Foreword

1. Introduction

The monthly bulletin on external trade, published by Eurostat in the B series, Short-term trends, sets out to provide within the shortest possible deadlines data on short-term trends in the European Union's external trade. In particular, it contains data on the European Union's trade flows with its trading partners and the various economic areas and a breakdown of this data by major product group. The bulletin also provides an overview, based on data from various international sources, of the place occupied by the European Union in the external trade of its main trading partners and of third countries. Trade flows between Member States are recorded under the Intrastat system and will be published at a later date.

The European Union's external trade statistics at the most detailed classification level are published monthly on CD-ROM (B series: Intra and extra-EU trade).

Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External Trade Statistical Yearbook (Series A)*".

External trade statistics are also available on line via the Eurostat data banks (Comext).

The catalogue of Eurostat publications and a detailed methodological description can be found in "*External Trade Statistics User's Guide*" published in all languages of the European Union.

2. Sources

Since 1978, the Member States have transmitted European Union external trade statistics according to a uniform methodology laid down by Council Regulation (EEC) No 1736/75. This regulation was amended to take account of the new developments in 1988, i.e. the introduction of the new external trade classification entitled "Combined Nomenclature" (CN) and the new "Single Administrative Document".

The tables in this bulletin are compiled by Eurostat from the detailed data transmitted on magnetic tape by the Member States; these data are broken down according to the eight-digit subheadings of the Combined Nomenclature.

Eurostat wishes to take this opportunity of thanking the relevant departments in the Member States for their cooperation, which enables it to compile these harmonized European Union statistics and to ensure their quality.

3. Coverage

The results of the European Union statistics relate to special trade. This comprises:

- 1) imports of goods placed in free circulation on their arrival at or on leaving warehouses, imports for inward processing and imports after outward processing (customs procedures);
- 2) exports of European Union goods, exports after inward processing and exports for outward processing (customs procedures).

Transit and warehousing traffic are not covered by European Union statistics.

4. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union excluding the French overseas departments. Thus Greenland, the Canary Islands and Ceuta and Melilla are not covered, while the Azores and Madeira for Portugal and the Balearics for Spain are.

From October 1990, the external trade data of the Federal Republic of Germany, the other Member States and EUR 12 relate to the Federal Republic of Germany in its borders after 3 October 1990.

5. *Goods classification*

In this publication the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of correspondence tables drawn up by Eurostat on the basis of the Combined Nomenclature (CN).

6. *Trading partners: countries and economic areas*

The results of the European Union are broken down by country of origin, country of consignment and country of destination in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom).

When goods that originate in third countries and are not in free circulation in the European Union are imported, EU statistics state the country of origin. When such goods are exported, the country of destination is specified.

7. *Units*

Values

The statistical value of goods on import is equal to the customs valuation or to a value determined by reference to the concept of customs valuation (in the case, for example, of imports from other Member States). It is the CIF value (cost, insurance, and freight).

The statistical value of goods on export is equal to their value at the place and time at which they leave the statistical territory of the exporting Member State. It is the FOB value (free on board).

The value is expressed in European units of account (ecus). The ecu is a "basket" currency unit based on the market exchange rates of a certain quantity of each European Union currency according to a weighting system involving the five-year average of each Member State's gross national product and intra-EU trade balance. The rates used in this bulletin are averages of daily rates. The bulletin contains a table showing the conversion rates used.

Quantity

The statistics give the net weight of the goods.

8. *Confidentiality*

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The relevant legislation, the procedures for implementing it and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data; it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only or to exports only and to only some of the variables recorded (value, statistical procedure, quantities, country, partner, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of these headings on the results for the European Union as a whole; in particular, trade data on these headings are included at higher levels of aggregation and in the totals.

On the other hand, the statistics are supplied on the strength of customs documents and do not take account of any amendments made by some Member States at the end of the year in drawing up accounts on intergovernmental trade. In view of this, drawing up a trade balance may produce figures that vary sometimes considerably from the official national figures.

9. *Corrections*

Every month the Member States send Eurostat a magnetic tape containing the results for the current month.

