Hinweis

Die Veröffentlichung Eurostatistik — Daten zur Konjunkturanalyse ist eine von drei Schlüsselveröffentlichungen des Eurostat, die dem Leser einen Überblick über die wichtigsten quantitativen Daten geben sollen, die für die Gemeinschaft und die Mitgliedstaaten zur Verfügung stehen. Die anderen Veröffentlichungen in dieser Reihe sind Statistische Grundzahlen mit Daten für ein bestimmtes Jahr sowie Eurostat-Revue mit einem Zehnjahresüberblick über die Gemeinschaft in Zahlen. Eine monatliche Veröffentlichung mit laufenden Wirtschaftsdaten muß ständig angepaßt und auf den neuesten Stand gebracht werden. Zu Beginn des Jahres 1982 wurde mit der Einbeziehung von Daten für Griechenland und der Abwandlung der Aufmachung eine bedeutende Änderung vorgenommen. Im Laufe des Jahres 1982 werden nach und nach Gesamtzahlen für die 10 Mitgliedstaaten der Gemeinschaft aufgenommen. Sobald genügend Daten zur Verfügung stehen, wird das Basisjahr 1975, das die Grundlage für diese Veröffentlichung bildet, durch das Jahr 1980 ersetzt werden. Zu einem späteren Zeitpunkt ist vorgesehen, Daten für die beiden beitrittswilligen Länder Portugal und Spanien sowie für die Vereinigten Staaten und Japan hinzuzufügen. Es werden vier Arten von Daten in Eurostatistik veröffentlicht. Auf den Seiten 5 und 6 findet sich ein Artikel „Kurz notiert“, der sich mit den jüngsten Tendenzen bei den verfügbaren Daten befaßt. Die Seiten 15 bis 20 enthalten eine schematische Darstellung der wichtigsten wirtschaftlichen Reihen für die Gemeinschaft und die Mitgliedstaaten. Die Seite 23 ist die erste von 56 Seiten mit „Gemeinschaftstabellen“. Dieser Abschnitt enthält von Eurostat auf der Grundlage von Gemeinschaftskriterien harmonisierte Daten. Die neuesten Daten sind vorläufig und in einigen Fällen von Eurostat geschätzt. Schließlich enthält die Veröffentlichung noch einen Abschnitt „Ländertabellen“, der eine Auswahl der in jedem Land am häufigsten verwendeten Konjunkturindikatoren enthält. Hierbei handelt es sich um nationale Reihen auf der Grundlage nationaler Definitionen. Zu Vergleichszwecken ist auch eine Tabelle für die Vereinigten Staaten enthalten. In allen Fällen stehen auf Anfrage Zeitreihen über die Cronos-Datenbank des Eurostat zur Verfügung. Es werden außerdem statistische Bulletins über Arbeitslosigkeit, Preise, industrielle Produktion, Zahlungsbilanzen, Außenhandel und Energie monatlich oder vierteljährlich veröffentlicht. In Eurostatistik selbst ist ein absolutes Minimum an Erläuterungen zur Methodik enthalten. Ausführliche Informationen über Definitionen und Methodik sind bei Eurostat erhältlich. Eurostatistik wird am Ende eines jeden Monats in einer gemeinsamen Ausgabe für Deutsch, Englisch und Französisch veröffentlicht. Darüber hinaus steht auf Anfrage eine Ergänzung mit Übersetzung der Titel und der Erläuterungen ins Dänische, Griechische, Italienische und Niederländische zur Verfügung.

(1) Die in diesem Teil des Bulletins enthaltenen Angaben stellen die Ergebnisse der Konjunkturerhebung bei den Unternehmern in der Gemeinschaft dar. Ausführlichere Daten werden in „Europäische Wirtschaft“ veröffentlicht.

Eurostatistik : Kurz notiert

1. Arbeitslosigkeit — 11,5 Millionen eingeschriebene Arbeitslose

Ende Oktober 1982 sind 11,5 Millionen Arbeitslose bei den Arbeitsämtern der Gemeinschaft der Neun registriert. Damit steigt die Arbeitslosenquote gemessen an den zivilen Erwerbspersonen von 10,2% Ende September auf 10,3% Ende Oktober 1982. Angesichts eines erneuten Anstiegs bei den saisonbereinigten Werten wird deutlich, dass sich die Lage auf dem Arbeitsmarkt in den Mitgliedstaaten im Oktober 1982 verschlimmert hat. Dies trifft auch für das Vereinigte Königreich zu, in dem die absoluten Zahlen zwar um 1,4% abgenommen haben, die saisonbereinigten Werte jedoch eine Zunahme aufweisen.

Die grössten Steigerungen bei den absoluten Zahlen eingeschriebener Arbeitsloser gegenüber September 1982 finden sich in Luxemburg (+16,4%) und in Dänemark (+10,5%). Ebenfalls über der durchschnittlichen Zunahme von 1,9% für die Neunergemeinschaft liegen die BR Deutschland (+5,5%), Frankreich (+3,7%), Irland (+3,0%) und die Niederlande (+2,2%). In Italien wird der Gemeinschaftsdurchschnitt in etwa erreicht, während sich in Belgien gegenüber dem Vormonat kaum eine Veränderung ergibt.

Die höchste Arbeitslosenquote in der Gemeinschaft der Neun weist Ende Oktober 1982 wie auch schon in den Vormonaten Belgien (14,8%) auf, gefolgt von Irland (13,5%), dem Vereinigten Königreich (12,8%), den Niederlanden (11,1%) und Italien (10,9%). Etwas unter dem Durchschnitt der Gemeinschaft liegen Frankreich (9,6%) und Dänemark (9,4%). Die niedrigste Arbeitslosenquoten finden sich nach wie vor in Luxemburg (1,5%) und in der BR Deutschland (7,3%). Die sich ständig verschlimmernde Situation auf dem Arbeitsmarkt wird besonders bei einem Vergleich mit Oktober 1981 deutlich. Für die Neunergemeinschaft machte die Zunahme in diesem Zeitraum 17,4% aus. Ein sehr starkes Anwachsen der Arbeitslosigkeit findet sich im letzten Jahr vor allem in der BR Deutschland (+40,6%), den Niederlanden (+38,6%), Luxemburg (+33,9%) und Irland (+27,7%).

