

COMMISSION OF THE EUROPEAN COMMUNITIES

COM(94) 566 final
Brussels, 07.12.1994

Proposal for a

COUNCIL REGULATION (EC)

fixing, for certain fish stocks and groups of fish stocks, the total allowable catches for 1995 and certain conditions under which they may be fished

(presented by the Commission)

EXPLANATORY MEMORANDUM

This proposal for a Council Regulation fixes the total allowable catches (TAC's) for 1995, the Community share of them, the distribution of those shares among Member States and the conditions under which the quotas may be fished. The fixing and the sharing of possibilities for fishing falls exclusively within the competence of the Community and arises from obligations set out in Article 8(4) of Regulation (EEC) No 3760/92 of the Council of 20 December 1992.

It should be noted that, as a consequence of the accession of Sweden and Finland, new stocks are included in the proposal, as compared with 1994.

In the case of autonomous stocks where the Advisory Committee on Fishery Management (ACFM) based its advice on analytical assessments, and where the EC Scientific, Technical and Economic Committee for Fisheries (STECF) has endorsed the ACFM advice, the TAC's proposed are based on the advice of these committees.

In the case of autonomous stocks for which no analytical assessments are available, TAC's (precautionary TAC's) have been proposed. In such cases, the Commission has based its proposal on advice either from ACFM or from STECF wherever these bodies give an explicit value for the TAC. Where no explicit value is given, the proposed value is equal to that adopted last year by the Council.

The consultations between the Community and Norway, held in Brussels on 30 November 1994, resulted in an agreement on reciprocal fisheries arrangements for 1995, until 31 March. These arrangements imply, inter alia, certain catch quotas for Norwegian vessels in Community waters.

The most recent report of ACFM indicates that many of the stocks of demersal fish, particularly cod, haddock, whiting, saithe and hake are very heavily exploited and are considered to be in a state which is actually or potentially outside safe biological limits. Depending on the stock in question, ACFM have recommended restrictive TAC's. The recommendations of ACFM are reflected in the proposed regulation. Furthermore, analytical assessments of the state of a number of stocks in Region 3 have become available this year. The results of these assessments are also reflected in the proposed regulation.

The technical conditions proposed for 1995 are broadly the same as for 1994. However, there are some reinforcements and changes as indicated below.

- 1) Given that certain technical measures should be implemented as from 1 January 1995, they are included in the proposal, in the form of temporary derogations to the main rules, while waiting for the corresponding regulations to be amended accordingly. In particular:
 - A proposal is made to maintain the currently defined conditions for a directed fishery on whiting until 31 December 1995. In addition, it is also proposed that the minimum mesh size for fishing for herring is maintained throughout 1995 at

the current value of 32 mm and that the minimum mesh size for fishing for *Pandalus* becomes 35mm for the same period.

- The prohibition for beam trawling in the Southern North Sea, established in Article 9(3) of Regulation (EEC) No3094/86 (Plaice box), is extended to the whole year 1995.
- 2) The technical measures recommended by the IBSFC during its last meeting are also proposed. They concern a seasonal ban on cod fishing and new rules on mesh sizes.
 - 3) For the new stocks appearing as a consequence of the enlargement, the associated conditions for fishing which appeared in the bilateral regulations for 1994 are included in this proposal and kept unchanged.

COUNCIL REGULATION (EC) No. /94
of 1994
fixing, for certain fish stocks and groups of fish stocks, the total
allowable catches for 1995 and certain conditions under which
they may be fished

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community,

Having regard to Council Regulation (EEC) No. 3760/92 of 20 December 1992 establishing a Community system for fisheries and aquaculture¹, and in particular Article 8(4) thereof,

Having regard to the Act of Accession of Spain and Portugal, and in particular Articles 157, 161 and 348 thereof,

Having regard to the Act of Accession of Austria, Sweden, Finland and Norway, and in particular Articles 44, 47, 48, 121, and 122 thereof.

