

ENERGIEPREISE ENERGY PRICES PRIX DE L'ÉNERGIE

1978-1990

ENERGIEPREISE

Eine Übersicht über die Verbraucherpreise
für Gas, Elektrizität, Erdölprodukte und Kohle
in der Gemeinschaft bis Juli 1990

ENERGY PRICES

A survey of consumer prices
for gas, electricity, oil and coal
in the Community up to July 1990

PRIX DE L'ÉNERGIE

Un aperçu des prix à la consommation
du gaz, de l'électricité, des produits pétroliers et du charbon
à l'intérieur de la Communauté
mis à jour jusqu'au mois de juillet 1990

Bibliographische Daten befinden sich am Ende der Veröffentlichung
Cataloguing data can be found at the end of this publication
Une fiche bibliographique figure à la fin de l'ouvrage

1. EINLEITUNG

Die Kommission der Europäischen Gemeinschaften sammelt und veröffentlicht zahlreiche Angaben über die Energiepreise in den Mitgliedstaaten. Mit der vorliegenden Veröffentlichung soll für alle grossen Energieträger in möglichst knapper Form über die Preise der letzten Jahre informiert werden. Es wurde daher bewusst nur die Entwicklungen bis zu dem Zeitpunkt betrachtet, zu dem Informationen für alle Energieträger verfügbar waren. Neuere Preisangaben für spezifische Energieträger können der Fachpresse, insbesondere dem Oil Price Bulletin, das wöchentlich von der Kommission veröffentlicht wird, entnommen werden.

Es wurde versucht, aus den zahlreichen verfügbaren Angaben diejenigen auszuwählen, die die wichtigsten Verbraucher für jeden Energiesektor betreffen. In einer derart knapp gefassten Veröffentlichung ist es jedoch nicht möglich, ein vollständiges Bild der sehr komplexen Preis- und Tarifstrukturen, des Ausmasses der regionalen Schwankungen innerhalb der Mitgliedstaaten oder der Preisunterschiede aufgrund vereinbarter Liefermengen und sonstiger Vertragsbedingungen zu geben. Insbesondere die Angaben über die für industrielle Zwecke verwendete Energie sollten mit Vorsicht interpretiert werden. Es handelt sich vorwiegend um Preisangaben für kleinere und mittlere Industrieverbraucher ; für die Energiepreise, die von sehr energieintensiven Industriezweigen bezahlt werden, sind sie deshalb nicht unbedingt repräsentativ. Aus diesen Gründen ist diese Veröffentlichung eher als ein Leitfaden zu verstehen denn als Instrument für den genauen Preisvergleich zwischen den Mitgliedstaaten.

Dieses Heft wird künftig zweimal jährlich veröffentlicht werden und enthält Preise für Januar und Juli, ausgenommen für Erdgas, wofür nur die Januarpreise verfügbar sind. Es gilt als Fortsetzung des früheren Bulletins der Energiepreise der Kommission.

Die Darstellung wurde grundlegend geändert, vor allem um Übereinstimmung mit den EUROSTAT-Normen und den Veröffentlichungen "Gaspreise" und "Elektrizitätspreise" zu erzielen.

Um die aus der Umgestaltung erwachsenen Schwierigkeiten zu vermeiden, wurden die älteren Daten je nach Verfügbarkeit bis Juli 1990 veröffentlicht.

1. INTRODUCTION

The Statistical Office of the European Communities collects and publishes a wide range of information on energy prices in the Member States. The aim of this publication is to summarize as succinctly as possible the most recent price information for all the principal energy sources. It is therefore deliberately confined to trends up to the date at which information for all these energy sources was available. More recent prices for particular sources can be found in the specialist press and notably in the Commission's weekly Oil Price Bulletin.

We have tried to select from the vast store of information available data concerning the most significant types of consumer for each energy sector. We have not, however, been able, in such a condensed publication, to give a full picture of the whole complex of structure and tariffs, the extent of their regional variations within individual countries or the price differentials created by the quantities contracted, and other contractual conditions. Great care must be exercised in interpreting these data, particularly that on energy used by industry. The prices given for industrial sectors usually concern small to medium-sized industrial users and are not necessarily representative of the prices paid by highly energy-intensive industries. This publication should therefore be treated as a guide rather than a means of establishing a strict comparison of prices between Member States.

