## **Basic statistics of the Community — 1981**

Format 10.8 × 15.3, 205 pages, price BFR 150

The work in question is the nineteenth edition of the most widely distributed reference work published by the Statistical Office of the European Communities. It is published in seven language editions (German, English, Danish, French, Italian, Dutch and Greek).

The format and the content of the work remain unchanged. Regular readers will know that it consists of a selection from the main statistical domains covered by Eurostat :

Population, research and education, national accounts, agriculture, energy, industry, transport, external trade, prices, earnings and hours of work, social accounts, standard of living, finance, regional populations and gross domestic product.

This selection allows the comparison with a number of the other European countries, plus the USA, Japan and the USSR.

## Seminar on employment and unemployment statistics

An important seminar entitled 'The measurement of employment and unemployment for Community purposes' was held in Luxembourg from 7-10 December at the instigation of the Statistical Office of the European Communities. It was chaired by Mr J. Sexton of the Economic and Social Research Institute in Dublin, and the secretariat functions were assumed by Miss Furst, Head of Division in the Directorate for Demographic and Social Statistics, assisted by officials of Division B 1. At the inaugural session, Mr A. Dornonville de la Cour, Directorate-General of Eurostat, said

in his introductory speech that the Statistical Office's aim in organizing the seminar was to encourage people to engage in a wide-ranging review of ways of improving employment statistics. With unemployment reaching the 10 million mark, he said it was becoming increasingly vital for Europe to have at its disposal effective means for the very rapid measurement and analysis of trends. He went on to say that this was possible given the right kind of joint goodwill on the part of the Member States' civil services, statistical institutes and professional and trade union organizations, Community

From left to right: Mr. R. Walker, Miss Fürst, Mr. la Cour, Director-General of Eurostat, Mr. J. Sexton, chairman of the seminar and Mr. D. Harris, Director of demographic and social statistics.

institutions like Eurostat and international organizations such as the OECD, the ILO, etc.

Several papers were given in the course of the seminar, the most important of which—apart from those on the statistics needed for the Community's employment, labour market and economic and social policies—were the papers given by Miss Hildegard Fürst, Head of SOEC Division B 1, on European employment and unemployment statistics, by Professor Maddison of the University of Groningen on a proposal for a comprehensive approach to official statistics, by Mr L. Reyher of the Institut für Arbeitsmarkt- und Berufsforschung on stocks and flows determining the labour market, by Messrs W.P. Leunis and C.G. Verhage from the Centraal Bureau voor de Statistiek in The Hague on the methodology of calculating

the volume of work, by Professor J. Zighera of the University of Paris-Nanterre on the present availability and future improvements needed in statistics from labour force surveys, by Mr G. McLeod of Gwilym Jenkins and Partners Ltd on the use of available statistics as a basis for forecasting employment in the Community, and by Mr I. Macredie of Statistics Canada on the estimation of gross flows from the Canadian labour force survey. Those taking part in the seminar then had a chance to discuss a number of subjects of the utmost interest to statisticians and to the users of statistics of this kind.

'Eurostat News' will of course be producing a detailed record of the work of this seminar in due course.

L.R.

## Trade between the European Community and the countries of Latin America

The Statistical Office of the EC has recently published a study entitled 'Analysis of trade between the European Community and the countries of Latin America'. The following article summarizes the main findings of this study.

### Latin America and world trade

The total trade of the Latin America countries increased nearly sixfold in value between 1970 and 1980. However, while imports increased at an average compound annual rate (20%) which matched the expansion of world trade (reference is to world trade excluding intra-Community trade) in the same period, exports increased at a slightly lower rate (approximately 18%).

Imports to Latin America accounted for about 6% of world trade including oil in

both 1970 and 1980, whereas exports dropped from 6% to just under 5%. These figures, which show that Latin America's external trade has remained fairly stable or has diminished slightly, are specially interesting when compared with the data concerning the developing countries as a whole (among whom the Latin American countries are included), as the developing countries world exports rose from 22% in 1970 to 34% in 1980 and imports went up from 23% to 30% in the same period.

