Foreword

1. Introduction

The monthly bulletin on external trade, published by Eurostat in the B series, Short-term trends, sets out to provide within the shortest possible deadlines data on short-term trends in the European Union's external trade. In particular, it contains data on the European Union's trade flows with its trading partners and the various economic areas and a breakdown of this data by major product group. The bulletin also provides an overview, based on data from various international sources, of the place occupied by the European Union in the external trade of its main trading partners and of third countries. Trade flows between Member States are recorded under the Intrastat system and will be published at a later date.

The European Union's external trade statistics at the most detailed classification level are published monthly on CD-ROM (B series: Intra and extra-EU trade).

Trends in external trade since 1958 and a comparison with world trade are contained in the publication "*External Trade Statistical Yearbook (Series A)*".

External trade statistics are also available on line via the Eurostat data banks (Comext).

The catalogue of Eurostat publications and a detailed methodological description can be found in "*External Trade Statistics User's Guide*" published in all languages of the European Union.

2. Sources

Since 1978, the Member States have transmitted European Union external trade statistics according to a uniform methodology laid down by Council Regulation (EEC) No 1736/75. This regulation was amended to take account of the new developments in 1988, i.e. the introduction of the new external trade classification entitled "Combined Nomenclature" (CN) and the new "Single Administrative Document".

The tables in this bulletin are compiled by Eurostat from the detailed data transmitted on magnetic tape by the Member States; these data are broken down according to the eight-digit subheadings of the Combined Nomenclature.

Eurostat wishes to take this opportunity of thanking the relevant departments in the Member States for their cooperation, which enables it to compile these harmonized European Union statistics and to ensure their quality.

3. Coverage

The results of the European Union statistics relate to special trade. This comprises:

- 1) imports of goods placed in free circulation on their arrival at or on leaving warehouses, imports for inward processing and imports after outward processing (customs procedures);
- 2) exports of European Union goods, exports after inward processing and exports for outward processing (customs procedures).

Transit and warehousing traffic are not covered by European Union statistics.

4. Statistical territory

The statistical territory of the European Union comprises the customs territory of the European Union excluding the French overseas departments. Thus Greenland, the Canary Islands and Ceuta and Melilla are not covered, while the Azores and Madeira for Portugal and the Balearics for Spain are.

From October 1990, the external trade data of the Federal Republic of Germany, the other Member States and EUR 12 relate to the Federal Republic of Germany in its borders after 3 October 1990.

5. *Goods classification*

In this publication the results are broken down by the sections and divisions of the UN Standard International Trade Classification (SITC Rev. 3 since 1988) by means of correspondence tables drawn up by Eurostat on the basis of the Combined Nomenclature (CN).

6. *Trading partners: countries and economic areas*

The results of the European Union are broken down by country of origin, country of consignment and country of destination in accordance with the "Country nomenclature for statistics on European Union external trade and trade between its Member States", referred to as the Geonomenclature (Geonom).

When goods that originate in third countries and are not in free circulation in the European Union are imported, EU statistics state the country of origin. When such goods are exported, the country of destination is specified.

7. *Units*

Values

The statistical value of goods on import is equal to the customs valuation or to a value determined by reference to the concept of customs valuation (in the case, for example, of imports from other Member States). It is the CIF value (cost, insurance, and freight).

The statistical value of goods on export is equal to their value at the place and time at which they leave the statistical territory of the exporting Member State. It is the FOB value (free on board).

The value is expressed in European units of account (ecus). The ecu is a "basket" currency unit based on the market exchange rates of a certain quantity of each European Union currency according to a weighting system involving the five-year average of each Member State's gross national product and intra-EU trade balance. The rates used in this bulletin are averages of daily rates. The bulletin contains a table showing the conversion rates used.

Quantity

The statistics give the net weight of the goods.

8. *Confidentiality*

Most Member States take measures to guarantee the confidentiality of certain flows of goods. The relevant legislation, the procedures for implementing it and the range of goods subject to secrecy vary from one Member State to another.