Energy Prices will be published twice a year indicating consumer prices for January and July, except natural gas where only January prices are available. It replaces and follows on from the "Bulletin of Energy Prices" published by the Commission.

The presentation has been extensively changed to bring it into line with the style used by EUROSTAT, notably for the publications "Gas Prices" and "Electricity Prices".

To avoid any difficulties which this new presentation might pose we include all data available up to and including July 1990.

1. INTRODUCTION

L'Office Statistique des Communautés Européennes recueille et publie de nombreuses informations sur les prix de l'énergie dans les Etats membres. Le but de cette publication est de rassembler de la manière la plus synthétique possible les informations les plus récentes sur les prix couvrant l'ensemble des principales sources d'énergie. Elle se limite par conséquent à l'évolution observée jusqu'au moment où les informations pour toutes ces sources ont été disponibles. Pour certaines sources d'énergie, le lecteur intéressé trouvera des données de prix plus actuelles dans les publications spécialisées, et en particulier, dans le "bulletin Pétrolier", hebdomadaire de la Commission.

Nous avons tenté de sélectionner, parmi les multiples données disponibles, les informations, concernant les consommateurs, les plus significatives de chaque secteur énergétique. Il n'est toutefois pas possible dans un document aussi concentré de refléter totalement la grande complexité des structures des prix et des tarifs, l'étendue de leurs variations régionales à l'intérieur d'un même pays où les différences des prix liées aux quantités contractées et autres conditions contractuelles. L'interprétation de ces données, notamment de celles qui concernent l'énergie utilisée à des fins industrielles, exige une grande prudence. Les prix indiqués pour les secteurs industriels concernent en général des utilisations de petite et moyenne taille et ne sont pas nécessairement représentatifs de prix payés par l'industrie à forte intensité en énergie. Pour toutes ces raisons, cette publication constitue plutôt un guide qu'un instrument permettant une comparaison stricte entre les différents Etats membres.

Cette brochure sera à l'avenir publiée semestriellement et comprend des prix à la consommation pour les mois de janvier et juillet, à l'exception du gaz naturel pour lequel les prix du mois de janvier seulement sont disponibles. Elle remplace et prend la suite du "Bulletin des prix de l'énergie" de la Commission.

Sa présentation a été entièrement modifiée, notamment pour être en conformité avec les normes EUROSTAT et les publications "Prix du Gaz" et "Prix de l'Electricité".

Pour éviter les difficultés dues à cette profonde modification, l'historique de toutes les données en notre possession a été publiée jusqu'en juillet 1990 lorsque les données étaient disponibles.

QUELLENANGABEN UND ANMERKUNGEN ZUR METHODIK

1. Mengeneinheiten

Für die **Endverbraucher** sind die Preise in nationalen Währungseinheiten pro spezifische Einheit (Gigajoule, Kilowattstunde, Liter, Tonne) ausgedrückt. Drei Arten von Preisen werden angegeben (Tabellen Seiten 11 bis 107)

- Preise einschliesslich Steuern
- Preise ausschliesslich Mehrwertsteuer und ausschliesslich absetzbare Steuern (für die Industrie)
- Preise ausschliesslich alle Steuern.

Der Preis einschliesslich Steuern ist der vom privaten Verbraucher tatsächlich gezahlte Preis. Er umfasst den Preis ausschliesslich Steuern plus die Summe aller vom Verbraucher zu tragenden Steuern.

Im Falle des Industriellen Energieverbrauchers schliesst er sowohl die Mehrwertsteuer als auch sonstige abzugsfähige Steuern aus.

2. Verwendete Währungseinheiten

Die Endverbraucherpreise sind in Landeswährung und in gemeinsamen Einheiten (ECU und KKS) ausgewiesen worden, um Preisvergleiche zwischen den Ländern zu ermöglichen. Die drei Einheiten enthalten die Preise mit jeweils allen Steuern, ohne Mehrwertsteuer und absetzbaren Steuern und ohne Steuern.

