PRESS RELEASE

Harmonized nomenclature for trade statistics

The harmonized nomenclature for the foreign trade statistics of the EEC countries came into operation on 1 January 1966. Foreign trade data can now be compared at Community level in respect of products under 4 828 headings.

The harmonized nomenclature does not replace the national nomenclatures, which have simply been amended and can contain additional particulars proper to each country.

It will be published shortly by the Statistical Office of the European Communities.
