COMMUNICATION FROM THE COMMISSION TO THE COUNCIL

**EUROPEAN UNION STRATEGY FOR TRADE IN
LIVE PLANTS AND FLORICULTURAL PRODUCTS (CN code 0603)**

COMMISSION COMMUNICATION TO THE COUNCIL

EUROPEAN UNION STRATEGY FOR TRADE IN LIVE PLANTS AND FLORICULTURAL PRODUCTS (CN code 0603)

I. INTRODUCTION

The common organization of the market in live plants and floricultural products is confined to setting quality standards and providing very incomplete protection in relation to imports from non-member countries (except as part of possible safeguard measures).

The sector is one where trade with non-member countries is important in terms of exports and imports, both of which are rising although at different rates (see Annexes 1 and 2).

Exports from the Community of all products covered by CN code 06 have climbed from 214 000 t in 1988 to 242 000 t in 1995 while imports over the same period are up from 137 000 t to 251 000 t. The result in 1995 is, for the first time ever, a negative export balance (- 8 300 t). In value terms, however, the balance is still positive (ECU 107 000).

Cut flowers account for almost 50% of imports (108 000 t), a trend that has remained unchanged over the last ten years. Imports consist mainly of other flowers (59.56%), followed by roses (15.53%) and carnations (9.6%) with chrysanthemums, gladioli and orchids making up the remainder.

As a result of agreements concluded with a large number of non-member countries, it has to be said that 80% of fresh cut flowers are imported into the Community free of customs duty.

Israel, which has always been the Community's main supplier of cut flowers, has now been overtaken by Kenya (accounting respectively for 25 196 t and 25 575 t or 23.27% and 23.62% of Community imports). There is every indication that Kenya, along with other African countries such as Zimbabwe (the Community's fourth largest supplier), will go on exporting more and more flowers to the European Union since production in those countries is undertaken by large industrial firms employing inexpensive labour to produce 'bulk products', i.e. generic products requiring no specialist know-how (in general carnations). In addition to that, weather conditions in those countries mean that production costs can be kept low.

Imports from Colombia stand at a maximum of around 20 000 t a year, making it the Community's third largest supplier of cut flowers - mainly carnations - (20 772 t in 1995).

Four-fifths of imports arrive in the seven months between 1 November and 31 May when Community production is to meet demand; the duty payable is 15%.

II. PREFERENTIAL ARRANGEMENTS CURRENTLY IN FORCE (CN code 0603) (see Annex 3)

(a) Mediterranean countries

Of the Mediterranean countries that have concluded agreements with the European Union, four, namely Israel, Morocco, Cyprus and Jordan, have been benefiting from concessions in respect of plants and flowers since 1987, i.e. since Spain and Portugal became members of the Community. In order not to upset unduly the traditional trade flows which those countries had with the Community, provision was made for the gradual dismantling of customs duties in the context of quotas for imports of fresh cut flowers, subject in the case of roses and carnations to observance of certain price levels which may not be less than 85% of the Community producer price.

With the introduction of the revised Mediterranean Policy in 1992 the dismantling of the remaining tariff was to be speeded up in two 50% stages, which resulted in a rate of duty of 0% on plants and flowers from the four countries in question from 1 January 1993, and the quotas were to be increased annually up to the end of 1995 by 3% in the case of Israel, Morocco and Jordan and 5% in the case of Cyprus.

Israel and Morocco are the only significant trading partners among these four countries, with exports of fresh cut flowers to the Union in 1995 amounting to 25 196 t and 2 869 t respectively.

The conclusion of new agreements with Israel, Tunisia and Morocco resulted in, among other things, distinctly larger tariff quotas for those countries.

In the case of Israel, an additional 5 000 t quota for 'exotic' flowers, together with an import period (1 November to 15 April), was added to the quota applicable for the period 1 January to 31 December 1996 (19 500 t), bringing the total for fresh cut flowers to 24 500 t. This quantity will be maintained in future years. On top of that a further 100 t of dried flowers¹ was granted. The 19 500 t quota had all been used up by 31 May 1996. Of the additional quota, barely 42 t has been used.

