

# COMMISSION OF THE EUROPEAN COMMUNITIES

COM(79) 13 final.

Brussels, 24 January 1979.

## DRAFT COUNCIL REGULATION (EEC)

opening, allocating and administering a Community tariff quota for ferro-chromium containing not less than 4% by weight of carbon, falling within subheading ex 73.02 E I of the Common Customs Tariff, and extending the benefit of this quota to certain imports of ferro-chromium containing a quantity of between 3 and 4% by weight of carbon (1979)

(submitted to the Council by the Commission)

COM(79) 13 final.

EXPLANATORY MEMORANDUM

1. Following a request from Benelux, the competent departments of the Commission were called upon to examine, during a meeting of the Economic Tariff Problems Group, the question of opening, for 1979, an autonomous Community tariff quota for certain qualities of ferro-chromium containing a quantity of 4% (with a fixed limit of 3%) or more by weight of carbon (high carbon ferro-chromium).

2. During the discussion it transpired that :

- a) the difficulties encountered on the market for this metal during the last few months, owing to pressure exerted on prices and supplies by certain third countries, have not been overcome so far, notwithstanding the conclusion of agreements with some of them
- b) in the Community, the productive capacity in respect of high carbon ferro-chromium is markedly underused and, according to forecasts for 1979, production might be voluntarily reduced in considerable proportions in exchange for dependable outlets inside the Community ;
- c) the Member States' forecasts place the usual particulars for calculating the quota at the following approximate levels :

consumption		487 265 tonnes
actual production	about	150 000 tonnes
inward processing arrangements		negligible quantity
duty-free imports under the terms of other preferential systems (EFTA, Turkey)		41 939 tonnes
exports to third countries		10 200 tonnes
unusual stocks as at 31 December 1978		54 000 tonnes

- d) on this basis, import needs from third countries up to the end of 1979 might vary between 75 000 and 300 000 tonnes, depending on the level which might be reached by Community production and the level of Community stocks.

3. In these circumstances, taking into account (i) the uncertainties of consumption levels, (ii) Community production, (iii) the necessary imports from third countries, (iv) the need to ensure parallel development in the marketing of Community production and in the obtaining supplies for consumer industries under favourable conditions, the Commission considers it necessary to be particularly prudent in fixing the quota volume in order not to endanger the market equilibrium. With this in mind the Commission feels that it is necessary to assure a certain compensation to those Member States who favour Community production to ensure their supplies.

For this purpose, the Commission intends to open for 1979 a nil-duty tariff quota, the provisional volume of which, covering the needs for the first four months (i.e. 80 000 tonnes), might be increased during the year to keep in step with the situation. There may well be a revision by the Economic, Tariff Problems Group at the beginning of the year to give effect, (allowing for the duration of the approval procedures) to an increase as from 1 May 1979.

4. As usual in such cases, the proposed quota volume has been divided into two tranches, the first, corresponding to 90% of this volume, being allocated among the Member States in proportion to their anticipated imports from third countries, the second, corresponding to the balance of the said volume, constituting a Community reserve. Setting up such a reserve can be all the better justified in this case as the quota volume is likely to be revised during the year, in order to meet more adequately the actual needs of consumer industries.

The draft Regulation submitted by the Commission, moreover, lays down in its Article 6 that Member States should be free to restrict the benefit of this tariff quota "to products to be used for certain purposes".