Having regard to the proposal from the Commission,

Whereas Article 4 of Regulation (EEC) No. 3760/92 requires the Council to formulate, in the light of the available scientific advice and, in particular, of the report prepared by the Scientific, Technical and Economic Committee for Fisheries, the measures necessary to ensure the rational and responsible exploitation of resources on a sustainable basis;

Whereas a management regime making full use of the new management possibilities given by Regulation (EEC) No. 3760/92 cannot yet be achieved, due to the need to put into force certain measures for the control of fisheries, to further develop the appropriate administrative framework (licensing system) and to enhance scientific knowledge; whereas, until such a

¹ O.J. No L389, 31.12.1992, p.1

management regime is consolidated, limitation of exploitation rates should be guaranteed by the current TAC system;

Whereas under the terms of Article 8(4) of Regulation (EEC) No 3760/92, it is incumbent upon the Council, in accordance with Article 4, to establish the total allowable catches (TAC) by fishery or group of fisheries; whereas fishing opportunities should be allocated to Member States in accordance with the second subparagraph of Article 8(4)(ii);

Whereas it is necessary to establish the principles and certain procedures of fishery management at the Community level, so that Member States can ensure the management of the fleets under their flag or jurisdiction;

Whereas, in accordance with the procedure provided for in Article 2 of the Agreement on fisheries between the European Community and the Government of Denmark and the Home Government of the Faroe Islands of the other part², the parties have consulted on their reciprocal fishing rights for 1995; whereas these consultations have been successfully concluded; whereas, as a result, it is possible to fix the TACs, the Community shares and the quotas for certain joint and autonomous stocks, of which part is allocated to the Faroe Islands;

Whereas, in accordance with the procedure provided in Articles 2 and 7 of the Fisheries Agreement between the European Economic Community and the Kingdom of Norway³, the Community and Norway have held consultations concerning mutual fishing rights for the period until 31 March 1995 and the management of common biological resources; whereas the Community and Norway agreed to hold consultations on their mutual fishing rights for the remainder months of 1995 as early as possible in 1995;

Whereas the Community has signed the United Nations Convention on the Law of the Sea, which contains principles and rules relating to the conservation and management of the living resources of the sea;

² O.J. No L226, 29.08.1980, p.12

³ OJ No L226, 29.08.1980, p.48

Whereas, in the framework of its wider international obligations, the Community participates in efforts to conserve fish stocks arising in international waters; whereas the extent to which such stocks are fished by vessels of the Community should be viewed in the light of overall fishing activity and the contribution made hitherto by the Community towards their conservation should be taken into account;

Whereas the International Baltic Sea Fishery Commission has recommended TACs for the stocks of cod, salmon, herring and sprat occurring in the waters of the Baltic Sea and the shares thereof for each contracting party;

Whereas, in the case of certain stocks fished mainly for reduction to meal and oil, it does not appear necessary to make quota allocations;

Whereas Article 161 of the Act of Accession of Spain and Portugal fixes the share of the TACs allocated to Spain for certain stocks in certain zones and allocates flat-rate amounts of horse mackerel and blue whiting to Spain;

Whereas those flat-rate amounts of blue whiting must be divided among ICES sub-areas and divisions Vb (EC zone), VI, VII and VIIIa, b and d;

Whereas, pursuant to Article 158 of the Act of Accession of Spain and Portugal, a distinction must be made between fishing for demersal species and fishing for species other than demersal; whereas the group to which blue whiting, anchovy and horse mackerel belong must therefore be defined;

Whereas, in order to ensure effective management of these TAC's, the specific conditions under which fishing operations occur should be established;

Whereas, in order to ensure a better exploitation of the quotas of herring, hake, blue whiting, mackerel and megrim, transfers of a part of the quotas from the zone of allocation to adjacent zones should be allowed;

Whereas, in order to ensure a better exploitation of the haddock stocks in zones Vb (EC zone), VI, XII and XIV, catches in zones Vb and VIa should be limited;

Whereas, taking account of the latest scientific advice, it is necessary to establish seasonal limitations on fishing activities in the Celtic Sea in order to limit fishing for herring;

Whereas catches of certain pelagic species and certain shrimps (Pandalus spp. except Pandalus montagui) may be taken with a mesh size which derogates from Community regulations; whereas catches of whiting may be taken in conditions that derogate from Community regulations; whereas scientific advice on these issues is already available; whereas, until the necessary amendments have been made to Council Regulation (EEC) No 3094/86⁴, as last modified by Regulation (EC) No. 1796/94⁵, it is appropriate to prolong the current conditions of fishing for the above-mentioned species as defined by article 9 of Council Regulation (EC) No. 3676/93⁶;

