 24)* the GSP duties have been indicated whereas for *manufactured products* which as a rule enter duty-free, it has been thought preferable not to fill up the tables by repeating 'duty-free' in regard to every single item.

For certain manufactured industrial products other than textiles (Chapters 25 to 49 and 64 to 99) there is no mention of arrangements regarding ceilings or maximum country amounts, whereas the fact that the products are included in the GSP is indicated, as

are the reference regulation and the beneficiary countries. These are products which are already exempt from duty under the Common Customs Tariff. They are included only for the record as in the regulation opening preferential tariffs; no ceiling or maximum country amount is applicable to these products under the GSP since imports from all non-member countries are exempted from duty.

For products falling within Chapters 50 to 62, the new scheme for textiles set out in Council Regulation (EEC) No 2894/79 takes as its basis the product categories used in the bilateral agreements concluded within the MFA framework (which refer to Nimex codes rather than CCT headings or subheadings). The category corresponding to each tariff subheading and the annex to the regulation where it appears to have simply been indicated alongside the entries in the schedules of duties, whereas the GSP arrangements proper for the various categories are set out after the schedules. For ease of reference, an index showing the categories (in numerical order) and the corresponding annexes, and indicating the page of the Guide where each category appears, is given on page 278.

Lastly, as regards the developing countries and territories eligible for GSP treatment, letters A, B and C in the 'Beneficiaries' column correspond to the lists on pages 313, 314 and 315, whereas the letters Ch and R refer to the People's Republic of China and Romania respectively.

CHAPTER 25								
SALT; SULPHUR; EARTHS AND STONE; PLASTERING MATERIALS, LIME AND CEMENT								
25.01	Common salt (including rock salt, sea salt and table salt); pure sodium chloride; salt liquors; sea water:							
	A. Common salt (including rock salt, sea salt and table salt) and pure sodium chloride, whether or not in aqueous solution:							
	I. For chemical transformation (separation of Na from Cl) for the manufacture of other products (a)	1 EUA per 1 000 kg net	—					
	II. Other:							
	a) Denatured or for industrial uses (including refining) other than the preservation or preparation of foodstuffs for human consumption (a)	5 EUA per 1 000 kg net	2.5 EUA per 1 000 kg net					
	b) Other	16 EUA per 1 000 kg net	7.65 EUA per 1 000 kg net					
	B. Salt liquors; sea water	Free	Free					
25.02	Unroasted iron pyrites	Free	Free					
25.03	Sulphur of all kinds, other than sublimed sulphur, precipitated sulphur and colloidal sulphur:							
	A. Crude	Free	Free					
	B. Other	10	3.9					

(a) Entry under this subheading is subject to conditions to be determined by the competent authorities.

25.04	Natural graphite	Free	Free					
25.05	Natural sands of all kinds, whether or not coloured, other than metal-bearing sands falling within heading No 26.01	Free	Free					
25.06	Quartz (other than natural sands); quartzite, including quartzite not further worked than roughly split, roughly squared or squared by sawing	1	Free					
25.07	Clay (for example, kaolin and bentonite), andalusite, kyanite and sillimanite, whether or not calcined, but not including expanded clays falling within heading No 68.07; mullite; chamotte and dinas earths	Free	Free					
25.08	Chalk	Free	Free					
[25.09]								
25.10	Natural calcium phosphates, natural aluminium calcium phosphates, apatite and phosphatic chalk	Free	Free					
25.11	Natural barium sulphate (barytes); natural barium carbonate (witherite), whether or not calcined, other than barium oxide:							
	A. Barium sulphate	Free	Free					
	B. Barium carbonate, whether or not calcined	3	1					
25.12	Siliceous fossil meals and similar siliceous earths (for example, kieselguhr, tripolite or diatomite), whether or not calcined, of an apparent specific gravity of 1 or less	Free	0.5					
25.13	Pumice stone; emery; natural corundum, natural garnet and other natural abrasives, whether or not heat-treated:							
	A. Crude or in irregularly-shaped pieces	Free	Free					
	B. Other	3	1					
25.14	Slate, including slate not further worked than roughly split, roughly squared or squared by sawing	Free	Free					
25.15	Marble, travertine, ecaussine and other calcareous monumental and building stone of an apparent specific gravity of 2.5 or more and alabaster, including such stone not further worked than roughly split, roughly squared or squared by sawing:							
	A. Crude; roughly split or roughly squared; not further worked than squared by sawing or splitting, of a thickness exceeding 25 cm	Free	Free					
	B. Not further worked than squared by sawing or splitting, of a thickness not exceeding 25 cm:							
	I. Alabaster	Free	Free

