pursuant to Rule 25 of the Rules of Procedure

on the crisis in the veal market and the need to
strengthen European legislation

The European Parliament,

- noting the present grave crisis in the veal market in Europe,
 - deploring the disparities in national legislation on animal feedingstuffs,
 - aware of the need to reach solutions rapidly which serve the interests of both producers and consumers,
 - convinced of the validity of the common agricultural policy and what has so far been achieved under that policy,
1. Urgently requests the introduction of European legislation prohibiting the use of artificial hormones and anabolic steroids, promoting the use of natural hormones and encouraging producers to feed calves using untreated milk,
 2. Instructs the President to forward this resolution to the Council and the Commission of the European Communities.
