country**

ARTIKLER – ARTICLES – ARTICOLI . . . . . 83

Manuskript afsluttet den 28. januar 1980

Manuscript completed 28 January 1980

Manoscritto terminato il 28 gennaio 1980

**Arbejdsløshed : situationen ved udgangen af 1979**

Ved udgangen af december 1979 var der i EF 6,2 Mio registrerede arbejdsløse. I sæsonkorrigerede tal er der næsten ingen ændring sket i forhold til november 1979.

Ifølge tal, som endnu er foreløbige, bliver antallet af arbejdsløse i EF i 1979 6,0 Mio. I forhold til 1978 er der tale om en stigning på 1,1%. Arbejdsløshedsprocenten nåede i 1979 op på 5,6% imod 5,5% i 1978.

Det gennemsnitlige antal registrerede arbejdsløse i 1979 viser en betydelig nedgang i arbejdsløsheden i visse medlemslande : Danmark (-18,8%), Forbundsrepublikken Tyskland (-11,8%), Luxembourg og Irland (ca. -9,5%) og Det forenede Kongerige (-5,7%). Arbejdsløsheden er derimod højere end i 1978 i: Frankrig (+15,7%), Italien (+6,6%), Belgien (+5,6%) og Nederlandene (+2,1%).

**Industriproduktionen : stigningen i industriproduktionen i De europæiske Fællesskaber anslås til 4,0 % i 1979**

Ved ekstrapolering af stigningstendenserne i indekset for EUR 9 skønner EUROSTAT, at industriproduktionen i De europæiske Fællesskaber er steget med 4,0% i 1979 i forhold til 1978. Denne foreløbige stigningstakt skal sammenholdes med stigningerne på 2,2% og 2,4% i industriproduktionen registreret i henholdsvis 1977 og 1978. Efter produktionskategori er produktionsstigningen i mellemproduktindustrien ifølge EUROSTAT nået op på 6,0% i 1979 (mod 2,2% i 1977 og 3,0% i 1978), mens stigningen i det samme år i sektoren for forbrugsgoder når op på mere end 3,0% (efter at have ligget stabilt på 2,7% i 1977 og 1978). For investeringsgodeindustriene forudser EUROSTAT en produktionsstigning på mindre end 2,0% efter stigninger på henholdsvis 2,8% og 0,3% i 1977 og 1978. I alt viser disse resultater, at den vigtigste væksthæder i 1979 har været mellemproduktsektoren (som repræsenterer ca. 50% af den samlede værditilvækst i industrien inden for De europæiske Fællesskaber), da de procenttal, der registreres for sektorerne investeringsgoder og forbrugsgoder var lavere.

Hvad angår den månedlige udvikling faldt det sæsonkorrigerede indeks til 117,0 (1975=100), hvilket er en nedgang på 0,8% i oktober. Endvidere fortsætter stigningstakterne på kort sigt med at udvikle sig i negativ retning. For alle de vigtigste varegrupper har man registreret særdeles betydelige fald i sektorerne investeringsgoder og forbrugsgoder i Fællesskabet. Sektoren for mellemprodukter har bevaret en vis styrke, selv om tallene er lavere end de tal, der registreres i foråret og i sommer.

På medlemsstatsniveau er der i de seneste måneder sket en negativ udvikling i stigningstakten på kort sigt i Forbundsrepublikken Tyskland, Nederlandene, Belgien og Danmark, mens udviklingen har været mere positiv i Italien og Frankrig. Hvad angår udviklingen på kort sigt tyder de seneste skøn fra INSEE på, at industriproduktionen kan holde sig på et relativt højt niveau i Frankrig indtil udgangen af første kvartal af 1980. I Det forenede Kongerige er det stadig væk vanskeligt at bedømme den kortsigtede udvikling, især på grund af den indflydelse på udviklingen i produktionsindekset, som skyldes de strejker, der i august og september lammede de metalforarbejdende industrier.

**Landbrugsprodukter : Fællesskabets mælkeproduktion i 1979**

På basis af de for øjeblikket forhåndenværende månedlige statistikker regner man med, at mejerierne i Fællesskabet i 1979 har indvejet 92,9 Mio t mælk. Med et lidt større antal malkekøer (+0,5%) skulle produktionen være steget med 1,8% på et år, hvilket giver en stigning i mælkeydelsen på 1,3%. Fællesskabets stigning i ydelsen skyldes for 1979's vedkommende stigninger i Forbundsrepublikken Tyskland, Frankrig, Italien og BLØU. I Nederlandene og Danmark har man derimod åbenbart nået en vis grænse for mælkeydelsen. Disse lande er sammen med Det forenede Kongerige de lande, der har de højeste mælkeydelser i EF.

I 1980 kan mælkeproduktionen nå op på 95 Mio t, hvilket vil være en fornyet stigning i størrelsesordenen 2%.

**Handelen inden for Fællesskabet : forøget samhandel**

Efter en let nedgang i de foregående to måneder steg handelen inden for Fællesskabet i sæsonkorrigerede tal i oktober måned med 12,0% i forhold til den foregående måned (basis : import). Med 20 Mrd ERE nåede den årets højeste niveau. Sammenlignet med den tilsvarende måned året i forvejen var stigningen endog på 27,2%.