Only one year (1973) has not produced a deficit in the balance of trade, the worst year being 1975 when the deficit soared to \$ 9 626 million. This figure was more than halved the following year when, as a result of the recession in some industrialized nations, the prices of manufactured goods, did not rise as much as the prices of foodstuffs

and raw materials. A reversal of this pattern occurred in 1980. Initial estimates indicate that for the first time for five years the trade balance for the Latin American countries is in surplus (+USD 700 m).

### Trade between LA 20 and EUR 10

The table below gives a more detailed picture of the growth and structure of trade between EUR 10 and LA 20 in the last 16 years.

Year	EUR 10: imports from LA 20		EUR 10: exports to LA 20		Balance E1	Import cover ratio
	million USD	1965 = 100	million USD	1965 = 100	million USD	E1 %
1965	3 518	100	2 139	100	- 1 379	61
1970	4 491	128	3 553	166	- 938	79
1972	4 861	138	4 721	221	- 140	97
1974	8 448	240	8 845	414	+ 397	105
1975	8 123	231	9 594	449	+ 1 471	118
1976	9 222	262	8 651	404	- 571	94
1977	11 448	325	10 118	473	- 1 330	88
1978	12 306	350	11 559	540	- 747	94
1979	16 210	461	14 362	671	- 1 848	89
1980	19 114	543	16 822	786	- 2 292	88

The table shows that trade relations between the Community and Latin America were characterized (apart from a brief interlude in the middle of the 1970s) by a constant increase in terms of absolute value and a generally negative trade balance for the Community.

In this context three important trends are evident:

- Community exports grew at a faster rate than imports until the end of the first half of the 1970s.

Period	Average annual compound rate of increase	
	Imports from LA 20	Exports to LA 20
1965-70	5 %	11 %
1970-74	17 %	26 %
1974-80	15 %	11 %

- Despite the substantial growth in trade in terms of absolute value, Latin America's share of the Community's external trade has, as already indicated, fallen steadily. Imports from LA 20, as a percentage of total Community imports, fell from 8.7% in 1965 to 5.1% in 1980 and there was a similar though less pronounced pattern on the export side (from 6.2% in 1965 to 5.4% in 1980).

- In the case of Latin America's share of Community imports, it is particularly significant to note the sharp fall towards the middle of the 1970s, after which the area's share more or less stabilized at around 3/5 of the 1965 level. In order to assess more accurately the significance and causes of this trading pattern and to understand the fluctuations in the rate of increase, the following factors have to be borne in mind:

- a) Worldwide exports of raw materials (which account for 80% of total Latin

American exports), apart from petroleum, tended to increase at a distinctly slower rate than exports of manufactured goods, at least until 1973. Until before the 1973 oil crisis there was in fact a slightly more noticeable drop in Latin America's share of Community trade with the developing countries (in which there was a less significant proportion of manufactured goods).

b) The increased proportion, after 1973, of Community petroleum imports (of which only a very modest percentage comes from Latin America) had two effects:

- it had an adverse effect, on the import side, on the Member States' balance of trade by curbing their willingness to import;
- it swelled the value of total Community imports (extra EUR 10) and, especially, the value of imports from the developing countries; this was bound to have an effect on Latin America's share of Community imports.

A. De Michelis

## Monthly bulletin on the consumer price index

From February 1982 Eurostat intends to publish each month an extended consumer price index for the member countries as well as for Spain, Portugal, Sweden, the United States and Japan. This bulletin will present not only price indices but also the rates of increase over one month and over 12 months. The index for Ireland will refer only to the months of February, May, August and October of each year. Given the importance of the consumer price index as a short term indicator a short comment will be given in the bulletin concerning the latest development of the consumer price index.

Price indices for the main groups of consumption are provided in separate tables.

These refer to food, drinks and tobacco, clothing and footwear, rents, heating and lighting, household goods and services, transport, communication, leisure entertainment and other goods and services as well as a special group for fuel and power.

All indices use 1975 as the base year. Indices for EUR 10 and EUR 9 are calculated by weighting the national indices with the real values derived from the purchasing power parities of 1975 for household consumption in each country.

H. K.L.

## CRONOS training seminar

To take stock of the first year of on-line availability of CRONOS, to provide the host with better information on the content of Eurostat's chronological data banks, to ascertain users' opinions, to examine the problems arising as regards cooperation between the Statistical Office and the host—these were the aims of the two-day training seminar which the Statistical Office organized in December for the economists of the CISI (Compagnie Internationale des Services en Informatique) and its own officials who are in charge of the various 'sefs'.