In order to correct these results, the Member States also send every month a magnetic tape containing monthly corrections covering the previous 24-month period.

Indices

1. Introduction

Changes over time in the value of trade are influenced by variations in prices and the quantities marketed. Indices are used to measure these two effects. In general, a system of indices is chosen so that the product of the volume index and the price index expresses the value index. Several systems of indices meeting this requirement may be regularly used. The results obtained by using one system will generally be different from those obtained by using another. For various reasons the Member States do not use a common system, and the level of breakdown of their indices by product group and by partner area also varies. Eurostat has therefore devised its own external trade indices which enable it to calculate, for each Member State, European Union indices on a strictly comparable basis. These indices may be consulted on the Trend database developed by Eurostat.

2. Sources of data

There are basically two ways of obtaining information on prices: conducting price surveys by directly approaching importers and exporters and using data collected by the customs authorities. At present only customs data are available in all the Member States. Eurostat therefore calculates indices of unit values (values divided by quantities) and uses them as price variation indicators. The computing programs contain a system for automatically identifying extreme unit values pointing to unlikely price movements.

3. Extreme values

To avoid a number of restrictions involved in using customs data, Eurostat decided to adopt two basic principles in calculating unit value indices: using the most detailed data possible and always bearing in mind that the object of the exercise is to break down variations in value into a "price" component and a "volume" component. Two rules are applied in order to exclude unlikely price movements. The first is that, given the general level of inflation, the price of a product should not be very different from its level a year ago. Any variation of five or more points is regarded as suspect. The second – more restrictive – rule is that the variation in the price of a product in relation to the most recent month for which data are available should not be very different from the average price variation for similar products. Applying these rules prevents extreme variations due to factors that are unconnected with prices and would otherwise distort the unit value index. For products whose unit values are rejected, the variations are taken to be the same as those for similar products.

4. Classification used

The United Nations Standard International Trade Classification (SITC), revised for the third time in 1988, was drawn up on the basis of the Harmonized Commodity Description and Coding System (HS). Using tables of correspondence between the various classifications (Nimexe, Combined Nomenclature and SITC), Eurostat has been able to publish an uninterrupted time series of external trade indices from 1979 to the present.

From 1994 onwards, external trade publications will give indices calculated from 1989 on the basis of the following SITC Rev. 3 aggregates:

TOTAL: all commodities;
0+1: foods, beverages and tobacco;
2+4: crude materials, except fuels;
3: fuels
5+6+7+8: manufactured goods.

By compiling other correspondence tables, Eurostat is able to supply complete time series based on other classifications.

5. *Types of indices and rebasing*

Eurostat calculates Fisher's "ideal" annual chain indices. Since the "basket of goods" marketed at international level varies rapidly over time, the annual chain permits the updating of the index weightings. Each month the changes in unit values in the product groups at detailed level are weighted in order to obtain the changes in unit values in the various major product categories. Since these changes are based on the previous year, a chain of unit values is obtained. The corresponding volume index chain is the ratio of the unit value variation to the variation in value for the month in question compared with the monthly average for the previous year. The indices published each month are calculated by multiplying the above-mentioned chains by the annual indices for the previous year, a fixed reference period having been chosen (at present 1990). The annual unit value chains are obtained by weighting the monthly chains by the volumes, while the annual volume chains are calculated by dividing the annual value variations by the unit value chains.

6. *General comments*

- Only data on normal trade (statistical procedure 1) are used to calculate the unit value indices; however, data on total trade (covering all the statistical procedures) are used to calculate the value indices from which the volume indices are obtained.
- The unit value indices are calculated on the basis of values expressed in ecus.
- For any further information on the methods used to calculate the indices, please refer to Eurostat's specialised publications.

Trends in European Union trade

SEASONAL ADJUSTMENTS: RESULTS

Following a period of relative stability which began in mid-1991, the European Union's seasonally adjusted exports to the rest of the world continually rose in 1993 (+10.5%). Whilst this trend was already evident during the first quarter of 1993 (+2.6%), the growth rate exceeded 10% during the next three quarters to reach +16.8% during the final quarter of 1993 (compared to the last quarter of 1992). The fact that the figure for December 1993 was up 3.2% on the previous month confirms this trend.

