before 14.00 HOURS, TUESDAY, 27 JANUARY 1987.

£183 MILLION REGIONAL FUND GRANTS TO THE UNITED KINGDOM

Tenth and Eleventh Allocations in 1986

The Commission of the European Communities has just approved grants from the Regional Development Fund amounting to £182 952 266 in respect of 282 investments in industry and infrastructure throughout the United Kingdom.

Northern Ireland receives aid of £18.5m for 103 investments. A grant of £1.8m will help to improve the port facilities at the Mail Quay, Larne, and ensure the retention of significant levels of commercial traffic using the port, while a £1.5m grant goes to North Down Borough Council to help pay for the new Pickie Breakwater. This will afford further protection to Bangor Harbour, and facilitate the development of a new marina at Bangor.

Wales receives aid for two major infrastructure investments the A483 Gresford-Pulford Bypass and the Loughor Bridge. The construction of the new road bridge across the Loughor Estuary to which a grant of £5m has been allocated will provide an essential link in the strategic road networks of South-East Dyfed and West Glamorgan. A number of smaller grants have been made throughout Wales for the development of industrial estates and small workshop developments. Of particular interest is a grant of £0.4m to South Glamorgan County Council for the construction of the Cardiff Technology Centre. This important venture will nurture small enterprises in the technology orientated sectors to progress innovative ideas beyond the research stage into production and marketing, and is expected to create about 100 jobs.

The North region gets £31m in aid in respect of 28 investments. £3.4m has been granted towards the infrastructure costs of developing the former Sunderland Airport for industrial use by the Nissan company. £17.5m has been granted as the final tranche of assistance to the Tyneside Sewerage Scheme. The scheme is a pre-requisite for industrial development and will enable the Water Authority to impose stricter controls on industrial discharges.

The grants made to industrial projects include £110 000 to Gresham Lion Plc at Ashington towards the expansion of the production of switch mode power supplies and the creation of 114 jobs.

In the North West grants have been made totalling £10.2m including notably the provision of a computer operating service to the Cooperative movement. £1.1m has been granted to the North West Water Authority for the construction of two new service reservoirs at Marklands and Montcliffe.

The Yorkshire and Humberside region benefits from grants which total £34m. As well as several major road schemes in different parts of the region a grant has been made to the British Petroleum Company's investment establishing a plant to expand the production of acetic acid and acetic anhydride at Hull. 140 jobs will be created.

£142 000 has been granted to the Sheffield Technology Campus which is intended to stimulate innovation and the formation of new enterprises, particularly those engaged in the application and development of new technology.

Grants have been made in the West Midlands totalling £25m. A project which is expected to make a considerable contribution to regional development and lead to the creation of jobs is the development of the Westwood Business Park in Coventry to which a grant of £2.5m has been made. £353 150 has been granted towards the development of industrial units at the Aston Science Park. In Birmingham the refurbishment of premises in the Vyse Street jewellery quarter for use as workshops has received a grant of £122 500. Phase II of the Birmingham Convention Centre has been awarded a grant of £13.6m.

In the South West a grant totalling £20.2m goes to 11 investments in infrastructure. The biggest single investment is the Plymouth Water Supply Stage 2 which has been awarded a grant of £3.7m. Stage 1 of the water supply scheme was ERDF awarded in 1980. Also noteworthy is the £1.4m grant to Queen Anne Battery Sea Sport Centre in Plymouth. The Centre is expected to attract a substantial number of tourists to the area.

Scotland benefits from 38 grants which total £18.8m. A grant of £2.4m has been given towards the infrastructure costs of constructing the Bonhill Bridge across the River Leven, which will improve the traffic flow and accessibility between Bonhill and Alexandria for industrial and commercial traffic. An industrial grant of £1.2m has been made to Beecham Pharmaceuticals for the construction of a new fermentation plant at Irvine, creating 136 new jobs in an area of high unemployment.
