A. Introduction

1. Preamble

This Eurostat publication relates to social protection data in Europe. The detailed tables on social benefits for each country are in an additional publication: "Expenditure and receipts – detailed breakdown of social benefits by function, 1994-2003".

Data for the Cyprus are available for the first time in this publication. These data could be revised in the future.

The tables are compiled from data supplied by the national statistical offices or the ministries in charge of social protection statistics. The 2003 data available are shown in this publication.

More detailed statistics can be found in the Social Protection domain ("population and social conditions" theme, "living conditions and welfare" sub-theme) of Eurostat's free data, which contains, for example, chronological data since 1990.

Eurostat wishes to thank the national statistical offices and ministries, without whose collaboration this project will not have been possible.

2. Methodology ("ESSPROS 1996")

The data on expenditure and receipts of social protection schemes contained in this publication are drawn up according to the ESSPROS Manual 1996.

ESSPROS stands for European System of integrated Social PROtection Statistics, a harmonised system providing a means of

analysing and comparing social protection financial flows.

Social protection is defined as follows in the ESSPROS Manual 1996:

"Social protection encompasses all interventions from public or private bodies intended to relieve households and individuals of the burden of a defined set of risks or needs, provided that there is neither a simultaneous reciprocal nor an individual arrangement involved.

The list of risks or needs that may give rise to social protection is fixed by convention as follows:

- 1) *Sickness/Health care*
- 2) *Disability*
- 3) *Old age*
- 4) *Survivors*
- 5) *Family/children*
- 6) *Unemployment*
- 7) *Housing*
- 8) *Social exclusion not elsewhere classified."*

3. Expenditure

Expenditure of social protection schemes is broken down into social benefits, administration costs, transfers to other schemes and other expenditure.

Social benefits consist of transfers, in cash or in kind, by social protection schemes to households or individuals to relieve them of the burden of the eight risks or needs ("social protection functions") listed above.

4. Receipts

Social benefits are classified:

- by function (1. Sickness/Health care, 2. Disability, etc...)
- by whether or not they are subject to means-testing (i.e. by whether the beneficiary's income and/or wealth falls below a specified level);
- by type:
 - cash benefits (periodic and lump sum)
 - benefits in kind
 - re-routed social contributions.

Re-routed social contributions are payments that a social protection scheme makes to another scheme in order to maintain or accrue the rights of its protected people to social protection from the recipient scheme.

Administration costs are the costs charged to the scheme for its management and administration.

Transfers to other schemes are unrequited payments made to other social protection schemes.

Other expenditure consists of miscellaneous expenditure by social protection schemes such as interest payable by the scheme to banks and other creditors in respect of loans taken up and payment of taxes on income or wealth.

Receipts of social protection schemes comprise social contributions, general government contributions, transfers from other schemes and other receipts.

Social contributions are the costs incurred by employers on behalf of their employees or by protected persons to secure entitlement to social benefits.

Within social contributions by employers a distinction is made between actual and imputed contributions.

Actual contributions include all payments made by employers to social protection schemes.

Imputed contributions are the costs incurred by employers from granting social benefits, or from promising social benefits payable in the future, to their employees, former employees and their dependants, without involving an autonomous insurer and without maintaining separate reserves for this purpose in their balance sheets.

Social contributions by protected persons are broken down by socio-occupational status: employees, self-employed, pensioners and others.

A social protection scheme may also receive a third type of social contribution: re-routed social contributions (see paragraph 2 above).

General government contributions relate to the financing of social protection expenditure by central, state, regional or local governments in their role as public authorities rather than as employers. They consist of:

- the cost to general government of running public non-contributory schemes;
- financial support provided by general government to other resident social protection schemes.

The category of General government contributions is broken down into Earmarked taxes and General revenue.

Earmarked taxes are the proceeds from taxes and levies which, by law, can be used only to finance social protection.

General revenue are general government contributions from sources other than earmarked taxes.

Transfers from other schemes are unrequited payments received from other social protection schemes.

Other receipts come from a variety of sources, such as interest and dividends.

Receipts are also broken down by sector of origin according to the national accounts, i.e.

