Proposal for a

COUNCIL REGULATION (EC)

opening and providing for the administration of
autonomous Community tariff quotas for certain agricultural
and industrial products
(1st series 1996)

(presented by the Commission)

EXPLANATORY MEMORANDUM

1. In response to requests from several Member States, the Commission has examined - in conjunction with the government experts concerned - the question of opening, in 1996, autonomous tariff quotas for various products.
2. Following this examination, which took place at the meeting of the "Economic Tariff" group, it has been decided that the opening of tariff quotas for the following products could meet with the approval of the Member States without disturbing the markets for those products:

Vanadiumoxides	13 000 T	à 0%
Ferrochrome

This is the aim of this proposal.

proposal for a
COUNCIL REGULATION (EC)
opening and providing for the administration of
autonomous Community tariff quotas for certain agricultural
and industrial products
(first series 1996)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty establishing the European Community, and in particular Article 28 thereof,

Having regard to the proposal from the Commission,

Whereas production in the Community of certain agricultural and industrial products will remain in the course of 1996 unable to meet the specific requirements of the user industries in the Community; whereas, consequently, Community supplies of products of this type will depend to a considerable extent on imports from third countries; whereas the most urgent Community requirements for the products in question should be met immediately on the most favourable terms; whereas Community tariff quotas at reduced or zero duty should therefore be opened within the limits of appropriate volumes for a period up to 31 December 1996 taking account of the need not to disturb the markets for such products nor the starting out or development of Community production;

Whereas it is necessary in particular to ensure for all Community importers equal and uninterrupted access to the said quotas and to ensure the uninterrupted application of the rates laid down for the quotas to all imports of the products concerned into all the Member States until the quotas have been used up;

Whereas the decision for opening of autonomous tariff quotas should be taken by the Community; whereas, to ensure the efficiency of the common administration of these quotas, there is no reasonable obstacle to authorizing Member States to draw from the quota volumes the necessary quantities corresponding to actual imports; whereas, however, this method of administration requires close cooperation between the Member States and the Commission, and the latter must be able to monitor the rate at which the quotas are used up and inform the Member States accordingly,

HAS ADOPTED THIS REGULATION:

Article 1

From 1 January 1996 until the dates indicated in the annexed table, the duties applicable to imports into the Community of the products listed below shall be suspended at the levels and within the limits of the Community tariff quotas shown below:

Article 2

The tariff quotas referred to in Article 1 shall be managed by the Commission, which may take any appropriate administrative measures to ensure that they are managed efficiently.

Article 3

Where an importer presents a declaration covered by this Regulation for release for free circulation in a Member State, applying to take advantage of the preferential arrangements, and the entry is accepted by the customs authorities, the Member State concerned shall, by notifying the Commission, draw an amount corresponding to its requirements from the appropriate quota volume.

Requests for drawings, indicating the date on which the entries were accepted, must be sent to the Commission without delay.

Drawings shall be granted by the Commission in chronological order of the dates on which the customs authorities of the Member States concerned accepted the entries for release for free circulation, to the extent that the available balance so permits

If a Member State does not use a drawing in full it shall return any unused portion to the corresponding quota volume as soon as possible.

If the quantities requested are greater than the available balance of the quota volume, the balance shall be allocated among applicants pro rata. The Commission shall inform the Member States of the drawings made.

Article 4

Each Member State shall ensure that importers of the products in question have equal and continuous access to the quotas for as long as the balance of the relevant quota volume so permits.

Article 5

The Member States and the Commission shall cooperate closely to ensure that this Regulation is complied with.

Article 6

This Regulation shall enter into force on 1 January 1996.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Council

The President
