

INDUSTRIAL SHORT-TERM TRENDS

Monthly

INDEX OF INDUSTRIAL PRODUCTION

Continuing downward trend in industrial production in October 1982

The provisional index of industrial production in the Community for October 1982 stood at 114.8 (1975=100), well below the corresponding figure for the previous year (-3.5%) for the fifth consecutive month since June. The loss in production recorded for the first ten months of 1982 compared with the same period in 1981 was thus -1.1%, from which a total loss of -1.5% can be deduced for the whole of 1982 compared with 1981, assuming that the current negative trend carries on into December.

The seasonally adjusted index has declined continually since its sharp fall in June 1982 to reach a level of only 111.3 (1975=100) in October. It is significant that since July this index has fallen below 112.5 (1975=100), level which corresponds to the average index for the year 1978.

The trend in industrial production in the four large Community countries, however, reveals several less gloomy signs, especially in France and the FR of Germany, where increases of 1.4% and 0.4% respectively (compared with the previous month, seasonally adjusted) were recorded for October 1982. In Italy, on the other hand, production fell sharply again in October (-3% compared with September), causing a marked deterioration in the short-term growth indicator (from -2.5% in September to -3.8% in October: see seasonally adjusted indices, %A). Finally, in the United Kingdom, this same indicator, which was still negative in July, has risen steadily to reach +2.2% in October 1982.

Note for readers

- ★ The delays in the publication of this edition are due to data-processing problems for which the author service is not responsible.
- ★ This edition of 'Short-Term Industrial Indicators' is accompanied by the 1982 Supplement, which describes the methodology for the indices of the number of wage and salary earners, gross wages and salaries and hours worked. It also contains retrospective series of indices of the number of wage and salary earners and wages and salaries.
- ★ This bulletin, which has so far been published in three versions (English, French and German), will be published in a single trilingual version with an adapted cover as from the next edition (N° 1-1983).

Means of transport (excluding motor vehicles)	40
Food, drink and tobacco industry	42
Textile industry	44
Footwear and clothing industry	46
III BUILDING & CIVIL ENGINEERING	49

1. NOMENCLATURE OF INDUSTRIAL ACTIVITIES

The indices included in this bulletin cover industry as it is defined in divisions 1 to 4 of the General Industrial Classification of Economic Activities within the European Communities (NACE). In part III of the bulletin there are also some indicators relating to NACE division 5 (building and civil engineering). An extract of divisions 1 to 4 of NACE can be found in appendix I to issue n° 5-1982.

2. INDICES OF PRODUCTION

2.a The index of production reflects changes in the volume of production. For industry as a whole, it also indicates changes in volume (at constant prices) in the gross added value created by industry, the branch indices being aggregated (like the aggregation at Community level for a given industrial branch) by means of a system of weighting according to gross added value (in principle, at factor costs). The indices are adjusted in two stages: first they are adjusted to take account of the varying number of working days in the month and this is followed by seasonal adjustment according to EUROSTAT's own particular method. Further information on the index of production may be obtained from supplement 01.1978 of this bulletin.

2.b Meaning of %A and %B:

2.b.1 indices of production per working day:

- %A: the last twelve months as compared with the previous twelve months;
- %B: the last month as compared with the corresponding month of the previous year.

2.b.2 seasonally adjusted indices of production:

- %A (short-term growth): the last three months as compared with the previous three months;
- %B: the last month as compared with the previous month.

2.c The descriptions and definitions in 2.a and 2.b above are also applicable to the indices of production for building and civil engineering.

2.d The indices of production for non-Member States (Spain, Portugal, the United States and Japan) are taken from OECD sources. The indices for Spain and Japan are not adjusted for differences in the number of working days.

3. Unlike the index of production (see 2.a above), the other indices (turnover, orders, exports, imports, number of employees, gross wages and salaries) are not adjusted to allow for differences in the number of working days in each period before they are seasonally adjusted.

4. INDICES OF TURNOVER AND ORDERS RECEIVED

These reflect changes in turnover (overall sales, including sales for export) and orders received at current prices. For detailed definitions, see also supplement N° 12-1980 to this bulletin.

5. INDICES OF IMPORTS AND EXPORTS BY INDUSTRIAL BRANCHES

These are indices of imports or exports (special trade), at current prices (respectively c.i.f. or f.o.b.), of industrial products classified according to the industrial branches to which they belong. It should be emphasized that this classification implies the need to make certain choices in allocating external trade products to overall groups of products according to a nomenclature of industrial activities, and that even comparability between the indices for imports and those for exports is limited.

The indices for the EEC as a whole refer only to trade with non-Member States.

NOTE

For the time being the indices are based on the external trade of the Community of Nine, excluding Greece, which became a full member of the Community with effect from 01.01.1981.

6. INDICES OF THE NUMBER OF EMPLOYEES AND OF GROSS WAGES AND SALARIES

6.1 The number of employees includes all persons employed by the firm (manual workers and salaried employees on the company's payroll).

6.2 Gross wages and salaries cover all sums paid out to persons employed by the company in remuneration for the work they do, including taxes and social security contributions payable by the employee and deducted by the employer, but excluding social security and other contributions payable by the employer. A methodological note on these two indices is being prepared and will be published as a supplement to a future issue of this bulletin.

7. BUILDING AND CIVIL ENGINEERING (PART III)

For information on the index of production and its layout, and on the index of the number of employees, see sections 2 and 6.1 above.

The indices for authorised dwellings and dwelling starts and completions only give a picture of activity in the residential building sector, whereas the other two types of indices also cover non-residential building and civil engineering.

8. GRAPHS

The graphs cover the trend in production and/or employment, whereby the trend is defined as the moving average over three months (after seasonal adjustment) in the case of the index of production; in the case of employment, for which the indices are quarterly, a monthly series is obtained by linear interpolation (without seasonal adjustment).

9. ADDITIONAL INFORMATION

The information included in this bulletin has been taken from the CRONOS data bank, which may be accessed via the EURONET network. Information on CRONOS-EURONET or on the information given in this bulletin may be obtained from EUROSTAT in Luxembourg (tel. 4301-3521 or 4301-3208).
