Article 2

The tariff quotas referred to in Article 1 shall be managed by the Commission, which may take all administrative measures required to ensure effective management.

If an importer submits in a Member State an entry for free circulation which includes an application for preferential treatment for the products covered by this Regulation and if that entry is accepted by the customs authorities, the Member State concerned shall, by notifying the Commission, draw from the tariff quotas a quantity corresponding to his needs.

Applications to draw quantities, stating the date of acceptance of that entry, shall be sent to the Commission without delay.

Drawing shall be accepted by the Commission, to the extent that the balance available permits, on the basis of the date of acceptance by the customs authorities of the Member State concerned of the entry for free circulation.

If a Member State does not make use of the quantities drawn, it shall return the tariff volumes as soon as possible.

If the quantities requested exceed the balance of the quota volumes available, allocation shall be made pro rata to applications. The Commission shall inform the Member States of the drawings made.

Article 3

Each Member State shall guarantee to importers of the products in question equal and continuous access to the tariff quotas for as long as the balance of quota volumes allows.

The Member States and the Commission shall cooperate closely to ensure compliance with this Regulation.

Article 4

This Regulation shall enter into force on the day of its publication in the Official Journal of the European Communities.

It shall apply from 1 May 1995.

This Regulation shall be binding in its entirety and directly applicable in all Member States.
