## VORWORT

Das Statistische Amt der Europäischen Gemeinschaften veröffentlicht im Rahmen der „Agrarstatistischen Hausmitteilungen“ in der Reihe „Monatliche Fleischstatistik“ die verfügbaren kurzfristigen Statistiken der Mitgliedstaaten über die Erzeugung von Vieh und Fleisch.

Das SAEG entspricht damit dem Wunsch der Benutzer der Reihe „Agrarstatistik“ die dort veröffentlichten jährlichen Angaben über die Vieh- und Fleischerzeugung zu aktualisieren und die jahreszeitliche Entwicklung aufzuzeigen.

Die Zusammenstellung und laufende Verbesserung der Statistiken wird in Zusammenarbeit mit den zuständigen Vertretern der Mitgliedstaaten im Rahmen der Arbeitsgruppe „Statistik der tierischen Erzeugnisse“ beraten. Die Angaben werden von den zuständigen nationalen Dienststellen übermittelt. Das SAEG dankt allen Beteiligten für ihre unermüdliche Mitarbeit.

**Teil I** zeigt die monatliche Entwicklung der Schlachtungen, den Austausch des Aussenhandels aller Länder von lebenden Tieren nach Tierarten: Rinder-Kälber-Schweine-Schafe und Ziegen-Einhufer. Es könnte sein, dass die nationalen Statistiken nicht vollständig oder nur vorläufig sind (siehe die Anmerkungen der Länder), so sind die Angaben nicht immer vergleichbar und können nicht ohne weiteres auf EG-Niveau addiert werden.

Um einen Eindruck von der Gesamterzeugung der EG zu geben, hat das SAEG eine Schätzung der EUR-9 Summen vorgenommen, bei der die fehlenden Angaben einiger Länder ergänzt worden sind.

**Teil II** zeigt in **Gewicht** die gleichen monatlichen Informationen wie Teil I. Anmerkungen mit denselben Einschränkungen wie Teil I.

**Teil III.** Der Inhalt von Teil III kann verschieden sein, je nach Aktualität und Anfragen; Ergebnisse der Viehbestände, kurzfristige Produktionsvorschau, Struktur der Aufzucht, Durchschnittsgewicht der geschlachteten Tiere usw.... in Anwendung der Richtlinien 68/161/EWG v. 27.3.68 und 73/132/EWG v. 15.5.1973.

### Hinweis

Die methodischen Anmerkungen im einzelnen sowie das Quellenverzeichnis sind auf den Seiten V-VI der Einleitung zu finden und erscheinen nicht in den statistischen Tabellen.

## AVANT-PROPOS

L'Office Statistique des Communautés Européennes publie dans le cadre des «Informations internes de la statistique agricole» dans la série «Statistique mensuelle de la viande» les statistiques des États membres disponibles concernant le bétail et la viande.

L'O.S.C.E. répond ainsi aux vœux exprimés par les utilisateurs d'actualiser les données annuelles sur la production de bétail et de viande de la série «Statistique agricole» et de dégager les variations saisonnières.

Les données de cette publication sont élaborées et constamment améliorées en collaboration avec les responsables des États membres dans le cadre du Groupe de travail «Statistique des produits animaux». Elles sont transmises par les services nationaux compétents. L'O.S.C.E. remercie tous ceux qui apportent leur concours à l'élaboration de cette publication.

**La Partie I** retrace l'évolution mensuelle du nombre des abattages totaux, des échanges du Commerce extérieur, tous pays, en animaux vivants par catégories d'animaux: Gros bovins-veaux-porcs-moutons et chèvres-chevaux. Quelquefois les données nationales sont partielles ou provisoires (voir les remarques par pays), en conséquence les données ne sont pas toujours comparables ou additionnables directement au niveau de la Communauté.

Afin de donner un aperçu de la production totale au niveau de la CEE, l'O.S.C.E. publie une estimation de l'ensemble des abattages EUR-9.

**La Partie II** retrace **en poids** les mêmes informations mensuelles que la partie I. Noter les mêmes restrictions.

**Partie III.** Le contenu de la partie III sera variable selon l'actualité et la demande: résultats d'enquêtes sur le cheptel, prévisions de production à court terme, structure des élevages, poids moyen des animaux abattus etc.... en application des directives 68/161/CEE du 27.3.68 et 73/132/CEE du 15.5.1973.