Reciprocal concessions were obtained for the Union, namely a 0% rate of customs duty for the whole of the plant and flower sector together with a 1 000 t reference quantity for fresh cut flowers and reciprocal plant protection measures given practical expression in a joint declaration.

In the case of Morocco, the Community quota of 336.5 t for fresh cut flowers was increased to 2 000 t for the period 1995/96, to 2 400 t for 1996/97, to 2 600 t for 1997/98 and to 3 000 t for 1998/99 and subsequent periods. These new quotas encompass the bilateral French quota which existed for fresh cut flowers and dried

¹ Council Decision of 22 December 1995 on the conclusion by the European Community of an Interim Agreement on trade and trade-related matters between the European Community and the European Coal and Steel Community, of the one part and the State of Israel of the other part (OJ No L 71, 20 March 1996, p. 1).

flowers with the exception of large-flowered roses (500 t) and the special quota for large-flowered roses (663.5 t). During each of these periods the quota is divided in two:

- a fixed part of 336.5 t representing the former Community quota open from 1 November to 31 October for all products falling within CN code 0603 10. This was entirely used up on 16 January 1996;
- a variable part set at 1 663.5 t for 1995/96, 2 063.5 t for 1996/97, 2 263 t for 1997/98 and 2 663.5 t for 1998/99 and subsequent periods together with a timetable starting on 15 October and ending on 14 May for roses, gladioli and chrysanthemums, and ending on 31 May for carnations. These quantities may be drawn down only when the 336.5 t quota has been used up. This quota was not used. At the end of 1995/96 there remained 545 t.

An additional 'exotic flowers' quota comprising other flowers (CN codes 060310 29 and 060310 69) was opened, amounting to 1 600 t for 1995/96 (15 October to 14 May), 1 700 t for 1996/97, 1 900 t for 1997/98 and 2 000 t for 1998/99 and subsequent periods. Only 3 t from this quota was used in 1995/96.

To recapitulate, the total quotas for Morocco are:

- 3 600 t for 1995/96
- 4 100 t for 1996/97
- 4 500 t for 1997/98
- 5 000 t for 1998/99 and subsequent periods².

- The reciprocal concessions granted by Morocco do not concern products falling within CN code 0603 but rather those covered by CN code 0601 and certain CN code 0602 products, the maximum customs duties and preferential tariff quotas having been set for these products as follows: 35% duty and a 200 t quota for CN code 0601, 2.5% duty and a 250 t quota for CN code 0602 20 and 35% duty and a 600 t quota for CN code 0602 99.

- The quotas for fresh cut flowers set for Jordan and Cyprus are 56 t and 75 t respectively for the period 1 November 1996 to 31 October 1997³. To date the quotas granted for earlier years have not been used.

² Proposal for a Council and Commission Decision on the conclusion of a Euro-Mediterranean Agreement establishing an association between the European Communities and their Member States of the one part, and the Kingdom of Morocco, of the other part (COM(95) 740 final) and Commission Regulation (EC) No 1099/96 of 19 June 1996 amending Council Regulation (EC) No 1981/94 opening and providing for the administration of Community tariff quotas for certain products originating in Algeria, Cyprus, Egypt, Israel, Jordan, Malta, Morocco, the Occupied Territories, Tunisia and Turkey, and providing detailed rules for extending and adapting these tariff quotas (OJ No L 146, 20.6.1996, p. 8).

³ Jordan: Decision 87/512/EEC of 28 September 1987, OJ No L 297, 21.10.1987, p. 18.
Cyprus: Decision 87/607/EEC of 21 December 1987, OJ No L 393, 31.12.1987, p. 1.

- The agreement with Jordan does not include any reciprocal concessions while that with Cyprus provides for reductions in the rate of duty on imports of cut flowers from the European Union, with no quantitative restrictions (1996: 12.4% instead of 77%; 1997: 6.5% instead of 64%; and from 1998 onwards: 0% instead of 64%).