- corporations;
- general government (central government, state and local government, social security funds);
- households;
- non-profit institutions serving households;
- rest of the world.

5. National values - Treatment of transactions between schemes

The national values contained in this publication are the sum of the values of all the individual social protection schemes.

Some financial flows of schemes refer to transactions with other social protection schemes.

The main transactions between social protection schemes are:

- transfers between schemes;
- re-routed social contributions.

These are recorded in ESSPROS 1996 as expenditure of the scheme from which they originate and as receipts of the scheme to which they are paid.

In order to obtain national values (i.e. for the overall system of social protection in each country), these transactions need to be consolidated, for both expenditure and receipts. In practice, they are not included in the calculation of aggregate values.

6. Contents of tables

Data relate to the 25 Member States of the European Union, Iceland, Norway and Switzerland.

Totals are calculated for the European Union (25 countries) EU25, the European Union (15 countries) EU15, the euro-zone composed of twelve countries (Eurozone12) and the European Economic Area (EEA).

Eurozone12 includes Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland.

EU15 includes the Eurozone12 countries plus Denmark, Sweden and the United Kingdom.

EU25 includes the EU15 countries plus Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovak Republic. As Cyprus data are available only for 2001 and 2002, EU25 data for 2000 and 2003 are calculated without Cyprus.

EEA includes the EU25 countries plus Iceland, Liechtenstein and Norway. No data are available for Liechtenstein.

The data relate to the years 1995 to 2003. Data for social benefits by function are also available for the period 1990-1994 on the Eurostat database (free data).

Part B contains expenditure tables.

Section B1 contains comparative tables of total expenditure in the different countries. Section B2 contains tables on the structure of expenditure (social benefits, administration costs and other expenditure).

Section B3 contains more detailed tables on the structure of benefits by type (means-tested and non-means-tested, cash benefits and benefits in kind, etc.) for each country.

Part C contains tables of social benefits broken down by function.

Section C1 contains tables on the total of each function.

Section C2 contains tables of benefits specific to each function, for each

country). This section is in an additional publication: "Expenditure and receipts – detailed breakdown of social benefits by function, 1994-2003".

Part D contains tables of receipts.

Section D1 contains tables on the structure of receipts by type (social contributions, general government contributions, etc.)

Section D2 contains tables on the structure of receipts by sector of origin (corporations, general government etc.).

Section D3 contains more detailed tables on the structure of receipts by both type and sector of origin, for each country.

Part E contains economic and demographic data used in the calculations in the tables. The extract date of these data is November 2005.

7. Important remarks

Social benefits are recorded without any deduction of taxes or other compulsory levies payable on them by beneficiaries. Users of the data are warned that, for some types of analysis, the use of data on gross benefits may give rise to misleading conclusions¹.

On the other hand, because of the consolidation of transactions between schemes - in particular the re-routed social contributions - (see paragraph 4 above), social benefits do not include the social contributions which social protection schemes pay on behalf of their beneficiaries.

¹ A module to estimate net social benefits is under going development.

Benefits granted within the framework of social protection can take many forms; however, in this publication (i.e. within the framework of ESSPROS 1996 “core system”), they are limited to:

- cash payments to protected persons,
- reimbursements of expenditure made by protected persons,
- goods and services provided directly to protected persons.

These are all direct benefits in the sense that they imply a direct rise in the disposable income of beneficiaries.

In the sections B1, B2, C1 and D1 the currency ECU/EURO is obtained by converting the national currency applying the ECU conversion rates in use until 1998 and the EURO conversion rates as from 1999.

In the sections B3, C2 and D3 the currency of the euro-zone countries is referred to the EURO currency. For the historical data the EURO currency is obtained by converting the old national currency with the 1999 (2000 for Greece) EURO conversion rates. Consequently the data for the period 1994-1998 (1994-1999 for Greece) is different from that in the sections B1, B2, C1 and D1.

Some data are still provisional (abbr. “p”), or estimated (abbr. “**”). These data may be subject to ordinary revisions.

Many footnotes have been included in the tables where problems of comparability between figures may persist.

Data for the United Kingdom are on a financial year basis and relate to the year from 1 April to 31 March (for example, data for 2000 relate to the year from April 2000 to March 2001).