This confidentiality applies to the most detailed level of the classification used for collecting the data; it may therefore refer to all or only part of a subheading of the Combined Nomenclature. Similarly, confidentiality may apply to imports only or to exports only and to only some of the variables recorded (value, statistical procedure, quantities, country, partner, etc.).

Measures are taken during collection and during processing by Eurostat to minimise the effect of these headings on the results for the European Union as a whole; in particular, trade data on these headings are included at higher levels of aggregation and in the totals.

On the other hand, the statistics are supplied on the strength of customs documents and do not take account of any amendments made by some Member States at the end of the year in drawing up accounts on intergovernmental trade. In view of this, drawing up a trade balance may produce figures that vary sometimes considerably from the official national figures.

9. *Corrections*

Every month the Member States send Eurostat a magnetic tape containing the results for the current month.

In order to correct these results, the Member States also send every month a magnetic tape containing monthly corrections covering the previous 24-month period.

Indices

1. Introduction

Changes over time in the value of trade are influenced by variations in prices and the quantities marketed. Indices are used to measure these two effects. In general, a system of indices is chosen so that the product of the volume index and the price index expresses the value index. Several systems of indices meeting this requirement may be regularly used. The results obtained by using one system will generally be different from those obtained by using another. For various reasons the Member States do not use a common system, and the level of breakdown of their indices by product group and by partner area also varies. Eurostat has therefore devised its own external trade indices which enable it to calculate, for each Member State, European Union indices on a strictly comparable basis. These indices may be consulted on the Trend database developed by Eurostat.

2. Sources of data

There are basically two ways of obtaining information on prices: conducting price surveys by directly approaching importers and exporters and using data collected by the customs authorities. At present only customs data are available in all the Member States. Eurostat therefore calculates indices of unit values (values divided by quantities) and uses them as price variation indicators. The computing programs contain a system for automatically identifying extreme unit values pointing to unlikely price movements.

3. Extreme values

To avoid a number of restrictions involved in using customs data, Eurostat decided to adopt two basic principles in calculating unit value indices: using the most detailed data possible and always bearing in mind that the object of the exercise is to break down variations in value into a "price" component and a "volume" component. Two rules are applied in order to exclude unlikely price movements. The first is that, given the general level of inflation, the price of a product should not be very different from its level a year ago. Any variation of five or more points is regarded as suspect. The second – more restrictive – rule is that the variation in the price of a product in relation to the most recent month for which data are available should not be very different from the average price variation for similar products. Applying these rules prevents extreme variations due to factors that are unconnected with prices and would otherwise distort the unit value index. For products whose unit values are rejected, the variations are taken to be the same as those for similar products.

4. Classification used

The United Nations Standard International Trade Classification (SITC), revised for the third time in 1988, was drawn up on the basis of the Harmonized Commodity Description and Coding System (HS). Using tables of correspondence between the various classifications (Nimexe, Combined Nomenclature and SITC), Eurostat has been able to publish an uninterrupted time series of external trade indices from 1979 to the present.

From 1994 onwards, external trade publications will give indices calculated from 1989 on the basis of the following SITC Rev. 3 aggregates:

TOTAL: all commodities;
0+1: foods, beverages and tobacco;
2+4: crude materials, except fuels;
3: fuels
5+6+7+8: manufactured goods.

By compiling other correspondence tables, Eurostat is able to supply complete time series based on other classifications.

5. *Types of indices and rebasing*

Eurostat calculates Fisher's "ideal" annual chain indices. Since the "basket of goods" marketed at international level varies rapidly over time, the annual chain permits the updating of the index weightings. Each month the changes in unit values in the product groups at detailed level are weighted in order to obtain the changes in unit values in the various major product categories. Since these changes are based on the previous year, a chain of unit values is obtained. The corresponding volume index chain is the ratio of the unit value variation to the variation in value for the month in question compared with the monthly average for the previous year. The indices published each month are calculated by multiplying the above-mentioned chains by the annual indices for the previous year, a fixed reference period having been chosen (at present 1990). The annual unit value chains are obtained by weighting the monthly chains by the volumes, while the annual volume chains are calculated by dividing the annual value variations by the unit value chains.