2. Verbraucherpreise im Oktober 1982

Zwischen September und Oktober 1982 stiegen die Verbraucherpreise in der Europäischen Gemeinschaft um durchschnittlich 0,9%. Ein Preisanstieg unter dem allgemeinen Durchschnitt war in der BR Deutschland und den Niederlanden (jeweils 0,3%), in Frankreich und dem Vereinigten Königreich (jeweils 0,5%) und in Belgien (0,8%) zu verzeichnen. In Dänemark und in Luxemburg lag der Preisanstieg mit 1% bzw. 1,1% leicht über dem Durchschnitt, während der Anstieg in Italien (2,0%) und Griechenland (2,4%) bedeutend höher ausfiel.

Die Steigerungsrate der letzten 12 Monate für EUR 10 insgesamt betrug 10,1%, dies ist die niedrigste Steigerungsrate seit Mitte 1979. In den Niederlanden (+4,7%), in der BR Deutschland (+4,9%) und im Vereinigten Königreich (+6,8%) waren die niedrigsten Zuwächse zu verzeichnen. Steigerungsraten um den Gemeinschaftsdurchschnitt werden aus Frankreich

(+9,4%), Belgien (+9,8%), Dänemark (+10,3%) und Luxemburg (+10,4%) gemeldet. Die höchsten Anstiegswerte waren in Irland (+17,0%), in Italien (+17,4%) und Griechenland (+20%) zu verzeichnen.

3. Index der industriellen Produktion : Deutlicher Rückgang seit Juni 1982

Der Vorläufige Index der industriellen Produktion in der Gemeinschaft lag im Juli bei 101,5 und im August 1982 bei 85,5 (1975=100), was einem Rückgang von 3,1 bzw. 2,6% gegenüber den entsprechenden Monaten der Vorjahres entspricht und somit die Tendenz zur Verschlechterung bestätigt, die sich bereits im Juni mit einem Rückgang des Index um fast 2% abgezeichnet hatte. Der durchschnittliche Rückgang des Index für die drei Monate Juni bis August 1982 (diese Monate sind nur schwer einzeln zu bewerten aufgrund der Auswirkung der Betriebsferien auf die Produktion) gegenüber dem gleichen Zeitraum des Vorjahres beläuft sich auf 2,5%. Hieraus geht deutlich hervor, dass sich die Hoffnungen auf einen Aufschwung, die sich auf die Festigkeit der Produktionsentwicklung in den Monaten April und Mai 1982 gegründet hatten, nicht bestätigt haben.

Der saisonbereinigte Index der Produktion lag im Juli bei 112,5 und im August 1982 bei 112,0 (1975=100), im Vergleich zu 114,8 im Durchschnitt der ersten fünf Monate des Jahres.

Bei den drei grossen Gruppen von Industrieerzeugnissen lässt sich ein allgemeiner Rückgang der kurzfristigen Wachstumsindikatoren feststellen: sie lagen im August 1982 für Grundstoff- und Produktionsgüter bei -2,3%, für Investitionsgüter bei -2,5% und für Verbrauchsgüter bei -1,2%.

4. Eisen und Stahl — Erzeugung um 23,9% niedriger als vor einem Jahr

Die Rohstahlerzeugung der Gemeinschaft (ohne Griechenland) ist im Oktober 1982 gegenüber dem Vormonat saisonbereinigt um 3,1% auf 8,4 Mio t zurückgegangen. Die Veränderung beträgt gegenüber Oktober 1981 -23,9%, gegenüber Oktober 1980 -19,6%. Dies ist gleichzeitig das absolut niedrigste Oktoberergebnis seit Bestehen der Gemeinschaft der Neun. Die Erzeugung Januar bis Oktober 1982 ist damit um 8,8% niedriger als im Vergleichszeitraum 1981. Der sehr schwache Auftragsingang bei Massenstahl im August 1982 von nur 4,5 Mio t (Veränderung gegenüber Juli 1982 saisonbereinigt -12,3%, gegenüber August 1981 -25,1%) war ein deutliches Vorzeichen für die niedrige Produktionstätigkeit der folgenden Monate. Nicht zu übersehen ist ferner der kräftige Anstieg der Importe aus Drittländern im ersten Halbjahr 1982 gegenüber dem ersten Halbjahr 1981 (+59%).

5. Entwicklung der Energiewirtschaft im ersten Halbjahr 1982

Trotz der Tatsache, dass aufgrund fehlender statistischer Unterlagen ausnahmsweise einige Schätzungen vorgenommen wer-

den mussten, lassen sich einige Elemente erkennen, die die festgestellten Tendenzen für das erste Vierteljahr 1982 bestätigen. Auf Gemeinschaftsebene kennzeichnen folgende Tatbestände die Entwicklung der Energiewirtschaft im Verlauf des ersten Halbjahres 1982 verglichen mit dem gleichen Vorjahreszeitraum:

- Deutlich verlangsamter Rückgang des Gesamtenergieverbrauchs im ersten Halbjahr 1982 (1,8% gegenüber 6,3% im gleichen Zeitraum 1981).
- Unterschiedliche Entwicklung des Bruttoinlandsverbrauchs bei dem Einsatz der einzelnen Energiequellen – von –5,0% bei Erdöl bis +11,6% bei Kernenergie – wodurch die Tendenz bestätigt wird, dass andere Energiequellen das Erdöl ersetzen, wenn auch immer noch im begrenzten Masse. Daraus ergibt sich eine leichte, aber fortgesetzte Aenderung der Anteile an festen Brennstoffen und Kernenergie, bei denen eine Zunahme von 24,0% auf 24,7% bzw. von 6,0% auf 6,9% zu verzeichnen ist, während der Anteil des Erdöls von 49,4% auf 47,8% zurückgegangen ist.
- Zunahme der Primärenergieerzeugung um etwa 7 Mio t Rohöleinheiten (+2,8%), hauptsächlich zurückzuführen auf das aus der Nordsee gewonnene Rohöl, auf die Kernenergie und, in geringerem Masse, auf die Braunkohle.
- Verringerung der Nettoenergieeinfuhr (Einfuhr minus Ausfuhr) um 7,2%. Insbesondere war ein Rückgang bei Steinkohle (8,4%) und bei Rohöl (11,4%) festzustellen. Aufgrund eines sehr starken Anstiegs der Einfuhr von Erdöl-erzeugnissen lag der Rückgang für Rohöl und raffinierte Erdöl-erzeugnisse insgesamt jedoch nur bei 8,1%.
- Schliesslich ist ein Rückgang der Energieabhängigkeit um weitere 2,5 Punkte auf ein Niveau von nunmehr 45% festzustellen. Die Aussenabhängigkeit bei Erdöl konnte aufgrund des mit einer Steigerung der Rohölerzeugung und einem Lagerabbau bei Erdöl-erzeugnissen verbundenen Einfuhrückgangs auf 36% verringert werden.

