

COMMISSION OF THE EUROPEAN COMMUNITIES

COM(80) 294 final

Brussels, 22nd May 1980

PROPOSAL FOR A COUNCIL REGULATION (EEC)
CONCERNING THE DEFINITIVE COLLECTION OF THE PROVISIONAL
ANTI-DUMPING DUTY IMPOSED ON IMPORTS OF STANDARDIZED
ELECTRIC MULTI-PHASE MOTORS HAVING AN OUTPUT OF
MORE THAN 0.75 kW BUT NOT MORE THAN 75 kW,
ORIGINATING IN THE USSR

(presented by the Commission to the Council)

COM(80) 294 final

EXPLANATORY MEMORANDUM

By Regulation (EEC) N° 451/80 of 22 February 1980 the Commission imposed a provisional anti-dumping duty on certain motors from the USSR. By virtue of the anti-dumping Regulation (EEC) N° 3017/79, the Commission must submit to the Council, one month before the expiration of this measure, a proposal regarding the adoption of definitive measures.

Since the imposition of the provisional duty the Commission has noted that the parties concerned have neither contested nor furnished any arguments against the preliminary determination which led to the imposition of the provisional duty and that consequently the conclusions of the investigation should remain unchanged.

However, since the imposition of the provisional duty, undertakings to increase prices, similar to those given by the exporting organisations of the other State-trading countries, have been given in the name of the Soviet exporter Energomachexport and have been accepted by the Commission.

In the circumstances the procedure may be closed without the imposition of a definitive duty.

However, because of the injurious dumping, involved in the Soviet exports and because of the tardy nature of the undertakings given by the Soviet exporter, the Commission submits to the Council the attached proposal for a Council Regulation regarding the definitive collection of the amounts secured by way of provisional duties with regard to the USSR.

COUNCIL REGULATION (EEC)

concerning the definitive collection of the provisional anti-dumping duty imposed on imports of standardized electric multi-phase motors having an output of more than 0.75 kW but not more than 75 kW, originating in the USSR

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Regulation (EEC) No 3017/79 of 20 December 1979 on protection against dumped or subsidized imports from countries not members of the Community⁽¹⁾, and in particular Articles 11 and 12 thereof,

After hearing the opinions expressed by the Advisory Committee set up under that Regulation,

Whereas in March 1979 the Commission received a complaint lodged by the Coordinating Committee for the Common Market Association of Manufacturing of Rotating Electrical Machinery (COMEL) on behalf of the great majority of Community manufacturers of low voltage electric motors; whereas the complaint contained evidence of the existence of dumping in respect of like products originating in Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland, Romania or the USSR, and of substantial injury resulting therefrom;

Whereas the said evidence was sufficient to justify initiating an investigation;

Whereas the Commission accordingly announced, by a notice published in the *Official Journal of the European Communities*⁽²⁾, the initiation of a proceeding concerning imports of standardized electric multi-phase motors having an output of more than 0.75 kW but not more than 75 kW originating in Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland, Romania or the USSR, and commenced an investigation of the matter at Community level;

Whereas the Commission officially so advised the exporters and importers known to be concerned;

Whereas the Commission has given the parties directly concerned the opportunity to make known their views in writing and to be heard orally, and to

meet so that opposing views might be presented and rebuttal arguments put forward;

Whereas the majority of the parties concerned with the exception, notably, of the Soviet exporter have taken this opportunity;

Whereas, in order to arrive at a preliminary assessment of the dumping margin and injury, the Commission carried out inspections at the premises of the great majority of exporters' agents and importers, including: in Belgium, Industrial Electric PVBA (Kortrijk) and Symkens SPRL (Liège); in Denmark, R. Frimodt Pedersen A.S. (Daugård), Arntlund Handels APS (Vejens), Nordelektro A.S. (København) and A. Johnson & Co. A.S. (Charlottenlund); in the Federal Republic of Germany, Horst Schenk (Brilon) and Fritz Oberstenfeld (Hamburg); in France, Sermes S.A. (Strasbourg), Les Industries Françaises (Wissous), Sodimef S.A. (Strasbourg), Sorice S.A. (Ivry-sur-Seine) and Sofhim S.A. (Paris); in Italy, Mez Italiana S.p.A. (Milano), Imex S.p.A. (Milano), Elprom S.p.L. (Parma), Elektropolcantoni & Co. S.p.A. (Milano), Veneta Motori S.N.C. (Padova), B.A.M.E. di Bartolomei Bruno (Pistoia) and Enital S.p.A. (Milano); and in the Netherlands, Rotor C.V. (Eibergen) and Peja Elektrotechniek B.V. (Arnhem); whereas the Commission contacted a number of other agents and importers; whereas the Commission also carried out inspections at the premises of the main complainant Community producers, viz in Belgium, ACEC (Charleroi); in the Federal Republic of Germany AEG-Telefunken AG (Oldenburg), Bauknecht GmbH (Stuttgart), and Siemens AG (Erlangen); in France, Alsthom-Union (Paris), Compagnie Electro-Mécanique S.A. (Paris) and Leroy-Somer S.A. (Angoulême); and in Italy, Ansaldo S.p.A. (Genova) and Ercole Marelli S.p.A. (Milano);

Whereas, in order to establish whether the abovementioned imports were dumped, the Commission had to take into account the fact that Bulgaria, Czechoslovakia, the German Democratic Republic, Hungary, Poland, Romania and the USSR are not market economy countries;

Whereas, for that reason, the Commission had to base its calculations on the normal value in a market economy country; whereas, in that connection, the complaint had cited the Austrian and Spanish domestic markets;

⁽¹⁾ OJ No L 319, 31. 12. 1979, p. 1.

