 - having regard to the report of the Committee on External Economic Relations (Doc. 257/74);

¹ OJ No. C 88, 26.7.74, p. 33

EXPLANATORY STATEMENT

1. Conclusion of the 'Basic Treaty on Relations between the Federal Republic of Germany and the German Democratic Republic' and the establishment of diplomatic relations between the GDR and the EEC Member States has made necessary a reexamination and possible adjustment of trade relations between these countries.

In its Communication of 18 April 1973 on this question the Commission reached the conclusion that relations between the Community and the GDR should be fully subject to general Community rules. However, both the Commission and the Council felt that the special status granted to internal German trade in the relevant Protocol to the EEC Treaty should continue¹.

2. The present proposal of the Commission provides for the application of Community rules in a further sector to relations between the Member States and the GDR. The provisions of Article 8(4) of Council Regulation (EEC) No. 803/68² will thus have to be abolished. These provide exceptionally that where goods from third countries are introduced into the customs territory of the Community through the territory of the GDR, delivery costs for such transit shall not be included in the value of the goods for customs purposes.

3. The Commission emphasizes that the introduction of goods from third countries into the customs territory of the Community through the territory of the GDR cannot be regarded as pertaining to German internal trade. The proposed amendment is therefore intended to ensure a uniform determination of customs value and at the same time prevent possible discrimination against certain routes.

4. In view of the reasons put forward by the Commission, the Committee on External Economic Relations approves the proposal for a regulation.