6. *General comments*

- Only data on normal trade (statistical procedure 1) are used to calculate the unit value indices; however, data on total trade (covering all the statistical procedures) are used to calculate the value indices from which the volume indices are obtained.
- The unit value indices are calculated on the basis of values expressed in ecus.
- For any further information on the methods used to calculate the indices, please refer to Eurostat's specialised publications.

Trends in European Union trade

SEASONAL ADJUSTMENTS: RESULTS

The month of April 1994 saw a marked upturn (+3.6% over the previous month) of the seasonally-adjusted figures for the European Union's exports to the rest of the world. The figures have remained constant since the start of the year after rising throughout 1993. In comparison with the first four months of 1993, the increase was even more noticeable, reaching 16.5%.

During the second half of 1993 the seasonally-adjusted figures for the European Union's imports from the rest of the world showed an upward trend. This trend was interrupted in 1994, with figures stabilizing at a high level. The downturn recorded in April 1994 (-0.4% compared with

the previous month) cannot be considered significant. Indeed, in comparison with the first four months of 1993, imports during the same period in 1994 were up by 9.4%.

The European Union's seasonally-adjusted trade balance has been improving since the third quarter of 1991, and in the first four months of 1994 it recorded a surplus of ECU 1 900 million, thanks primarily to a solid performance in April (+1 600 million). The overall result for the first four months of the year showed a marked improvement over the figure for the corresponding period of 1993, when there was a deficit of ECU 8 100 million as a result of a greater rise in exports.

(1) Seasonal Adjustment via X11/ARIMA procedure.

GLOBAL TRENDS IN EXTERNAL TRADE

EXTERNAL TRADE OF THE EUROPEAN UNION : Results for April 1994(*)

The gap between the rates of change between exports and imports during the first four months of 1994 was +6.2 points for the European Union, -3.8 points for the United States and +0.6 points for Japan.

The external trade deficit of the European Union (EU) between the periods January-April of 1993 and 1994 went down from ECU 14.4 billion to ECU 6.8 billion. This improvement of the extra-EU's trade balance is mainly due to the increase of the exports (15.9%). EU imports grew by 9.7% between these two periods.