This two-day seminar was chaired by Mr Nols, a director at Eurostat responsible for the management of CRONOS, and or-

ganized by Mr C. Dewaleyne, manager of the data base, and Mr Callais of CISI. A dozen CISI economists and about 40 officials of the Statistical Office took part. The participants from Eurostat described the main features of the statistics they work on in a series of lectures followed by discussion. Many problems were discussed or mentioned, with particular reference to the correct description of contents, the forms of classification of statistical series, the improvement of updating procedures and the preparation of a descriptive catalogue of series—in short, some of the problems concerning 'producers' and 'distributors' of statistical data.

Mr. J. Nols, chairman of the seminar, Mr. S. Ronchetti, Director of external trade statistics and some participants during a practical demonstration.

## **The Austrian Central Statistical Office**

The Director-General of Eurostat recently visited the Austrian Central Statistical Office in Vienna. Discussions with the President, Dr Josef Schmidl, and his colleagues concentrated on the work of the two Offices on the United Nations International Comparison of Prices Project, an area where there has been close collaboration in the framework of the regional contribution by the Economic Commission of Europe.

Other areas where an exchange of information and ideas showed that there were inter-

esting possibilities for future collaboration were National Accounts, External Trade and Transport Statistics and the development of data bases. The visit included a demonstration of the capabilities of the ISIS Data Bank and ended with the presentation by Mr la Cour of a paper to the Austrian Statistical Society on 'The Statistical System in the European Economic Community'. Copies of the paper are available, in English and German, on request from the Secretariat of SOEC, office B3/029, (tel. 3105).

## **List of International Abbreviations**

The 1981 edition of the 'List of major international abbreviations' published under the aegis of the Statistisches Bundesamt, Wiesbaden (Federal Statistical Office of Germany) is available now. It is a precious tool containing the list of major abbreviations of international organizations, classifications and systems as well as selected technical

terms and their English, French and German equivalents. Copies may be obtained from Verlag W. Kohlhammer GmbH, Postfach 42 11 20, 6500 Mainz 42, Bestellnummer: 6520040-81900 ISBN 3-17-003241-0. The price for individual copies is DM 4,30, discounts are available for orders for 25 copies or more.

## **Conference of the Directors-General of the National Statistical Institutes**

The directors-general of the national statistical institutes met in Brussels on 19 and 20 November, with Mr Dornonville de la Cour in the chair, to examine the current state of Eurostat work. Among other things, the participants discussed problems to do with the on-line dissemination of data bank material and were informed of the agreements reached between Eurostat and the OECD on the coordinated dissemination of purchasing power parity statistics.

The directors-general expressed their appreciation of the work of Mr Helmut Schumacher, who had been Director of Agricultural and Energy Statistics until his departure from Eurostat after twenty-three years' service. Mr Darragon, Head of the Energy Division, had taken over his duties ad interim in Directorate D.

## Rolf Wagenführ, first Director-General of SOEC

*A commemorative work*

We are happy to inform our readers that a book has just come off the press in Germany which may interest users of European statistics and officials of Eurostat. The publication takes the form of a collection of articles and was conceived by Günter Menges and Reiner Zwer. It is devoted to the memory of Rolf Wagenführ who was for many years Director-General of Eurostat. The title is 'Probleme internationaler wirtschafts- und sozialstatistischer Vergleiche', Bund-Verlag, Köln, 1981.

A few words on the life of Rolf Wagenführ are appropriate. Born in 1905, he was appointed first head of the Statistics division with the ECSC High Authority and later became the first Director-General of the Statistical Office of the European Communities. In 1966, at the age of 61 he left the Office to devote himself entirely to science. Since 1957 he had been Professor of economic and social statistics at the University of Heidelberg where he created the Institute for international comparative studies in economic and social statistics. He died in 1975 after a life well spent, active until the end, rich in plans and very influential.

The work contains general articles by some of the many personalities who knew M. Wagenführ. Amongst these, Dr. Helmut Schumacher recalls his experience as assistant at the Statistical Office of the European Communities.