C. Social benefits by function

The functions of social protection

Function	Brief description
1. Sickness/Health care	Income maintenance and support in cash in connection with physical or mental illness, excluding disability. Health care ended to maintain, restore or improve the health of the people protected irrespective of the origin of the disorder.
2. Disability	Income maintenance and support in cash or in kind (except health care) in connection with the inability of physically or mentally disabled people to engage in economic and social activities.
3. Old age	Income maintenance and support in cash or in kind (except health care) in connection with old age.
4. Survivors	Income maintenance and support in cash or in kind in connection with the death of a family member.
5. Family/children	Support in cash or kind (except health care) in connection with the costs of pregnancy, childbirth and adoption, bringing up children and caring for other family members.
6. Unemployment	Income maintenance and support in cash or in kind in connection with unemployment.
7. Housing	Help towards the cost of housing.
8. Social exclusion not elsewhere classified	Benefits in cash or kind (except health care) specifically intended to combat social exclusion where they are not covered by one of the other functions.

¹ Since 1996 the public administration pay actual social contributions toward a new institution called INPDAP for the pensions of the civil servants.

² Since 1998 the social contributions for the Health Service are abolished and substituted by a new income (IRAP) paid only by who carries on an economic activity (at local government level).

³ See footnote number 2.

Totals are calculated in ECU/EURO for EU25, EU15, Eurozone12 and EEA.

In accordance with ESSPROS data, GDP data do not include Cyprus data for EU25 in 2000 and 2003, Cyprus (in 2000 and 2003) and Lichtenstein data for EEA.

The GDP extract date is November 2005.

These conversion rates indicate the national currency units needed, in the various countries, to purchase the same basket of goods and services. If national currency values are converted using this rates, this gives values that are directly comparable in terms of the purchasing power of households.

The PPP conversion rates extract date is November 2005.

¹ The decrease between 1997 and 1998 was due to the cut back of the duration from 2 to 1,5 years.

² The birth grant was cancelled in general as from 1997. The residual amount is for special cases.

³ For the period 1994-1996 the breakdown between non means-tested and means-tested benefits in kind is not available.

¹ Some old age pensions became means-tested as from 1996.

² As from 1998 the age limit for part time pensions is temporary lowered to 56 years (the law will be in force until the end of 2002), whereas it was 60 years old in the private sector and 58-62 in the public sector until 1997.

³ In 1996 some special pensions were paid out in one-time.

¹ Anticipated old age pensions are included under old-age pension until 2002.

² The breakdown between "Accommodation", "Assistance in carrying out daily tasks" and "Other benefits in kind" is estimated. The split of benefits in kind between old aged and disabled persons is estimated for the period 1994-1999 (see old age function).

² Since 2003 benefits are no longer means-tested and financed by general revenue (until 2002 by social contributions).

345

¹ The breakdown between all the non means-tested benefits in kind is not available for the period 1993-1998.

² Including Family Credit until 1999, but excluding Children's Tax Credit for the same period, which does not fulfil the conditions to be recorded in the core system of ESSPROS. Both benefits were replaced by the Working Families' Tax Credit (WFTC) in October 1999. As the WFTC does also not fulfil the conditions to be recorded in the core system (parallel to Children's Tax Credit), a decrease in expenditure between 1998 and 2000 can be noticed for this category and the whole family function. The Working Families' Tax Credit (WFTC) itself was replaced by the Tax Credit (CTC) and Working Tax Credit (WTC), which are payable from 6th April 2003.

United Kingdom

353

The detailed breakdown of benefits has been revised as from 2002.

¹ Included a new type of benefit as from 1998.

² The increase from 2000 to 2001 was due to two different reasons: 1. In 2000 (from 01.05.2000) the child allowance was expanded to children up to the age of 18 (previously till the age of 16). The same year the average amount paid per child was somewhat reduced, so the net effect was a decrease in the total expenditure for this purpose. 2. The increase from 2000 to 2001 was due to a rather large increase in the amount paid per child. At the same time the amount paid for each child was made equal for all children, whereas earlier the amount paid for child number 3,4 etc was higher than for child number 1 and 2 in each family.