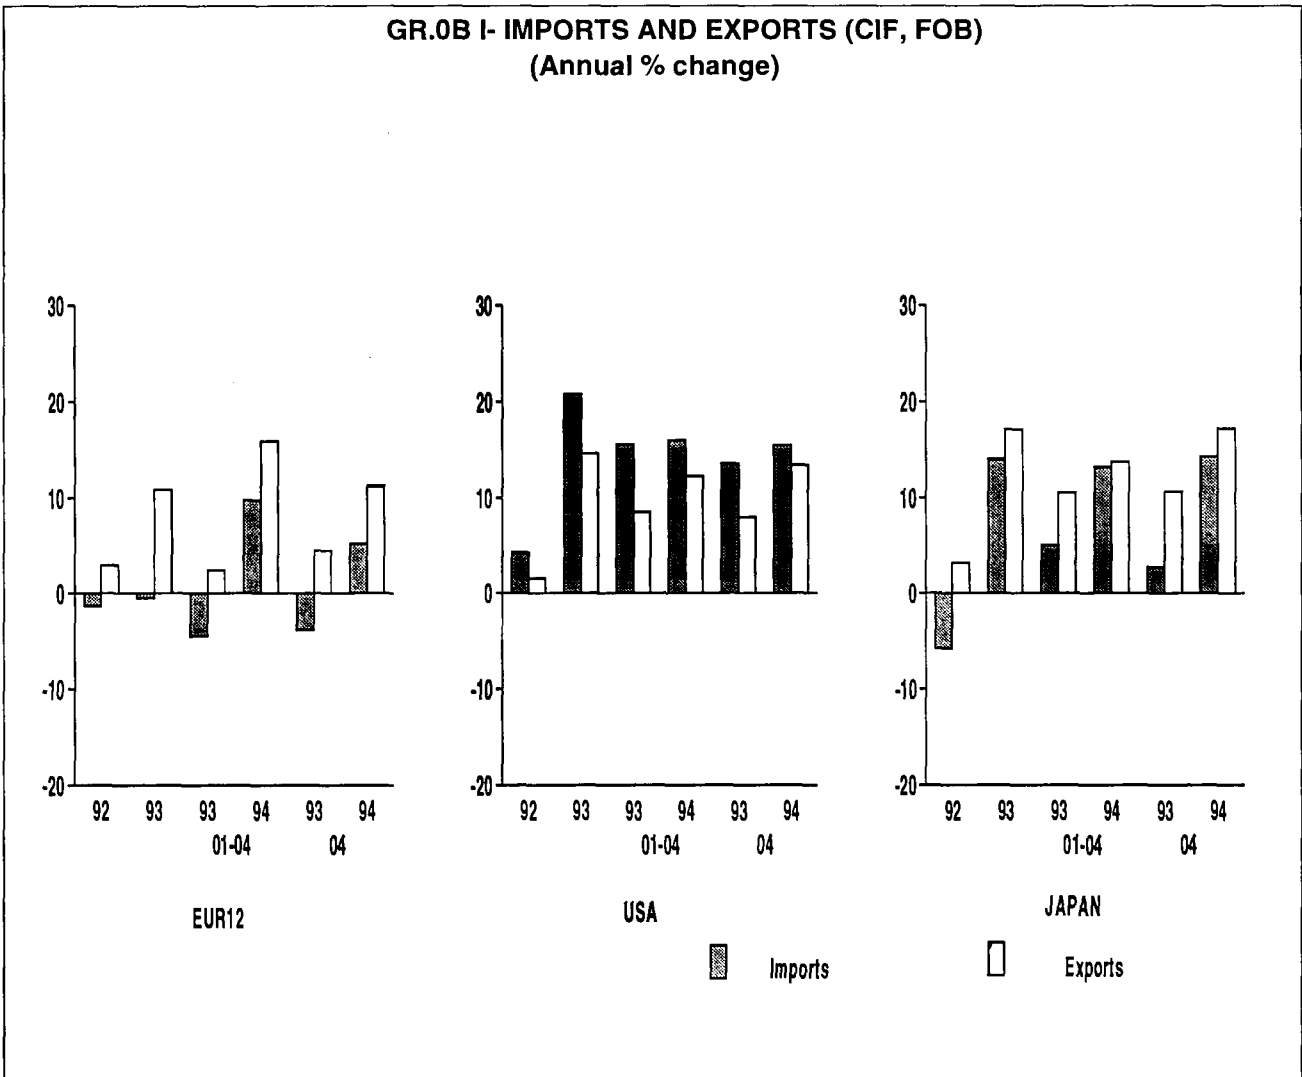

The United States increased its trade deficit from ECU 30.3 billion in the first four months of 1993 to ECU 40.0 billion in the same period of 1994. US imports increased

by 16% between these two periods, while exports rose 12.2%, both figures in ECU terms. In US dollars, these figures were 9.3% and 5.7% respectively.

The Japanese external surplus went up ECU 5 billion to ECU 38.1 billion between the periods January-April of 1993 and 1994. Both imports and exports, when considered in ECU, increased by nearly the same amount (13.2% and 13.8% respectively). In terms of US dollars, there was a difference of 0.5% for the exports, while in terms of Yen both Japanese imports and exports decreased by 5.1% and 5.4% respectively.

() These figures should be regarded with caution, due to the introduction of the INTRASTAT system in the beginning of 1993.*

GLOBAL TRENDS IN EXTERNAL TRADE

EXTERNAL TRADE BY EU MEMBER STATES: Results for April 1994.

Germany was the EU country which registered the largest surplus during the first four months of 1994 (ECU 5.5 billion), while the United Kingdom recorded the biggest deficit during the same period (ECU 8.0 billion)

The two EU countries which showed the most significant improvements in their trade position between the first four months of 1993 and 1994 were **France** (which went up from a deficit of ECU 2.6 billion to a surplus of ECU 2.1 billion) and **Italy** (which recorded a surplus of ECU 3.4 billion in the first four months of 1994). Extra-EU exports of these two countries increased significantly (by 25.8% in the case of France and by 16.4% for Italy), while the increase of their extra-EU imports was more contained (2.6% and 3.1% respectively).