I forhold til de 10 måneder i 1978 steg samhandelen inden for Fællesskabet med 19,9% og nåede op på 179,7 Mrd ERE i den samme periode i 1979. Den hurtige vækst i samhandelen mellem medlemslandene skyldes først og fremmest Irland. Det forenede Kongerige og Danmark, som forøgede deres import fra de andre medlemslande med henholdsvis 34,1%, 30,5% og 19,9%. Da stigningen i deres eksport imidlertid ikke var så stor som stigningen i importen, registrerede disse tre lande et større eller mindre underskud på deres EF-handelsbalance.

De livlige konjunkturer førte til en kraftig stigning i de øvrige medlemslandes import (mellen 8,3% for BLØU og 28,7% for Italien). Da også deres eksport steg betydeligt, blev deres EF-handel betydeligt forbedret.

**Fællesskabets samhandel med tredjelande : import : stigning i efterspørgslen og i oliepriserne**

I sæsonkorrigerede tal udviser Fællesskabets samhandel med tredjelande en betydelig stigning i forhold til den foregående måned : importen steg med 12,2% til 20,7 Mrd ERE, og eksporten steg med 9,6% til 17,4 Mrd ERE. Stigningstakten var sammenlignet med samme måned i 1978 helt oppe på 36,0% for importens vedkommende og på 16% for eksporten.

Den kraftige efterspørgsel, som til dels skyldtes livlige konjunkturer i nogle af medlemslandene, og de højere oliepriser førte til en kraftig stigning i importen, hvilket gav et rekordstort underskud på 3,0 Mrd ERE i oktober. Derved nåede underskuddet på handelsbalancen for de ti første måneder i 1979 op på -16,9 Mrd ERE. For hele året bliver der tale om et rekordstort underskud, som endog vil blive større en underskuddet i 1976 (-18,3 Mrd ERE). Man regner med, at underskuddet i 1979 vil blive på mere end 20 Mrd ERE. I løbende værdi er eksporten steget betydeligt langsommere end importen 158,1 Mrd ERE og +11,4% mod 175,1 Mrd ERE og +20,4%.

Især er den nedgang, der er registreret i Forbundsrepublikken Tysklands udenrigshandel, bemærkelsesværdig: handelsbalancen for perioden januar-oktober 1978 udviste et overskud på 10,6 Mrd ERE, men dette overskud faldt til 5,4 Mrd ERE for den samme periode i 1979. Forbundsrepublikken Tyskland har således den laveste eksportstigning (7,3%) og den tredjehøjeste importstigning i EF (22,7%).

Men også de øvrige medlemslande har registreret et forøget underskud over for tredjelande (se serie O80, s. 34). Nederlændenes store underskud skyldes landets nøgleposition for den europæiske olieimport. Dette forhold kompenseres i vid udstrækning af et meget stort overskud i samhandelen inden for Fællesskabet.

**Forbrugerpriser : prisstigningen i 1979**

Forbrugerprisindekset for EF steg med 0,8% fra november til december 1979.

Med undtagelse af Italien, hvor der var tale om en meget kraftig stigning (1,6%), var stigningerne i alle EF-landene moderate eller svage i sidste måned i forhold til stigningerne i de foregående måneder.

For hele 1979 steg priserne med 9,9% i forhold til 1978 (års gennemsnit).

Man kan iagttage en meget betydelig stigning i årets løb : i forhold til de tilsvarende perioder i 1978 var den gennemsnitlige stigning i første halvår af 1979 for EUR 9 på 8,6%, mens den for andet halvår var på 11,6%.

Den årlige stigningstakt for De forenede Stater vil komme til at ligge på ca. 11,5% for 1979.

For de tre ansøgerlande har man registreret kraftige stigninger : Spanien 15,7% (skøn), Grækenland 18,5% og Portugal 23,5%.

**Landbrugspriser : udviklingen i tredje kvartal af 1979**

I løbet af tredje kvartal 1979 steg produktionsprisindekset for hele EUR 9 (undtagen frugt og grønsager) med 7,2% i forhold til tredje kvartal 1978. Denne stigningstakt er på ny betydelig større end stigningstakten i de seneste kvartal sammenlignet med de tilsvarende kvartaler året i forvejen. Det bør imidlertid bemærkes, at det samlede indeks (undtagen frugt og grønsager) faldt med 1,2% i forhold til andet kvartal 1979.

I samme kvartal steg købspriserne på varer og tjenesteydelser til brug for driften i landbruget for hele EUR-9 med 10% i forhold til den tilsvarende periode i 1978, dvs. en større stigning end for produktionspriserne på landbrugsvarer (undtagen frugt og grønsager). Stigningen i købspriserne på varer og tjenesteydelser til brug for driften i landbruget var betydelig højere i tredje kvartal 1979 end i de foregående tre kvartaler. Den væsentligste årsag hertil er den betydelige stigning på næsten 23% i energipriserne.

I den samme periode steg købspriserne på varer og tjenesteydelser, som indgår i investeringerne i landbruget, for hele EUR-9 med 11,3%, hvilket er en lidt større stigning. Det bør bemærkes, at der i forhold til andet kvartal er sket en betydelig stigning i byggeomkostningsindekset for landbrugsbygninger (+13,1%).