Der ECU spiegelt Wechselkursschwankungen wider, die durch Faktoren verursacht werden können, die von der inländischen Preisentwicklung unabhängig sind. Der ECU-Kurs bringt daher nicht unbedingt die Kaufkraft einer Währung auf dem inländischen Markt zum Ausdruck.

Der KKS wird in der Weise berechnet, dass die Kaufkraftparität zwischen dem KKS und den einzelnen Landeswährungen die Anzahl nationaler Währungseinheiten ausdrückt, die erforderlich ist, um in jedem Gemeinschaftsland die gleiche Menge an Waren und Dienstleistungen zu kaufen, die man mit einem KKS in der Gemeinschaft erhält.

Es handelt sich also um eine Masseinheit, welche die Kaufkraftrelationen zwischen den Währungen der zu vergleichenden Länder berücksichtigt.

3. Energieträger

A. Gas (Tabellen Seiten 11 bis 34)

Die Preise stammen aus einer regelmässigen Erhebung des SAEG bei Gasversorgungsunternehmen in den Gemeinschaftsländern. Die dabei angewandte Methodik ist in der EUROSTAT-Veröffentlichung "Gaspreise" beschrieben.

Die in dieses Bulletin aufgenommenen Verbrauchertypen entsprechen folgenden Kategorien der EUROSTAT-Veröffentlichung :

Haushaltsgas : D2 und D3_b

Industriegas : I₃₋₁ und I₄₋₁

Für die Inlandspreise wurde eine repräsentative Stadt oder Region berücksichtigt.

B. Elektrizität (Seiten 35 bis 70)

Die Preise stammen aus einer regelmässigen Erhebung der Internationalen Union der Erzeuger und Verteiler elektrischer Energie (UNIPEDA).

Eine ausführliche Beschreibung der dabei angewandten Methoden finden sich in der EUROSTAT-Veröffentlichung "Elektrizitätspreise".

Für die Länder, in denen es keine landeseinheitlichen Tarife gibt, wurden aus den in dieser Erhebung aufgenommenen Städten und Gebieten die repräsentativsten ausgewählt.

C. Mineralölerzeugnisse (Tabellen Seiten 71 bis 82 und Seiten 96 bis 107)

Die geltenden Preise, die der Kommission monatlich von den Mitgliedstaaten gemäss Richtlinie 76/491/EWG vom 4. Mai 1976 mitgeteilt werden. Ausgewiesen sind die am 15. Januar und 15. Juli gültigen Preise für :

Benzin und Dieselöl : Tankstellenpreise

Leichtes Heizöl : Preise für Lieferungen von 2 000 bis 5 000 Liter

Schweres Heizöl : Preise für Lieferungen von weniger als 2 000 Tonnen pro Monat bzw. weniger als 24 000 Tonnen pro Jahr.

D. Kohle (Tabellen Seiten 83 bis 95)

- Hausbrandkohle : durchschnittliche Einzelhandelspreise für kleinere Mengen, die der Kommission von Produzenten, Händlern und aus sonstigen Quellen gemeldet werden;
- Industriekohle : Angaben aus einer regelmässigen Erhebung des Statistischen Amtes der Europäischen Gemeinschaften (SAEG) bei Verbrauchern in den Gemeinschaftsländern. Es handelt sich um Preise frei Verbraucher für lose Lieferungen und komplette Ladungen von aufbereiteter Kohle.

Für beide Sektoren werden die Preise je t SKE angegeben, um einen Vergleich zu ermöglichen.

Tabellen Seiten 11 bis 107 : Endverbraucherpreisreihen

Um die saisonalen Faktoren berücksichtigen zu können, werden die Preise für Januar und Juli ausgewiesen.

Tabellen Seiten 108 bis 111 : Preisvergleich auf Endenergieebene

Diese Tabellen enthalten die Preise der in Ihrem jeweiligen Verbrauchersektor als konkurrierend angesehenen Energieträger, ausgedrückt in ECU pro GJ (Hu).

