

INDUSTRIAL SHORT-TERM TRENDS

Monthly

INDEX OF INDUSTRIAL PRODUCTION

The decline in industrial production came to an end during the first half of 1981, but no clear upturn in the trend is evident yet.

The provisional index of industrial production in the European Community was 117.3 (1975=100) in June 1981, representing a decline of 3.6% compared with the June 1980 figure. The fall-off in the first six months of 1981 was about 4.5% compared with the corresponding figure for the previous year, and 2.3% compared with that for 1979.

The seasonally adjusted index was 113.2, which is roughly the same as the indices for April (113.0) and May (112.9). On the other hand, the short-term growth indicator for the last two months (see Table II for average seasonally adjusted indices for the last three months compared with the previous three months) dropped slightly, falling gradually from 0.2% in April (revised figure) to -0.4% in June. However, these successive falls are of little significance as they can be largely put down to the effect of the temporary upturn in February 1981.

Moreover, a comparison of average seasonally adjusted indices for recent quarters shows that industrial production in 1980 fell most markedly from the second quarter on, and evened out during the first six months of 1981, as can be seen from the following figures (quarterly fall-off or rise compared with the previous three-monthly period): +0.2% (I-80), -1.2% (II-80), -2.6% (III-80), -1.2% (IV-80), -0.4% (I-81), -0.4% (II-81).

When production trends in member countries (see also Table II) in recent months are considered, unstable growth trends can be observed for countries such as Germany (where surprisingly the growth rate became negative again at the end of the first half of the year), the Netherlands and Denmark. In France, Italy, Belgium, Luxembourg and the United Kingdom, however, some signs of recovery or stabilization are apparent.

As far as the main groups of industrial products are concerned, trends were also subject to fluctuations, with the exception of intermediate products, which still show a basic downward trend (approximately -1%:Table II). The trend in production of consumer and capital goods is wavering between a modest improvement and a slight decline (consumer goods: -0.4%; capital goods: +0.5%).

N O T E S

1. Significance of growth rates A and B

— per working day:

- A last 12 months with respect to preceding 12 months;
- B latest month with respect to the corresponding month of the previous year;

— seasonally adjusted:

- A last 3 months with respect to the preceding 3 months;
- B latest month with respect to the previous month.

2. Methodological notes relating to the tables are published as supplements to the monthly bulletin.

3. For additional information on the Index of Industrial Production contact EUROSTAT, tel.: 4301-2808 or 4301-3208.

For additional information on all other indicators contact EUROSTAT, tel.: 4301-3521 or 4301-3208.

4. N.B. : indicates that data are not available;
— indicates a non-existent series.