Whereas massive catches of young flatfish are being taken in the southern North Sea in autumn; whereas protection should be given to these fish, in order to achieve a better exploitation;

Whereas the International Baltic Sea Fisheries Commission has recommended certain technical measures for resource conservation and other dispositions on control of fishing activities, to be implemented by its contracting parties with effect from 1 January 1995;

Whereas, pursuant to Articles 48 and 122 of the Act of Accession of Austria, Sweden, Finland and Norway, the conditions under which allocations made in the framework of the Accession can be fished will remain identical to those applicable immediately prior to the entry in force of the Accession Treaty;

⁴ O. J. No. L 288, 11.10.1986, p. 1

⁵ O. J. No. L 187, 22.7.1994, p. 1

⁶ O. J. No. L 341, 31.12.1993, p. 1

Whereas improved economical utilization of certain stocks of herring requires them to be used for purposes other than direct human consumption; whereas the state of these stocks is such that, under appropriate management, there is no danger in implementing such a measure;

Whereas, pursuant to Article 2(3) of the Treaty of Accession of Austria, Sweden, Finland and Norway, the institutions of the Union may adopt before accession the measures referred to in Articles 44, 47, 48, 94, 121, and 122 of the Act of Accession,

HAS ADOPTED THIS REGULATION:

Article 1

This Regulation fixes for 1995, for certain fish stocks and groups of fish stocks, total allowable catches (TACs) per stock or group of stocks, the share of these catches available to the Community, the allocation of that share among Member States and the specific conditions under which these stocks may be fished⁷.

For the purposes of this Regulation, the Skagerrak is bounded on the west by a line drawn from the Hanstholm lighthouse to the Lindesnes lighthouse and on the south by a line drawn from the Skagen lighthouse to the Tistlarna lighthouse and from this point to the nearest point on the Swedish coast.

For the purposes of this Regulation, the Kattegat is bounded on the north by a line drawn from the Skagen lighthouse to the Tistlarna lighthouse and from this point to the nearest point on the Swedish coast and on the south by a line drawn from Hasenøre to Gribens Spids, from Korshage to Spodsbjerg and from Gilbjerg Hoved to Kullen.

For the purposes of this Regulation, the North Sea shall comprise ICES Sub-area IV and that part of ICES division IIIa which is not covered by the definition of the Skagerrak given in this article.

⁷ The definition of the ICES and CECAF areas referred to in this Regulation is given in Commission Communications 85/C 347/05 (O.J. No. C 347, 31.12.1985, p. 14) and 85/C 335/02 (O.J. No. C 335, 24.12.1985, p. 2) respectively.

Article 2

TACs for stocks or groups of stocks to which Community rules apply and the share of these catches available to the Community are hereby fixed for 1995 as set out in Annex I

Article 3

The allocation among the Member States of the share available to the Community of the TACs mentioned in Article 2 is fixed for 1995 in Annex I.

This allocation shall be without prejudice to exchanges made pursuant to Article 9 (1) of Regulation (EEC) No. 3760/92 and re-allocations made pursuant to Articles 21(4), 23(1) and 32(2) of Regulation (EEC) No. 2847/93⁸.

Article 4

As regards the herring stock of the North Sea and of the eastern English Channel, transfers of up to 50 % of the quotas may be effected from ICES divisions IV c and VII d to ICES division IV b.

As regards the hake stock in zones IIa (EC zone) and IV (EC zone), Member States having a quota in this zone may, on exhaustion of this quota, make transfers from zones Vb (EC zone), VI, VII, XII and XIV and from zones VIIIa, b and d to zone IIa (EC zone) and IV (EC zone).

However, such transfers must be notified in advance to the Commission.