Germany registered the largest surplus during the first four months of 1994 (ECU 5.5 billion, ECU 1 billion up from the same figure of 1993). The percentage of increase of both extra-EU imports and exports between these two periods was rather similar (7.0% and 8.2% respectively).

Ireland and **Denmark** experienced small surpluses during the period January-April of 1994 (ECU 0.1 billion and ECU 0.6 billion respectively, with minor variations from the same figures of 1993). While for Denmark the difference between the rates of increase of extra-EU imports and exports between the first four months of 1993 and 1994 was +5.0%, it was -3.7 percentage points in the case of Ireland.

The **BLEU** registered a trade deficit of ECU 0.3 billion during the period January-April of 1994, an improvement of ECU 0.8 billion from the same figure of 1993. Both extra-EU imports (19.9%) and exports (31.4%) in-

creased strongly between these two periods. **Portugal** did not experience a significant change in its deficit between the first four months of 1993 and 1994 (from ECU 0.8 billion to ECU 0.9 billion). Both extra-EU imports and exports increased by a similar amount (15.6% and 16.1% respectively).

Greece (with ECU 1.1 billion) and **Spain** (ECU 1.3 billion) recorded similar deficits during the period January-April of 1994. It represented an improvement of ECU 0.2 billion and ECU 0.6 billion respectively from the same figures of 1993. While in both countries the extra-EU exports increased sharply during these two periods (by 22.5% and 19.3% respectively), the percentage change of extra-EU imports between the first four months of 1993 and 1994 was positive in the case of Spain (7.7%) and negative for Greece (-1.7%).

The **Netherlands** and the **United Kingdom** were the two EU countries which experienced the largest deficits during the period January-April 1994, with ECU 6.8 billion and ECU 8.0 billion respectively. These two countries experienced a deterioration of their trade positions from the same period of 1993 (of ECU 1.7 billion in the case of the Netherlands and ECU 0.4 billion for the United Kingdom). The percentage changes of extra-EU imports and exports between the first four months of 1993 and 1994 were 20.6% and 13.6% respectively for the Netherlands, while these figures were 14.3% and 17.3% respectively for the United Kingdom.

EUROPEAN UNION TRADE BY PARTNER COUNTRY

TRADE IN TERMS OF VALUE: Results for April 1994.

The EU's trade deficit with the industrialised countries improved by ECU 6.2 billion between the first four months of 1993 and 1994; the EU surplus with developing countries went up ECU 1.5 billion to ECU 5.7 billion between these two periods.

In the first four months of 1994 the EU trade deficit with the **industrialised countries** amounted to ECU 9.5 billion, while for the same period of 1993 this deficit was ECU 15.7 billion. This improvement of the EU trade position with this group of countries between these periods is mainly due to the reduction of the EU trade deficits with the United States and Canada (which went down ECU 4.7 billion to ECU 1.9 billion) and Japan (down ECU 1.3 billion to ECU 8 billion). The EU's trade deficit with the EFTA countries went up ECU 0.5 billion to ECU 1.9 billion between the periods January-April of 1993 and 1994.

EU imports from industrialised countries (which represented 57.4% of total extra-EU imports) increased by 6.8% between the first four months of 1993 and 1994, somewhat under the value for total extra-EU imports (9.7%). While EU imports from the United States and Canada and the EFTA countries increased by 6.4% and 9.5% respectively, EU imports from Japan increased less (by 0.4%).

Exports from the EU to industrialised countries (53% of total extra-EU exports) increased by 16.2%. EU exports to the United States and Canada rose by 25.4% during the periods January-April of 1993 and 1994, and EU exports to Japan by 20.1%. Exports to the EFTA countries were more moderated (8.5% between these two periods).

EU trade with **developing countries** showed a surplus of ECU 5.7 billion during the first four months of 1994, ECU 1.5 billion up from the same period of 1993. The most significant EU surpluses were recorded with Mediterranean countries (ECU 4.5 billion), the Asian Newly

Industrialised Countries (NICs) (ECU 1.7 billion) and the countries of Latin America (ECU 0.4 billion), the EU registered a deficit of ECU 1.4 billion with the ACP countries and of ECU 0.8 billion with the OPEC countries.

