I. EIC ACTIVITIES

IT-355 Bologna

The EIC IT-355 belonging to the specialised group on Taxation Law is planning to set up an initiative to create a complete database about the VAT rates on 240 categories of goods and services in the 15 countries of the European Union.

The chief of the project is the Director of the Advanced Course in Tax Law of the University of Bologna, Prof. Adriano Di Pietro.

A floppy disc will be made available by the IT-375 to all EICs and their clients, though the potential price thereof is unknown for the moment.

BG-681- Sofia

On 28 March 1995, the official inauguration of the EICC will take place in Sofia. The Centre received a sum of 96,000 ECU from the PHARE SME Programme.

The EICC is launching a new project with the Centre for European Studies, the implementation of the Association Agreement. The project is for 2 years and the total sum is 1,2 mn ECU.

The EICC BG-681 serves as the information office of the Bulgarian Privatisation Agency. Information on companies that are going to be privatised, information on the privatisation process, information about their biggest privatisation deals, is provided to interested individuals and companies.

In September 1995, the EICC will organise a seminar on financial support for SMEs - EIB credit lines, JOPP Programme and SME Fund facilities are amongst the topics to be discussed. Should you need more information, please contact Mrs Antonina Stoyanovska at the following number: 359-2-738.448 or 732.487.

CZ-671 Prague

The Third Entrepreneurs Meeting took place successfully on 9 February 1995 in the presence of Mr. Giorgio Ficarelli, representative of the European Commission to the Czech and Slovak Republics, and other guests of honour, including the Mayor of the City of Brno, representatives of the Hungarian and Polish Embassies, and of the Ministry of Industry.

The EIC CZ-671 will have a stand at the following trade fair :

- International Consumer Goods Fair: 9-13.04
- Techagro: 25-29.04
- Autotec: 3-8.06
- International Engineering Fair: 11-16.09
- Invex-Computer: 10-14.10
- Envibrno, Simet: 7-11.11

II. EU NEWS

1. INDUSTRIAL COMPETITIVENESS

The European Commission is set to adopt on Wednesday a plan to help the EU's industry become more competitive, a Commission spokesman said on Tuesday. The paper will set out a timetable for implementing measures proposed in the Commission's September communication on industrial competitiveness, COM(94)319. The communication said the EU should invest in training, promote industrial cooperation, modernise public administrations and promote an "information society" built around computer and telecommunications networks. The Industry Council asked the Commission last November to prepare a timetable for the initiatives. The Commission has taken action already in some areas -- for example, setting up a round table between Japanese and European businesses -- and will propose that most other action be launched in 1995 and 1996. He said the Commission would also adopt a working paper on Wednesday outlining what action has been taken to boost Europe's industry since the Commission adopted its 1990 communication on industrial policy.

2. SINGLE MARKET DEREGULATION

The European Commission expects to be able to identify by June cumbersome or bureaucratic European Union and national legislation that needs to be simplified, Internal Market Commissioner Mario Monti said on Tuesday. He told the European Parliament's economic and monetary committee he hoped the group of independent experts set up in September to examine the issue would soon conclude its report. "In June, on the basis of the report we will be able to pinpoint areas where to reduce the burden for businesses," Mr. Monti said.

3. VAT

Internal Market and Taxation Commissioner Mario Monti said on Tuesday that he was not satisfied with the current transitional value

added tax (VAT) regime, but noted difficulties in switching to the definitive system. "I don't feel the present transitional VAT regime is satisfactory," he told the European Parliament's economic and monetary committee. He acknowledged that there were cases in which the current regime had led to the refusal of goods and even fiscal fraud, which made the switch to the country-of-origin system even more important. But the Commission's proposal on the changeover to the final system would not be ready before July. "I hope to move forward soon, I hope before the summer recess," he said. The Commission's proposal was initially due by the end of last year. This meant that the January 1, 1997 deadline for moving to the final regime, where goods will be taxed in the country where they are made instead of that where they are consumed, was unlikely to be met, he said.