### *REGIONAL ACCOUNTS ESA — DETAILED TABLES BY BRANCHES*

ISBN 92-825-1884-1 (DA/DE/EN/FR/IT/NL)

Format A 4, 165 pages, price BFR 300

Main aggregates of economic accounts for the basic administration units of the Community. Time series covering 1970-1979 for value added by broad groups of branches (agriculture, industry, services), for population and for employment. Detailed results for 1975 and 1976.

### *GENERAL GOVERNMENT ACCOUNTS AND STATISTICS 1971-1978*

ISBN 92-825-2221-0 (EN/FR/NL) 92-825-2222-9 (DA/DE/IT)

Format A 4, 370 pages, price BFR 1 000

Series of publications relating to statistics on general government; they provide all transactions on general government broken down by sub-sector (central government, local government, social security funds), as well as an analysis of public income and expenditure. The volume also presents detailed information on the receipts from the various national taxes. It is completed by comparative tables for the nine member countries.

**Theme 4**

*OPERATION OF NUCLEAR POWER STATIONS 1980*

ISBN 92-825-2585-6 (EN/FR)

Format A 4, 145 pages, price BFR 400

This annual publication presents in its first part the main operating statistics for the past year and gives an outline of the structure of the nuclear plant situation, with units on line as well as units under construction.

The second part of the publication gives the monthly operating data for each nuclear power station of the Community as well as the yearly results since the first connection to the grid. The annual load diagrams are also included showing the main reasons for unavailability.

*STATISTICAL YEARBOOK TRANSPORT, COMMUNICATIONS, TOURISM*

ISBN 92-825-1664-4 (DE/EN/FR/IT)

Format A 4, 383 pages, price BFR 800

Statistics on the infrastructure, on the equipment and on the operations of the different modes of transport.

Statistics on traffic accidents, on communications (post, telegraph, telex, telephone) and on tourism.

**Theme 5**

*AGRICULTURAL PRICE STATISTICS 1969-1980*

ISBN 92-825-1663-6 (DE/EN/FR/IT)

Format A 4, 321 pages, price BFR 600

This bulletin contains annual selling prices of crop and animal products as well as annual purchase prices of the means of agricultural production in the Member States of the Community (EUR 9); it covers the period 1969 to 1980. In addition, it describes and shows the evolution of the rates of the value-added tax in agriculture.

*EC AGRICULTURAL PRICE INDICES (INPUT - OUTPUT) 1973-1980*

ISBN 92-825-2540-6 (DE/EN/FR/IT)

Format A 4, 85 pages, price BFR 150

This publication provides information on the trends of the annual EC indices of the producer prices of agricultural products and of purchase prices of the means of agricultural production, covering the eight years from 1973 to 1980, for EUR 9 and for each Member State. The price indices are base-weighted Laspeyres calculations using value weights determined for the base year 1975 for a fixed basket of agricultural products (output price index) or of goods and services (input price indices). The year 1975 also serves as reference year.

## To be published

Theme 4
---------

### *YEARBOOK IRON AND STEEL 1981*

ISBN 92-825-2681-X (DE/EN/FR/IT)

Format A 4, approximately 165 pages, price BFR 1 000

Yearly statistics on the structure and the economic situation of Community's iron and steel industry: employment, size of enterprises, plants, crude steel, iron and scrap balances, production of iron ore, pig iron, crude steel, finished steel and end products, consumption of raw materials, works deliveries and receipts, external trade of scrap and ECSC products, indirect foreign trade, steel consumption investments of the iron and steel industry, prices and levy.

### *EC-RAW MATERIALS BALANCE SHEETS 1979*

ISBN 92-825-2637-2 (DE/EN/FR)

Format A 4, approximately 35 pages, price BFR 100

This booklet follows the SOEC publication 'EC-Raw materials balance sheets 1975-1978' issued in May 1981 and gives in a more condensed form, the supply balance sheets for 20 mineral raw materials for the year 1979, compared with 1978, namely:

- Consolidated balance sheets for the EC, Member States and certain third countries.
- Balance sheet ratios showing the degree of external dependance and self-sufficiency in raw materials.
- EC imports of raw materials by country of origin.
- The evolution of apparent consumption from 1975 to 1979.

### *IRON AND STEEL — EXPLANATORY NOTES*

ISBN 92-825-2734-4 (DE), 92-825-2735-2 (EN)

ISBN 92-825-2736-0 (FR), 92-825-2737-9 (IT)

Format A 4, approximately 80 pages, price BFR 200

The publication complements the monthly and quarterly bulletin and the Yearbook Iron Steel by presenting explanatory notes and the methods employed in establishing the statistics published in these publications.