**Penge og finanser**

Som følge af de politiske kriser i Nærorienten kom den amerikanske dollar under pres i begyndelsen af januar.

Desuden er efterspørgslen efter guld blevet så stor, at guldmarkedet i Paris blev tvunget til at lukke en dag i første uge af januar. I løbet af et år er guldprisen blevet fordoblet.

Pund sterling holdt sig stabil over for dollaren, og ligger for øjeblikket på det højeste niveau i fem måneder. Det har også forbedret sin stilling over for de vigtigste europæiske valutaer.

## Unemployment: situation at the end of 1979

At the end of December 1979 the number of registered unemployed in the Community stood at 6.2 million. After seasonal adjustment, this is more or less the same situation as in November 1979.

According to figures which are still provisional, the average number of unemployed in the Community in 1979 was 6.0 million. This represents an increase of 1.1% compared with 1978. The unemployment rate was 5.6% in 1979, as against 5.5% in 1978.

The average number of registered unemployed in 1979 show an appreciable fall in some Member States, namely Denmark (-18.8%), the FR of Germany (-11.8%), Luxembourg and Ireland (approximately -9.5%), and the United Kingdom (-5.7%). On the other hand, unemployment was higher than in 1978 in France (+15.7%), Italy (+6.6%), Belgium (+5.6%) and the Netherlands (+2.1%).

## Industrial production: growth in industrial production estimated at 4.0% for the European Community in 1979

By extrapolating the growth trends in the EUR 9 index, EUROSTAT estimates that industrial production in the European Community went up by 4.0% between 1978 and 1979. This estimated rate of growth is to be compared with increases of 2.2 and 2.4% recorded in 1977 and 1978 respectively. With respect to the aggregate branch level, production in the intermediate products industries was, according to EUROSTAT, 6.0% up in 1979 (as against 2.2% in 1977 and 3.0% in 1978), whereas in the same year the growth in the consumer goods sector was over 3.0% (after remaining stable in 1977 and attaining 2.7% in 1978). For the capital goods industries EUROSTAT forecasts a growth of less than 2.0%, following increases of 2.8 and 0.3% in 1977 and 1978 respectively. All these results indicate that the prime mover of growth in 1979 was the intermediate products sector (which represents approximately 50% of the total value added of the index in the European Community), the percentages recorded in the capital and consumer goods sectors being lower.

As regards monthly trends, the seasonally adjusted index fell to 117.0 (1975=100), i.e. a drop of 0.8% in October. Similarly, the short-term growth rates continue to show a downward trend in all the main groupings of products, the decline in the Community's capital and consumer goods sectors being appreciable. The intermediate products sector remained fairly buoyant, even though the growth rates are lower than in spring and summer.

At national level, the short-term growth rates have shown a downward trend over the past few months in Germany, the Netherlands, Belgium and Denmark, whereas in Italy and France the trend has been more positive. As far as the short-term outlook is concerned, the INSEE's latest forecasts indicate that industrial production might remain fairly high in France until the end of the first quarter of 1980. In the United Kingdom, the short-term trends are still difficult to interpret, owing in particular to the effects on the index of production of the strikes which paralysed the metal processing industries in August and September.

## Agricultural products: community milk production in 1979

On the basis of the monthly statistics currently available, it may be estimated that in 1979 Community dairies collected 92.9 million tonnes of cow's milk. With a slightly higher number of dairy cows (+0.5%), production is expected to have increased by 1.8% in a year, representing a growth of +1.3% in milk yields. In 1979 the greater Community yield was due solely to the increases achieved in the FR of Germany, France, Italy and the BLEU; on the other hand, milk yields are expected to have reached a definite ceiling in the Netherlands and Denmark, the two countries which together with the United Kingdom have the highest milk yields in the Community.

In 1980 the total amount of milk collected could be 95 million tonnes, i.e. a further increase of around +2%.

## Intra-Community trade: increasing integration

After a slight downturn in the previous two months, the seasonally adjusted intra-Community trade figures showed an increase of 12.0% during October over the previous month (based on imports) to reach their highest level of the year at 20 thousand million ECU. Compared with the corresponding month of 1978, the increase was as much as 27.2%.

Compared with the first ten months of 1978 the value of intra-Community trade went up by 19.9% to 179.7 thousand million ECU during the same period of 1979. The rapid growth of commercial integration among member countries was due primarily to Ireland, the United Kingdom and Denmark, which stepped up their imports from the other member countries by 34.1%, 30.5% and 19.9% respectively. However, as their sales did not keep pace with their purchases, these three countries recorded a deficit of varying proportions on their intra-Community trade balance.

Buoyant market conditions led to a substantial increase in the other member countries' imports (ranging from 8.3% for the BLEU to 28.7% for Italy). As there was also a notable increase in their exports, their total intra-Community trade was distinctly higher.

## Community external trade: imports: increase in oil demand and prices

The Community's trade (seasonally adjusted) with non-member countries showed an appreciable increase over the previous month: imports went up by 12.2% to 20.7 thousand million ECU and exports by 9.6% to 17.4 thousand million ECU. The rates of increase compared with the same month of 1978 were as high as 36.0% for imports and 16% for exports.

