BALANCE-SHEETS DESIGNED TO SHOW USEFUL ENERGY

The energy balance-sheets currently published in the Community are of the "primary input" type and refer primarily to coal, oil and natural gas. They are drawn up by converting the various sources of energy into their energy equivalent at the primary input level. This system means that the quantities consumed by the various consumer sectors are expressed in terms of the calorific value of the energy needed at the primary input level to meet final consumption requirements. The result is that when one form of energy is transformed into another, losses during transformation are not recorded. Compiling the balance-sheets in this way does not fully satisfy the needs of economic analysis.

Recent trends in energy policy in the wake of the 1973 oil crisis call for a more detailed knowledge of the physical amount of energy actually used for transformation and by final consumers. Work on energy-saving and demand analyses and forecasts have made it necessary to know the exact losses of energy which occur during the various stages of transformation and consumption and thus the energy consumed, i.e. "useful energy".

For these purposes the present balance-sheets - drawn up and valid purely from the primary input standpoint - have several drawbacks. By definition, they tackle the problems solely from the producers' point of view, thereby failing to take account of the importance of consumption, obscuring losses, favouring certain forms of energy because of the equivalence conversion method, and using a unit of measurement of thermal equivalence which has a variable definition.

As a step towards meeting the new analysis requirements and the need for more accurate forecasts of overall energy demand, the Statistical Office has conducted an exercise in drawing up overall energy balance-sheets based on the amounts of energy actually used by final consumers.

The establishment of such balance-sheets involves taking into account the various items of supply and demand in terms of their real physical calorific content (and not simply their energy equivalent obtained by substituting one form of energy supply for another at each stage from primary supply to the "useful energy" available to the consumer in the form of output from his appliances. These balance-sheets thus indicate the true energy losses at the various stages of transformation and consumption and permit a better understanding of actual energy consumption.

This study, unique of its kind, is intended primarily as a model for further development. It is being conducted on a trial basis, its scope being at present restricted to the Federal Republic of Germany and France for the year 1975. The results will be described in a subsequent publication.

This project forms part of the Statistical Office's action programme and the system will be improved as far as possible, using all practical means available to obtain a better knowledge of the technical criteria used. Its field of application will be widened to include all the Member States of the Community.

#### A CRITICAL LOOK AT EC SUPPLY BALANCE-SHEETS

The Statistical Office of the European Communities recently published Volume N° 20 in its series "Agricultural Statistical Studies". (1) In this volume the former German "Ministerialdirektor" (chief of division at the Federal Ministry of Food, Agriculture and Forests), Dr. Kurt Häfner, deals with agricultural supply balance-sheets, taking a very critical look at the principles behind them and the present-day problems and making proposals for improvements. At the present time he is probably the only person in the world to have developed food and supply balance-sheets for so many years for each agricultural product and used them for practical purposes of agricultural policy at national and international level. For this reason his remarks will definitely be of particular interest to a fairly wide circle of readers.

The supply balance-sheets are of key importance in the EC agricultural policy system for the assessment of the supply situation. Although the way in which they are computed was to a great extent laid down by the SOEC in cooperation with the Member States, there is still a whole series of problems, which are examined in this study.

---

A NEW COMMUNITY FARM TYPOLOGY

Commission decision 78/463/EEC of 7 April 1978 (Official Journal n° L 148 of 5 June 1978) sets out details of a community farm typology. This scheme for classifying agricultural holdings according to the type of farming and to the economic size of the holding is the result of deliberations over 4 years by a group of experts representing structural, statistical and farm accounts interests, called together by the Commission. The classification of holdings by types of farming (17 principal types broken down if required into up to 58 particular types), depends on the nature and extent of their various farm enterprises. Each farm enterprise is valued in common units by being weighted by regional Standard Gross Margins (SGM) expressed in EUC. These coefficients (gross production value less certain direct costs) have been calculated for all relevant crop and livestock headings of the 1975 Farm Structure Survey for each of 119 regions in the Community. The total SGM for the holding is used as a measure of the holding's economic size and the proportionate contribution of each of the different enterprises of the holding to the total SGM determines the type of farming.