85.01	Electrical goods of the following descriptions: generators, motors, converters (rotary or static), transformers, rectifiers and rectifying apparatus, inductors:							
	A. The following goods, for use in civil aircraft (a):							
	Generators, converters (rotary or static), rectifiers and rectifying apparatus, inductors;							
	Electric motors of an output of not less than 0.75 kW but less than 150 kW;							
	Transformers rated at 1 kVA or more	12	Free					
	B. Other machines and apparatus:							
	I. Generators, motors (whether or not equipped with speed reducing, changing or step-up gear) and rotary converters:							
	a) Synchronous motors of an output of not more than 18 watts	12	8.5	x	2789/79	A, B, R, Ch	Ceiling under surveillance	50
	b) Other	14	5	x	2788/79	A, B, Ch	Ceiling under surveillance	40 ⁽¹⁾
	II. Transformers, static converters, rectifiers and rectifying apparatus; inductors	16	6.5	x	2789/79	A, B; R; Ch	Ceiling	50
	C. Parts	15	5.8	x	2789/79	A, B, R, Ch	Ceiling under surveillance	25
85.02	Electro-magnets; permanent magnets and articles of special materials for permanent magnets, being blanks of such magnets; electro-magnetic and permanent magnet chucks, clamps, vices and similar work holders; electro-magnetic clutches and couplings; electro-magnetic brakes; electro-magnetic lifting heads	15	5.8	x	2789/79	A, B; R; Ch	Ceiling	50
85.03	Primary cells and primary batteries	20	18.6	x	2789/79	A, B; R; Ch	Ceiling under surveillance	20 ⁽²⁾
85.04	Electric accumulators:							
	A. Lead-acid accumulators	20	9.5	x	2789/79	A, B; R; Ch	Ceiling under surveillance	20
	B. Other accumulators	17	7.2	x	2789/79	A, B; R; Ch	Ceiling	50
	C. Parts:							
	I. Wooden separators	10	3.9	x	2789/79	A, B, R; Ch	Ceiling	50
	II. Other	17	8.1	x	2789/79	A, B; R; Ch	Ceiling	50

(1) Entry under this subheading is subject to conditions to be determined by the competent authorities. See also Section II, paragraph B, of the Preliminary Provisions of the Annex to the CCT

(1) Reduced to 15% (3 116 000 EUA) for Yugoslavia and China.
(2) Reduced to 15% for China.

Under the GSP, the least-developed countries are exempt from any duty on all the agricultural products covered: however, the the case of four of the six products subject to a ceiling or to quotas (preserved pineapples in slices and preserved pineapples other than in slices, falling within subheading ex 20.06 B II a) 5, ex 20.06 B II b) 5, ex 20.06 B II c) 1 dd) or ex 20.06 B II c) 2 bb); unmanufactured tobacco of the Virginia

type falling within subheading 24.01 A ex 1, 24.01 A ex II or 24.01 A ex B; other manufactured tobacco falling within subheading 24.01 A ex II), they are accorded exemption from duty only while the ceiling or the quota has not been completely used up. These countries are also exempt from any duty on industrial products included textiles.

TERMINOLOGY

Tariff quotas

For a number of sensitive products import duty is suspended totally or partially under the GSP only within strict limits (expressed in units of value or specific units). These involve tariff quotas allocated among the Member States (the Benelux countries being considered as a single territory for this purpose) according to a fixed scale; the scale is given in the grounds introducing the regulations opening tariff quotas, whereas the total amount of these quotas and that of the quota shares are given in the annexes to the regulations in question.

As soon as each Member State has used up its quota share it automatically reintroduces the normal customs duties, unless the tariff quota has a reserve share. In this case, before reintroducing the normal duties, it draws from the reserve certain quantities specified by the regulation until the reserve is used up as a result of successive drawings by Member States. The reserve is replenished during the quota year by transfers from Member States which have not used up their quota shares under the regulation.

The reserve share is administered by the Commission.

