

CONSUMER PRICE INDEX

RAPID INFORMATION

THE CONSUMER PRICE INDEX IN JUNE 1985

The CPI for the Community went up by 0.3 % between May and June 1985.

This increase, after the 0.4 % between April and May, shows the clear deceleration of the rate of inflation compared to the first four months of this year. This improvement can be observed in nearly all the Member States where the rates of increase for June are between -0.1 % (Netherlands) and + 0.5 % (Italy), except for Greece, where another big increase (1.8 %) was recorded.

During the first six months of 1985 the CPI for the EC as a whole rose by 3.6 %, whereas the corresponding rate for 1984 was 3.2 %. The rates for the individual countries for the first half year of 1985 are as follows : the lowest rate is recorded in the Netherlands (1.2 %), followed by the F.R. of Germany (1.7 %) and Luxemburg (2.7 %). Increases were also moderate in Belgium (3.0 %), Denmark and Ireland (both 3.2 %) and in France (3.4 %), whereas they were higher in the United Kingdom (5.0 %), in Italy (5.2 %) and in Greece (9.3 %).

The two future Members States of the Community recorded the following inflation during the first six months of 1985 : Spain 5.3 %, Portugal 10.5 %.

The rates of increase over-the-year remained practically unchanged compared to that reported last months.

The rate for EUR-10 is still around 6.0 % (see table A and the graphs).

N.B. Thanks to the cooperation of the Central Statistical Office of Finland, Eurostat will be able to publish from now on also the CPI for this country (see table C).

6 □ 1985
