May 15, 1986

EMBARGO: Not for publication or broadcast  
before 15.00 HOURS, THURSDAY, 15 MAY 1986.

£16 200 000 REGIONAL FUND GRANTS TO THE UNITED KINGDOM

The European Commission has just approved new grants from the European Regional Development Fund (ERDF) amounting to £16.2m in respect of 94 investments in the United Kingdom. This round of grant concerns only "small" projects, i.e. those where the investment cost is less than £3m. Among the projects approved are about twenty small industrial investments throughout the UK, contributing to the creation or maintenance of 857 jobs.

Major beneficiaries of this round of grants are the West Midlands, Scotland and the North-West receiving grants totalling £3.2m, £6.9m and £1.3m respectively.

This is the third allocation from the European Regional Development Fund from the 1986 budget. The first two allocations concerned only the new Member States, Spain and Portugal.

The full list of new grants is attached.

Noteworthy amongst the grants to infrastructure projects are:

- a grant of £92 000 made to workshop developments in Cumbernauld in Strathclyde, Scotland. This project was approved by the Commission in the light of new guidelines on workshop units approved for ERDF aid agreed between the Commission and the Member States following a review in 1985. These guidelines provide in particular that the units should be used primarily to house industrial/service activities which would themselves qualify for Regional Fund assistance and that the aid rate should be 35 per cent of the investment cost of the units;

- in the West Midlands £566 500 has been granted to the Woodgate Valley Business Park, Phase II, in Birmingham, and £49 000 to the University of Warwick Science Park distributor road. Both investments will enhance modern manufacturing facilities and support the development of high technology industry in this region suffering from particularly acute industrial decline;

- in Northern Ireland a grant of £112 500 has been made towards the provision of a direct railway link to the Ulster Folk and Transport Museum in North Down to further enhance this major tourist attraction;

- a grant of £700 000 has been made to develop a major tourist facility at the West Kirby Marine Lake in the North-West of England. This is expected to enhance the attractiveness of the area and generate considerable economic spin-off benefits in this area.
