## Introduction

This catalogue of documents lists the COM Documents of the Commission of the European Communities, the Reports of the European Parliament and the Opinions and Reports of the Economic and Social Committee prepared during the reference period by the Office for Official Publications of the European Communities for distribution to the public on paper and microfiche.

This version of the catalogue takes account only of documents of which English language texts have been prepared. There are parallel catalogues covering documents in each of the eight other official languages of the European Community.

### Presentation

Documents are listed in numerical order within each document type under the nineteen main headings of a classification based on that used for the *Directory of Community legislation in force*.

In this Classified Index there is one single entry for each document, showing *inter alia* its number, title, date of adoption by the institution concerned, ISBN and catalogue number followed finally by the microfiche reference(s) for the version of the document in that form.

### Frequency and cumulation

It is intended that catalogues of the present type will appear monthly. Cumulative catalogues will be published during and at the end of each year. They will contain alphabetical and numerical indexes, as well as classified indexes.

### Subscription system

An attractive system of selective subscriptions is on offer for the paper versions of the three series of documents covered by this catalogue either individually or in combination.

Microfiche subscriptions are also available, but only for entire series, either individually or in combination.

More information can be obtained from the sales offices whose addresses are given on the back cover.

### Other publications

Other European Community monographs — whether classed as publications or documents — as well as periodicals are listed in the catalogue '*Publications of the European Communities*'.

#### **COMMON STANDARDS FOR ENTERPRISES**

by Florence Nicolas with the collaboration of Jacques Repussard.

The purpose of this book is to explain the workings of the European standardization system, the resources available to it and how it fits in with the Community institutions and interfaces with national and world systems. It also contains practical examples which might serve as a basis for a European standardization manual.

#### **THE SINGLE FINANCIAL MARKET**

by Dominique Servais.

The large internal market is inconceivable without a financial dimension: capital and financial services must be able to circulate freely. Despite the progress made in this field to date, there is still a long way to go. The prospect of the creation of a real 'European area' makes it more urgent, but also more problematical, to achieve the complete deregulation of movements of capital.

This work describes in a language readily comprehensible to non-legal specialists a picture of the present situation and will help people to become familiar with the essential features of the freedom of movement for individuals. An annex contains the official instruments drawn up to facilitate the exercise by natural persons of an activity in a Member State other than their own.

#### **THE SOCIAL DIMENSION OF THE INTERNAL MARKET**

Social Europe - special issue.

This report is understood to be an important component in the discussion of the social aspects of the internal market, a discussion which the Commission wants to carry out with all social and political actors, since the consideration of the social dimension of the internal market is a matter which concerns everybody.

by Herbert Ungerer with the collaboration of Nicholas Costello.

The convergence of telecommunications, data processing, and, ultimately, the audio-visual TV broadcasting technologies is dramatically transforming the sector world-wide. This book sets out to give an insight into the main elements involved: digitization; Integrated Broadband Communications; the Community's RACE programme; world-wide competition; and the fundamental issue of liberalization.