- From 1 January 1996 the West Bank and Gaza Strip was granted a 1 500 t quota for fresh cut flowers. In this quota the minimum price conditions apply to roses and carnations. To date the quota, which expires on 31 December 1996, has not been used. It is planned to renew the quota volume for 1997⁴. The quota, adopted autonomously by the Community, is likely to be given contractual effect in the forthcoming Euro-Mediterranean Agreement with the Palestinian Authority which may also include certain reciprocal arrangements.

- The agreement with Tunisia was signed in early April 1995 and has still to be ratified by the Member States. It grants a concession for cut flowers of 750 t. No request was made for advance measures for flowers in 1996⁵. A reciprocal concession is granted for products falling within CN code 0602 99 (reduced duty of 43% and a quota volume of 200 t) but none for products falling within CN code 0603.

- Under an agreement dating from 1986⁶ Turkey qualifies for a 0% rate of duty for cut flowers and is not subject to any restrictions (as to timetable or volume) whatever. As the Community's sixth largest supplier of fresh cut flowers (3 368 t in 1995 compared with 806 t in 1988), it ranks before Morocco therefore which occupies eighth place. The present agreement grants no reciprocal concessions.

- The situation is the same for cut flowers from Malta⁷. In 1995 there were no imports into the Community whereas in 1990 the volume imported stood at 90 t. Malta grants a reduced rate of duty of 35% (as against the rate under the GATT) for all products falling within CN code 06 from the European Union.

It is the responsibility of the Council to open and provide for the administration of Community tariff quotas adopted under the above Agreements by both extending and adapting them⁸.

(b) ACP countries

⁴ Council Regulation (EC) No 539/96 of 25 March 1996 amending Regulations (EEC) No 1134/91, (EEC) No 4088/87 and (EC) No 1981/94 with regard to the tariff arrangements applicable to imports into the Community of products originating in the West Bank and the Gaza Strip (OJ No L 79, 29.3.1996, p. 6).

⁵ Doc. COM(95) 235 final of 31 May 1995.

⁶ Council Regulation (EEC) No 4115/96 of 22.12.1986 (OJ No L 380, 31.12.1986, p. 16).

⁷ Council Decision 89/208/EC (OJ No L 81, 23.3.1989, p. 1).

⁸ Council Regulation (EC) No 1981/94 opening and providing for the administration of Community tariff quotas for certain products originating in Algeria, Cyprus, Egypt, Israel, Jordan, Malta, Morocco, the Occupied Territories, Tunisia and Turkey, and providing detailed rules for extending and adapting these tariff quotas (OJ No L 199, 2.8.1994, p. 1), as last amended by Commission Regulation (EC) No 1099/96 (OJ No L 146, 20.6.1996, p. 8).

Kenya is currently the European Union's largest supplier of cut flowers (25 575 t in 1995) with Zimbabwe occupying fourth place. As ACP countries both these countries qualify for exemption from customs duties. Concessions granted to the ACP countries under the Lomé IV Convention are fixed up to the year 2000⁹. The ACP countries qualify also for the scheme of generalized tariff preferences (SGP). The SGP for agricultural products, which applies from 1 January 1997, gives the same level of preference as the Lomé Convention to the less advanced developing countries, 39 of which are members of the Lomé Convention. With exceptionally low production costs, these countries are exploiting this opportunity and exporting increasing quantities of flowers to the Community.

(c) SGP countries

The new SGP which is to apply until 30 June 1999¹⁰ provides for the reintroduction of full customs duties where the quantities put into free circulation with preferential benefit exceed the volume of imports from one of those countries into the Community corresponding to the figure half-way between the highest and the average quantity for the last four years for which statistics are available (Article 14 and footnote 3 to Annex VI, p. 57). The fact that this intervention mechanism has been introduced improves appreciably the protection for Community producers.

It is important to point out here that imports from Ecuador have shown a substantial increase in recent years (up from 380 t in 1988 to 4 353 t in 1995), making this country the Community's fifth largest supplier.