6. Landwirtschaft – Index der Erzeugerpreise landwirtschaftlicher Produkte

Im zweiten Quartal 1982 erhöhte sich der Gesamtindex der Erzeugerpreise landwirtschaftlicher Produkte (ohne Obst und Gemüse) für EUR 10 um 13,9%. Dieser Prozentsatz, der in etwa den Prozentsätzen der drei vorausgegangenen Quartale entspricht, bestätigt die gegenwärtige Stabilisierung der Preissteigerungsrate des landwirtschaftlichen Outputs bei ungefähr 14%. Bei den pflanzlichen Erzeugnissen (ohne Obst und Gemüse) erhöhte sich der Index um 17,5% und stieg damit deutlich beschleunigt gegenüber dem vorausgegangenen Quartal an.

Bei einem Ländervergleich zeigt sich, dass in den meisten Ländern (7 von 10) die jährliche Steigerungsrate der Erzeugerpreise landwirtschaftlicher Produkte in diesem Quartal niedriger ist als vor drei Monaten. In den Niederlanden, im Vereinigten Königreich, in Irland und in Dänemark ist dieser Rückgang besonders ausgeprägt. Eine Ausnahme bilden jedoch drei Länder: Frankreich, Luxemburg und vor allem Italien. Im allgemeinen bewegen sich die jährlichen Steigerungsraten jetzt zwischen +4,1% in der Bundesrepublik Deutschland und +21,9% in Griechenland.

7. EG-Aussenhandel

In dem Zeitraum Juni bis August 1982 nahmen die EG-Ausfu-

ren in Drittländer gegenüber dem entsprechenden Vorjahreszeitraum wertmässig nur um 3% zu (ohne den Beitrag der Niederlande, für die jüngere Daten des Jahres 1982 noch nicht vorliegen). Hinter dieser Zahl verbirgt sich jedoch eine sehr unterschiedliche Entwicklung bei den einzelnen Erzeugnissen. Auf der Basis von Angaben aus acht Mitgliedstaaten lässt sich erkennen, daß die Nahrungsmittlexporte um 24%, die Ausfuhr chemischer Erzeugnisse und sonstiger bearbeiteter Waren um etwa 3% zurück gegangen sind. Andererseits stiegen die Ausfuhr von Maschinen und Fahrzeugen um 9%. In Irland (11%), der Bundesrepublik Deutschland (8%), Griechenland und dem Vereinigten Königreich (jeweils 5%) lagen die Ausfuhrleistungen über dem Gemeinschaftsdurchschnitt, während in Frankreich, Italien und Dänemark ein Rückgang um 5%, 2% bzw. 1% zu verzeichnen war.

Die Einfuhren aus Drittländern nahmen in diesem Zeitraum um 2% zu. Die Einfuhren von Rohstoffen, Brennstoffen, Oelen, Fetten und Wachsen waren niedriger als im Zeitraum Juni bis August 1981. Bei anderen Kategorien war ein überdurchschnittlicher Anstieg der Importe zu verzeichnen.

Die Einfuhren nach Belgien-Luxemburg und Irland lagen im Zeitraum Juni bis August 1982 unter denen des entsprechenden Vorjahreszeitraums. In zwei Mitgliedstaaten, der Bundesrepublik Deutschland und Irland, war im Handel mit Drittländern ein Ueberschuss festzustellen.

8. Innergemeinschaftlicher Handel

Der innergemeinschaftliche Handel lag im Zeitraum Juni bis August 1982 um 8% über dem des entsprechenden Vorjahreszeitraums (auf der Basis von Angaben aus neun Mitgliedstaaten). Diese Zahl weist auf einen verlangsamten Anstieg hin; die entsprechende Zahl für den Zeitraum März bis Mai lag bei 19%. Wie beim EG-Aussenhandel zählten Belgien-Luxemburg und Irland zu den Ländern mit den niedrigsten Einfuhrzuwachs-raten. Frankreich wies in diesem Zeitraum die niedrigste Ausfuhrzunahme auf.

9. Finanzen : Zinssenkungen und Währungsunruhen

Die US-Zentralbank unterstrich mit der Senkung des Diskontsatzes von 9,5 auf 9,1% am 19. November erneut die Absicht, die Geldpolitik zu lockern.

Auf den Devisenmärkten kam das Pfund Sterling im November unter erheblichen Druck. So sackte der Kurs für ein Pfund Sterling von 1,82353 ECU zu Beginn des Monats auf 1,73942 ECU am 24.11., was einen Wertverlust von 4,8% innerhalb eines Monats darstellt. Das Pfund Sterling befindet sich nunmehr gegenüber dem ECU auf dem niedrigsten Stand seit September 1981.

Technischer Hinweis

Wegen eines Streiks im öffentlichen Dienst im Vereinigten Königreich ist es zur Zeit nicht möglich, Aussenhandelsdaten für den Zeitraum Februar bis August 1981 für das VK und EUR 10 zu veröffentlichen. Ausserdem können aus technischen Gründen die meisten Aussenhandelsdaten für Griechenland und EUR 10 ebenfalls nicht veröffentlicht werden. Sämtliche Reihen werden so bald wie möglich vervollständigt werden.

Notice

Eurostatistics — data for short-term economic analysis is one of three key Eurostat publications designed to give the reader an overview of the most important quantitative information available for the Community and Member States. The other publications in this series are Basic Statistics giving data for a specific year, and Eurostat review with its summary of the Community in figures over the past 10 years.

A monthly publication with current economic data must be continually adapted and updated. At the beginning of 1982 a major modification took place with the inclusion of data for Greece and a change in presentation. Totals for the 10-member Community are being progressively introduced in 1982. Once sufficient data are available, the base year 1975 which is fundamental to this publication will be replaced with 1980. At a later stage it is planned to add data for the two applicant countries, Portugal and Spain, as well as for the United States and Japan.