Tabellen Seiten 112 bis 119 : Preisvergleich auf Nutzenergieebene

Diese Tabellen basieren auf den in Tabellen Seiten 11 bis 107 dargestellten Preisen. Sie geben in einer ersten Gruppe (Tabellen Seiten 112 bis 115) die Preise für Nutzenergie in ECU/GJ an. Eine zweite Gruppe (Tabellen Seiten 116 bis 119) vergleicht für die jeweiligen Verbrauchertypen die Preise von anderen Energieträgern und Erdölerzeugnissen im Zeitablauf.

Die für die Umwandlung in Nutzenergie verwendeten Wirkungsgrade wurden der EUROSTAT-Veröffentlichung "Nutzenergie-Bilanzen" entnommen.

Tabellen Seiten 120 bis 128 : Steuerinzidens

In diesen Tabellen wird die Steuerlast als Prozentsatz des vom privaten Verbraucher bezahlten Preises angegeben.

Für Industrieverbraucher wurden die Mehrwertsteuer und sonstige spezifische absetzbare Steuern nicht berücksichtigt.

NOTES ON SOURCES AND METHODS

1. **Quantity units employed**

For end consumers, the prices are indicated in pages 11 to 107 in currency units per specific unit (gigajoule, kilowatt hour, tonne, litre). Three types of prices were used :

- prices including all taxes
- prices excluding VAT and excluding specific deductible taxes (for industrial consumers)
- prices excluding all taxes.

The prices including all taxes are the prices actually paid by the household consumer. They therefore comprise the price excluding tax plus all taxes borne by the consumer.

In the case of the industrial consumer the price excludes both VAT and other specific deductible taxes.

2. **Monetary units employed**

End consumer prices are expressed in both national currencies and in common units (ECU and PPS) so as to be able to compare prices between countries.

The ECU reflects exchange rate fluctuations which can be caused by factors other than internal price movements. It therefore does not necessarily reflect the purchasing power of a currency in its national territory.

The PPS is calculated in such a way that the purchasing power parity between the PPS and each national currency expresses the number of national currency units required to purchase in each Member State of the Community the same volume of goods and services obtained with one PPS in the Community.

This is a measurement unit which takes into account the purchasing power relationships between the respective currencies of the countries to be compared.

3. Sources

A. Gas (Pages 11 to 34)

These prices are taken from regular SOEC survey of the gas utilities in the Community countries. The methodology is described in the EUROSTAT publication "Gas Prices".

The standard consumer categories used in this bulletin correspond to the following categories in the EUROSTAT publication :

Domestic gas - D2 and D3_b

Industrial gas - I₃₋₁ and I₄₋₁

For national prices a representative town or region has been used.

B. Electricity (Pages 35 to 70)

These prices are taken from a regular survey carried out by the International Union of Producers and Distributors of Electrical Energy (UNIPEDA).

A detailed description of the methods used in this survey is given in the EUROSTAT publication "Electricity Prices".

For the countries which do not have national tariffs we have chosen the towns or regions which are most representative in the survey.

C. Petroleum products (Pages 71 to 82 and pages 96 to 107)

Ruling prices notified by Member States to the Commission each month pursuant to Directive 76/491/EEC of 4 May 1976. The prices given are those recorded at 15 January and 15 July for :

Gasoline and automotive diesel oil = pump prices

Heating gas oil = prices for deliveries of
between 2000 and 5000 litres

Residual fuel oil = prices for monthly deliveries of less
than 2000 tonnes or annual deliveries
of less than 24.000 tonnes

D. Coal (Pages 83 and 95)

- Domestic sector : average retail prices for small quantities notified to the Commission by various sources including producers and dealers.
- Industrial sector: these prices are derived from a regular survey undertaken by the Statistical Office of the European Communities (SOEC) among consumers in the different Community countries. These prices are delivered prices for bulk delivery of treated coal in full loads.

For both sectors prices are given per tce and so can be compared.

Pages : 11 to 107 : Series of end consumer prices

In order to take into account seasonal factors, prices are given for January and July.