The strong demand, created partly by buoyant market conditions in some member countries, and higher oil prices led to a considerable increase in imports, resulting in a record deficit of 3.0 thousand million ECU in October. The trade balance deficit for the first ten months of 1979 thus amounted to -16.9 thousand million ECU. The deficit for the whole year will be a record one, even exceeding the 1976 level (-18.3 thousand million ECU), and may be estimated at over 20 thousand million ECU. In current terms, the value of exports went up at an appreciably slower rate than that of imports (+11.4% to 158.1 thousand million ECU and +20.4% to 175.1 thousand million ECU respectively).

The downturn in Germany's external trade was most spectacular; while its trade balance showed a surplus of 10.6 thousand million ECU for the period from January to October 1978, this fell to 5.4 thousand million ECU for the same period of 1979. Germany thus had the lowest increase in exports (7.3%) and the third-highest increase in imports (22.7%) in the Community.

However, the other member countries also saw their deficit with non-member countries rise (see series O80, p. 34). The Netherlands' substantial deficit is due to its role as the hub of European oil imports. It is largely offset by a very considerable surplus on intra-Community trade.

## Prices: the increase in prices in 1979

The consumer price index for the Community rose by 0.8% between November and December 1979.

With the exception of Italy, where the increase was very high (1.6%), the increases in all the Community countries were moderate or low last month compared with the preceding months.

For 1979 as a whole, the increase in prices was 9.9% compared with 1978 (annual averages).

The rate of increase shows a very distinct acceleration during the year: compared with the corresponding periods of 1978, the average increase for EUR 9 was 8.6% in the first half of 1979 and 11.6% in the second half. In 1979, the annual rate of increase for the USA will be about 11.5%. Sharp increases were recorded in the three prospective member countries, viz. Spain 15.7% (p), Greece 18.5% and Portugal 23.5%.

## Agricultural prices: trends during the third quarter of 1979

During the third quarter of 1979 the overall Community index of producer prices (excluding fruit and vegetables) went up by 7.2% compared with the same period of 1978. This rate of increase is again appreciably higher than in the past two quarters in comparison with the corresponding quarters of the previous year. It should be noted, however, that the overall index (excluding fruit and vegetables) is 1.2% down on the second quarter of 1979.

During the third quarter the purchase prices of the goods and services currently consumed in agriculture went up by 10.0% for EUR 9 compared with the corresponding period of 1978, i.e. a higher increase than for producer prices of farm products (excluding fruit and vegetables). The rate of increase in these purchase prices was distinctly higher in the third quarter of 1979 than in the three previous quarters. This was due mainly to the substantial rise of almost 23% in energy prices.

Over the same period, purchase prices of goods and services contributing to agricultural investment showed a slightly higher increase of 11.3% for the Community as a whole. Particular mention must be made of a distinctly higher increase (+13.1%) in prices for fixed asset investment than in the second quarter.

## Finance

As a result of the political crises in the Middle East, the US dollar came under pressure at the beginning of January.

Moreover, the demand for gold became so strong that the Paris gold market was forced to close for one day during the first week of January; the price of gold has doubled in a year.

The £ sterling remains firm against the dollar and is currently at its highest level for five months. It has also hardened against the main European currencies.

**Disoccupazione : la situazione alla fine del 1979**

A fine dicembre del 1979 i disoccupati iscritti negli uffici di collocamento della Comunità erano 6,2 milioni: tenuto conto delle variazioni stagionali, questa cifra indica una sostanziale stabilità rispetto al mese di novembre.

In base a dati ancora provvisori, il numero medio dei disoccupati nella Comunità è stato nel 1979 di 6,0 milioni di persone; questa cifra corrisponde ad un tasso di disoccupazione del 5,6% (contro 5,5% nel 1978) e ad un aumento dell'1,1% rispetto al 1978.

A livello dei singoli paesi, le medie per il 1979 del numero dei disoccupati iscritti evidenziano, rispetto all'anno precedente, un notevole regresso della disoccupazione in alcuni Stati membri (Danimarca: -18,8%; R.f. di Germania: -11,8%; Lussemburgo e Irlanda: -9,5% circa; Regno Unito: -5,7%), ma un aggravamento in altri (Francia: +15,7%; Italia: +6,6%; Belgio: +5,6%; Paesi Bassi: +2,1%).

**Produzione industriale : l'incremento della produzione industriale nella Comunità europea è stimato per il 1979 al 4,0%**

Estrapolando le tendenze dello sviluppo dell'indice EUR 9, l'EUROSTAT valuta che la produzione industriale nella Comunità europea sia aumentata nel 1979 del 4,0% rispetto al 1978. Questo tasso d'incremento previsionale va raffrontato con gli aumenti della produzione industriale pari al 2,2% e al 2,4% registrati rispettivamente nel 1977 e nel 1978. Se si considerano i singoli raggruppamenti di branche produttive, l'aumento della produzione nel 1979 è stato, secondo l'EUROSTAT, del 6,0% nelle industrie dei beni intermedi (contro il 2,2% nel 1977 e il 3,0% nel 1978) e di oltre il 3,0% nel settore dei beni di consumo (dopo un tasso costante del 2,7% nel 1977 e nel 1978); per le industrie dei beni d'investimento l'EUROSTAT prevede invece uno sviluppo della produzione inferiore al 2,0%, che fa seguito agli aumenti rispettivi del 2,8% e dello 0,3% nel 1977 e nel 1978. L'insieme di questi risultati indica che il principale motore dello sviluppo nel 1979 sarà stato il settore dei beni intermedi (che rappresenta circa il 50% del valore aggiunto totale nell'indice della Comunità europea), mentre le percentuali registrate nei settori dei beni d'investimento e dei beni di consumo sono meno elevate.