Four kinds of information are published in Eurostatistics. Pages 9 and 10 offer an article 'In brief' which looks at the latest trends in the data available. Pages 15 to 20 provide the reader with a visual presentation of the most important economic series for the Community and the Member States. Starting on page 23 there are 56 pages of 'Community tables'. This section contains data harmonized by Eurostat on the basis of common criteria. The most recent data are provisional and in some cases estimated by Eurostat. Finally there is a section 'Tables by country' which contains a selection of economic indicators most often used in each country. These are national series based on national definitions. For comparison a table for the United States is also included.

For all series, historical data are available on request from Eurostat's data bank Cronos. Statistical bulletins on unemployment, prices, industrial production, balance of payments, external trade and energy are also published monthly or quarterly. Eurostatistics itself contains an absolute minimum of methodological notes. Detailed information on definitions and methodology may be obtained from Eurostat.

Eurostatistics is published at the end of each month in a single edition in German, English and French. A supplement with translations of titles and explanatory notes exists in Danish, Greek, Italian and Dutch, and it is available on request.

Eurostatistics: in Brief

1. Unemployment — 11,5 million unemployed registered

There were 11,5 million persons registered as unemployed in the Community of the Nine at the end of October 1982; the unemployment rate for the civilian working population rose from 10.2% at the end of September 1982 to 10.3% at the end of October. There was a further increase in the seasonally adjusted totals for unemployment, indicating that the situation in Member States worsened during October 1982. This is true even for the United Kingdom where, despite a 1.4% drop in the absolute figures, the seasonally adjusted figures indicate an increase in the numbers of unemployed.

The largest percentage increases in the absolute figures for registered unemployed as compared with September 1982 occurred in Luxembourg (+16.4%) and in Denmark (+10.5%). Increases above the 1.9% average for the Community of the Nine also occurred in Germany (+5.5%), France (+3.7%), Ireland (+3.0%) and the Netherlands (+2.2%). In Italy the increase was near the Community average, while in Belgium there was practically no change over the previous month.

At the end of October 1982, as in previous months, the highest unemployment rate in the Community of the Nine was registered in Belgium (14.8%), followed by Ireland (13.5%), the United Kingdom (12.8%), the Netherlands (11.1%) and Italy (10.9%). France (9.6%) and Denmark (9.4%) were slightly under the Community average. As before, the lowest unemployment rates were in Luxembourg (1.5%) and the F.R. of Germany (7.3%). The continued deterioration in the labour market situation is clear from a comparison with October 1981. Since then, unemployment in the Community of the Nine has risen by 17.4%. Particularly large percentage increases in unemployment over the past year have occurred in the F.R. of Germany (+40.6%), the Netherlands (+38.6%), Luxembourg (+33.9%) and Ireland (+27.7%).

2. Consumer prices in October 1982

Between September and October 1982, consumer prices in the European Community increased on average by 0.9%. Increases below the general average were recorded in Germany and the Netherlands (both 0.3%); France and the United Kingdom (both 0.5%) and Belgium 0.8%. Increases in Denmark at 1% and Luxembourg at 1.1% were slightly above the average while the increases in Italy (2.0%) and Greece (2.4%) were significantly more.

The increase over 12 months for the Community of Ten is 10.1%; the lowest such increase since mid-1979. The lowest increases were in the Netherlands (+4.7%), Germany (+4.9%) and the UK (+6.8%). Near to the average were France (+9.4%), Belgium (+9.8%), Denmark (+10.3%) and Luxembourg (+10.4%). The highest increases were recorded in Ireland (+17.0%), Italy (+17.4%) and Greece (+20.0%).

3. Index of industrial production: Clear downward trend since June 1982

The provisional index of industrial production in the Community stood at 101.0 in July and 85.5 in August 1982 (1975=100), corresponding to falls of 3.1 and 2.6% respectively compared with the same months of the previous year, thereby confirming the deterioration which had started in June with a clear decline in the index of almost 2%. The average fall in the index for the three months June to August 1982 (these months are difficult to assess individually because of the variable impact of annual works holidays on production) as compared with the same period in 1981 is 2.5%, which shows quite clearly that the hopes of an economic upturn, to which the firm production trends during the months of April and May 1982 had given rise, have not been borne out in reality.

After seasonal adjustment, the index of production was 112.5 in July and 112.0 in August 1982 (1975=100), compared with an average of 114.8 for the first five months of the year.

As regards the three main groups of industrial products, a generalized decline in the short-term growth indicators was observed: the latter stood in August 1982 at -2.3% for intermediate products, -2.5% for capital goods and -1.2% for consumer goods.

4. Iron and Steel — production 23.9% down on a year ago

In October 1982 the production of crude steel of the Community (ex Greece) at 8.4 mio t, has shown a drop of 3.1% (after deseasonalisation) compared with the previous month. This figure is 23.9% below that for October 1981 and 19.6% lower than the October 1980 figure. It represents the lowest October production since the creation of the Community of the Nine. The first ten months of 1982 show a reduction of 8.8% when compared with the same months of the preceding year. At the very low level of 4.5 mio t, new orders (ordinary steels) in August 1982 (-12.3%) after deseasonalisation compared with July 1982, -25.1% compared with August 1981) have already pointed to the fall in production during subsequent months. Equally notable is the significant rise in imports from third countries in the course of the first half of 1982, as compared with those of the first half of 1981: viz. +59%.

5. Energy -developments in the energy economy in the first half of 1982

Although some figures have had to be estimated because certain statistics were not available as usual, the results for the first half of 1982 contain indications which confirm the trends observed in the first quarter of 1982. At Community level, the salient features of the developing energy situation in the first half of 1982 as compared with the same period in 1981 are as follows:

- A marked slowing in the rate of decline of gross energy consumption, which stood at 1.8% as opposed to a year-on-year drop of 6.3% observed for the first half of 1981;
- Differences in the development of gross domestic consumption of energy from the various sources, ranging from -5.0% for oil to +11.6% for nuclear energy, which

confirm the trend to substitution, though still on a limited scale, of other energy sources for oil; a consequent slight but sustained change in the proportion of consumption accounted for by solid fuels and nuclear energy, which increased from 24.0% to 24.7% and from 6.0% to 6.9% respectively, and, conversely, in the proportion represented by oil, which fell from 49.4% to 47.8%;

- An increase of about 7 million toe (i.e. +2.8%) in primary energy production, largely attributable to North Sea oil, nuclear energy and, to a lesser extent, lignite;
- A drop of 7.2% in net energy imports (imports minus exports) and in particular in imports of coal (8.4%) and crude oil (11.4%), though it should be noted that the drop for crude oil and refined petroleum products taken together was only 8.1% as imports for petroleum products increased very substantially;
- As a result of the above, a further reduction of two and a half points in overall dependence on external sources of energy to only 45%, dependence in respect of oil being reduced to 36% by the fall in imports together with an increase in crude oil production and a run-down in stocks of petroleum products.

