PRESS RELEASE

EEC published details of social  
security for migrant workers.

The publications services of the European Communities have just brought out a booklet on "Social security of migrant workers", which contains all the Community provisions on the subject in force on 1 January 1965.

It also contains a list of the decisions taken by the Administrative Committee for the Social Security of Migrant Workers about the interpretation or application of the various regulations of the Council, together with a list of the standard forms adopted by the Administrative Committee in implementation of the regulations.

The arrangement of the booklet permits easy reference to the relevant texts, decisions and standard forms published in various issues of the Official Gazette of the European Communities, and which now appear together for the first time.

The contents of the booklet directly concern over two million people - migrant workers, frontier workers, seasonal workers, those receiving retirement or disability pensions and the unemployed, as well as their families.

The booklet can be ordered from the publications services of the European Communities, or obtained through the London, Washington or New York offices of the Communities.