4. ENERGY ELECTRICITY

The European Commission is due to propose on Wednesday a two-pronged approach to bringing more competition to European Union electricity markets. Energy Commissioner Christos Papoutsis will present a working paper intended to thread together EU member countries' widely differing views on how far liberalisation should go, which the Commission is due to agree. Energy ministers in the 15-country bloc are deadlocked over a Commission proposal, COM(91)548, to allow companies increased rights to supply power to fellow EU countries and to negotiate access to their electricity grids. The Commission's first proposal was opposed in particular by France, which said any liberalised regime should retain existing monopolies as sole buyer and seller of electricity in a system for which it would also determine long-term energy strategy. Competition Commissioner Karel van Miert has said France's suggestion as it stands would contravene EU law, a problem Mr. Papoutsis hopes to overcome with changes proposed in his working paper. Mr. Papoutsis will suggest that the Energy Council consider a modified French proposal alongside the Commission's existing one when they meet next in June. Commission deliberations, requested by

ministers at the November 29 Energy Council, are based on a study carried out by the University of Cologne's Energiewirtschaftliches Institut which compared the relative effects of the negotiated third party access system (TPA) and the single buyer proposal.

5. TENS

The ECOFIN Council is due to agree new ground rules for funding cross-border transport networks from the central budget when they meet on Monday, diplomats said on Friday. The new set of rules will replace those that expired on December 31. In the absence of these rules no money can be spent from the trans-European networks (TENS) line in the annual budget. But diplomats stressed this had no bearing on more general funding for the 14 top priority road and rail projects agreed in principle at last December's European Council in Essen, Germany. The then Economic Affairs Commissioner Henning Christophersen said at Essen that the Commission was prepared to find extra money from inside the budget to help fund the projects apart from the cash that is already set aside under the TENS line. The European Investment Bank has also pledged to provide far more funding for the projects when and where necessary. Diplomats said detailed cost-benefit work was continuing on the 14 projects. Ministers have ruled out the European Commission itself raising cash for the projects.

6. PARLIAMENT-TELECOMS

The European Parliament approved on Thursday a draft directive to allow telecommunications operators who have been licensed in one member state to offer services across the EU. But it proposed amendments to extend the legislation to a wider range of services and to restrict its benefits to third countries -- an apparent swipe at the United States. The assembly also asked the European Commission to draft a proposal to set up a European Telecommunications Authority to enforce European telecoms regulations and eventually replace national authorities. The parliament approved the amendments in a first reading of draft directive COM(94)041, which

will be adopted under co-decision-making procedures. The legislation aims to establish a mutual recognition procedure under which national governments would recognise licences or other authorisations for telecoms services granted by other EU states. The Commission proposed that the directive apply to data transmission, corporate phone networks and fax services, but not to voice telephone, satellite, mobile or telex services. But the parliament argued it should apply to all but satellite services, which are covered by a separate proposal on mutual recognition of licences, COM(93)652. The assembly also said the mutual recognition provisions should apply only to companies that are based in the EU and whose non-EU ownership is not more than 25 percent. It said the restriction could be waived for countries that had no foreign participation limits of their own. The United States limits foreign ownership in telecommunications companies to 25 percent, although Vice President Al Gore announced last month that it will scrap that restriction for countries who open their own markets. The draft directive now goes to the Council for a common position.

7. EUROPEAN COMMITTEE FOR STANDARDIZATION (CEN) PRESS RELEASE DOCUMENT DATE: MARCH 20, 1995

Protection of the public in Europe - and abroad

Escalators : Quality European Standards are able to transfer technology and know-how to a wide sphere of interest. A European Standard for escalators now serves all of Europe including the Eastern countries, and is used widely in the far East (China, Singapore, Malaysia), almost all of the middle East and South Africa. With a few modifications it has been adopted by Hong Kong, Taiwan, South Korea, Brazil, Argentina and increasingly in India. In order to maintain progress CEN has just issued a revision of the standard EN 115, Safety rules for the construction and installation of escalators and passenger conveyors. Work began on this standard in 1975 in CEN Technical Committee 10, which worked on the

basis of a directive for safety issued by the International Labour Office, and the standard was published in 1983. As with all complex specifications which have to meet the needs of different parties there were initially problems of interpretation which had to be resolved; furthermore the Council of Ministers issued the Directive relating to machinery (89/392/EEC), which necessitated the revision now completed. Elevators: Last year CEN issued for public enquiry prEN 81 concerning safety rules for the construction and of lifts (Part 1 for electric lifts and Part 2 for hydraulic lifts), which will lead to a revision of the widely-used European Standard. A 'new approach' directive is expected this year to replace Directive 84/529/EEC. The directive will be relevant to evolution of the standard.