6. Agriculture — index of producer prices of agricultural products

During the second quarter of 1982, the overall index of producer prices of agricultural products (excluding fruit and vegetables) for EUR 10 showed an increase of 13.9%. This figure, of the same order of magnitude as that for the three previous quarters, confirms the current levelling off of the rate of increase of agricultural output prices at around 14%. The index for crops (excluding fruit and vegetables) rose by 17.5%, which represents a marked increase on the previous quarter.

An analysis by Member State shows that in the majority (seven countries out of ten) the annual rate of increase in producer prices of agricultural products was not as great as three months previously. This slowdown was particularly apparent in the Netherlands, the United Kingdom, Ireland and Denmark. However, three countries registered an upward trend: France, Luxembourg and, particularly, Italy. All in all, the increases over the year range from +4.1% in the case of the Federal Republic of Germany to +21.9% in the case of Greece.

7. Extra-EC Trade

In the three months to end August 1982, Community exports to third countries were only three per cent higher in value than in the corresponding period of 1981 (excluding a contribution from the Netherlands for which recent 1982 data is not yet available). This figure masks a widely differing performance

across products. Based on data from eight member states, food exports fell by 24 per cent, and chemical products and miscellaneous manufactured articles fell by around 3 per cent. On the other hand, exports of machinery and transport equipment rose by 9 per cent. Looking at individual Community members, Ireland (11 per cent), Germany (8 per cent), Greece and the United Kingdom (5 per cent) have had a better trend in export performance than the Community average, whilst France, Italy and Denmark recorded falls of 5.2, and 1 per cent respectively.

Community imports from third countries rose by two per cent in this period. Imports of crude materials, fuel products and oils, fats and waxes were lower than in June-August 1981. Imports of other categories of imports rose by more than the average. Imports into Belgium-Luxembourg and Ireland in the three months to August 1982 were lower than in the corresponding period of 1981. There were two member countries with a trade surplus on extra-EC trade, Germany and Ireland.

8. Intra-EC Trade

Intra-EC imports in the period June-August 1982 were 8 per cent higher than in the corresponding period of 1981 (based on figures for 9 countries). This marks a slowing down in the rate of growth; the corresponding figure for the previous three months to May was 19 per cent. As with extra-EC trade, Belgium-Luxembourg and Ireland were amongst the countries with the lowest imports growth. France had the lowest growth of exports in this period.

9. Finances: Falls in interest rates and currency perturbations

The US Federal Reserve further underlined its intention of relaxing monetary policy by lowering the Discount Rate from 9.5 to 9.1% on November 19th.

In November the Pound Sterling came under considerable pressure. The Pound exchange rate fell from 1.82353 ECU at the beginning of the month to 1.73942 ECU on 24th November which corresponds to a loss in value of 4.8%. The Pound Sterling is now at its lowest rate against the ECU since September 1981.

Technical note

Because of a civil-service strike in the UK it is not possible for the moment to publish external trade figures for February to August 1981 for UK and EUR 10. In addition most external trade data for Greece and EUR 10 cannot be published because of technical reasons. All series will be completed as soon as possible.

Avertissement

Eurostatistiques — données pour l'analyse de la conjoncture est l'une des trois publications clés d'Eurostat, destinées à donner au lecteur un aperçu des informations quantitatives les plus importantes disponibles concernant la Communauté et les États membres. Les autres publications de cette série sont les Statistiques de base fournissant des données pour une année spécifique déterminée et la Revue de l'Eurostat qui passe en revue dix ans de la Communauté sous forme de tableaux chiffrés.

Une publication mensuelle contenant des données économiques conjoncturelles d'actualité doit être continuellement adaptée et mise à jour. Au début de 1982, une modification importante est intervenue avec l'inclusion de données concernant la Grèce et un changement de présentation. Des totaux pour la Communauté de dix membres seront progressivement introduits en 1982. Lorsque l'on disposera de données en nombre suffisant, l'année 1975 — année de référence pour cette publication — sera remplacée par 1980. Il est prévu ultérieurement d'ajouter les données concernant les deux pays candidats à l'adhésion — à savoir l'Espagne et le Portugal — ainsi que pour les États-Unis et le Japon.

Eurostatistiques publie quatre types d'informations. Les pages 13 et 14 contiennent un article « En bref » dans lequel les dernières tendances pouvant être dégagées à partir des données disponibles sont examinées. Les pages 15 à 20 fournissent au lecteur une présentation visuelle des séries économiques les plus importantes pour la Communauté et les États membres. Des « tableaux communautaires » sont présentés sur 56 pages à partir de la page 23. Cette section contient des données harmonisées par Eurostat sur la base de critères communs. Les données les plus récentes sont provisoires et, dans certains cas, estimées par Eurostat. Enfin, la section « tableaux par pays » contient une sélection des indicateurs économiques les plus souvent utilisés dans chaque pays. Ce sont des séries nationales fondées sur des définitions nationales. A des fins de comparaison, un tableau concernant les États-Unis est également inclus.

Pour toutes les séries, des données historiques sont disponibles sur demande auprès de la banque de données d'Eurostat, CRONOS. Les bulletins statistiques sur le chômage, les prix, la production industrielle, la balance des paiements, le commerce extérieur et l'énergie sont également publiés sur une base mensuelle ou trimestrielle. En soi, Eurostatistiques contient un minimum de notes méthodologiques. Une information détaillée concernant les définitions et la méthodologie peut-être obtenue auprès d'Eurostat.

Eurostatistiques est publié à la fin de chaque mois dans une seule édition en allemand, anglais et français. Un supplément contenant les traductions des titres et des notes explicatives existe en danois, grec, italien et néerlandais et est disponible sur demande.

Eurostatistiques : en bref

1. Chômage : 11,5 millions de chômeurs enregistrés

Il y avait 11,5 millions de personnes inscrites au chômage dans la Communauté Européenne des Neuf à la fin du mois d'octobre 1982. Le taux de chômage enregistré par rapport à la population active civile est ainsi passé à 10,3%, par rapport à 10,2% à la fin du mois de septembre 1982. Comme le nouvel accroissement des valeurs corrigées des variations saisonnières l'indique, la situation sur les marchés du travail s'est encore détériorée dans tous les États membres de la Communauté en octobre 1982. Ceci est aussi le cas au Royaume-Uni où, malgré une diminution de 1,4% des chiffres bruts, les données corrigées des variations saisonnières ont augmenté.