The Community farm typology should permit a more meaningful presentation of the results of farm structure surveys and of the Farm Accountancy Data Network (Directorate-General VI - Agriculture) as well as providing the necessary link between these complementary sources of information.

## SURVEYS OF AREAS UNDER VINES

On the 10th of May the Council adopted a Regulation, (EEC) N° 978/78, on statistical surveys of areas under vines. The Regulation requires the mayor winegrowing Member States (i.e. France, Germany, Italy and Luxembourg)

1. to conduct basic surveys at 10 yearly intervals on the area of vines under cultivation in holdings cultivating for sale;
2. to conduct intermediate surveys on the annual changes in the areas under wine-grape varieties of vines;
3. to provide information on annual yields.

The proposed system of surveys will provide the statistical information on the production potential and the structure of holdings which is necessary to manage the common organization of the market in wine.

Member States were previously required, under Council Regulation 24 of 1962 as amended by Regulation N° 26/64/EEC and Commission Regulation (EEC) N° 1456/76, to establish a viticultural land register not later than 30 June 1963, to keep it continuously up to date and to revise it completely every 10 years. This requirement proved to involve administrative operations on an enormous scale in order to cover 3 Mio vinegrowers, 2,5 Mio hectares and about 10 million land parcels with sufficient detail for them to be identified. Member States were unable to initiate these operations at the same time or in the same manner and have been able to update the registers only partially and at irregular intervals.

Council Regulation (EEC) N° 978/78 will therefore replace the complete revision of the Community viticultural land register which was due in 1979 under Council Regulation 24 of 1962 with a system of statistical surveys which offers the following important advantages :

1. reduction in the information required from individual vinegrowers;
2. reduction in the number of individual vinegrowers to be covered, by elimination of those growers which produce only for home consumption (for example, in France approximately 45 percent of the vinegrowers accounted for only 4 % of production in 1979);
3. substantial cost savings in surveys compared with the establishment and updating of a cadastral land register in which many changes are continually occurring in ownership without necessarily involving changes in the structure or production potential of the vineyards;

4. separation of the areas cultivated with wine-grape varieties for the production of quality wines p.s.r. from the areas cultivated for other wines, the latter being the wines principally subject to difficulties on the market and where local interest in updating a cadastral register is minimal;
5. substantial additional savings in survey costs for certain Member States where sampling methods are appropriate.

The first basic survey will be carried out in 1979 (or before 1 April 1980 at the latest) and will relate to the situation after grubbing and planting in the 1978/79 wine-growing year; the intermediate surveys will be conducted annually beginning in 1981. The results of the first basic survey will be notified to the Commission by 1 July 1981, and will be published by the Statistical Office of the European Communities by 1 July 1982.

180 pages                      Format A 4

Editions DA/NL, DE/IT, EN/FR                      published in May 1978

This volume presents the most recent available data on the geographical breakdown of the balance of payments of each European Community country and of the United States and Japan.

The balances of the European Community countries are also given, where possible, in the form of totals relating to the nine member states (EUR 9) as a whole.

The data are expressed in millions of EUC, the new unit of account of the European Community intended to replace progressively the various units used by the different Community institutions. They are presented according to the EUROSTAT balance of payments and geographical breakdown schemes, and cover the period 1972 to 1976. The figures are preceded by a commentary on their development during 1976 and by two notes concerning, respectively, the drawing up of a consolidated balance of payments of the European Community countries and the balance of payments of the Community institutions.

Editions EN/FR/NL, DA/DE/IT      to be published in July 1978

Detailed results of the national accounts of Member States according to ESA (European system of integrated economic accounts). The volume presents a large number of data covering transactions in goods and services (value added, final consumption, gross fixed capital formation), distributive transactions (social contributions, social services, compensation of employees), financial transactions (stocks, shares, credits) : A summary of all the transactions carried out by the sectors (companies, administrations, households, etc.) is given in the section devoted to institutional sectors.