Another new point of interest to Community producers is the fact that cut flowers are now classified as very sensitive products for which customs duties is limited to 15%.

From 1 January 1998 special incentive arrangements in the form of additional preferences may be granted to beneficiary countries covered by the scheme which request such arrangements in writing and provide proof that they have adopted and actually apply domestic legal provisions for the protection of workers and/or the environment.

(d) East European countries

Tariff concessions for fresh cut flowers (concessions having been granted for the other CN code 06 sub Chapters) have not been granted to the countries of eastern Europe, other than to Bulgaria for roses, carnations and orchids and to the Czech Republic for all products falling within CN code 0603, in both cases with a quota volume¹¹. For dried flowers, on the other hand, all countries apart from Latvia and Lithuania¹² have been

⁹ Council Regulation (EC) No 1194/96 of 27 June 1996 (OJ No L 161, 29.6.1996, p. 2) extending Regulation (EEC) No 3066/95 of 22.12.1995 (OJ No L 328, 30.12.1995, p. 31).

¹⁰ Council Regulation (EC) No 1256/96 of 20 June 1996 applying multiannual schemes of generalized tariff preferences from 1 July 1996 to 30 June 1999 in respect of certain agricultural products originating in developing countries (OJ No L 160, 29.6.1996, p. 1).

¹¹ Council Regulation (EC) No 1194/96 of 27 June 1996 (OJ No L 161, 29.6.1996, p. 2).

¹² Council Regulation (EC) No 1926/96 of 7 October 1996 (OJ No L 254, 8.10.1996, p. 1).

granted a rate of duty equivalent to 35% of the most favoured nations duty (MFN). All these countries along with Slovenia have applied for accession.

A large number of concessions were granted by these countries in respect of Community ornamental horticultural exports in the form of tariff quotas at a reduced rate of duty (see Annex 4).

Of these countries, Poland, Hungary and Slovenia have become major trading partners in recent years, chiefly in respect of Community exports (totalling 12 094 t, 5 052 t and 9 733 t respectively in 1995). There is every reason to believe that this trade will go on expanding.

It would appear, however, according to those with specialist knowledge of the sector, that the market offering the most promising potential is Russia where Community exports are rising sharply.

III. NEGOTIATIONS IN HAND

Negotiations are under way with a number of Maghreb-Mashreq countries for some of which the cut flower sector is likely to be of considerable importance before long. Because of this their requests are in some cases quite substantial.

Egypt, for example, is asking for a quota of 30 000 t for cut flowers despite the fact that at the moment it does not export. The Commission is proposing a duty free quota of 500 t.

Lebanon began with a request for 3 000 t of cut flowers later reducing it to 1 000 t. In this case too the Community is offering only 100 t for the same reasons as in the case of Egypt.

Jordan would like its present concession for cut flowers to be increased. The Commission has suggested raising it from 56 t to 100 t which would virtually double the volume now admitted duty-free.

Negotiations are near completion with Turkey, the innovation for cut flowers being the grant in the Community of a duty-free concession for 100 t. Agreement has not yet been reached on the Community request for the inclusion or the Turkish proposal for the non-inclusion of roses and carnations. Similarly, a decision has yet to be taken on the grant to the European Union of a duty-free concession for 200 t of bulbs.

Following on from the Uruguay Round and enlargement, negotiations on the updating of the Europe agreements are about to end with the central and eastern European countries. Most of the results of the negotiations have now been put into effect autonomously and reciprocally and are summarized at II(d) above.

The negotiating brief/directions for a free trade agreement with South Africa, adopted in March 1996, excludes cut flowers. On account of the existing volume of exports (more than 1 800 t in 1995) a request for concessions is nevertheless expected.

IV. FORESEEABLE NEGOTIATIONS

The agreement in force with Algeria does not contain any concession for flowers. Formal negotiations for a new agreement have not begun and Algeria's position regarding flowers is unknown.

In the case of the West Bank and Gaza Strip, lastly, for which the Council brief envisaged making the existing 1 500 t quota binding, at the outset of the negotiations for a new agreement the Palestinian delegation asked for the quota to be raised to 5 000 t.