Les accroissements les plus importants, en données brutes, de chômage enregistré sont observés au Luxembourg (+16,4%) et au Danemark (+10,5%). Des augmentations supérieures à la moyenne communautaire (+1,9%) ont été enregistrées en R.F. d'Allemagne (+5,5%), France (+3,7%), Irlande (+3,0%) et aux Pays-Bas (+2,2%). En Italie l'accroissement était proche de la moyenne communautaire, tandis qu'en Belgique il n'y avait pratiquement pas de changement par rapport au mois précédent.

A la fin d'octobre 1982 le taux de chômage enregistré le plus élevé de la Communauté était, comme les mois précédents, celui de la Belgique (14,8%) suivi de celui de l'Irlande (13,5%), du Royaume-Uni (12,8%), des Pays-Bas (11,1%) et de l'Italie (10,9%). La France (9,6%) et le Danemark (9,4%) sont à un niveau légèrement inférieur à la moyenne communautaire. Comme auparavant les taux les plus faibles sont observés au Luxembourg (1,5%) et en R.F. d'Allemagne (7,3%). La détérioration continue de la situation du marché du travail apparaît clairement quand on la compare à celle d'octobre 1981. Depuis lors, le chômage a augmenté de 17,4% dans la Communauté des Neuf. Des accroissements du chômage particulièrement importants ont été enregistrés en R.F. d'Allemagne (+40,6%), aux Pays-Bas (+38,6%), au Luxembourg (+33,9%) et en Irlande (+27,7%).

2. Index des prix à la consommation en octobre 1982

Entre septembre et octobre 1982, l'indice des prix à la consommation de la Communauté (EUR 10) a augmenté de 0,9%. Les hausses inférieures à cette moyenne sont observées en R.F. d'Allemagne et aux Pays-Bas (0,3%), en France et au Royaume-Uni (0,5%) ainsi qu'en Belgique (0,8%). Les hausses au Danemark (1,0%) et au Luxembourg (1,1%) sont légèrement supérieures à la moyenne tandis que pour l'Italie (2,0%) et pour la Grèce (2,4%) les hausses sont nettement supérieures à la moyenne.

Le rythme de hausse en un an pour la Communauté (EUR 10) est de 10,1%, ce qui est le rythme le plus bas observé depuis le milieu de l'année 1979. Les hausses les plus faibles ont été enregistrées aux Pays-Bas (+4,7%), en Allemagne (+4,9%) et au Royaume-Uni (+6,8%). Autour de la moyenne se trouvent la France (+9,4%), la Belgique (+9,8%), le Danemark (+10,5%) et le Luxembourg (+10,4%). Les hausses les plus

importantes ont été enregistrées en Irlande (+17,0%), en Italie (+17,4%) et en Grèce (+20,0%).

3. Indice de la production industrielle : Claire tendance à la baisse depuis juin 1982

L'indice provisoire de la production industrielle dans la Communauté s'est établi à 101,0 en juillet et 85,5 en août 1982 (1975=100), correspondant à des baisses respectives de 3,1 et 2,6% par rapport aux mois respectifs de l'année précédente, et confirmant ainsi la dégradation qui s'était manifestée en juin avec un net recul de l'indice de près de 2%. La baisse moyenne de l'indice pour les trois mois de juin à août 1982 (mois difficiles à apprécier individuellement en raison de l'impact variable des fermetures annuelles sur la production) par rapport à la même période de 1981 se chiffre à 2,5%, faisant clairement apparaître que les espoirs de reprise engendrés par la bonne tenue de la production aux mois d'avril et de mai 1982 ne se sont pas vérifiés.

Après correction des variations saisonnières, l'indice de production était de 112,0 en juillet et 114,8 en août 1982 (1975=100), comparé à 114,8 en moyenne pour les cinq premiers mois de l'année.

Au niveau des trois grands regroupements de produits industriels, on observe un repli généralisé des indicateurs de croissance à court terme : ceux-ci se trouvaient en août 1982 à -2,3% pour les biens intermédiaires, à -2,5% pour les biens d'investissement et à -1,2% pour les biens de consommation.

4. Sidérurgie : Production diminuée de 23,9% en un an

En octobre 1982 la production communautaire d'acier brut (sans la Grèce) avec 8,4 mio t, a enregistré une baisse désaisonnalisée de 3,1% par rapport au mois précédent. Ce chiffre est inférieur de 23,9% au mois d'octobre 1981, et de 19,6% au mois d'octobre 1980. C'est le mois d'octobre le plus faible depuis l'existence de la Communauté des Neuf. Les dix premiers mois de l'année 1982 sont en baisse de 8,8% comparés aux mêmes mois de l'année précédente.

Avec 4,5 mio t, les commandes nouvelles (aciers courants) très faibles du mois d'août 1982 (-12,3% désaisonnalisé comparé à juillet 1982, -25,1% comparé à août 1981) ont déjà annoncé la baisse de production des mois suivants. Il est également à remarquer l'augmentation importante des importations en provenance des pays tiers au cours du 1^{er} semestre 1982, comparées à celles du 1^{er} semestre 1981 : +59%.

5. Énergie : Évolution de l'économie énergétique au cours du premier semestre de 1982

Les résultats du premier semestre 1982 permettent, malgré quelques estimations dues à un défaut inhabituel de disponibilités statistiques, de dégager certains éléments qui confirment les orientations perçues au cours du premier trimestre 1982. Au niveau de la Communauté, les faits marquant l'évolution de la

situation énergétique au cours du premier semestre 1982 par rapport à la période homologue de 1981 sont les suivants :