## Periodicals

### ► Monthly bulletins

*EUROSTATISTICS — DATA FOR SHORT-TERM ECONOMIC ANALYSIS (THEME 1)*

ISSN 0250-393X (DE/FR/NL), 0250-3921 (DA/EN/IT)

Format A 4, approximately 100 pages, price BFR 800 subscription (11 issues)

BFR 1 500 subscription (22 issues)

The publication is intended to provide a selection of the most significant indicators of the trends in employment, production, external trade, prices, finance and the balance of payments for the Member States, the Community as a whole and the United States of America. The indicators will be expressed in the form of indices relating as far as possible to seasonally-adjusted series.

The bulletin will be available in two three-language editions which will appear alternately at the beginning and in the middle of each month.

*MONTHLY STATISTICS OF REGISTERED UNEMPLOYED IN THE COMMUNITY (THEME 3)*

(DE, EN, FR, IT)

Format A 4, approximately 10 pages, price BFR 360 annual subscription

The report contains monthly figures of unemployed persons registering at public employment offices (Community and Member States, including Greece), changes compared with the previous month and the previous year, and unemployment rates calculated on a uniform basis by reference to the civilian working population. Also shown are numbers of persons unemployed aged under 25 years as well as new registrations of unemployed persons during the month and vacancies. A short commentary and a graph illustrating the month's figures are included.

*INDUSTRIAL SHORT-TERM TRENDS (THEME 4)*

ISSN 0378-7427 (FR), 0378-7877 (EN), 0378-8008 (DE)

Format A4, approximately 60 pages, price BFR 500 annual subscription

Short-term industrial indicators with commentary and graphs. The indicators relate to industrial production (gross indices per day worked and seasonally adjusted), turnover, new orders, exports and imports, number of persons employed and wages and salaries for 13 sectors of industry, three main groups of industrial products and for total industry. A special section of the bulletin deals with the short-term indicators of the building and civil engineering sector. The publication may include one or more supplements with methodological notes or long series in the course of the year; these are included in the subscription price.

*IRON AND STEEL — MONTHLY BULLETIN (THEME 4)*

ISSN 0378-7559 (DE/EN/FR/IT)

Format A 4, approximately 15 pages, price BFR 450 annual subscription

Short-term economic statistics (monthly) on production of pig-iron, crude steel, steel mill products, index of production, new orders, deliveries and order-books, external trade of ECSC steel products, consumption and receipts of scrap and number of short-time workers.

*HYDROCARBONS — MONTHLY BULLETIN (THEME 4)*

ISSN 0378-3731 (DE/EN/FR)

Format A 4, approximately 30 pages, price BFR 600 annual subscription

Updates monthly the principal statistical series characterizing the short-term movements in the petroleum and gas industries.

*COAL — MONTHLY BULLETIN (THEME 4)*

ISSN 0378-357X (DE/EN/FR)

Format A 4, approximately 20 pages, price BFR 300 annual subscription

Updates monthly the principal statistical series characterizing the short-term movements in the coal industry.

*ELECTRICAL ENERGY — MONTHLY BULLETIN (THEME 4)*

ISSN 0378-3561, approximately 16 pages, price BFR 300 annual subscription

Updates monthly the principal statistical series characterizing the short-term movements in the electrical economy in general and fuel consumption in power stations in particular.

*MONTHLY EXTERNAL TRADE BULLETIN (THEME 6)*

ISSN 0378-3723 (DA/DE/EN/FR/IT/NL)

Format A 4, approximately 130 pages, price BFR 1 800 annual subscription

General summary of foreign trade of the European Community by countries and by products. Trends in EC trade by countries and by products. Trade of the main non-EC countries. Indices.

The persons especially interested in foreign trade may also consult for more detailed information the *Analytical tables Nimexe and CTCI* series of annual publications which will be published shortly. This important source of information exists also on microfiches.

