Statistical Office of the European Communities

## Ecustat, the ecu reference

*Ecustat* is a newly-developed publication of Eurostat, the Statistical Office of the European Communities. As the European Monetary Union (EMU) draws closer and the ecu markets continue their evolution, Eurostat has decided to provide the market with the statistical tool it needs to understand and manage ecu-related topics.

*Ecustat* offers in tables and graphs a coverage of all kinds of statistical information relating to the ecu that is both diverse and in-depth. It saves the reader a huge amount of compilation and calculation work as it gives access not only to long historical series but also to the most up-to-date data and relevant technical explanations.

### Coverage includes:

- the EMS and the ERM
- exchange rates
- ecu securities
- financial futures
- ecu clearing
- ecu interest rates and yields
- consumer price indices
- banking statistics

... and many other items.

New series will be included to match market developments.

On top of in-house Eurostat data, the reader finds in *Ecustat* information collected from institutions such as the EMI, European central banks, national statistical offices, JP Morgan, Cedel, Euroclear, and the BIS, just to mention a few.

### *Ecustat* is:

- relevant and useful
- timely and up-to-date
- exact and rigorous
- comprehensive
- authoritative
- easy to use (trilingual: English, French and German)

As part of the *Ecustat* package, subscribers will also receive a methodology/glossary and analytical studies mainly based on *Ecustat* data.

Who should subscribe? Anybody interested in monetary and financial developments in Europe. The publication should be of particular interest to financial analysts, market participants, journalists, academics and international institutions. *Ecustat* is the reference publication for quantitative and technical ecu information.

Price: ECU 400 (excluding VAT and p&p) for 12 issues a year.