Despite the considerable fluctuations observed since the beginning of 1993, the European Union's seasonally adjusted imports from the rest of the world fell quite

steadily from mid-1991 onwards. Whilst this trend was reversed at the beginning of the second half of 1993 (+3.3% compared to 1992), the figures for the year as a whole were still slightly down (-0.2%). The December figure is in keeping with the trend towards a further rise in imports (up 2.0% on November).

The European Union's seasonally adjusted balance of trade has been improving since the third quarter of 1991 and in December 1993 was in surplus once again (+ECU 1.9 billion). The strong growth in extra-EU exports helped reduce the trade deficit from ECU 51.5 billion in 1992 to ECU 1.4 billion in 1993.

(1) As from October 1990, the territory of the Federal Republic of Germany includes the territory of the former German Democratic Republic, including East Berlin. Community results are drawn up accordingly.

(2) Seasonal Adjustment via X11/ARIMA procedure.

GLOBAL TRENDS IN EXTERNAL TRADE

EXTERNAL TRADE OF THE EUROPEAN UNION: Results for December 1993.

The gap between the rates of change in exports and imports between 1992 and 1993 was +11 points for the European Union, -5 points for the United States and +3 points for Japan.

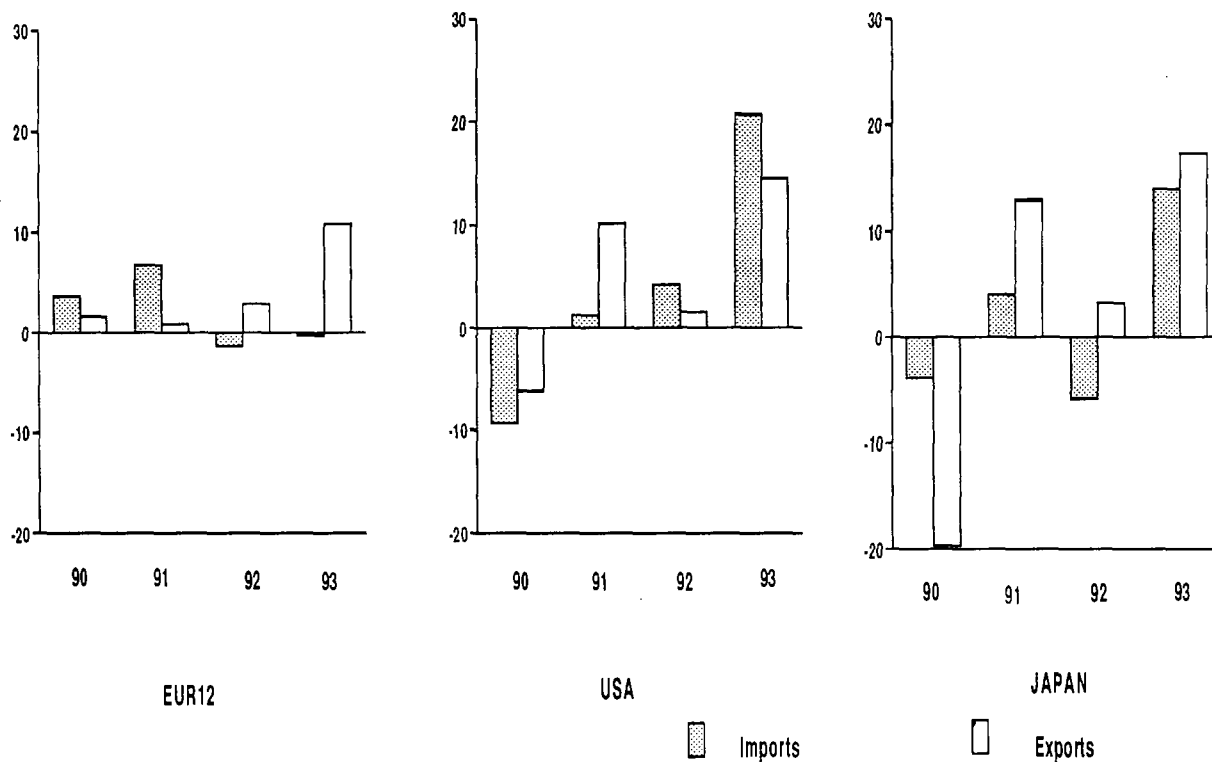

The **European Union's** trade deficit in 1993 was ECU 3.4 billion, against 52 billion in 1992, thanks to sharply higher extra-EU exports (+10.8%) and stagnating imports (-0.3%). The cost per barrel in ecus of the EU's crude oil supplies fell by 3.5% and contributed to the moderate change in imports.

compared with the previous year. Exports increased more slowly, by 14.5% in ecus and 3.7% in dollars.

The **Japanese** surplus was ECU 20 billion higher than in 1992 at ECU 102.3 billion. Exports were sharply up in ecus (17.3%), due in part to the ecu's appreciation against the yen. Exports declined by 6.5% in yen and rose 6% in dollars.

The trade deficit of the **United States** widened by some ECU 38 billion in 1993 to ECU 119 billion. US imports rose by 20.6% in ecus and 9% in dollars

GLOBAL TRENDS IN EXTERNAL TRADE

EXTERNAL TRADE OF THE MEMBER STATES: Results for December 1993.
The extra-EU surpluses of Italy and Germany were almost ECU 13 billion and ECU 12 billion higher than their 1992 levels.