Foldaway beds: CEN has issued EN 1129 which specifies requirements for the safety and strength of foldaway beds for domestic use, including the strength of wall fastenings where applicable. The tests have to be carried out by applying loads or forces which simulate normal functional use to various parts of the bed and its assembly. The tests also simulate misuse that can reasonably be expected to occur.

European Standards: In February CEN issued 65 new European Standards and 71 draft European Standards.

Communiqué issued by: Stewart Sanson Tel 32 2 519 68 52
fax 32 2 519 68 19

8. SCHENGEN-GERMANY

Germany on Monday played down fears of increased crime and illegal immigration when border controls between seven European Union countries are ended, and said the move would aid freedom of movement in Europe. The so-called Schengen accord, which comes into effect next Sunday, will scrap all checks on travellers between Germany, France, Belgium, Luxembourg, the Netherlands, Spain and Portugal. It will also create a single computerised information system for the police forces of these states. "Schengen is a decisive step in the path towards freedom of movement in the whole of Europe," Bernd Schmidbauer,

minister of state in the German chancellery, told a news conference. "We cannot allow weak spots on our borders," he said. "There will be some problems at the beginning but everything will be ironed out." The Schengen signatories plan to have stricter border checks at frontiers with non-EU countries and use a joint information system to combat international crime and illegal immigration. Italy and Greece have joined the pact but have not finished preparations for hooking up to the information system, Schmidbauer said. Austria has observer status and talks are under way with Denmark, which also wants to become an observer. Schmidbauer said increased cooperation between the police forces of the states that had signed the Schengen accord -- named after the Luxembourg village where it was signed -- would simplify manhunts and extradition. Implementation has been delayed since January 1993 because of hitches with the computer in the French city of Strasbourg. "Searching for wanted people will become easier because they will be sought in all Schengen countries," Schmidbauer said. In exceptional circumstances, police will be able to cross borders in pursuit of a criminal from their country, he said. From Sunday, passengers flying between one Schengen country and another will leave from domestic rather than international airport terminals and will not be subject to identity checks. The computer system, the Schengen Information System, will give police and immigration officials a multinational database on suspect persons, stolen vehicles and forged money. Schmidbauer said non-EU citizens who needed a visa to travel to one Schengen state would be allowed to visit all seven member countries with the same visa.

9. EASTERN EUROPE-INDUSTRY

Eastern European countries are lagging badly in their efforts to restructure and modernise their industries to prepare for European Union membership, the European Commission said on Wednesday. The executive said in a report on industrial cooperation with central and eastern Europe -- COM/95/71 -- they were struggling mainly due to EU companies' reluctance to invest there. "It does not meet the persisting

industrial restructuring and modernisation needs and it does not promote the rapid growth necessary if these countries are to catch up at least partially with the EU," it said. The report covered Poland, Hungary, the Czech Republic and Slovakia, Romania, Bulgaria, the three Baltic republics -- Estonia, Latvia and Lithuania -- and Slovenia, with which the EU has or is negotiating transitional Europe agreements. Hungary and Poland submitted formal applications for EU membership in April 1994 and other countries have indicated their interest in membership. The Copenhagen European Council in June 1993 stopped short of promising a date for their EU entry, but the EU has started the lengthy process of examining how they could meet the conditions to be incorporated. The Commission said eastern European countries needed to have foreign investment, technology transfers and knowledge in cooperation with EU industry if they were going to make their industries fit for EU membership. "It must be recognised that the industry privatisation, restructuring and modernisation process can not succeed without the broad mobilisation of EU industry, for investment and the transfer of technology and know-how," it said. "This role of EU industry in the transition process will gain relative importance compared to the other elements the more the process advances," it said. The Commission said administrative hurdles were often responsible for industry's reticence at investing eastwards. Where investment had been made, Poland, Hungary and the Czech Republic received the lion's share, it said. But it stressed it was in EU companies' interests to invest in what were becoming growth markets, although care had to be taken as the process would involve shifts in employment. "EU industry needs to be present on growth markets," it said. "This is one of the key objectives of EU industrial policy." The report will be presented to the April 7 Industry Council in Luxembourg. Among the ideas floated in the Commission report are:

