COM(80) 378 final

EXPLANATORY NOTE

On 12 June 1980, the Commission submitted a proposal for a regulation on a common measure to improve the conditions under which agricultural products in the eggs, poultry meat, cereals and animal feed sectors in Northern Ireland are processed and marketed.

Given that the pigmeat sector is faced with difficulties in processing and marketing which are similar to those relating to eggs and poultry, it is desirable that the area of application of the proposal should be extended to this sector.

Amendment of the proposal for a Council Regulation on a common measure to improve the conditions under which agricultural produce in the eggs, poultry-meat, cereals and animal feed sectors in Northern Ireland are processed and marketed.