DRAFT

COUNCIL REGULATION (EEC)

opening, allocating and administering a Community tariff quota for ferro-chromium containing not less than 4 % by weight of carbon, falling within subheading ex 73.02 E I of the Common Customs Tariff, and extending the benefit of this quota to certain imports of ferro-chromium containing a quantity of between 3 and 4 % by weight of carbon (1979)

THE COUNCIL OF THE EUROPEAN  
COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community, and in particular Article 28 thereof,

Having regard to the draft Regulation submitted by the Commission,

Whereas for ferro-chromium containing not less than 4 % by weight of carbon, Community production is, to a variable degree, inadequate and producers are unable to meet the total requirements of consumer industries ; whereas it is therefore in the Community's interest to suspend totally in respect of this metal the application of the Common Customs Tariff duty until 31 December 1979, within a suitable tariff quota ; whereas in order to avoid

disturbing the equilibrium of the market for this ferro-alloy and to ensure parallel development in sales of Community production and in supplies to meet the requirements of consumer industries, it is appropriate to fix the quota volume at the provisional level of 80 000 tonnes, covering import needs from third countries during the first few months of the year ; whereas the fixing of this amount, based on conservative estimates, does not preclude future adjustment in line with changes in the situation; whereas, moreover, Member States should be free to authorize charges to be made against this volume only subject to certain conditions relating to use;

Whereas relatively limited imports of ferro-chromium containing a quantity of between 3 and 4 % by weight of carbon are foreseeable for this quota period ; whereas provision should be made on a temporary basis for the extension of the benefit of the tariff quota in question to these imports, limiting it however to 20 % of the quota volume taking account of the existence of Community production ;

Whereas equal and continuous access to the quota should be ensured for all Community importers and the rate of duty for the tariff quota should be applied consistently to all imports until the quota is exhausted; whereas in the light of these principles, arrangements for the utilization of the tariff quota based on an allocation among Member States would seem to be consistent with the Community nature of the quota; whereas, to correspond as closely as possible to the actual trend in the market in the product in question, allocation of the quota should be in proportion to the requirements of the Member States as calculated by reference to statistics of imports from third countries during a representative reference period and to the economic outlook for the quota period in question;

Whereas, however, since the quota is an autonomous Community tariff quota intended to cover import needs arising in the Community, it may, as an experiment, be allocated on the basis of the temporary import needs from third countries expressed by each of the Member States while assuring a certain degree of compensation for those Member States which favour Community production when obtaining supplies; whereas this system of allocation also ensures the uniform application of the Common Customs Tariff;

Whereas, to take account of future import trends for the product concerned, the quota should be divided into two tranches, the first being allocated among the Member States and the second held as a reserve to cover subsequently the requirements of Member States which have exhausted their initial shares and any additional requirements which might arise in the other Member States; whereas, to give importers of the Member States some degree of certainty, the first tranche of the tariff quota should be fixed at a relatively high level which could be 72 000 tonnes;

Whereas Member States may exhaust their initial shares at different rates; whereas to avoid disruption of supplies on this account it should be provided that any Member State which has almost used up its initial share should draw an additional share from the reserve; whereas each time its additional share is almost exhausted a Member State should draw a further share, and so on as many times as the reserve allows; whereas the initial and additional shares should be valid until the end of the quota period; whereas this form of administration requires close collaboration between the Member States and the Commission and the Commission must be in a position to keep account of the extent to which the quotas have been used up and to inform the Member States accordingly;

Whereas if at a given date in the quota period a considerable quantity of a Member State's initial share remains unused it is essential that such State should return a significant proportion thereof to the reserve, in order to prevent a part of a quota from remaining unused in one Member State while it could be used in others ;

Whereas, since the Kingdom of Belgium, the Kingdom of the Netherlands and the Grand Duchy of Luxembourg are united within and jointly represented by the Benelux Economic Union, any measures concerning the administration of the shares allocated to that economic union may be carried out by any one of its members,

HAS ADOPTED THIS REGULATION :

#### *Article 1*

1. From the date of entry into force of this Regulation and until 31 December 1979 a tariff quota of 80 000 tonnes shall be opened within the Community in respect of ferro-chromium containing not less than 4 % by weight of carbon, falling within subheading ex 73.02 E I of the Common Customs Tariff.
2. During this period the Member States shall be authorized within the 20 % limit of the quotas allocated to them or which they levy on the reserve in accordance with Articles 2 and 3 to charge against the said tariff quota, imports of ferro-chromium containing a quantity of between 3 and 4 % by weight of carbon.
3. Importations of the products in question, which already benefit from exemption from customs duties under another preferential tariff system, are not to be charged against this tariff quota.
4. Within this quota, the customs tariff duty shall be totally suspended.