Germany and Italy had the highest extra-EU trade surpluses in 1993, at ECU 20.1 billion and ECU 11 billion respectively. The Italian surplus was up ECU 12.6 billion over 1992. Exports rose by 16.5%, while imports fell by 5.2%. The German surplus was up by ECU 11.6 billion. Germany's extra-EU exports progressed by 7.6%, while imports were steady.

The trade deficits of the **Netherlands and Spain** fell by ECU 8 billion and ECU 7 billion respectively between 1992 and 1993. The exports of both countries advanced sharply, by 19.1% and 15.3% respectively, while imports fell by 6.3% in the case of the Netherlands and 14.5% in the case of Spain.

The **BLEU's** extra-EU trade showed a slight deficit (ECU 0.6 billion) in 1993, but the balance represented an improvement of ECU 4.7 billion over 1992 as a result of improved extra-EU exports (+19.7%). BLEU's extra-EU imports showed little change.

The **United Kingdom and France** saw their extra-EU trade balances for 1993 improve by ECU 2 billion and ECU 2.3 billion respectively. The United Kingdom remained the country with the highest extra-EU trade deficit (ECU 18.4 billion) in 1993. Its extra-EU trade rose sharply compared with 1992: exports were up by some 16% and imports by almost 10%. France's extra-EU exports rose by 1%, while imports fell by 2.3%.

The trade balances of **Denmark, Ireland and Portugal** improved by less than ECU 0.5 billion compared with their 1992 levels. Danish imports were down by 0.5%, exports up by 2.4%. Ireland's extra-EU imports and exports each rose by 37% between 1992 and 1993. Portugal's extra-EU imports fell by 3.4% and its exports by 2.7%.

The **Greek** trade deficit was the only one to deteriorate in 1993 (by ECU 0.2 billion), to ECU 4.3 billion, although the very strong growth in extra-EU exports (23.6%) outstripped the rise in imports (13.2%).

EUROPEAN UNION EXTERNAL TRADE BY PARTNER COUNTRY.

TRADE IN TERMS OF VALUE: Results for December 1993.

ECU 25.4 billion improvement in trade deficit with industrialized countries between 1992 and 1993.

In 1993 the extra-EU trade deficit with **industrialized countries** amounted to 22.6 billion, less than half that of 1992. The balance of trade with the United States and Canada improved by ECU 11.8 billion and remained slightly negative (ECU -1.6 billion). Trade with Japan showed a deficit of ECU 25.1 billion in 1993, an improvement of almost ECU 6 billion compared with 1992. Trade with Eastern Europe showed a surplus almost ECU 5 billion higher than in 1992. The European Union balance of trade with the EFTA countries showed a deficit of ECU 3.3 billion in 1993, compared with ECU 3.9 billion in 1992.