Ceilings, ceilings subject to surveillance, allocated ceilings

Manufactured industrial products (including textiles, but excluding certain jute and coir products) which are not subject to tariff quotas are admitted duty-free up to an indicative limit known as a

ceiling. The method of calculation ceilings is given in the regulations opening them

The ceilings are not allocated among the Member States; they are administered at Community level by the Commission. It can reintroduce the normal customs duties on its own initiative or on that of the Member States where it transpires from information supplied by the latter that the ceiling has been reached.

Imports subject to certain ceilings (ceilings under surveillance) are administered by methods which enable the Commission to draw up overall balance sheets and breakdowns by country of origin on the basis of figures supplied by the Member States at given intervals.

Sensitive textile products are subject to ceilings which are allocated among the Member States in accordance with a key indicated in the regulation opening them.

The ceilings for products covered by the Arrangement regarding International Trade in Textiles (MFA) (allocated ceilings for sensitive products and non-allocated ceilings for the rest) are worked out individually for each beneficiary, while ceilings for non-MFA products are open to all beneficiaries.

Maximum country amount ('butoir')

In the context of tariff quotas and ceilings, a maximum country amount, known as the 'butoir', is fixed for imports into the Com-

munity from each beneficiary country. The purpose of the maximum country amount is to ensure that every beneficiary country has the chance to use a tariff quota or ceiling. If no such limit existed, the quota or ceiling might well be monopolized by a very small number of countries (or even a single beneficiary country) which happened to be more competitive or better organized.

The Commission administers the maximum country amounts; if it finds, on the basis of information supplied by the Member States, that a beneficiary country has used up its maximum amount under a ceiling it can reintroduce the duty in respect of that country (the butoir rule is not applicable in regard to the least-developed countries—see List C, page 315).

In the case of a tariff quota, the Commission notifies the Member States that the maximum amount has been reached; such notifica-

tion entails the reintroduction of normal duties in all Member States simultaneously on the date stipulated.

Safeguard clause

The regulations granting developing countries preferential treatment in respect of agricultural products contain a clause which states that if products are imported under the GSP in such quantities or at such prices as to cause or threaten to cause serious injury to Community producers or create an unfavourable situation in the ACP States, the levying of customs duties may be reintroduced in respect of any country causing the injury.

SYMBOLS AND ABBREVIATIONS

- adf** additional duty on flour; same type of duty as the variable component (see below) and levied according to the difference between the Community price of flour and the international price for the quantities of flour contained in the product
- ads** additional duty on sugar; same type of duty as the variable component (see below) and levied according to the difference between the Community price of sugar and the international price for the quantities of sugar contained in the product
- CCT** Common Custom Tariff; the footnotes to the schedules of the 'Community's Generalized Tariff Preferences Scheme for 1980' worded 'see CCT Annex' refer to the Annex to the Common Customs Tariff, OJ L 342 of 31 December 1979, p. 373.
- EUA** European unit of account: the European unit of account is expressed as the sum of the following amounts of the currencies of the Member States of the European Communities: DM 0.828, UKL 0.0885, FF 1.15, LIT 109, HFL 0.286, BFR 3.66, LFR 0.14, DKR 0.217, IRL 0.00759; the value of the European unit of account in a national currency is equal to the sum of the equivalents in that currency of the above amounts. It is determined by the Commission on the basis of the exchange rates recorded each day on the exchange markets and published each day in the C Series of the Official Journal of the European Communities (see Article 10 (1) and (2) of the Financial Regulation of 31 December 1977 applicable to the general budget of the European Communities — OJ L 356 of 31 December 1977); for the purposes of the application of the Common Customs Tariff, the value of the EUA in the national currencies shall be fixed once a year: the rates to be applied shall be those obtaining on the first working day of October, with effect from 1 January of the following year (see Article 2 of Council Regulation (EEC) 2779/78 of 23 November 1978 — OJ L 333 of 30 November 1978); specific conversion rates are fixed for certain special cases (see OJ L 335 of 1 December 1978, p. 13) and also for the application of the tariff quotas expressed in value terms within the framework of the generalized tariff preferences (see Article 1 of Regulation (EEC) 2787/79 and Article 7 of Decision 79/1061/ECSC — OJ L 328 of 24 December 1979)

This Practical Guide to the Use of the European Communities' Scheme of Generalized Tariff Preferences is presented in two parts. The first describes briefly the international and Community background against which the scheme is devised and describes its characteristics and mechanics.

In the second, the 'Guide' lists, product by product, the preferential advantages open to developing countries, following the Common' Customs Tariff classification.