Circa l'evoluzione mensile, l'indice destagionalizzato è sceso a 117,0 (1975 = 100), con una diminuzione dello 0,8% in ottobre. Analogamente, i tassi di sviluppo a breve termine continuano ad avere un andamento negativo in tutti i principali raggruppamenti di prodotti, mentre flessioni particolarmente sensibili si osservano nei settori dei beni d'investimento e dei beni di consumo della Comunità. Il settore dei beni intermedi ha mantenuto invece una certa vitalità, sebbene i tassi siano inferiori a quelli registrati in primavera e in estate.

A livello dei singoli Stati membri, i tassi di sviluppo a breve termine hanno avuto negli ultimi mesi un andamento negativo in Germania, nei Paesi Bassi, in Belgio e in Danimarca, mentre l'evoluzione è stata più positiva in Italia e in Francia. Per le prospettive a breve termine le ultime previsioni dell'INSEE indicano che la produzione industriale potrebbe mantenersi in Francia ad un livello relativamente sostenuto fino alla fine del primo trimestre del 1980. Nel Regno Unito le tendenze congiunturali restano difficili da interpretare, in particolare per l'incidenza che sull'andamento dell'indice della produzione hanno avuto gli scioperi che hanno paralizzato nei mesi di agosto e settembre le industrie di trasformazione dei metalli.

**Prodotti agricoli : produzione lattiera della comunità nel 1979**

Le statistiche mensili attualmente disponibili permettono di stimare che nel 1979 i caseifici della Comunità hanno raccolto 92,9 milioni di tonnellate di latte di vacca.

Con un patrimonio di vacche lattifere in lieve aumento (+0,5%), la produzione risulta così salita dell'1,8% in un anno, il che corrisponde ad un miglioramento dei rendimenti lattieri pari all'1,3%. Tale miglioramento globale comunitario del 1979 va attribuito esclusivamente agli incrementi ottenuti nella Repubblica federale di Germania, in Francia, in Italia e nell'UEBL, mentre nei Paesi Bassi e in Danimarca si osserva ormai un ristagno dei rendimenti lattieri che peraltro, insieme con quelli del Regno Unito, si situano sui livelli più elevati della Comunità.

Nel 1980 il volume del latte raccolto potrebbe ascendere a 95 milioni di tonnellate, con un nuovo aumento dell'ordine del 2%.

**Commercio intracomunitario : integrazione crescente**

Dopo la lieve flessione dei due mesi precedenti, gli scambi intracomunitari (valutati sulla base delle importazioni e in dati corretti delle variazioni stagionali) segnano nel mese di ottobre un aumento del 12,0% rispetto a settembre, raggiungendo con 20 miliardi di UCE il livello più elevato dell'anno. Rispetto all'ottobre dello scorso anno, l'espansione risulta ben del 27,2%.

Il volume complessivo degli scambi intracomunitari nei primi dieci mesi del 1979 è stato di 179,7 miliardi di UCE, il che corrisponde ad un aumento del 19,9% sullo stesso periodo del 1978. Tale rapido sviluppo dell'integrazione commerciale tra i paesi membri è dovuto in primo luogo all'Irlanda, al Regno Unito e alla Danimarca, che hanno aumentato le loro importazioni dagli altri paesi membri nella misura rispettiva del 34,1%, 30,5% e 19,9%. Questi tre paesi hanno però registrato un disavanzo più o meno rilevante della bilancia commerciale intracomunitaria, avendo incrementato le loro vendite nella Comunità solo ad un ritmo meno rapido di quello dei loro acquisti.

Il vivace clima congiunturale ha stimolato fortemente anche le importazioni degli altri paesi membri (tassi compresi tra l'8,3% per l'UEBL e il 28,7% per l'Italia), i quali hanno peraltro potuto sviluppare notevolmente anche le loro esportazioni, migliorando così decisamente il saldo della loro bilancia commerciale con gli altri paesi della Comunità.

**Commercio estero della Comunità : importazioni : aumento della domanda e del prezzo del petrolio**

I dati destagionalizzati relativi al commercio della Comunità con i paesi terzi indicano per il mese di ottobre un sensibile aumento rispetto al mese precedente : le importazioni sono salite del 12,2%, arrivando a 20,7 miliardi di UCE, mentre le esportazioni sono aumentate del 9,6%, raggiungendo i 17,4 miliardi di UCE. Rispetto al mese corrispondente del 1978 i tassi di sviluppo risultano ben del 36,0% per le importazioni e del 16% per le esportazioni.