Approximately 31 pages Format A 5

Editions DE, EN, FR to be published in June 1978

During the 1975 Labour force sample survey the respondents were required to reply to question relating to any occupational training outside the school and university system which they had undergone during the reference week. The questions were particularly simple as they concerned only the type of vocational training being undergone (basic or further training) and the location in which it was carried out (enterprise, with or without contract - specialized institutes). The questions related to persons between the ages of 14 and 65 years.

Nonetheless, the data collected provide very interesting information on the use made of the various formulae for out-of-school vocational training. An analysis of the replies in terms of age, sex and activity throws light on certain questions which it is very difficult to answer fully on the basis of other statistics. The value of this survey is further increased by the fact that for the first time it covered the nine Member States of the Community and that, at least in the case of six countries, it allows a comparison to be made with the 1973 position.

Earnings of permanent workers in agriculture

ISBN 92-825-0172-8 Price : UKL 6.30  
DKR 70  
USD 12.30  
BFR 400

Approximately 125 pages Format A 4

Multilingual edition to be published in June 1978

This publication contains the methodology and detailed results of the Community survey of earnings of permanent workers in agriculture in 1976.

These results cover labour forces, earnings and monthly duration of paid work, broken down by sex, age, training, type of work, relative size of holding and the provision or not of payment in kind. In the case of certain countries, these data are also broken down by major region.

Green series : Land use and production 1970-1976

This publication updates the statistical series published in the green series 1976 "Land use and production". Part I concerning "Land use" contains results for EUR 9 for the years 1958, 1965 and 1974 to 1976. To part II concerning the "production of cereals, dried pulses, root and industrial crops" in EUR 9 will be added statistics on production of green forage. The publication contains data for three years (1974 to 1976) except for the data on green forage which is for the years 1970 to 1976.

Agricultural and forestry accounts - Unit values

ISBN 92-825-0053-5

Price : UKL 7.85  
DKR 87,30  
USD 15.30  
BFR 500

Approximately 194 pages Format A 4

Multilingual edition to be published in June 1978

Most recent data on agricultural and forestry accounts and on unit values. The purely statistical section is preceded by graphs and a commentary on the most recent agricultural data.

The tables section contains :

- time-series for final production, intermediate consumption and fixed capital formation for the Member States in national currencies and for the Community (in Eur) at current prices (and exchange rates), and at constant prices (and exchange rates);
- time-series for the principal aggregates of the agricultural accounts: in Eur, their moving averages in Eur; their annual rates; their value indices and volume indices for the Community as a whole and the Member States;
- percentage data clarifying the structural development of the constituents of final production, of intermediate consumption, of value added and of fixed capital formation in agriculture;
- time-series for unit values in Eur and in national currency for selected agricultural products.

It is the constant concern of the official statistical services to safeguard the confidentiality of the information with which they are entrusted. Each Member Country has its own customary procedures taking the form, in many cases, of national laws defining the rules of confidentiality applicable to business statistics.

These rules, which were elaborated in a national context, are now applied to Community statistics where they have led, in combination, to a far more drastic shrinkage of information than that which they cause at a national level. At the same time, in industrial circles in every Member Country, there is evident reluctance to release more information than is released by the others, apprehensions conducive to the development of a restrictive approach.

For that reason, the Statistical Office of the European Communities has decided, in agreement with the national statistical services, to examine this problem with a view to its solution. This report is a major contribution to such an undertaking. Its preparation was rendered possible by the collaboration of the various National Statistical Institutes, which not only provided the author with the necessary information regarding the laws and practices relating to the confidentiality of business statistics in their respective countries but also submitted their comments on the first version of the report. Nevertheless, as the author himself has emphasized in his preface, the opinions expressed in this document are strictly his own, and are in no way to be taken as those of the national statistical services or of the Commission of the European Communities.