EU imports from developing countries (which accounted for 29.5% of total extra-EU imports) increased by 11.3% between the first four months of 1993 and 1994, while for the EU exports this value was 13.4%. EU exports to developing countries accounted for 34.8% of total extra-EU exports. The differences between the percentages of change between EU imports and exports with this group of countries between these two periods were the following: -15.3% for the Asian NICs, +0.6% for the OPEC countries, -6.1% for the Mediterranean countries, +45.3% for the ACP countries and -1.4% for the countries of Latin America.

The balance of trade of the EU with the countries of **Central and Eastern Europe** recorded a surplus of ECU 0.5 billion in the first four months of 1994; this figure was ECU 0.4 billion in the corresponding period of 1993. EU imports from this area (8% of total extra-EU imports) went up 21.1%, while EU exports (nearly 9% of total extra-EU exports) increased by 20.7% between the periods January-April of 1993 and 1994.

Trade with **China** showed a deficit of ECU 3.3 billion in the first four months of 1994, ECU 0.3 billion up from the corresponding figure of 1993. Both EU imports and exports to this country presented sharp increases between these two periods (by 20.7% and 32.1% respectively). EU imports from China accounted for 4% of total extra-EU imports, while this figure was 2.3% for the extra-EU exports.

EUROPEAN UNION EXTERNAL TRADE BY PRODUCT.

TRADE IN TERMS OF VALUE: Results for April 1994.

The improvement in the EU's trade balance between the periods January-April of 1993 and 1994 was mainly due to the positive performance of machinery and transport equipment, which recorded a surplus of ECU 16.5 billion in the first four months of 1994.

The EU's trade surplus in **machinery and transport equipment** (SITC 7) went up ECU 5.6 billion to ECU 16.5 billion between the first four months of 1993 and 1994. While EU imports of this kind of products (around 30% of total extra-EU imports) increased by 11.8%, EU exports (42.3% of total extra-EU exports) rose by 19%.

The trade position of the EU for **chemical products** (SITC 5) also improved between the periods January-April of 1993 and 1994: the EU's surplus went from ECU 8.4 billion to ECU 9.5 billion. Both EU imports and exports of these products increased by a similar amount (15.1% and 14.5% respectively).

The EU's trade deficit for **other manufactured products** (SITC 6+8) went down ECU 2.8 billion to ECU 5.1 billion between the first four months of 1993 and 1994. The increase of the EU's imports of these products between these two periods (7.4%) was less than half the

increase of exports (15.1%). EU imports of other manufactured products represented around 32% of total extra-EU imports, while this figure was nearly 30% for the exports.

The EU's trade deficit in **fuel products** (ECU 15 billion during the period January-April of 1994) was ECU 0.9 billion smaller as in the corresponding period of 1993. EU imports of fuel (around 13% of total extra-EU imports) went down 1.6%, while EU exports (around 3% of total extra-EU exports) rose 11.7%.

The EU's trade deficits in **food, beverages and tobacco** (SITC 0+1) and **raw materials except fuel** (SITC 2+4) were ECU 1 billion and ECU 8.8 billion respectively during the first four months of 1994, a deterioration of ECU 0.6 billion and ECU 1.7 billion respectively from the corresponding figures of 1993. They accounted together for 14% of total extra-EU imports and 10% of total extra-EU exports.

(1) The ECU is a 'basket' monetary unit based on the market exchange rates of certain quantity of each European Union currency weighted on the basis of the average gross national product over five years and of the intra-EU trade of each Member State. The rates used here are averages of the daily rates.