#### *Article 2*

1. A first instalment of 72 000 tonnes of this Community tariff quota shall be allocated among the Member States ; the shares, which, subject to Article 5 shall be valid until 31 December 1979, shall be as follows :

Benelux	3 800 tonnes,
Denmark	30 tonnes,
Germany	32 000 tonnes,
France	10 560 tonnes,
Ireland	10 tonnes,
Italy	12 000 tonnes,
United Kingdom	13 600 tonnes

2. The second instalment of 8 000 tonnes shall constitute the reserve.

### *Article 3*

1. As soon as one of the Member States referred to in Article 2 has used 90 % or more of its initial share as fixed in Article 2 (1), or of that share minus any portion returned to the reserve pursuant to Article 5, it shall forthwith, by notifying the Commission, draw a second share, to the extent that the reserve so permits, equal to 10 % of its initial share rounded up as necessary to the next whole number.

2. As soon as one of the Member States, after exhausting its initial share, has used 90 % or more of the second share drawn by it, that Member State shall forthwith, in the manner and to the extent provided in paragraph 1, draw a third share equal to 5 % of its initial share.

3. As soon as one of the Member States, after exhausting its second share, has used 90 % or more of the third share drawn by it, that Member State shall forthwith and on the same conditions draw a fourth share equal to the third.

This process shall continue until the reserve is exhausted.

4. Notwithstanding paragraphs 1 to 3, a Member State may draw shares lower than those specified in those paragraphs if there are grounds for believing that those specified may not be used in full. Any Member State applying this paragraph shall inform the Commission of its grounds for so doing.

### *Article 4*

Additional shares drawn pursuant to Article 3 shall be valid until 31 December 1979.

### *Article 5*

The Member States shall not later than 1 October 1979, return to the reserve the unused portion of their initial share which on 15 September 1979, exceeds 20 % of the initial amount. They may return a greater portion if there are grounds for believing that such portion may not be used in full.

Not later than 1 October 1979 the Member States shall notify the Commission of the total quantities of the products in question imported up to and including 15 September 1979 and charged against the Community quota and of any portion of their initial shares returned to the reserve.

*Article 6*

Member States may restrict the product in question which may be charged against their quota shares to products to be used for certain purposes.

*Article 7*

The Commission shall keep an account of the shares opened by the Member States pursuant to Articles 2 and 3 and shall, as soon as the information reaches it, inform each State of the extent to which the reserve has been used up.

Not later than 5 October 1979 it shall inform the Member States of the amounts still in reserve following any return of shares pursuant to Article 5.

It shall ensure that when an amount exhausting the reserve is drawn, the amount so drawn does not exceed the balance available, and to this end shall notify the amount of that balance to the Member State making the last drawing.

*Article 8*

1. The Member States shall take all appropriate measures to ensure that additional shares drawn

pursuant to Article 3 are opened in such a way that importations may be charged without interruption against their accumulated share of the tariff quota.

2. The Member States shall ensure that importers of the product in question established in their territories have free access to the shares allocated to them.

3. The Member States shall charge imports of the product in question against their shares as and when the product is entered with the customs authorities for home use.

4. The extent to which the Member States have used up their shares shall be determined on the basis of the importations charged against their shares in accordance with paragraph 3.

*Article 9*

At the request of the Commission, the Member States shall inform it of imports charged against their shares.

*Article 10*

The Member States and the Commission shall cooperate closely to ensure that this Regulation is complied with.

*Article 11*

This Regulation shall enter into force on the seventh day following its publication in the *Official Journal of the European Communities*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

*For the Council*  
*The President*