By circulating this report, the Statistical Office of the European Communities hopes to elicit the reactions and opinions of its readers, including in particular the organisations representing the producers and users of business statistics.

Edition DE/FR

Volume 1 of this series describes the methodology established by the SOEC for the construction of input-output tables calculated, from the year 1970 on, according to Community rules. A general description of the input-output table is given, with some detail on its various components and their relationships. The classifications and the accounting rules which are used are defined by a number of references to the European System of integrated economic Accounts (ESA). The last chapter shows a few examples of the way in which the tables can be used for economic analysis.

Each of the volumes 2 to 7 deals with the input-output table of one country (United Kingdom, the Netherlands, Italy, Belgium, Germany, France). In each volume, the first part describes the problems encountered when using the Community classifications and methods and the adjustments made in order to improve comparability from one country to another. A short description of the table is also given. The second part is composed of the input-output table expressed in units of account EUR, tables of direct coefficients (vertical and horizontal) and several tables of indirect coefficients (inverse matrix, content of imports, content of primary inputs in the final uses).

Volume 8 will put together the tables for the countries and the one for the Community. Volume 9 will present the corresponding coefficient tables and will include a comparative analysis of the economic structure of the various countries.

Comparison in real values of the aggregates of ESA

The study provides purchasing power parities (PPP) between the currencies of the nine countries of the European Communities. These PPP's are used instead of the official exchange rates in order to convert nominal values of each country of Gross Domestic Product and its uses into a common unit (EURPA).

The values expressed in EURPA are called "real values". These values make a direct comparison between the aggregates of the different countries possible.

Multilingual edition to be published in June 1978

Each of the countries of Europe-9 carried out a census of population during the period 1 March 1968 to 24 October 1971. The presentation of the results in the various national census reports differs very much from country to country, making comparisons difficult. Partly on the basis of special returns provided by the national census offices and partly using their published material, the SOEC has prepared the present volume which sets out the principal census results in a manner as comparable as possible between the member countries. Tables are given showing, in a concise and easily understood form, the structure of the population of countries and of the entire Community, by sex, age, marital status, nationality and economic activity. Some basic information on households and dwellings is also included. Because of the wide diversity in size of population in member countries, ranging from 61 millions in Germany FR to 340 000 in Luxembourg, direct comparisons are sometimes difficult and a number of tables have been included expressing the results in proportional form (per cent or per thousand). Europe-6 totals are also included, this being the actual Community at the time of the censuses.

This survey has been conducted simultaneously, and according to identical methods, in the 9 countries of the European Community.

Its essential objective was to obtain details of the earnings and of individual characteristics (sex, age, level of professional qualification, length of service, etc.) of employed persons, and of the structure (branch of activity, size, etc.) of the enterprises employing them, in order to bring out the relationships between these facts and the levels of remuneration.

The results are published in one volume for each country.

published in June 1978

In this publication the Statistical Office of the European Communities presents the main results of a survey on working conditions in the countries of the Community which was carried out as part of the Community labour force sample survey conducted in spring 1975 pursuant to Regulation (EEC) N° 2640/74 of the Council of 15 October 1974.

This was the first survey carried out in this field at Community level. The content of this survey was determined by a series of questions relating to :

- a) work performed : shift work, working on Sundays and public holidays, at night;
- b) working environment : noise, hygiene, safety;
- c) distance between home and place of work and means of transport used.

This publication contains the methodology and detailed results of the Community survey of labour costs in industry 1975.

The results cover the number of establishments and employees, the number of hours worked, and the level and structure of labour costs in different industries (73 groups of the divisions 1-5 of the NACE).

The results are published in four volumes, as follows :

Volume 1 : General results by countries and industries

Volume 2 : Results by size of establishments

Volume 3 : Structure of labour costs

Volume 4 : Regional results

Ruby series : Useful-energy balance-sheets - 1975

Approximately 100 pages      Format A 4

Editions DE, EN, FR      to be published in June 1978

To enable it to improve its service to the Commission on the question of the rational use of energy, the Statistical Office has attempted to compile overall energy balance-sheets in terms of the amount of energy actually used by the final consumer.