La domanda sostenuta, dovuta in parte alla vivacità della congiuntura in alcuni paesi membri, e i prezzi più elevati del petrolio hanno provocato un forte aumento delle importazioni, che ha portato al disavanzo record di 3,0 miliardi UCE del mese di ottobre; in tal modo il deficit della bilancia commerciale è ormai di 16,9 miliardi di UCE per i primi dieci mesi del 1979 ed arriverà su base annua ad un livello record, superando perfino il deficit del 1976 (-18,3 miliardi di UCE) : le stime per l'intero 1979 lasciano infatti prevedere un saldo negativo superiore a 20 miliardi di UCE. In valori correnti, le esportazioni sono aumentate ad un ritmo molto meno rapido delle importazioni (+11,4% e 158,1 miliardi di UCE, contro +20,4% e 175,1 miliardi di UCE).

L'elemento più spettacolare è la flessione osservata nel saldo del commercio estero della Repubblica federale di Germania : l'attivo della bilancia commerciale tedesca, pari a 10,6 miliardi di UCE per il periodo gennaio-ottobre 1978, si è ridotto per il periodo corrispondente del 1979 a 5,4 miliardi di UCE. La Germania ha d'altronde registrato il più debole incremento delle esportazioni (7,3%) e si trova al terzo posto nella CE per l'incremento delle importazioni (22,7%).

D'altra parte gli altri paesi membri hanno a loro volta registrato un aumento del loro disavanzo nei confronti dei paesi terzi (vedi serie O80, pag. 34). Il forte saldo negativo dei Paesi Bassi si spiega per la loro funzione di centro d'approvvigionamento nelle importazioni petrolifere europee : questa situazione è d'altronde ampiamente compensata del fortissimo attivo negli scambi intracomunitari.

**Prezzi : l'aumento nel 1979**

Tra novembre e dicembre del 1979 l'indice dei prezzi al consumo per la CE è salito delle 0,8%.

Se si esclude l'Italia, in cui il rialzo è stato molto sensibile (1,6%), in tutti gli altri paesi della CE gli aumenti di quest'ultimo mese risultano moderati o bassi rispetto a quelli osservati nei mesi precedenti.

Sull'intero arco del 1979, l'aumento dei prezzi rispetto al 1978 risulta del 9,9% (medie annue).

Si può osservare un deciso accelerarsi dell'inflazione nel corso dell'anno : l'aumento medio EUR 9 rispetto al corrispondente periodo del 1978 è stato infatti dell'8,6% nel primo semestre del 1979 e ben dell'11,6% nel secondo semestre.

Le stime effettuate per gli Stati Uniti lasciano prevedere per il 1979 un tasso di aumento annuo dei prezzi intorno all'11,5%.

D'altra parte, nei tre paesi candidati all'adesione, si sono osservati aumenti molto forti : 15,7% in Spagna (dato provvisorio), 18,5% in Grecia e 23,5% in Portogallo.

**Prezzi agricoli : evoluzione nel terzo trimestre 1979**

Nel terzo trimestre del 1979 l'indice globale EUR 9 dei prezzi alla produzione dei prodotti agricoli (ortofrutticoli esclusi) è salito del 7,2% rispetto al corrispondente periodo del 1978. Questo tasso di aumento è di nuovo nettamente superiore a quelli corrispondenti osservati di volta in volta negli ultimi trimestri, sempre su base annua. Va notato che su base trimestrale, e cioè rispetto al secondo trimestre del 1979, si registra un regresso dell'indice globale (ortofrutticoli esclusi) pari all'1,2%.

Nello stesso trimestre, i prezzi d'acquisto dei beni e servizi di consumo corrente in agricoltura sono mediamente aumentati, per EUR 9, del 10,0% rispetto al periodo corrispondente del 1978 : l'aumento risulta perciò superiore a quello dei prezzi alla produzione dei prodotti agricoli (ortofrutticoli esclusi). Il tasso d'aumento dei prezzi d'acquisto dei beni e servizi di consumo corrente in agricoltura nel terzo trimestre 1979 è stato sensibilmente più alto di quello dei tre trimestri precedenti : la causa principale è il forte rialzo dei prezzi dell'energia, pari quasi al 23%.

Un aumento leggermente superiore (11,3%) è stato registrato per EUR 9, nello stesso periodo, dai prezzi d'acquisto dei beni e servizi che contribuiscono agli investimenti in agricoltura. Va sottolineato in particolare che per gli investimenti in fabbricati agricoli l'aumento (+13,1%) è nettamente superiore a quello del secondo trimestre.

**Finanze**

La crisi politica nel Medio Oriente ha portato a pressioni sul dollaro americano all'inizio di gennaio.

D'altra parte, nella prima settimana di gennaio la domanda d'oro è diventata talmente forte da costringere alla chiusura, per una giornata, del mercato dell'oro di Parigi. Il prezzo dell'oro è raddoppiato nel giro di un anno.

La sterlina mantiene una posizione alquanto solida nei confronti del dollaro e si trova attualmente al suo livello più elevato osservato da 5 mesi; la sua posizione è migliorata anche nei confronti delle principali valute europee.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelseres definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

## PREFACE

EN

This bulletin is in two parts: 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

## AVVERTENZA

IT

Il presente bollettino consta di 2 parti: l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa

## COMMUNITY FOOD SUPPLY SITUATION IN BALANCE, BUT WITH CONSIDERABLE DIFFERENCES FROM COUNTRY TO COUNTRY

In the 1977/78 farm year, agricultural products equivalent to 310 million tonnes of cereals were produced and at the same time 313 million tonnes of grain-equivalent units were consumed for food and industrial purposes in the European Economic Community. The 'degree of self-sufficiency', which is a comparison of production and consumption figures, was 99. In overall terms, the Community was thus only 1 % short of achieving full self-sufficiency in food. In this overall figure the high import and export figures have, however, been set off against each other.