Imports from industrialized countries fell by 3.3%. Imports from the United States and Canada and those from EFTA countries fell slightly compared with 1992 levels (-1.6% and -1.8% respectively). Imports from Japan fell more sharply: -7.5%. They had become more expensive owing to the change in the yen-ecu exchange rate (+ 26%).

Exports from the European Union to industrialized countries rose by 6.6% between 1992 and 1993. Exports to the United States and Canada and Japan rose steadily (by 12.3% and 10.1% respectively). Exports from the European Union benefited from the devaluation of the ecu against the dollar and the yen (by 9.8% and 20.7% respectively).

Trade with **developing countries** showed a surplus of ECU 24.5 billion in 1993, compared with ECU 7.1 billion in 1992. The EU balance of trade with Mediterranean countries was ECU 14.5 billion in 1993, around ECU 10 billion higher than in 1992. The balance of trade with OPEC countries, which showed a deficit of ECU 0.7 billion in 1992, recorded a surplus of ECU 0.9 billion in 1993. In EU trade with ACP

countries and the countries of Latin America there was a surplus of around ECU 2 billion for each area in 1993, whereas in 1992 there was a deficit of ECU 0.9 billion and ECU 4.5 billion respectively. The balance of trade with Asian Newly Industrialized Countries (NICs), which showed a deficit in 1992, improved by ECU 5 billion and achieved a surplus of around ECU 3 billion in 1993.

Imports from developing countries into the European Union fell by 1.7% in 1993, compared with 1992. Imports from OPEC countries fell by 7.5%, combined with the drop in the cost of providing the European Union with crude oil (-3.5% per barrel in ecu terms between 1992 and 1993). Goods imported from Mediterranean countries, Latin America and ACP countries fell by 6.7%, 10.5% and 18.8% respectively. Imports from Asian NICs were the only ones to rise (+4.9%). European Union exports to developing countries rose sharply compared with 1992 (+9.8%). They were sustained by exports to Asian NICs (+23.2%) and exports to Mediterranean countries and countries of Latin America, which rose by around 17%. Exports to ACP countries and OPEC countries fell by almost 4% compared with 1992.

The balance of trade with the countries of **Central and Eastern Europe**, which showed a deficit of ECU 1.4 billion in 1992, achieved a surplus of ECU 3.2 billion in 1993. Imports by the European Union from this area rose by 5.8%, compared with 18.9% for exports from the Union to these countries.

Trade with **China** showed a deficit of ECU 8.2 billion in 1993, an improvement of ECU 9.9 billion compared with 1992. Exports to China rose sharply in 1993 (+ 65%). Imports from China rose by 16.4%.

EUROPEAN UNION EXTERNAL TRADE BY PARTNER COUNTRY

TRADE IN TERMS OF VOLUME: Results for quarter four 1993. Exports to developing countries rise by 11.3% in 1993.

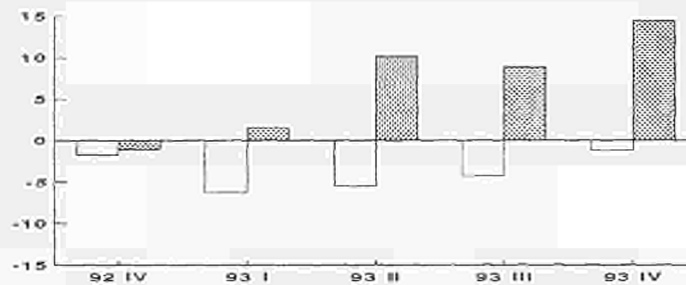

Imports fell by 3.9% in 1993. The drop was particularly marked for imports from industrialized countries (-9.3%). While the drop in imports from EFTA countries was limited (-3.4%), imports from the United States and Japan fell to a greater extent (-10.1% and -19% respectively). The volume of exports to industrialized countries rose by 2.6% in 1993, slower than the increase in total volumes (9.3%). The volume of exports to the United States and Japan rose by 7.8% and 4.1% respectively. Exports to EFTA countries fell in terms of volume by 4.1%.