Pages 108 to 111 : Comparison of supplied energy prices

These tables show the prices of energy sources which can be regarded as competing in their sector of utilization. Prices are expressed in ECU per GJ (NCV).

Pages 112 to 119 : Comparison of useful energy prices

These tables are based on the prices shown in Pages 11 to 107. They express, in a first group (pages 112 to 115), prices in ECU/GJ of useful energy. A second group (pages 116 to 119) compares over time the prices of other energy sources and those of petroleum products for the same consumer categories.

The efficiency coefficients used for conversion into useful energy have been taken from the EUROSTAT publication : "Useful Energy Balance Sheets".

Pages 120 to 128 : Incidence of taxation

This table shows the amount of tax expressed in the form of a percentage of the price paid by household consumers.

VAT and other specific deductible taxes have not been taken into account in the case of industrial consumers.

NOTES CONCERNANT LES SOURCES ET LA METHODOLOGIE

1. Unités de mesure quantitative

Au niveau de la consommation finale, les tableaux pages 11 à 107 présentent les prix en unités monétaires nationales par unité spécifique (gigajoule, kilowatt-heure, tonne, litre). Trois niveaux de prix ont été retenus :

- prix toutes taxes comprises
- prix hors TVA et hors taxes spécifiques déductibles (pour les consommateurs industriels)
- prix hors taxes.

Le prix toutes taxes comprises est le prix réellement payé par le consommateur domestique. Il correspond donc au prix hors taxes plus l'ensemble des taxes qui restent à la charge du consommateur.

Dans le cas du consommateur industriel ce prix ne comprend ni la TVA ni aucune autre taxe spécifique déductible.

2. Unités monétaires

Les prix à la consommation finale sont exprimés en monnaie nationale et ont été convertis dans les unités communes (ECU et SPA) dans le but de permettre une comparaison entre pays. Pour les 3 unités ils comprennent les prix toutes taxes comprises, hors TVA et taxes spécifiques et hors taxes.

L'ECU reflète les fluctuations des taux de change qui peuvent aussi se produire sous l'effet de facteurs indépendants des mouvements de prix intérieurs. Il ne reflète donc pas nécessairement le pouvoir d'achat d'une monnaie sur le territoire national.

Le SPA est calculé de façon à ce que la parité du pouvoir d'achat entre le SPA et chaque monnaie exprime le nombre d'unités de monnaie nationale nécessaire pour acheter dans chaque pays de la Communauté le même volume de biens et de services qu'on obtient avec un SPA dans la Communauté.

Il s'agit donc d'une unité de mesure des valeurs qui tient compte des rapports de pouvoir d'achat de la monnaie des pays à comparer.

3. Sources

A. Gaz (tableaux pages 11 à 34)

Les prix proviennent de l'enquête régulière menée par l'OSCE parmi les sociétés de distribution de gaz dans les différents pays de la Communauté. La méthodologie est décrite dans la publication EUROSTAT "Prix du Gaz".

Les consommateurs-type retenus pour ce Bulletin correspondent aux catégories suivantes de la publication EUROSTAT :

Gaz domestique : D2 et D3_b

Gaz industriel : I₃₋₁ et I₄₋₁

En ce qui concerne les prix dans les différents pays, la méthode du choix d'une ville ou d'une région représentative a été retenue.

B. Electricité (Tableaux pages 35 à 70)

Les prix proviennent d'une enquête régulière menée par l'Union internationale des Producteurs et Distributeurs d'Energie Electrique (UNIPEDÉ).

Une description détaillée de la méthodologie utilisée pour cette enquête figure dans la publication EUROSTAT "Prix de l'électricité".

Pour les pays dans lesquels il n'existe pas de tarifs au niveau national, ont été choisies, parmi les villes ou les régions qui apparaissent dans l'enquête, celles qui semblent être les plus significatives.