These balance-sheets are based on the various stages of supply and demand from the primary input stage to the "usefull energy" recovered by the consumer in final output and are expressed in terms of real energy content (and not in terms of their substitute energy equivalence between different sources of energy). They bring out the real loss in energy at the various stages of conversion and consumption and provide a more accurate picture of the effective consumption of energy.

This study is first and foremost a model designed to point the way to later refinements. For the moment, it applies only to France and the Federal Republic of Germany, and relates to 1975.

This document also sets out the methods used, the assumptions made for the practical application and the conclusions which may be drawn from this initial trial.

Red series : List of chemicals in NIMEXE together with their tariff classification and NIMEXE code

This list provides all relevant information as to the tariff and statistical classification of the chemical products falling within chapter 28 and 29 of the Common Customs Tariff. It includes 1,300 chemical terms in six languages (by the name used in up-to-date chemical nomenclatures, by common name and by synonym) and is complementary to and an extension of the list of chemical products published in four languages in 1975 and of its supplement published in 1977.

This publication provides :

- an immediate classification (heading and subheading) by their chemical terms in each of the Community languages of the chemical products to be found in the Common Customs Tariff of the European Communities as well as the corresponding statistical classification of NIMEXE;
- a correlation of these terms as between the six languages (specialised, multilingual dictionary).

Principal figures on the short-term economic evolution in the enlarged Community, i.e. : employment, industry, internal trade and services, transport, external trade, price and wage indices, finance, balance of payments.

Yellow series : Hourly earnings - Hours of work

ISSN 0378-3596

Annual subscription :	UKL	9.60	Single copy :	UKL	6.40
	DKR	98,50		DKR	65,55
	USD	16.50		USD	11.10
	BFR	600		BFR	400

Approximately 266 pages Format A 4 half-yearly

This publication which is updated every six months contains harmonized data on workers' hourly wages, on labour costs, and weekly hours worked, plus indices of developments in employees' monthly salaries, by region. The publication also contains some data on the earnings and the conditions of employment of permanent workers in agriculture.

Green series : Crop production

ISSN 0378-3588

Annual subscription :	UKL	40	Single copy :	UKL	4.80
	DKR	410		DKR	49,20
	USD	69		USD	8.25
	BFR	2 500		BFR	300

Approximately 120 pages    Format A 4    11 issues per year

The most recent information on

Crop production of arable land (area, yield, production)

- 1) or
- 2) Fruit and vegetable production (area, yield, production)
- 2) Areas sown (twice a year)
- 3) Stocks and deliveries of cereals and potatoes
- 4) Meteorological report
- 5) Supply balances for crop products (3 or 4 per year).

Monthly statistics of meat

ISSN 0378-3553

Annual subscription :	UKL	40	Single copy :	UKL	4.80
	DKR	410		DKR	49,20
	USD	69		USD	8.25
	BFR	2 500		BFR	300

Approximately 100 pages    Format A 4    11 issues per year

Publication of monthly statistics supplied by Member States in application of the Council's Directives 73/132/EEC and 76/630 EEC concerning surveys to be carried out in the cattle and pig sectors. The bulletin contains information on slaughterings, on foreign trade in live animals, on production by species and by country. In addition, it may also give information on head structure - comments (red pages) - information about supply balances.

Monthly statistics of sugar

Annual subscription :	UKL	Single copy :	UKL
	DKR		DKR
	USD		USD
	BFR		BFR

Approximately 75 pages Format A 4 11 issues per year

Monthly balance sheets showing the main flows of sugar only, expressed as white sugar equivalent. Products containing sugar (sweetened products) are therefore excluded. The objective of the publication is two-fold : to make provisional annual data rapidly available at the end of the crop year, before the issue of final figures, and to follow the seasonal trends of the different flows.