Article 5

1. It shall be prohibited to retain on board or to land catches from stocks for which TACs or quotas are fixed unless:

⁸ O.J. No. L 261, 20.10.1993, p. 1

- (i) the catches have been taken by vessels of a Member State having a quota and that quota is not exhausted; or
- (ii) the share of the TAC available to the Community (Community share) has not been allocated by quota among Member States and the Community share has not been exhausted; or
- (iii) for all species other than herring and mackerel, they are mixed with other species and have been taken with nets whose mesh size is 32 millimetres or less in Regions 1 and 2 or 40 millimetres or less in Region 3 in accordance with Article 2 paragraph 1 of Regulation (EEC) No. 3094/86⁹, and are not sorted either on board or on landing; or
- (iv) for herring, they are within the limits of paragraph 2; or
- (v) for mackerel, they are mixed with horse-mackerel or pilchard and the mackerel does not exceed 10% of the total weight of mackerel, horse-mackerel and pilchard on board and the catches are not sorted, or
- (vi) they are caught during the course of scientific investigations carried out under Regulation (EEC) No. 3094/86.

All landings shall count against the quota, or, if the Community share has not been allocated between Member States by quotas, against the Community share, except for catches made under the provisions of (iii), (iv), (v) and (vi).

2. When fishing with nets whose mesh size is less than 32 millimetres in Regions 1 and 2 other than the Skagerrak and the Kattegat and with nets whose mesh size is less than 40 millimetres in Region 3, it shall be prohibited to retain on board catches of herring mixed with other species unless such catches are not sorted and unless the herring, if mixed with sprat only, does not exceed 10% by weight of the total weight of herring and sprat combined.

When fishing with nets whose mesh size is less than 32 millimetres in Regions 1 and 2 and with nets whose mesh size is less than 40 millimetres in Region 3, it shall be prohibited to retain on board catches of herring mixed with other species unless such

⁹O. N° L288, 11.10.1986, p.1

catches are not sorted and unless the herring, if mixed with other species whether or not including sprat, does not exceed 5% by weight of the total weight of the herring and other species combined.

3. The determination of the percentage of by-catches and their disposal shall be made in accordance with Article 2 of Regulation (EEC) No. 3094/86.

Article 6

Blue whiting, anchovy and horse mackerel shall be considered to be species other than demersal.

Article 7

1. Fishing for herring shall be prohibited from 1 to 15 November 1995 within the area bounded by the following coordinates:

- the south-east coast of Ireland at longitude 7°30' W,
- latitude 51°15' N, longitude 7°30' W,
- latitude 51°15' N, longitude 9°00' W,
- the south coast of Ireland at longitude 9°00' W.

2. The areas and periods described in this Article may be altered in accordance with the procedure laid down in Article 18 of Regulation (EEC) No. 3760/92.

Article 8

By way of derogation from Regulation (EEC) No 2115/77, directed fishing and landing of herring for purposes other than human consumption can be conducted, until 31 December 1995, by vessels flying the flag of Sweden or Finland and, in the Baltic Sea, on a pilot basis, by vessels flying the flag of other Member State, within the rules provided in Regulation (EEC) No 1866/86.

Article 9

By way of derogation from footnotes 11, 12 and 13 in Annex I to Council Regulation (EEC) n° 3094/86 the following provisions shall apply:

- i) When fishing in region 3, except Skagerrak and Kattegat, for the target species "mackerel (*Scomber scombrus*), horse mackerel (*Trachurus trachurus*), herring (*Clupea harengus*), pelagic Cephalopoda, sardine (*Sardina pilchardus*), and blue whiting (*Micromesistius poutassou*)", the use of 32 mm mesh shall be permitted until 31 December 1995;
- ii) When fishing in region 3, except Skagerrak and Kattegat, for the target species "Shrimps (*Pandalus spp.*, except *Pandalus montagui*)", the use of 35 mm mesh shall be permitted until 31 December 1995;
- iii) The conditions for fishing for the target species "whiting (*Merlangius merlangus*) in ICES sub-areas II, IV, V and VI (north of 56°N) shall remain valid until 31 December 1995".

Article 10

By way of derogation from the second sub-paragraph of paragraph a) of Article 9(3) of Regulation (EEC) No. 3094/86, the period of enlargement of the area in which beam trawling is banned shall be from 1 January to 31 December 1995.

Article 11

Fishing for cod shall be prohibited in the Baltic Sea, the Belts and the Øresund from 1 June to 31 August 1995.