List of products : SITC, rev. 3

0-9 Total trade

0 Food and live animals

- 00 Live animals other than animals of division 03
- 01 Meat and meat preparations
- 02 Dairy products and birds' eggs
- 03 Fish (not marine mammals), crustaceans, molluscs and aquatic invertebrates and preparations thereof
- 04 Cereals and cereal preparations
- 05 Vegetables and fruit
- 06 Sugars, sugar preparations and honey
- 07 Coffee, tea, cocoa, spices, and manufactures thereof
- 08 Feeding stuff for animals (not including unmilled cereals)
- 09 Miscellaneous edible products and preparations

1 Beverages and tobacco

- 11 Beverages
- 12 Tobacco and tobacco manufactures

2 Crude materials, inedible, except fuels

- 21 Hides, skins and fur skins, raw
- 22 Oil seeds and oleaginous fruits
- 23 Crude rubber (including synthetic and reclaimed)
- 24 Cork and wood
- 25 Pulp and waste paper
- 26 Textile fibres (other than wool tops and other combed wool), and their wastes (not manufactured into yarn or fabric)
- 27 Crude fertilizers, other than those of division 56, and crude minerals (excluding coal, petroleum and precious stones)
- 28 Metalliferous ores and metal scrap
- 29 Crude animal and vegetable materials, n.e.s.

3 Mineral fuels, lubricants and related materials

- 32 Coal, coke and briquettes
- 33 Petroleum, petroleum products and related materials
- 34 Gas, natural and manufactured
- 35 Electric current

4 Animal and vegetable oils, fats and waxes

- 41 Animal oils and fats
- 42 Fixed vegetable fats and oils, crude, refined or fractionated
- 43 Animal or vegetable fats and oils, processed; waxes of animal or vegetable origin; inedible mixtures or preparations of animal or vegetable fats and oils, n.e.s

5 Chemicals and related products, n.e.s

- 51 Organic chemicals
- 52 Inorganic chemicals

- 53 Dyeing, tanning and colouring materials
- 54 Medical and pharmaceutical products
- 55 Essential oils and resinoids and perfume materials; toilet, polishing and cleaning preparations
- 56 Fertilizers (other than those of group 272)
- 57 Plastics in primary forms
- 58 Plastics in non-primary forms
- 59 Chemical materials and products, n.e.s

6 Manufactured goods classified chiefly by material

- 60 Complete industrial plant appropriate to section 6
- 61 Leather, leather manufacture, n.e.s, and dressed fur skins
- 62 Rubber manufacture, n.e.s
- 63 Cork and wood manufacture (excluding furniture)
- 64 Paper, paperboard and articles of paper pulp, of paper or of paperboard
- 65 Textile yarn, fabrics, made-up articles, n.e.s, and related products
- 66 Non-metallic mineral manufactures, n.e.s
- 67 Iron and steel
- 68 Non-ferrous metals
- 69 Manufacture of metals, n.e.s

7 Machinery and transport equipment

- 70 Complete industrial plant appropriate to section 7
- 71 Power-generating machinery and equipment
- 72 Machinery specialized for particular industries
- 73 Metal working machinery
- 74 General industrial machinery and equipment, n.e.s, and machine parts, n.e.s
- 75 Office machines and automatic data-processing machines
- 76 Telecommunications and sound recording and reproducing apparatus and equipment
- 77 Electrical machinery, apparatus and appliances, n.e.s and electrical parts thereof (including non-electrical counterparts n.e.s of electrical household type equipment)
- 78 Road vehicles (including air-cushion vehicles)
- 79 Other transport equipment

8 Miscellaneous manufactured articles

- 80 Complete industrial plant appropriate to section 8
- 81 Prefabricated buildings; sanitary plumbing, heating and lighting fixtures and fittings, n.e.s
- 82 Furniture and parts thereof; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings
- 83 Travel goods, handbags and similar containers
- 84 Articles of apparel and clothing accessories
- 85 Footwear
- 87 Professional, scientific and controlling instruments and apparatus, n.e.s
- 88 Photographic apparatus, equipment and supplies and optical goods, n.e.s; watches and clocks
- 89 Miscellaneous manufactured articles, n.e.s

9 Commodities and transactions not classified elsewhere in SITC

- 91 Postal packages not classified according to kind
- 93 Special transactions and commodities not classified according to kind
- 94 Complete industrial plant, not elsewhere specified
- 96 Coin (other than gold coin) not being legal tender
- 97 Gold, non-monetary (excluding gold, ores and concentrates)