Monthly statistics of milk

ISSN 0378-3545

Annual subscription :	UKL	22.40	Single copy :	UKL	2.90
	DKR	229,50		DKR	29,50
	USD	39		USD	5
	BFR	1 400		BFR	180

Approximately 60 pages Format A 4 8 to 10 issues per year

Publication of weekly and monthly statistics transmitted by Member States in compliance with the Council directive of 31st July 1972, on the statistical surveys to be made by Member States concerning milk and milk products (72/280/EEC).

The bulletin contains the data relating to cows milk collection and the production of processed products by the dairy industry. From time to time the bulletin may contain a commentary on the supply balance sheets and information on dairy structure.

Monthly statistics of eggs

ISSN 0378-3537

Annual subscription :	UKL	22.40	Single copy :	UKL	2.90
	DKR	229,50		DKR	29,50
	USD	39		USD	5
	BFR	1 400		BFR	180

Approximately 75 pages Format A 4 8 to 10 issues per year

Publication of monthly statistics transmitted by Member States in compliance with the Council regulations 2782/75 and 1868/77 on the commercialisation of hatching eggs and farmyard poultry chicks. The bulletin contains data on the selection, multiplication and the uses by species as well as trade with third countries. In addition the bulletin may contain data on structure of hatcheries, commentaries (pink pages) and information on supply balance sheets.

Selling prices of vegetable products

ISSN 0378-6714

Annual subscription :	UKL	43.20	Single copy :	UKL	4.80
(Selling prices of animal	DKR	442,50		DKR	49.20
products included)	USD	74.50		USD	8.25
	BFR	2 700		BFR	300

Approximately 100 pages Format A 4 bi-monthly

Monthly and annual up-dating of the prices of the most important vegetable products and of a number of products processed by the food industry. The prices for each of the member countries are given in national currency and in EUA. The percentage variations refer to the same period of the year before. The monthly evolutions of the prices in EUA of most products are illustrated also by graphs.

Selling prices of animal products

ISSN 0378-6722

Annual subscription :	UKL	43.20	Single copy :	UKL	4.80
(Selling prices of vegetable	DKR	442,50		DKR	49.20
products included)	USD	74.50		USD	8.25
	BFR	2 700		BFR	300

Approximately 125 pages Format A 4 bi-monthly

Monthly and annual up-dating of the prices of the most important animal products and of a number of products processed by the food industry. The prices for each of the member countries are given in national currency and in EUA. The percentage variations refer to the comparable period of the year before. The monthly evolutions of the prices in EUA of most products are illustrated also by graphs.

Purchase prices of the means of production

ISSN 0378-6692

Annual subscription :	UKL	11.20	Single copy :	UKL	4
	DKR	115		DKR	41
	USD	19.50		USD	6.90
	BFR	700		BFR	250

Approximately 140 pages Format A 4 quarterly

Up-dated monthly and annual figures for the principal products bought by farmers. The series for each of the member countries cover animal feed, fertilizers, transport and heating fuels, seeds and pesticides.

EC-Index of producer prices of agricultural products

Annual subscription :	UKL	11.20	Single copy :	UKL	2.40
	DKR	115		DKR	24,60
	USD	19.50		USD	4.15
	BFR	700		BFR	150

Approximately 28 pages Format A 4 bi-monthly

This publication presents for EUR 9 and each of the member countries the evolution of the indices of the producer prices for agricultural products during the last known 12 months.

Fishery statistics

Annual subscription :	UKL	Single copy :	UKL
	DKR		DKR
	USD		USD
	BFR		BFR

Approximately 72 pages Format A 4 quarterly

The publication contains monthly statistics on the quantities and values of landings for the principal fish species in Member States.

Blue series :      Industrial short-term trends

ISSN 0378-7427

Annual subscription :	UKL	8	Single copy :	UKL	0.80
	DKR	82		DKR	8,20
	USD	13,80		USD	1.40
	BFR	500		BFR	50

Approximately 50 pages Format A 4 monthly

Publication of short-term industrial indicators.  
The publication contains indices of industrial production for about 40 industrial branches and groups of branches. During 1978 the contents will be gradually increased to include indices of turnover, new orders, employees, wages and salaries and hours worked.  
Methodological supplements and retrospective series will complete the regular monthly publication.