- Setting up an industrial policy dialogue with the countries.
- Bringing them step by step under the scope of the single market and EU competition laws.
- Creating a regional quality management structure to encourage intra-regional trade.
- Improvements

in the countries' legal and regulatory frameworks on investment.

- Improving potential investors' access to information.
- Consideration of partnering events and subcontracting
- Encouragement of regional cooperation to avoid misuse of funds and duplication of efforts.
- Multilateralisation of the region's trade.
- Establishment of effective banking and payment systems in central and eastern Europe.
- Improving management training.

**10. EUROPEAN COMMISSION PRESS RELEASE: IP/95/265
DOCUMENT DATE: MARCH 15, 1995**

**OPENING OF THE NEGOTIATIONS
ON EUROPE AGREEMENT
BETWEEN THE EUROPEAN UNION
AND SLOVENIA**

Joint press release

The inaugural round of negotiations on the Europe agreement between the European Union and Slovenia was held today in Brussels. The Head of the Slovenian delegation, Minister of Foreign Affairs Mr. Zoran Thaler and the Director General Gunther Burghardt representing the European Commission, expressed their satisfaction with the decision of the Council of Ministers of 6 March to adopt the mandate for the Europe agreement with Slovenia. It is expected that the negotiations would be concluded under the French Presidency. This will allow for the inclusion of Slovenia in the pre-accession strategy for the countries of Central and Eastern Europe, as anticipated in the conclusions of the Essen European Council. Slovenia has a long tradition of close knit relations with the European Union. Its economic links with the EU were established long before the dissolution of the former federal state. After the independence of Slovenia, the importance of its political and economic relations with the European Union increased significantly. The Co-operation Agreement between Slovenia and the EU, concluded in 1993 and the previously granted trade regime helped Slovenia to become one of the most successful countries in transition.

Trade volumes were increasing steadily and today about two thirds of Slovenia's foreign trade is conducted with the EU. A political dialogue was established by a Joint Declaration adopted at the signature of the Co-operation agreement. The European Union and Slovenia granted each other free transit for road carriers on the basis of the Transport agreement. The PHARE Programme of financial and technical assistance was extended to Slovenia in August 1992. A total of 44 MECU has been committed over the 1992-1994 period including 4 MECU for the 1994 Cross Border Co-operation Facility. In the framework of the Financial

Protocol (1993-1997) which provides for EIB loans totalling 150 MECU, Slovenia has already allocated the total amount for the financing of three projects in the field of transport infrastructure (road and rail). Ever closer links between EU and Slovenia, as well as the economic and political achievements of Slovenia, called for further deepening of relations in the framework of a Europe agreement. As the negotiations got under way today, Slovenia joined the group of Central and Eastern European countries which already have, or are currently negotiating a Europe agreement on association with the EU.

III. QUESTIONS AND ANSWERS

QUESTION 1:

Could you provide us with information on the availability of E.U. finance for a meeting between Belgian and Moroccan companies within the framework of Enterprise?

ANSWER 1:

A Med-Enterprise initiative should include at least 2 countries/regions from the E.U. and at least 1 country/region from the Mediterranean. The event should also take place in the Mediterranean country concerned, i.e. in your case, Morocco. There is also the possibility for companies from a Mediterranean country to participate in Enterprise events organised in Europe.

I would advise you to consult the documentation on Enterprise which should be in your possession, for more details concerning conditions and procedures to be followed for the organisation of these events.

I would like to draw your attention to the ECIP initiative whose principle aim is to promote joint ventures between companies from the E.U. and their counterparts in Asia, Latin America and the Mediterranean. Facility 1 of this initiative is concerned with the financing of events which would eventually lead to the creation of joint ventures, i.e. the business meeting proposed by your client, for Moroccan and Belgian companies. You should have at least 2 brochures on the ECIP programme in your documentation. I am attaching an updated list of the ECIP financial intermediaries for your information.