### Avertissement

Le lecteur voudra bien consulter les pages V-VI de l'introduction pour les notes méthodologiques et les indications de sources qui ne figurent pas dans les tableaux statistiques.

METHODISCHE ANMERKUNGEN

- FLEISCH -

Schätzung EUR-9 und EUR-6

Die EUR-Summen für die Schlachtungen insgesamt enthalten bei den Haupttierarten eine Schätzung des Anteils derjenigen Schlachtungen, die in bestimmten Ländern nicht erfasst werden. In diesen Ländern schätzen die zuständigen Dienststellen die monatlichen Angaben.

Definitionen

Schlachtungen insgesamt: Anzahl und Schlachtmengen der innerhalb des Landes vorgenommenen Schlachtungen von Tieren inländischer und ausländischer Herkunft.

Die Schlachtmengen werden in Schlachtgewicht ausgedrückt, worunter das Gewicht des geschlachteten und ausgeweideten Tieres einschliesslich Knochen zu verstehen ist, von dem nur einige Teile wie z.B. Kopf (ausser bei Schweinen) Haut, ein Teil der Glieder usw. abgezogen sind.

Dieser Definition entsprechend sind die essbaren Innereien nicht einbegriffen, wohl aber die Schlachtfette innerhalb des Schlachtkörpers.

- Ein- und Ausfuhr lebender Schlachttiere, schlachtreif.

- Bruttoeigenerzeugung an Fleisch: Angebot an schlachtreifen Tieren inländischer Herkunft (= Schlachtungen insgesamt + Ausfuhr lebender Schlachttiere - Einfuhr lebender Schlachttiere).

NOTE METHODOLOGIQUE

- VIANDE -

Estimation EUR-9 et EUR-6

Les totaux EUR des "abattages totaux" des espèces principales contiennent une estimation de la partie des abattages non relevée dans certains pays. Pour ces pays, les services compétents estiment les données mensuelles.

Définition de base

Abattages totaux: le nombre et les quantités des animaux abattus à l'intérieur d'un pays qu'ils soient d'origine indigène ou étrangère.

Les quantités abattues sont estimées en poids en carcasse, on entend par là le poids de l'animal abattu et dépouillé, déduction faite de certaines parties telles que la tête (à l'exception des têtes de porcs), la peau, une partie des membres, les viscères, les intestins, etc.

Par conséquent, on ne tient pas compte des abats comestibles tandis que les graisses comprises dans le poids en carcasse sont incluses.

- Importations et exportations des animaux vivants de boucherie prêts à l'abattage.

- Production indigène brute.- viande: offre des animaux d'origine indigène prêts à l'abattage (= abattages totaux + Exportations animaux vivants de boucherie - Importations animaux vivants de boucherie).

VIANDE (10 tableaux)

In order to speed up the dissemination of information, EUROSTAT is publishing concise balances in the various monthly parts of the series: "Internal Information" ("Crop production", "Monthly Statistics: Meat", "Monthly Statistics: Milk", "Monthly Statistics: Eggs"). The concise Supply Balance Sheets printed on green pages in this publication are the national balances received by EUROSTAT at the date of publication. When the balances are indicated as provisional, final balances will be published later in this series.

For methodology and explanatory notes reference should be made to the publication "Agricultural Statistics" (see following table).

Afin d'accélérer la diffusion de l'information, EUROSTAT publiera des bilans abrégés dans les divers fascicules mensuels de la série "Informations Internes" ("Production végétale", "Statistique mensuelle: Viande", "Statistique mensuelle: Lait", "Statistique mensuelle: Oeufs"). Les bilans d'approvisionnement abrégés figurant dans les pages vertes de ce fascicule sont les bilans nationaux reçus par EUROSTAT à la date de parution. Au cas où les bilans sont indiqués comme provisoires, les bilans définitifs seront publiés ultérieurement dans cette même série.

Pour la méthodologie et les notes explicatives, se référer aux publications "Statistique Agricole" (voir tableau qui suit).