Quarterly bulletin of industrial production

ISSN 0378-3529

Annual subscription :	UKL	14.40	Single copy :	UKL	4.80
	DKR	147,50		DKR	49,20
	USD	25		USD	8.25
	BFR	900		BFR	300

Approximately 147 pages Format A 4 quarterly

Data on production within the Community of certain raw materials and finished or semi-finished products.

Quarterly iron and steel bulletin

ISSN 0378-3510

Annual subscription :	UKL	14.40	Single copy :	UKL	4.80
	DKR	147,50		DKR	49,20
	USD	25		USD	8.25
	BFR	900		BFR	300

Approximately 120 pages Format A 4 quarterly

Annual, quarterly and monthly statistics of production, deliveries, receipts and foreign trade in iron ore, pig iron, crude steel and rolled steel products, on the consumption of raw materials in the iron and steel industry and deliveries by merchants of steel products and of scrap, together with statistics of the labour force, hours of work and wages in the iron and steel industry.

Monthly iron and steel bulletin

Annual subscription :	UKL	6.40	Single copy :	UKL	0.80
	DKR	65,50		DKR	8,20
	USD	11		USD	1.40
	BFR	400		BFR	50

Approximately 19 pages Format A 4 monthly (11 issues per year)

Monthly statistics on the number of short-time workers; the production of pig iron, crude steel and finished rolled products; new orders, order books and deliveries of ordinary steels; the production and deliveries of special steels; foreign trade in ECSC steel products; the consumption and net receipts of ferrous scrap by the iron and steel industry.

Ruby series : Coal - Monthly bulletin

ISSN 0378-357X

Annual subscription :	UKL	4.80	Single copy :	UKL	0.65
	DKR	49		DKR	6,50
	USD	8.50		USD	1.15
	BFR	300		BFR	40

Approximately 14 pages Format A 4 monthly (11 issues per year)

Produce monthly the principal statistical series characterising the short term movements in the coal industry.

Hydrocarbons - Monthly bulletin

ISSN 0378-3731

Annual subscription :	UKL	9.60	Single copy :	UKL	0.95
	DKR	98,50		DKR	9,85
	USD	16.50		USD	1.65
	BFR	600		BFR	60

Approximately 20 pages Format A 4 monthly (11 issues per year)

Produce monthly the principal statistical series characterising the short term movements in the petroleum and gas industries.

Electrical energy - Monthly bulletin

ISSN 0378-3561

Annual subscription :	UKL	4.80	Single copy :	UKL	0.65
	DKR	49		DKR	6,50
	USD	8.50		USD	1.15
	BFR	300		BFR	40

Approximately 12 pages Format A 4 monthly (11 issues per year)

Produce monthly principal statistical series characterising the short term movements in the electrical economy in general and fuel consumption in power stations in particular.

Red series :

Monthly external trade bulletin

ISSN 0378-3723

Annual subscription :	UKL	24	Single copy :	UKL	2.90
	DKR	246		DKR	29,50
	USD	41.50		USD	5
	BFR	1 500		BFR	180

Approximately 130 pages Format A 4 monthly (11 issues per year)

General summary of foreign trade of the European Community by countries and by products.  
Trends in EC trade by countries and by products.  
Trade of the main non-EC countries. Indices.

Crimson series : Monthly tables of transport

ISSN 0378-3502

Annual subscription :	UKL	20	Single copy :	UKL	2.40
	DKR	205		DKR	24.60
	USD	34.50		USD	4.15
	BFR	1 250		BFR	150

Approximately 60 pages Format A 4 monthly

Monthly data on :

- Transport of persons and goods by Railway, Inland Waterways, Merchant Shipping and Road
- Registration of motor vehicles
- Road traffic accidents
- Aviation
- Tourism.