- Net ralentissement de la baisse de la consommation énergétique globale qui a été de 1,8% contre 6,3% constaté pour le premier semestre 1981 par rapport à la même période de 1980.
- Évolution divergente des consommations intérieures brutes des différentes sources d'énergie s'étalant de -5,0% pour le pétrole à +11,6% pour l'énergie nucléaire, qui confirme la tendance à une substitution, bien qu'encore limitée, au détriment du pétrole; en conséquence, modification légère mais continue des parts des combustibles solides et de l'énergie nucléaire qui augmentent (de 24,0% à 24,7% et de 6,0% à 6,9% respectivement) et a contrario, de celle du pétrole qui diminue (de 49,4% à 47,8%).
- Augmentation de la production d'énergie primaire d'environ 7 millions de tonnes d'équivalent pétrole (soit +2,8%) imputable essentiellement au pétrole brut de la Mer du Nord, à l'énergie nucléaire et, en moindre mesure, au lignite.
- Diminution des importations nettes d'énergie (importations moins exportations) de 7,2% en particulier de houille 8,4% et de pétrole brut 11,4%. Toutefois, compte tenu d'une très importante progression des importations de produits pétroliers, la baisse pour l'ensemble du pétrole brut et des produits pétroliers raffinés n'a été que de 8,1%.
- En tant que terme résultant, chute de la dépendance énergétique totale de deux points et demi supplémentaires, limitant ainsi le niveau à 45%. La dépendance pétrolière, quant à elle, du fait de la diminution des importations conjuguée à un accroissement de la production de pétrole brut et à un déstockage de produits pétroliers, a été réduite à 36%.

6. Agriculture : Indice des prix à la production des produits agricoles

Au cours du second trimestre de 1982, l'indice global des prix à la production des produits agricoles (sans fruits et légumes) a augmenté, pour EUR 10, de 13,9%. Ce chiffre, du même ordre de grandeur que celui des trois trimestres précédents, confirme la stabilisation actuelle du rythme de hausse des prix des outputs de l'agriculture à un niveau voisin de 14%.

Pour les produits végétaux (sans fruits et légumes), l'indice a augmenté de 17,5%, ce qui représente une très forte accélération par rapport au trimestre précédent.

Une analyse par État-membre montre que dans la majorité d'entre eux (sept sur dix) le rythme de hausse annuelle des prix à la production des produits agricoles est moins fort ce trimestre qu'il y a trois mois. Cette décélération est particulièrement nette aux Pays-Bas, au Royaume-Uni, en Irlande et au Danemark. Trois pays font toutefois exception : la France, le Luxembourg et surtout l'Italie. Au total, les hausses annuelles s'échelonnent maintenant entre +4,1% pour la République Fédérale d'Allemagne et +21,9% pour la Grèce.

7. Commerce extra-communautaire

Dans les trois mois jusqu'à fin août 1982, les exportations

communautaires vers des pays tiers étaient en hausse de 3% par rapport à la même période de 1981 (les données pour les Pays-Bas ne sont pas incluses). Ce chiffre cache des différences très importantes entre produits. Selon les données de huit pays les exportations des produits alimentaires ont diminué de 24%, et celles des produits chimiques et articles manufacturés divers de 3%. Toutefois, les exportations de machines et matériels de transport ont augmenté de 9%. Une analyse par pays membre démontre que les exportations ont augmenté de 11% en Irlande, de 8% en Allemagne et de 5% en Grèce et au Royaume-Uni tandis que la France, l'Italie et le Danemark ont connu des baisses de 5%, 2% et 1% respectivement.

Les importations des pays tiers ont augmenté de 2% dans la même période par rapport au même trimestre de 1981. Pour les matières brutes non comestibles, produits énergétiques et huiles, graisses et cires une baisse a été enregistrée. Les importations des autres secteurs ont été au-dessus de la moyenne.

Les importations vers Belgique-Luxembourg et Irlande pour cette période ont diminué par rapport à juin-août 1981. Deux pays membres connaissent un excédent dans leur commerce extra-communautaire : Allemagne et Irlande.

8. Commerce intra-communautaire

Les importations intra-communautaires pour la période juin-août 1982 étaient 8% au-dessus du niveau de la même période en 1981 (les chiffres pour les Pays-Bas sont exclus). Ceci signifie un ralentissement du taux de croissance; le chiffre correspondant pour les trois mois jusqu'à mai étant de 19%. Comme pour le commerce extra-communautaire Belgique-Luxembourg et Irlande sont parmi les pays ayant les plus bas taux de croissance de leurs importations. La France a connu le plus bas taux de croissance de ses exportations à la même période.