### First SOEC calculations

These results are derived from calculations which the Statistical Office of the European Communities carried out for the first time with the help of the supply balance sheets. These are compiled on a regular basis for all the important foodstuffs, including wine. For the purposes of these calculations all agricultural products were valued on the basis of a standard ratio derived from their value as compared with cereals and known as a 'grain-equivalent unit'. Double counting is a result of, for example, the use of agricultural products for feed was thus eliminated. Naturally, the aggregation of the various agricultural products leads to rather approximate and generalized figures. On the other hand, it shows which of the Community

Member States are to be considered overall as agricultural exporters and how high their export surpluses are in relation to their own production. It likewise shows the deficits of the Member States which on balance are dependent on food and feedingstuff imports.

### France is the largest food producer and consumer

The largest agricultural producer in the Community is France, with an annual production (including wine) of 89 million tonnes of grain-equivalent units (GEU), followed by the Federal Republic of Germany with 67 million tonnes GEU and Italy with 50 million tonnes GEU. With an annual production of 10 million tonnes GEU, Ireland is the smallest agricultural producer alongside Belgium/Luxembourg. The country with the highest consumption of foodstuffs and wine (including consumption for industrial purposes) is again France with 76 million tonnes GEU. The Federal Republic of Germany, which has 8 million more inhabitants than France, is only in second place with 74 million tonnes GEU. It is thus obvious that in France more food (including wine) is consumed per head of population than in Germany and the Community as a whole. Italy and the United Kingdom show a total consumption of only 62 million tonnes GEU. Ireland and Denmark are at the bottom of the table.

### Supply situation 1977/1978

	Production	Consumption	Balance	Degree of self-sufficiency
	in million tonnes GEU			
FR of Germany	66.8	74.1	- 7.3	90
France	88.6	76.4	+ 12.2	116
Italy	50.1	61.6	- 11.5	81
Netherlands	24.8	15.7	+ 9.1	158
Belgium/Luxembourg	12.6	13.2	- 0.6	95
United Kingdom	42.5	61.6	- 19.1	69
Ireland	10.0	4.1	+ 5.9	243
Denmark	14.1	5.9	+ 8.2	240
Community	310	313	- 3	99

### The smaller agricultural countries have relatively the greatest surpluses

The difference between production and consumption gives the supply balance, i.e. the net quantity which has to be imported in order to ensure that the population is fully supplied, or (as it cannot be sold in the country itself) exported or stored. In 1977/78 France had a surplus of 12 million tonnes GEU; France's degree of self-sufficiency was 116, which means that (in net terms) 16% more agricultural products were produced than could be sold on domestic markets. Measured in absolute figures, the surpluses in the Netherlands (9 million tonnes GEU) were the second highest. However, in relation to production the surplus was much greater than in France; the Netherlands' degree of self-sufficiency stands at 158. Denmark showed a surplus of 8 million tonnes GEU. Since the consumption of the inhabitants, who number only 5 million (Netherlands 14 million) is comparatively low, Denmark's degree of self-sufficiency is calculated at 240. This means, therefore, that far more than half (50%) of indigenous Danish agricultural production is exported. The situation is similar in Ireland; in 1977/78 its degree of self-sufficiency was 243.

### The United Kingdom has the largest supply deficit

The balances of the countries with a net deficit likewise show typical differences. The United Kingdom is by far the most dependent on food imports, which in 1977/78 stood at 19 million tonnes GEU. It was followed by Italy with a deficit of 12 million tonnes GEU. Whereas the United Kingdom's degree of self-sufficiency stood at 69 (31% of foodstuffs consumed had thus to be imported), Italy's stood at 81%. The Federal Republic of Germany, with the highest population in the Community, had a much lower deficit in 1977/

1978 (8 million tonnes GEU) than either the United Kingdom or Italy. Its degree of self-sufficiency stood at 90. Agricultural production is thus relatively higher in Germany than in these two member countries.

### Imports of foreign feed are significant

A considerable proportion, i.e. approximately one-eighth, of animal production in the Community is produced with the help of imported high-grade feedingstuffs such as oilcakes, soybean meal, maize, tapioca, etc. Most of these feedingstuffs cannot be produced at all or not in sufficient quantities in Europe itself. They are therefore imported from areas with favourable climatic conditions where, in addition, they can be produced relatively cheaply.

The means of production of animal products are artificially increased by the import of feedingstuffs. Instead of self-produced feed, for which farmers require their own land, use is made of imported feed produced on foreign land. It may therefore be said — in exaggeration — that the existing area used for agriculture is increased by the use of imported feed and that in a way agricultural land is 'imported'.

The scale of these imports of feed or the increase in capacity from other countries can also be expressed in area equivalents. The basic concept is to give a rough estimate of the area which would have been needed to produce the imported feed (converted into grain-equivalent units) domestically. This area is calculated by dividing the quantities of foreign feed by the cereals yield per hectare on the basis of the respective national figures. In the data for the individual Member States intra-Community trade is likewise counted as imports from abroad, whereas the data for the Community include only imports from non-member countries.