The volume of imports from developing countries fell by 3.4%. Imports from ACP countries fell by 17.3%, those from OPEC countries and Asian NICs by 5%. Imports from the Mediterranean countries rose sharply in 1993 (+14.9%).

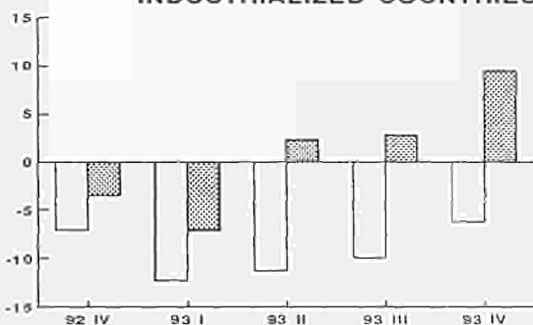

The volume of exports to developing countries rose by 11.3%. The volume of exports to Mediterranean countries and Asian NICs rose by 19.2% and 22.9% respectively between 1992 and 1993. The volume of exports to ACP countries and OPEC countries, which fell by 5%, tempered the growth in exports to the above-mentioned areas.

EUROPEAN UNION EXTERNAL TRADE BY PRODUCT

TRADE IN TERMS OF VALUE: Results for December 1993. Exports of machinery and transport equipment (SITC 7) rise by 13.1% in 1993.

The surplus in **machinery and transport equipment** (SITC 7) was over ECU 55 billion in 1993, compared with almost ECU 33 billion in 1992. The external trade balance in chemical products (SITC 5) showed a surplus of ECU 29 billion, up by almost ECU 9 billion compared with 1992. The deficit in other manufactured products (SITC 6 + 8) improved by ECU 4 billion, amounting to ECU 11.8 billion for 1993. The deficit in energy products (SITC 3) amounted to almost ECU 46 billion in 1993, compared with ECU 54.3 billion in 1992. Trade in raw materials (SITC 2 + 4) showed a deficit of ECU 21.3 billion, an improvement of ECU 3.1 billion compared with 1992. The deficit in food products (SITC 0 + 1) was absorbed between 1992 and 1993, amounting to ECU 4.8 billion in 1992 and ECU 0.4 billion in 1993.

Imports of **machinery and transport equipment** rose by 2% in 1993, those of chemical products also rose slightly (0.8%). Imports of **other manufactured products** rose more sharply (+6.5%). Imports of energy products and food products fell by around 5%, while those of raw materials were down by 6.6%. Exports of machinery and transport equipment rose by 13.1% compared with 1992. Exports of other manufactured products increased by 10.4%, while exports of chemical products grew by 16.4%. Exports of food products were 8.1% up on 1992.

EUROPEAN UNION EXTERNAL TRADE BY PRODUCT

TRADE IN TERMS OF VOLUME: Results for quarter four 1993.
Volume of exports of manufactured products rises by almost 10% between 1992 and 1993.

Total imports fell by 3.9% in terms of volume between 1992 and 1993. The volume of imports of machinery and transport equipment fell by 8.6% in 1993 compared with 1992. This drop affected, to a lesser extent, chemical products (- 5.9%) but not other manufactured products, which rose slightly (+ 1.3%). In terms of volume, imports of energy products fell by 2.4%, and those of raw materials by 5.2%. Imports of food products fell by 4.3% in volume terms compared with 1992.

Total volumes exported by the European Union rose by 9.3% in 1993. The volume of exports of machinery and transport equipment rose by 7.5% in 1993, that of other manufactured products by 10.3%. The volume of exports of chemical products also rose (+ 9.1%). The volume of exports of food products rose by 10.8% in 1993 compared with 1992.

(1) The ECU is a "basket" monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

List of products : SITC, rev. 3

0-9 Total trade

0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s.

5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals

- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s.

6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

7 Machinery and transport equipment

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

8 Miscellaneous manufactured articles

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