V. STRATEGY

Before dealing with this item, two general comments should be made:

- The Commission must abide by the negotiating brief adopted by the Council. In some cases this allows for a certain degree of flexibility. In others, it is very specific and gives details of the groups of products for which concessions may be granted, the volumes to which the concessions apply, time tables and customs duties.
- The agreements with non-member countries are based on comprehensive negotiations which go far beyond the negotiations on plants and flowers.

A more specific comment will round off this introduction: where concessions for plants and flowers are requested by non-member countries, such requests should be examined with full knowledge of the facts, that is to say, on the basis of the figures for production in those countries (regions, products concerned, periods, surface area under flowers and plants, volumes, etc.), their traditional exports (which products are exported to which countries, the relevant quantities, periods and price levels) and their potential capacity for increasing those exports.

I. Logically, a distinction should be made here too between the various non-member countries in terms of the preferential arrangements that apply or will be applied to them.

(a) ACP countries

As indicated above, the concessions granted to the ACP countries under the Lomé Convention are fixed up to the year 2000. Given that the context is very specific, it would be premature to put forward a strategy that is to apply to ornamental horticultural products at the start of the next century. A study will be made when the time is right.

The Commission has recently published a Green Paper on relations between the European Union and the ACP countries on the eve of the 21st century: Challenges and options for a new partnership. Consideration of what is to become of the cut flower sector will have to take place in the context of the options set out in the Green Paper for trade relations.

(b) SGP countries

The same holds good in the case of the new SGP which will apply up to 30 June 1999 and which is itself subject to quite specific rules, such as for example, the possibility of reintroducing the normal duty where there is a sharp rise in imports.

(c) Mediterranean countries, South Africa and other countries

On the basis of past experience and foreseeable developments, the following eight-part strategy has been devised:

(1) The grant of concessions as part of tariff quotas based on traditional exports together with the introduction of a growth element reflecting the need to adapt the quotas, where they are used up speedily, and the sensitivity of the sector within the European Union.

In a situation where there are no exports, a limited quantity could be set.

(2) The introduction for the most sensitive products (roses and carnations) of minimum price conditions, meaning not less than 85% of the Community producer price.

(3) The establishment of partial rather than total reductions in duty, modulated in relation to the sensitivity of the products at Community level.

(4) The introduction of import periods, confined to those where Community production is not liable to be upset (in principle, therefore, the winter months). The prospect could be offered of importing certain exotic plants and flowers that are not produced in the Community throughout the year at reduced rates of duty.

(5) Concessions restricted to clearly defined products (with eight figures in the Combined Nomenclature, such as carnations, chrysanthemums, etc.) rather than to groups of products (with less than eight figures in the CN, such as for example fresh cut flowers falling within CN code 0603 10).

(6) Reciprocal concessions requested from the more developed countries (see Agreement with Israel, the Commission's proposals to Turkey). It is essential in this context that the Community's requests for reciprocity be clearly formulated and taken into consideration, the aim being to stimulate Community exports.

(7) Plant protection requirements must be absolutely transparent and mutually binding.

(8) The countries concerned must give an undertaking to sign the UPOV Convention on the protection of breeders of new varieties of plants.

II. Quite apart from the arrangements in question, it is planned to launch and expand promotion campaigns for Community ornamental horticultural products in non-member countries which conclude trade agreements with the European Union.

Promoting these products outside the Community will favour the expansion of the market for Community products on which there are no export refunds.

* Ces pays appartiennent aussi au groupe ACP (Afrique, Caraïbes, Pacifique) ou sont des TOM français (Territoires d'outre-mer)

** Concernant les fleurs, l'Afrique du Sud ne bénéficie pour l'instant du SPG que pour certains produits des codes 0602 et 0604

*** La République yougoslave de Macédoine appartient en fait au groupe "Autres bénéficiaires" qui jouit des mêmes concessions que le groupe "Autres pays SPG".