QUESTION 2:

Could you forward us some information on the availability of support towards investment in the French Overseas Departments and tell us

whether these areas are included in the ECIP programme?

ANSWER 2:

The French Overseas Territories and Departments are classified as ACP countries (African, Caribbean and Pacific) and under the terms of the Lomé Convention, benefit from financial support from the EU under the European Development Fund. Projects to be financed by the EDF are agreed by the national authorities in the countries concerned and are subject to approval by the Commission. Calls for tender are published in the Official Journal, S series, and in the TED database. Another good source of information on on-going and up-coming projects is the Courier Magazine, in particular the so-called "Blue Pages".

Furthermore, I would suggest that you contact the EICs in Guadeloupe and Martinique to verify whether any measures exist on a local level to promote investment in these areas.

Guadeloupe and Martinique are not beneficiaries of the ECIP scheme, which you will note from the documentation on ECIP in your possession, is reserved for joint ventures with companies in the Mediterranean, Asian and Latin American countries.

QUESTION 3:

Could you please provide us with information on the current situation of the following programmes?

ANSWER 3:

* **Poverty IV:** this programme has not been adopted yet because Germany contests the validity of the programme on the basis of the principle of subsidiarity. However, the French presidency is trying to have it adopted during the first half of the year.

* **Europe against cancer:** we advise you to consult Council Resolution of 13 December 1993 regarding the future orientations of the

"Europe against cancer" programme (OJ C 15 - 18.01.94) and the document COM (94) 83 final on the third action plan of 29 March 1994. This proposal has not yet been adopted but will probably be adopted under the Spanish Presidency.

* **Europe against AIDS:** we suggest you consult the programme 1991-1993 "Europe against AIDS", report from the Commission on the implementation of the action plan in 1993 (COM (94) 525 final) and the common position adopted by the Council on 2 June 1994 for the adoption of the decision regarding the prolongation of the "Europe against AIDS" programme (OJ C 213 - 03.08.94). The follow-up "Europe against AIDS" programme was adopted on 22 December 1994 and will soon be published in the Official Journal.

QUESTION 4:

Could you please forward us some information on Community financing for the adaptation of slaughterhouses to Community law?

Under the Council Directive regarding the sanitary problems in the field of intra-Community exchanges of meat based products, it is possible to grant Community support in the framework of the FEOGA. The responsible organisations have therefore to send their dossier to the National Agriculture Ministry

which will decide whether the demand can be satisfied or not.

We also advise you to consult information on the Copenhagen facility of the EIB (European Investment bank). This initiative aims to grant one billion ECU with a 2% interest rate subsidy for the investments by SME the disposable capital of which does not exceed 75 million ECU, which does not employ more than 500 persons and, above all, which foresees a long-term job creation.

* **Drugs:** consult Council Regulation 3294/94 of 22 December 1994 modifying Regulation 302/93 regarding the creation of an European observatory on drug(addiction) (OJ L 341-30.12.94) and the Commission Communication to the Council and European Parliament regarding an action plan of the European Union in the field of fight against drugs (1995-1999) (COM (94) 234 final).

* **EURATHLON:** programme in favour of sport in two areas: activities intended to bring together citizens and, in particular, young people, as well as sport training actions, directly addressed to athletes and sportsmen in the framework of common training. We advise you to consult the first call for tenders published in the OJ C 297-25.10.94.

V. CALLS FOR PROPOSALS/ OFFICIAL JOURNAL DEADLINES

This publication has been shortened in order to enable it to be sent to EICs in one single VANS electronic mail file. It now focuses purely on calls for tenders and proposals for EU programmes published by the Commission and Commission study and service contracts related to EU affairs. For information on other EC-related calls for tenders (e.g. supply contracts for the Institutions of the European Union), please consult TED.

Please note that in so far as calls for proposals on research and development are concerned, this publication only contains the main deadlines. Many RTD calls for proposals also have continuously open measures for SMEs, accompanying measures, etc. Please refer to the texts of these calls and the information packages published by the Commission for further details on this matter.