⁽²⁾ OJ No C 103, 25. 4. 1979, p. 9.

-3-

Whereas, on the basis of contacts with Austrian and Spanish producers and inspections carried out on their premises, and in the light of the arguments put forward in the course of the hearings by the exporters concerned, *inter alia* disputing the comparability of the Spanish market, a comparison with the price of electric motors on the Austrian domestic market appeared reasonable at least for the purposes of a preliminary finding of dumping, since the manufacturing processes and technical standards and also the technology are similar, while the large volume of imports, notably from the countries cited in the complaint, appeared to guarantee a fair level of prices;

Whereas the preliminary assessment of dumping has accordingly been effected by comparing the average Austrian ex-works prices for sales over the period from September 1978 to September 1979 with prices for imports into the Community from the countries in question over the same period;

Whereas, to take due account of the differences affecting price comparability, the maximum discounts for bulk orders and cash payment, and sales and service costs borne by the Austrian manufacturers, have been deducted from Austrian list prices; whereas only fob or cif export prices were available, but no adjustment has been effected to take account of the transport costs included in those prices; whereas all the above factors have had the effect of reducing the difference between Austrian ex-works prices and export prices;

Whereas the above preliminary examination of the facts showed the existence of dumping in respect of the imports considered in the investigation, the dumping margin being equal to the amount by which the normal value as established above exceeded the export price to the Community; whereas the margin varied depending on the type of motor, the exporting country, and the importing Member State; whereas, for example, the said margin in every case exceeded 19.65 ECU for B3 type 1.1 kW 1 500 rpm motors, which are one of the commonest types;

Whereas, with regard to the injury caused to the Community industry, the evidence available to the Commission showed that imports into the Community of the electric motors in question originating in the countries covered by the investigation have risen from approximately 462 000 units in 1975 to 856 000 units in 1978, and reached 469 000 units for the first six months of 1979;

Whereas the best information available suggests that for 1978 imports of standardized electric multi-phase motors with an output of more than 0.75 kW but not more than 75 kW originating in the countries covered by the investigation took a market share of 28 % in the Community, 44 % in Belgium, 41 % in Denmark and France, 46 % in Italy and 12 % in the Federal Republic of Germany (excluding inter-German trade);

Whereas in 1978 imports into the Community originating in the Soviet Union accounted for 5.25 % of the imports from all the countries in question; whereas in France that share was 13.5 %, and in both the Federal Republic of Germany and Italy, 4.3 %, those three countries being the main importers among the Member States of electric motors originating in the USSR;

Whereas the resale prices in the Community of motors originating in the countries in question have undercut those of like motors produced by Community manufacturers by between 10 % and 51 %; whereas, for example, the resale price of a B3 type 1.1 kW 1 500 rpm motor imported from the USSR was 37 % lower than the price of the same motor produced in France, and 51 % lower than the price of the same motor produced in Italy;

Whereas the consequent impact on the Community industry, whose volume of production has been stagnating since 1976, has taken the form of a depression of Community prices, in real terms, making it impossible in most instances to cover production costs;

Whereas most of the Community firms consequently made considerable losses on the standardized multi-phase motors covered by the procedure, and this put at risk the profitability of the rotary machinery industry as a whole, and has already led to an appreciable fall in the numbers directly employed in the manufacture of electric motors, from 28 300 in 1974 to 23 600 in 1978;

Whereas injuries caused by other factors which could adversely affect the Community industry, such as the volume and prices of other imports, or stagnation of demand, have been examined and have not been attributed to the imports under consideration;

Whereas the preliminary examination of the facts showed the existence of dumping, and there was sufficient evidence of consequent injury;

Whereas, in these circumstances, the interests of the Community called for action to prevent injury being caused during the proceeding;

Whereas such action took the form of a provisional anti-dumping duty imposed on imports of the electric motors concerned;

Whereas, in the course of the investigation, undertakings were given by the exporting bodies in Bulgaria (Electroimpex - Sofia), Czechoslovakia (Zavody Silnoproute Elektrotechniky - Prague), the German Democratic Republic (Elektrotechnik - Import-Export - Berlin), Hungary (Transelektro - Budapest), Poland (Elektrim - Warsaw) and Romania (Electroexportimport - Bucharest); whereas the price increases resulting from the application of these undertakings convinced the Commission that it was not necessary to take protective action in respect of products originating in those countries;

Whereas, in these circumstances, imports from these countries have been exempted from application of the duty;

Whereas, since the imposition of the preliminary anti-dumping duty no supplementary information has been received from the parties concerned and no-one has contested or provided arguments against the preliminary determinations made by the Commission;

Whereas, therefore, the calculations and determinations of dumping and material injury remain unchanged;

Whereas, meanwhile, since the imposition of the provisional duty, similar undertakings to those given by the export organizations of the other State-trading countries concerned have been given by the Soviet exporter Energomachexport (Moscow); whereas these undertakings have been accepted by the Commission¹;

¹ Cf. Decision of the Commission accepting undertakings given by the firm Energomachexport (Moscow).

Whereas, in these circumstances, the procedure can be closed without the imposition of a definitive anti-dumping duty;

Whereas, however, because of the existence of dumping by the Soviet exporter, the material injury suffered by the Community industry and taking into account the lateness of the undertaking given by Energomachexport and the need not to penalise the exporters who have previously given similar undertakings, the interests of the Community require that the provisional duty imposed is collected,

HAS ADOPTED THIS REGULATION:

Article 1

The amounts guaranteed under the provisional anti-dumping duty applied by Regulation (EEC) No 451/80 are definitively levied.

Article 2

This Regulation shall enter into force on 22 June 1980.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the Commission

The President