► **Quarterly bulletins**

*BALANCES OF PAYMENTS — QUARTERLY DATA (THEME 2)*

ISSN 0251-1800 (EN/FR)

Format A 4, approximately 90 pages, price BFR 360 annual subscription

This publication provides the latest available quarterly and annual data on the global balances of payments (flows) of each European Community country, as well as for the Community as a whole (EUR 10 and EUR 9), of each of the candidate member countries (Spain and Portugal) and of the United States and Japan. The publication includes comparative tables with the main balance items of a certain number of industrialized countries.

The data are expressed in millions of European currency units (Mio ECU); they are presented according to the Eurostat's balance-of-payments schema and cover the three latest annual and the nine latest quarterly available periods.

---

## PUBLICATIONS

---

### *QUARTERLY IRON AND STEEL BULLETIN (THEME 4)*

ISSN 0378-3510 (DE/EN/FR/IT)

Format A 4, approximately 130 pages, price BFR 1 200 annual subscription

Annual, quarterly and monthly statistics on employment, consumption of raw materials, production of iron-ore, pig-iron, crude steel, finished steel products and end products, on works deliveries and receipts, stocks, on external and internal ECSC steel and scrap trade and on apparent steel consumption.

### *CROP PRODUCTION (THEME 5)*

ISSN 0378-3588 (DE/EN/FR/IT)

Format A 4, approximately 120 pages, price BFR 900 annual subscription

The most recent information on

- (1) land use, crop production of arable land (area, yield, production), fruit and vegetable production;
- (2) meteorological report;
- (3) supply balances for crop products.

### *ANIMAL PRODUCTION (THEME 5)*

ISSN 0250-6580 (DE/EN/FR/IT)

Format A 4, approximately 120 pages, price BFR 900 annual subscription

This quarterly bulletin replaces the three monthly bulletins giving monthly statistics of meat, eggs and milk.

The data in the first three sections of the bulletin are supplied by Member States under the following Council legislation:

- Directives 68/161/EEC and 73/132/EEC on production statistics for beef and veal and pigmeat;
- Regulation (EEC) No 2782/75 on the production and marketing of eggs for hatching and of poultry chicks, and
- Directive 72/280/EEC on milk and milk products.

The fourth section contains data derived from external trade statistics, aggregated so as to make them comparable with production statistics.

The fifth and final section contains the main findings of surveys carried out at different intervals, such as the structural surveys on cattle-breeding and pig-breeding, annual supply balance-sheets, notes and forecasts, and other information.

### *SELLING PRICES OF VEGETABLE PRODUCTS (THEME 5)*

ISSN 0378-6714 (DE/EN/FR/IT)

Format A 4, approximately 160 pages, price BFR 600 annual subscription

The quarterly bulletin *Selling prices of vegetable products* shows:

- producer prices of vegetable products in each of the past 12 months;
- prices of certain processed products of vegetable origin;
- percentage variations compared with the previous month and the same period in the previous year.

The prices in absolute values are expressed in national currency and in ECU. The conversion rates used are shown in the preliminary section which also gives a description of the main characteristics of each price series and the rates of the value-added tax in agriculture.

*SELLING PRICES OF ANIMAL PRODUCTS (THEME 5)*

ISSN 0378-6722 (DE/EN/FR/IT)

Format A 4, approximately 130 pages, price BFR 600 annual subscription

The quarterly bulletin *Selling prices of animal products* shows:

- producer prices of animal products in each of the past 12 months;
- prices of certain processed products of animal origin;
- percentage variations compared with the previous month and the same period in the previous year.

The prices in absolute values are expressed in national currency and in ECU. The conversion rates used are shown in the preliminary section which also gives a description of the main characteristics of each price series and the rates of the value-added tax in agriculture.

*PURCHASE PRICES OF THE MEANS OF PRODUCTION (THEME 5)*

ISSN 0378-6692 (DE/EN/FR/IT)

Format A 4, approximately 165 pages, price BFR 900 annual subscription

The quarterly bulletin *Purchase prices of the means of production* shows:

- prices of the main means of production purchased by farmers in each of the past 12 months (feedingstuffs, fertilizers, fuels, seeds and pesticides);
- percentage variations compared with the previous month and the same period in the previous year.

The prices in absolute values are expressed in national currency and in ECU. The conversion rates used are shown in the preliminary section which also gives a description of the main characteristics of each price series and the rates of value-added tax in agriculture.