Cette publication a été rationalisée afin de nous permettre de l'envoyer aux EIC en un seul fichier de courrier électronique (VANS). Elle recouvre notamment les appels à propositions pour les programmes communautaires, ainsi que les appels d'offres pour des études et services liés aux affaires communautaires. Pour des informations relatives aux autres appels publiés par les Institutions de l'Union européenne (p.ex. les appels en matière de fournitures), veuillez consulter TED.

En ce qui concerne les appels à propositions pour les programmes de recherche et développement, cette publication ne contient que les dates limites principales. Beaucoup de ces programmes prévoient également des actions telles que des mesures pour les PME,

les mesures d'accompagnement, etc. qui restent continuellement ouvertes. Nous vous recommandons donc de consulter les textes des appels à propositions et les dossiers d'information diffusés par la Commission pour de plus amples renseignements à ce sujet.

Contact addresses of new European Union agencies

A number of new European Union agencies/organisations are currently in the process of becoming established. Listed below is the latest information on their contact address. In future issues of *European Access* this information will be added to the 'List of useful addresses' at the back of each issue.

Committee of the Regions

Address: Rue Ravenstein 2, B-1000, Brussels, Belgium. Tel: 00-32-2-546-22-11. Fax: 00-32-2-546-28-96

Role: To represent local and regional interests in the EU decision-making process.

European Agency for the Evaluation of Medicinal Products

Address: 7 Westferry Circus, Canary Wharf, London E14 4HP. Tel: 0171-418-8400. Fax: 0171-418-8416

Role: To implement EU procedures for the authorisation and supervision of medicinal products for human and veterinary use.

European Environment Agency

Address: 6 Kongens Nytorv, DK-1050 Copenhagen K, Denmark. Tel: 00-45-331-450-75. Fax: 00-45-331-465-99

Role: To monitor environmental developments and provide comparable data on trends in European Union and neighbouring countries.

European Monetary Institute

Address: Postfach 102031, D-60020 Frankfurt-am-Main, Germany. Tel: 00-49-69-240-00-60. Fax: 00-49-69-240-006-99

Role: Established at the start of the second stage of EMU, and a forerunner of the European Central Bank, the role of the EMI is to strengthen co-operation between national central banks; to improve co-ordination of Member States' monetary policies; to promote use of the ECU; to prepare for EMU.

European Monitoring Centre for Drugs and Drug Addiction

Temporary Address: European Commission - Drugs Unit, Rue de la Loi 200, B-1049 Brussels, Belgium. Tel: 00-32-2-296-05-03. Fax: 00-32-2-296-59-97

Role: To provide the Union and the Member States with comparable statistics on drugs and drug addiction. To be based in Lisbon.

European Training Foundation

Temporary Address: Rue des Deux-Eglises 37, B-1040 Brussels, Belgium. Tel: 00-32-2-230-53-78. Fax: 00-32-230-64-04.

Role: To help establish vocational training schemes in the countries of Central and Eastern Europe and in those qualifying for the TACIS Programme (Belarus, Kazakhstan, Kirghizstan, Moldova, Russia, Ukraine, Uzbekistan). To be based in Turin.

Europol

Address: PO Box 90850, NL-2509 LV The Hague, The Netherlands. Tel: 00-31-70-302-53-02. Fax: 00-31-70-345-58-96

Role: Its final role is still being discussed. Currently, only a Drugs Unit has been established.

Trade Marks Office

Address: Avenida Aguilera 20, SP-3007 Alicante, Spain. Tel: 00-34-6-513-91-46. Fax: 00-34-6-513-91-43

Role: To register and protect trade marks.

Contact addresses are not yet available for the Community Plant Variety Office (Ireland), the European Agency for Safety and Health at Work (Spain) and the Translation Centre (Luxembourg). CEDEPOP is also in the process of moving from Berlin to Thessaloniki.

Information obtained from a number of sources but principally from 'The European Public Affairs Directory 1995' (Landmarks SA, 1994). A review of this highly recommended title can be found in 'Recent publications of interest' on p35.