Article 12

By way of derogation from Articles 3, 5 and 6 of Council Regulation No 1866/86 of 12 June 1986¹⁰, the following provisions will apply in the Baltic Sea, the Belts and the Øresund from 1 January to 31 December 1995:

- i) The weight of undersized cod kept on board may amount to 5% of the total catch of cod.
- ii) The by-catch of cod in herring and sprat fishing shall not exceed 10% by weight. No more than 5% of this by-catch of this cod may be undersized.
- iii) It shall be prohibited to use trawls, Danish seines or gillnets having a mesh opening (measured when wet) smaller than that specified for the fisheries listed below:
 - a) Cod gillnets, and trawls and Danish seines with special devices such as exit windows or any other design with at least a selectivity at level of 50% retention length of 38 cm and listed in annex II of this regulation: 105 mm;

Normal trawl and Danish seines: 120 mm¹¹;
 - b) Flatfish in Sub-divisions 22 to 27 fished with gillnets, normal trawls and Danish seines: 120 mm^{12 13}
 - c) Flatfish in Sub-division 28, fished with gillnets, normal trawls and Danish seines: 110 mm;

¹⁰ O.J. No L162, 18.06.86, p. 1

¹¹ Applied to the meshes of the last eight meters of the net measured from the codline with the meshes stretched lengthwise.

¹² with the exemption of sole fishing in sub-divisions 22 and 23

¹³ with the exemption of Sub-divisions 22-24, west of 14°00'E, where normal trawls and Danish seines with a mesh opening of 90 mm shall be allowed.

- d) Flatfish in Sub-divisions 29 and 32, south of latitude 59°30'N fished with i) gillnets: 100 mm; ii) normal trawls and Danish seines: 110 mm
 - e) Flatfish fished with trawl and Danish seines with special selectivity devices as specified in a) above: 105 mm¹³
 - f) Herring in Sub-divisions 22 to 27: 32 mm
 - g) Herring in Sub-divisions 28 to 29, south of latitude 59°30'N: 28 mm
 - h) Herring in Sub-divisions 30 to 32 and Sub-division 29, north of latitude 59°30'N: 16 mm
 - i) Sprat in the whole Convention area: 16 mm
- iv) When fishing for cod, only authorised gear for the cod fishery, as defined in subparagraph iii) above, or gear with a larger mesh opening, shall be allowed to be kept on board. If there is any other gear on board, landing of cod shall be prohibited.

Article 13

This Regulation shall enter into force on the day of its publication in the Official Journal of the European Communities. For the new Member States, this Regulation shall enter into force as from the Accession.

It shall apply with effect from 1 January 1995.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

1994

For the Council
The President

ANNEX II

EXIT WINDOW (model 1)

Two exit windows with plastic coated, fully opened diamond meshes shall be attached to the codend of trawls and Danish seines in the cod fishery. The mesh opening shall be no less than 108 mm. The exit windows shall be attached with a separate piece of netting (between the ordinary diamond meshes and the meshes of the exit window). The mesh size of the separate netting shall be identical to the bar length of the exit window netting times the square root of two.

The exit window shall be attached on both sides of the codend, and the distance between the rear end of the codend and the window shall be 40-50 cm. The length of the window shall be 80% of the total length of the codend and the height of the window shall be 50 cm. The window shall be mounted in a way that gives an opening between the upper and lower seams of the window of 15-20 cm.

EXIT WINDOW (model 2)

Identification:

The windows shall be rectangular sections of netting in the codend. There shall be two windows in the codend.

Size:

Each window shall have a minimum width of 45 cm along its entire length. Each window shall have a minimum length of 3.5 m measured along its sides (Figure 1)

Netting (Fig. 2):

The meshes in the windows shall have a minimum size of 105 mm. They shall be square meshes, i.e. all four sides of the window netting will be cut all bars. The netting shall be mounted such that the bars run parallel and perpendicular to the length of the codend. The window width shall be 8 open square meshes. The length shall be between 57 and 62 square meshes.

Location:

The codend shall be divided into upper and lower panels by selvages running down the port and starboard sides. The two windows shall be located in the lower panel, immediately adjacent to and below the selvages. The windows shall terminate a minimum of 2 m and a maximum of 2.5 m from the codline (Figure 1).