*EC AGRICULTURAL PRICE INDICES (INPUT-OUTPUT) (THEME 5)*

ISSN 0250-5967 (DE/EN/FR/IT)

Format A 4, approximately 70 pages, price BFR 600 annual subscription

Statistics are presented month by month for the past 12 months. The indices are preceded in each case by a brief analysis of the previous quarter's results showing the percentage variations for both EUR 9 and each Member State. Weighting schemes are given by country and by product. Graphs show trends for EUR 9 for the main elements of the indices. The annual results for the indices are also published in the yearbooks *Agricultural price statistics* and *Yearbook of agricultural statistics*.

*FISHERIES — QUANTITY AND VALUE OF LANDINGS IN THE EC (THEME 5)*

ISSN 0250-4383 (DE/EN/FR/IT)

Format A 4, approximately 88 pages, price BFR 600 annual subscription

This quarterly publication contains the monthly data on the landings (quantities and values) of the more important fish species in Community ports.

## PUBLICATIONS

---

### *EC TRADE WITH THE ACP STATES AND THE SOUTH MEDITERRANEAN STATES* (THEME 6)

ISSN 0379-3486 (EN/FR)

Format A 4, approximately 75 pages, price BFR 150 annual subscription

This publication comprises a selection of statistics on the main flow of trade between the Community and the developing countries, in particular the ACP countries and the south Mediterranean States. The statistics published relate both to trade by broad categories of products and to Community imports of the main commodities.

#### ► **Half-yearly bulletins**

### *HOURLY EARNINGS — HOURS OF WORK* (THEME 3)

ISSN 0378-3596 (DA/DE/EN/FR/IT/NL)

Format A 4, approximately 290 pages, price BFR 600 annual subscription

This publication which is updated every six months contains harmonized data on workers' hourly wages, on labour costs and weekly hours worked, plus indices of developments in employees' monthly salaries in industry. These data are broken down according to NACE, and, for certain countries, by region.

This publication also contains some data on the earnings and conditions of employment of permanent workers in agriculture.

# General information

The publications of the Statistical Office of the European Communities (Eurostat) are grouped according to 'themes', of which the reader will find a list below.

*Eurostat News* provides the public with a regular flow of information on the progress of the SOEC publications programme. The presentation is such that it is clear which publications have *just appeared* in the course of the last quarter and which are *in course of preparation* and will thus be available in the near future. There follows a list of 'periodicals', indicating their frequency of publication (monthly, quarterly, half-yearly).

The information provided on each publication is as follows: 'theme' to which the work belongs, title of volume, international classification number (ISBN or ISSN), languages in which available, format, number of pages, price and brief summary of content. For practical reasons, the *price* is given in only one currency, the BFR (Belgian franc) which is the legal tender in the country of publication (the Grand Duchy of Luxembourg). The price thus indicated applies when orders are placed directly with the Office for Official Publications of the European Communities (L-2985 Luxembourg, 5 rue du Commerce – postal cheque account (CCP) 19 190-81 – bank current account BIL 8-109/6003/300) and serves as a rough guide to the prices in the various national currencies in the event of purchase from the sales offices which are listed on the third page of the cover. The *languages* in which the publications are available are shown by

the following abbreviations: M – multilingual, i.e. in the official languages of the European Communities.

DA = Danish, DE = German, EN = English, GR = Greek, FR = French, IT = Italian, NL = Dutch

Users who wish to order publications directly from the Publications Office (or to take out subscriptions) will find an *order form* on the last page of *Eurostat News*. It need only be detached, legibly completed and sent to the address indicated.

As certain users of statistical information wish to be regularly informed of the publications produced by the Statistical Office of the European Communities, a *request for information* is provided at the second last page of this issue. If it is completed and returned to Eurostat, the sender will subsequently receive notification of our publications as they appear.

Further information may be obtained from the staff responsible for *Eurostat News* (at the address given on the first page of this issue) or from Division C-4 – Dissemination of information (Jean Monnet Building L-2920 Luxembourg – Tel. 4301/2038 – Telex COMEUR LU 3423).

Officials of the Commission of the European Communities and the other institutions who are *employed in Brussels* should apply to the Eurostat liaison office 'Data shop' (U.P.B. Building, 120 Rue de la Loi, Brussels – Office 4/11, tel. 735 80 40/1504 – Telex 21877 COMEU B).