C. Produits pétroliers (Tableaux pages 71 à 82 et pages 96 à 107)

Prix pratiqués tels qu'ils sont notifiés par les Etats membres chaque mois à la Commission conformément à la Directive 76/491/CEE du 4 mai 1976. Les prix indiqués sont les prix relevés au 15 janvier et au 15 juillet pour les consommations suivantes :

Essence et gasoil routier = prix à la pompe
Gasoil chauffage = prix pour livraisons de 2000 à 5000 litres
Fuel oil résiduel = prix pour livraisons inférieures à
2000 tonnes par mois ou 24000 tonnes par an.

D. Charbon (Tableaux pages 83 à 95)

- Secteur domestique : prix moyens au détail pour des petites quantités, notifiés à la Commission par différents milieux, tels que producteurs et marchands;
- Secteur industriel : les prix proviennent d'une enquête régulière menée par l'Office Statistique des Communautés Européennes (OSCE) parmi les consommateurs et négociants dans différents pays de la Communauté. Il s'agit de prix franco consommateur pour des livraisons de charbon en vrac par véhicule complet.

Pour les deux secteurs les prix sont indiqués par tec et sont ainsi comparables.

Tableaux pages 11 à 107 : Séries de prix à la consommation finale

Les tableaux présentent les prix pour les mois de janvier et de juillet, afin de tenir compte des facteurs saisonniers.

Tableaux pages 108 à 111: Comparaison entre prix de l'énergie finale

Dans ces tableaux ont été réunis les prix des énergies qui peuvent être considérées comme concurrentes dans leur secteur d'utilisation. Les prix sont exprimés en ECUS par Gigajoule (PCI).

Tableaux pages 112 à 119: Comparaison entre les prix de l'énergie utile

Ces tableaux sont établis sur la base des prix des tableaux pages 11 à 107. Ils expriment dans un premier groupe (Tabl. pages 112 à 115), les prix en ECU/GJ utile. Un deuxième groupe (Tabl. pages 116 à 119) indique l'évolution dans le temps des rapports entre les prix des autres énergies et ceux des produits pétroliers pour les mêmes catégories de consommateurs.

Pour la conversion en énergie utile les coefficients de rendement retenus sont extraits de la publication EUROSTAT : "Bilans de l'Energie Utile".

Tableaux pages 120 à 128 : Incidence de la fiscalité

Dans ces tableaux le montant des taxes a été reporté, sous forme de pourcentage du prix payé par les consommateurs domestiques.

Dans le cas des consommateurs industriels, la TVA et autres taxes spécifiques déductibles n'ont pas été considérées.

Das Statistische Amt der Europäischen Gemeinschaft sammelt und veröffentlicht zahlreiche Informationen über Energiepreise in den Mitgliedstaaten. Das Ziel dieser Veröffentlichung ist eine möglichst erschöpfende Zusammenfassung der jüngsten Preisinformationen für alle wesentlichen Energiequellen. Es beschränkt sich demzufolge auf Entwicklungen bis zu dem Zeitpunkt, an dem die Informationen für alle diese Energiequellen zur Verfügung stehen. Aktuellere Preise für spezielle Energiequellen findet der interessierte Leser in spezialisierten Veröffentlichungen, insbesondere im wöchentlich erscheinenden **Bulletin der Kommission über Ölpreise**.

The Statistical Office of the European Communities collects and publishes a wide range of information on energy prices in the Member States. The aim of this publication is to summarize as succinctly as possible the recent price information for all the principal energy sources. It is therefore deliberately confined to trends up to the date at which information for all these energy sources is available. More recent prices for particular sources can be found in the specialist press and notably in the Commission's weekly **Oil Price Bulletin**.

L'Office statistique des Communautés européennes recueille et publie de nombreuses informations sur les prix de l'énergie dans les États membres. Le but de cette publication est de rassembler de la manière la plus synthétique possible des informations récentes de prix couvrant l'ensemble des principales sources d'énergie. Il se limite, par conséquent, à l'évolution observée jusqu'au moment où les informations pour toutes ces sources sont disponibles. Pour certaines sources d'énergie, le lecteur intéressé trouvera des données de prix plus actuelles dans les publications spécialisées, et en particulier dans le **Bulletin pétrolier**, hebdomadaire de la Commission.