The forward end of the window shall be joined to 8 meshes width of the normal codend netting. One side shall join to the selvedge or be joined immediately adjacent to the selvedge and the other side shall be joined to the normal codend lower panel netting following a straight all knots cut (Figure 3).

Mesh size in the whole codend:

All parts of the codend shall conform to a minimum mesh size of 105 mm.

Diagram (Exit Window Model 1)

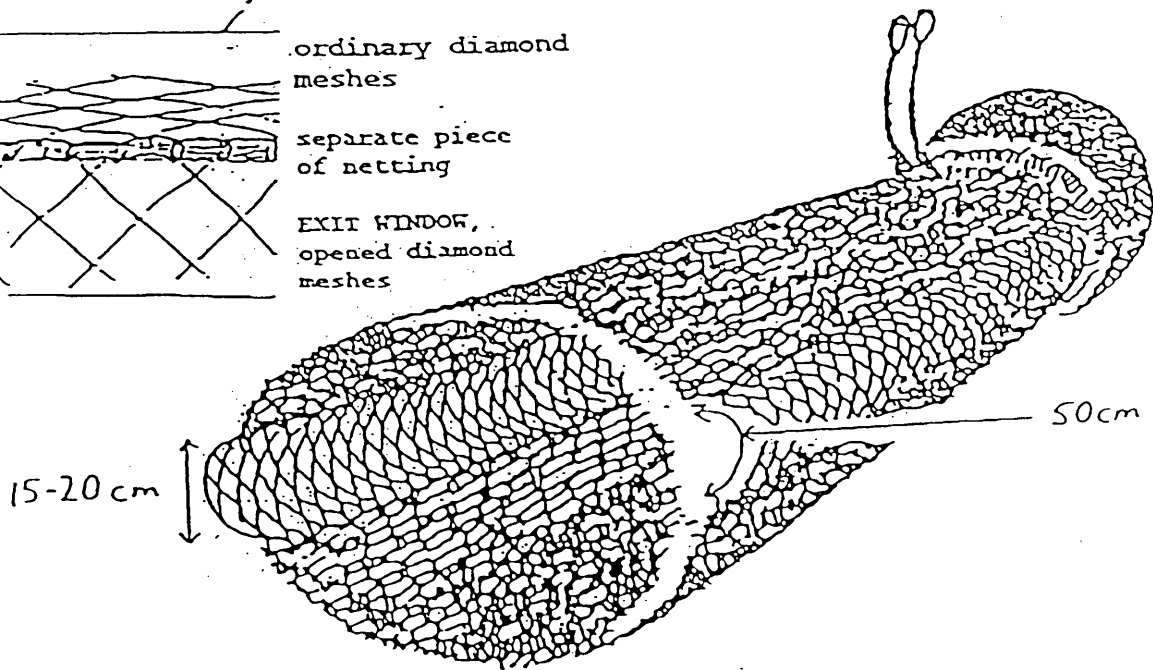

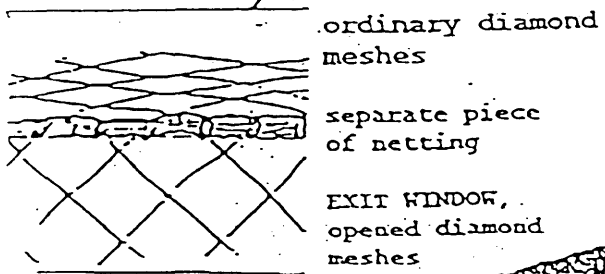

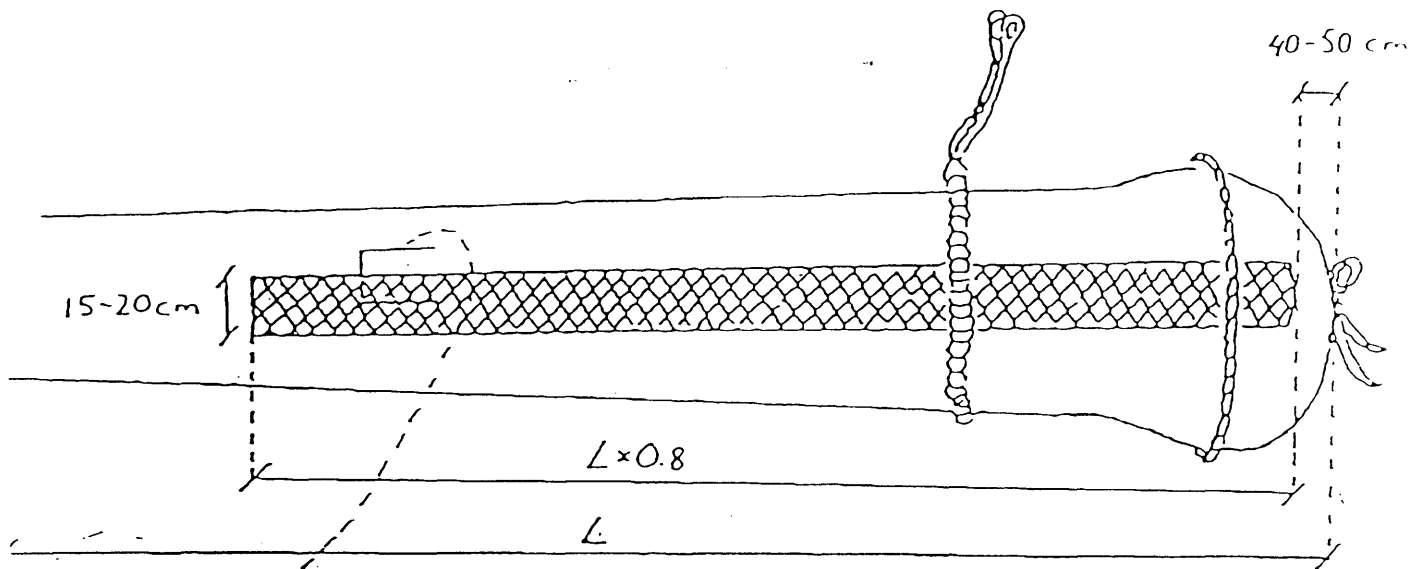

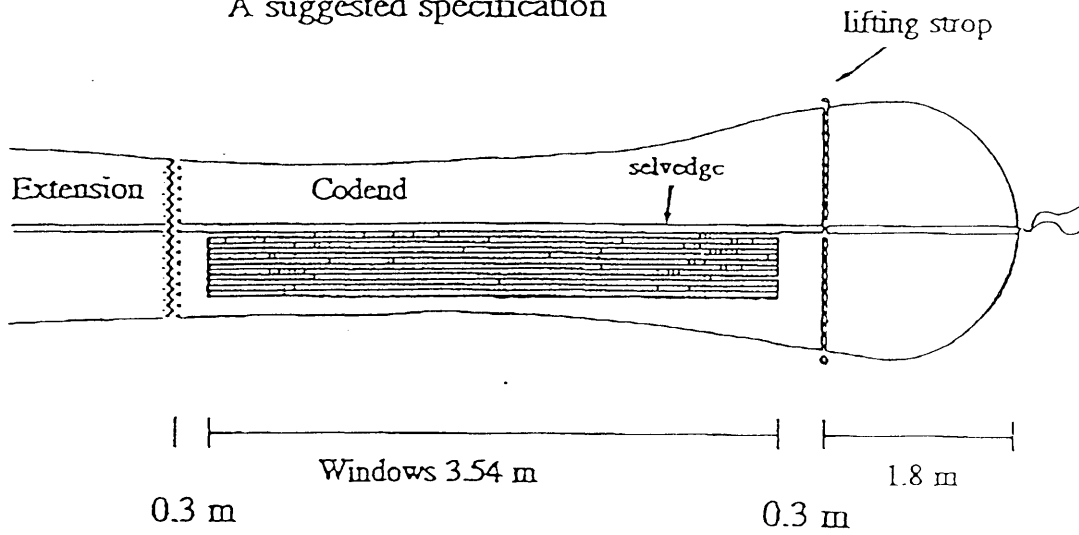

Figure 1 Position of the square mesh windows in the codend
 A suggested specification

Square mesh windows are 0.48 m high
