

CONSUMER PRICE INDEX

eurostat

RAPID INFORMATION

CONSUMER PRICE INDICES IN AUGUST 1984

The consumer price index for the EC as a whole rose 0.4 % between July and August 1984. In most of the Member States rises were moderate and were between 0 and 0.5 %, while even slight decreases were observed in the F.R. of Germany (- 0.2 %) and in Greece (- 0.5 %) due to the seasonal effects of falling prices for fruit and vegetables as well as the summer sales. Only in the United Kingdom was there a significant increase of 0.9 %, mainly caused by an increase in the rate of mortgage interest paid by owner-occupiers.

The quarterly index for Ireland moved up by 1.2 % between May and August 1984.

The rate of increase over 12 months for the Community is 6.9 %, which is the lowest year-on-year increase since the end of 1972, before the first enlargement of the E.C.

For the rates of increase of the individual countries please see table A overleaf and also the corresponding graphs.

NOTE

To make available to the readers of this bulletin long series on base 1975 = 100, EUROSTAT has recently published consumer price indices for the period from 1976 to 1982.

The publication contains monthly and annual figures for the general index and for 9 main groups, as well as for 18 detailed groups which have not been published before.

It contains also a historical review of the consumer price index from 1955 to 1982, as well as 10 graphs, illustrating the trends in consumer prices from 1976-1982.

Users can order a free copy of this publication by filling out the form attached at the end of this bulletin.

Latest data 20.9.84.

METHODOLOGICAL NOTES

1. The consumer price indices presented here are national indices which may appear under different titles in some of the countries. The development of the general index published by EUROSTAT is equivalent to that published by the country.
2. The components of this general index correspond to groupings of the national indices aggregated according to a harmonized classification of the ESA (European System of Integrated Economic Accounts). The price development of these components is equal to the price development of the national indices for the same components of the classification.
3. The scope of the general index differs according to each country. This can be due to population differences (specific income classes, certain socio-occupational categories, or all households), differences in geographic zones (capital, urban areas, rural areas); or differences in the concepts of expenditure on rent, health, etc.. Finally methods of seasonal correction differ from country to country.
4. A fixed base system is used in some countries, while others use a chain system (variable weights). Base years may also differ between countries. For better comparison EUROSTAT has taken 1975 as the base year for all countries.
5. The EUR 10 indices are obtained from the arithmetic average of the national indices weighted by the relative share of each country in real values, as obtained for final household consumption in real values of the aggregates for 1975 (1975 has been derived from the new 1980 results).

NOTE METHODOLOGIQUE

1. Les indices de prix à la consommation presentee ici sont les indices nationaux. Ces indices portent des noms différents dans les différents pays. L'indice général publié par l'EUROSTAT correspond toujours, en évolution, à l'indice général publié par le pays.
2. Les composantes de cet indice général correspondent à des regroupements des indices nationaux agrégés selon une classification harmonisée conforme au SEC (Système européen des Comptes nationaux). Les évolutions de prix correspondent pour ces regroupements aux évolutions constatées par les indices nationaux pour le même champ de classification.
3. Le champ couvert par l'indice général est différent selon les pays, aussi bien concernant la population concernée (tranche de revenu spécifique, certaines catégories socio-professionnelles ou l'ensemble des ménages) que en ce qui concerne les zones géographiques concernées (capitale, zones urbaines, ensemble du pays, etc.) ou encore concernant les concepts de dépense pour les loyers, la santé, etc.. Enfin les traitements statistiques concernant les corrections des variations saisonnières sont aussi différents selon les pays.
4. Un système de base fixe est utilisé dans certains pays, dans d'autres un système en chaîne est mis en œuvre (pondérations variables). Les années de référence utilisées au niveau national pour présenter les indices, sont différentes selon les pays. Pour faciliter la comparaison l'EUROSTAT a choisi l'année 1975 comme année commune pour la présentation de ces indices.
5. Les indices EUR 10 sont obtenus comme moyenne arithmétique des indices nationaux pondérés par les parts relatives des différents pays en valeurs réelles, telles qu'elles ont été obtenues pour la consommation finale des ménages et ses composantes, lors de la comparaison en valeurs réelles des agrégats du SEC-1975 (1975 a été dérivé des nouveaux résultats pour 1980).

COMMANDE

Par la présente je vous prie de m'envoyer .. exemplaires
de la publication "Les indices des prix à la consommation
1976-1982"

Renvoyer la demande à M. J.H. NIJENHUIS
EUROSTAT
Bâtiment Jean Monnet
Bur. B2/026

Luxembourg / G.D.
B.P. 1907

ORDER

Please send me . . . copies of the publication
"Consumer price indices 1976-1982".

Return this sheet to : Mr. J.H. NIJENHUIS