### Foreign feed 1977/1978

	Consumption of foreign feed	Area equivalent of foreign feed <sup>1</sup>	
	Million tonnes GEU	Million ha	% <sup>2</sup>
FR of Germany	12,1	3,0	22
France	5,1	1,3	4
Italy	6,6	2,1	12
Netherlands	11,7	2,3	110
Belgium/Luxembourg	4,1	1,0	59
United Kingdom	5,6	1,3	7
Ireland	0,9	0,2	4
Denmark	2,6	0,7	24
Total	48,7	—	—
Intra-Community trade <sup>3</sup>	-9,6	—	—
Community (from non-member countries)	39,1	10,0	11

<sup>1</sup> Area theoretically required to produce this foreign feed in the country itself.

<sup>2</sup> Area equivalent of the foreign feed as a percentage of the actual area used for agriculture.

<sup>3</sup> Deduction in respect of the quantities of feed traded between Community countries.

### The Community 'increased' its area by 10 million ha

The above table shows that in 1977/78 the Community increased its area capacity by 10 million ha of agricultural land as a result of importing 39 million tonnes GEU of foreign feed. These 10 million ha are equivalent to 11% of the existing area used for agriculture.

There are considerable differences between Member States. The Netherlands is a particularly conspicuous case. When converted, imports of foreign feed represent in this country an increase of 110% or 2.3 million ha in its own means of feed production. More imported than self-produced feed is in fact consumed in the Netherlands. Since 49.5% of Dutch animal production was exported in 1977/78 — with similar figures for many years prior to this — it may be said that on balance Dutch exports are produced with the help of foreign feed.

The importance of foreign feed has likewise increased in Belgium. Imports have led to an increase of around 60% (or approximately 1 million ha) in domestic production capacity. In 1977/78 the Danish animal processing industry increased its own feed production by 24% with the help of imported feed, representing a theoretical increase in area of approximately 700 000 ha. The next country is the Federal Republic of Germany with an increase of 22%. Taking account of the size of this country, this gives a theoretical increase in area of 3 million ha. In the other Member States the relative importance of foreign feed is smaller, although the increases in capacity calculated in absolute terms are definitely significant; Italy 2.1 million ha, United Kingdom and France 1.3 million ha each.

243 sider. Format A4

Flersproget udgave. Udkommet i december 1979

Denne publikation indeholder de seneste rækker om beskæftigelse og den erhvervsaktive befolkning, arbejdsløshed og arbejdskonflikter og ajourfører således publikationen »Beskæftigelse og arbejdsløshed« fra 1978.

Basistabellerne vedrørende befolkningen, den erhvervsaktive befolkning og beskæftigelsen suppleres med resultaterne af de statistiske undersøgelser vedrørende lønmodtagere, der er udarbejdet på grundlag af de i NACE anvendte klasser. Tabellerne om arbejdsløshed indeholder de rækker, Det statistiske Kontor offentliggør hver måned, hvortil kommer flere specialanalyser og oplysninger om ledige arbejdspladser og arbejdsformidling. Arbejdskonflikterne angives som tabte arbejdsdage for 1 000 lønmodtagere for hver erhvervssektor.

En historisk del omfatter de vigtigste oplysninger i form af kronologiske rækker, hvoraf flere går helt tilbage til 1950.

Publikationen indeholder et tillæg, som bringer oplysninger om beskæftigelsen og arbejdsløsheden i Grækenland, Spanien og Portugal.

Yellow series:

**Employment and unemployment 1972-1978**

ISBN 92-825-1360-2

243 pages. Format A4

Multilingual edition published in December 1979

This publication contains the most recent series on employment, working population unemployment and industrial stoppages thus bringing the 1978 edition on 'Employment und unemployment' up to date.

The basic tables on population, working population and unemployment are supplemented by employees-in-unemployment statistics established in accordance with the NACE classes. The tables on employment include the series published monthly by the Statistical Office plus several specific analyses and certain figures on vacancies notified and filled. Industrial stoppages are shown as the number of days lost per 1 000 employees per branch of activity.

A historical section shows the main figures in the form of chronological series, several of which date back to 1950.

An annex is added to include employment and unemployment figures in Greece, Spain and Portugal.

DM 31,25	UKL 7,60
FF 72,80	USD 17

La pubblicazione presenta le serie più recenti disponibili sull'occupazione e sulla popolazione attiva, sulla disoccupazione e sui conflitti di lavoro, e aggiorna pertanto il volume « Occupazione e disoccupazione » del 1978.

Le tabelle di base su popolazione, popolazione attiva e occupazione sono completate con i risultati della statistica dell'occupazione dipendente, articolata in base alle classi della NACE. Le tabelle sulla disoccupazione riprendono le serie pubblicate mensilmente dall'Istituto Statistico, completate con varie analisi specifiche e con dati sulle offerte di lavoro e sui collocamenti. I conflitti di lavoro sono presentati sotto forma di numero di giornate perdute ogni mille lavoratori, per ramo d'attività.

Una parte storica riporta per i dati principali le serie cronologiche, che risalgono in molti casi fino al 1950.

Si è aggiunto un allegato per presentare i dati sull'occupazione e sulla disoccupazione per la Grecia, la Spagna e il Portogallo.