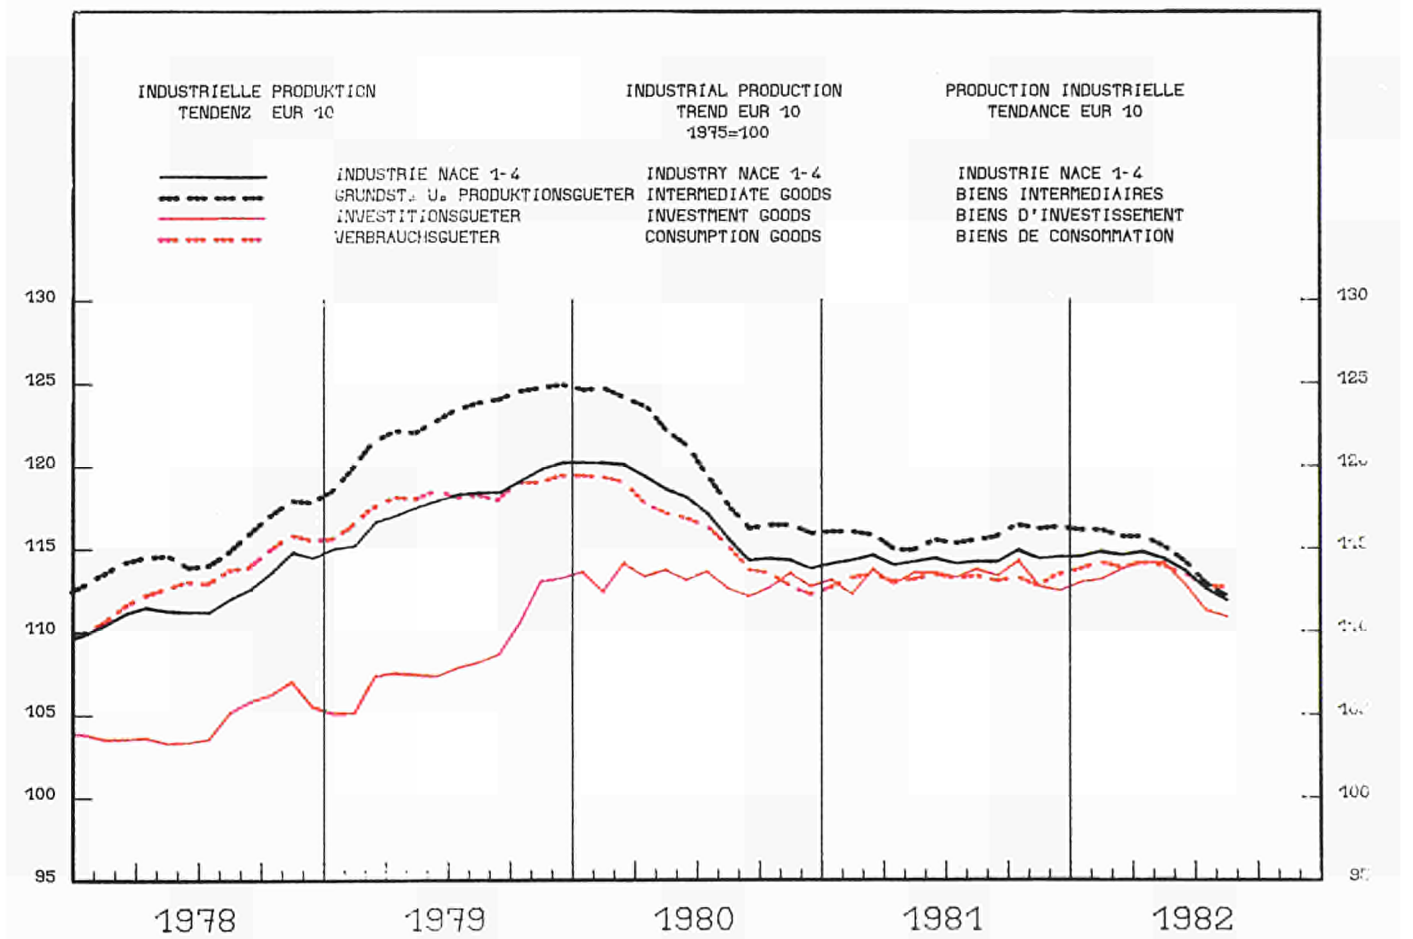

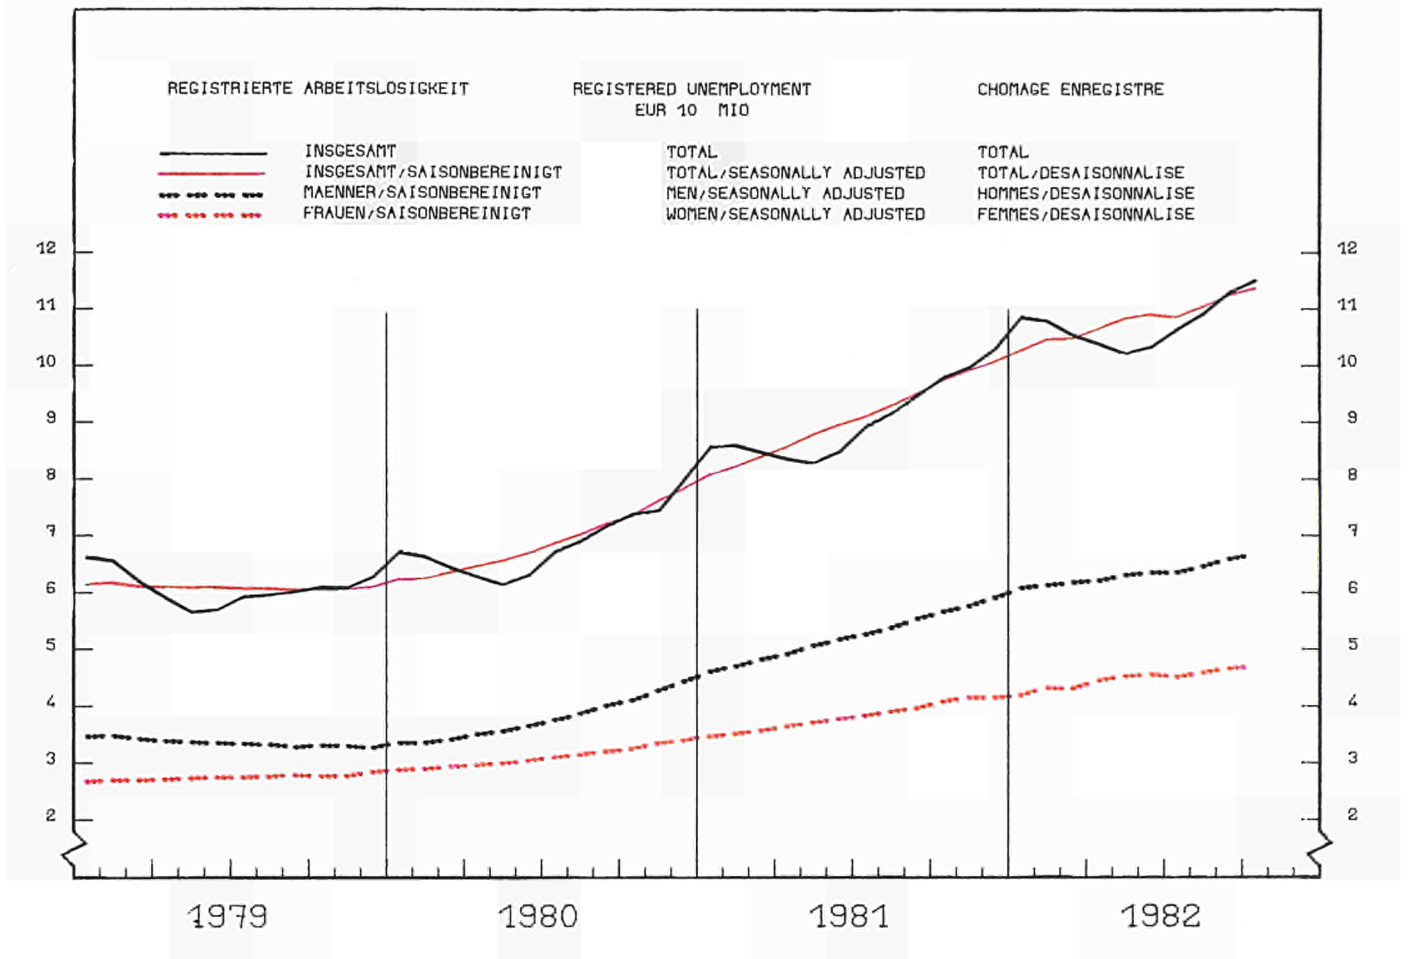

9. Finances : Taux d'intérêt plus bas et perturbations monétaires

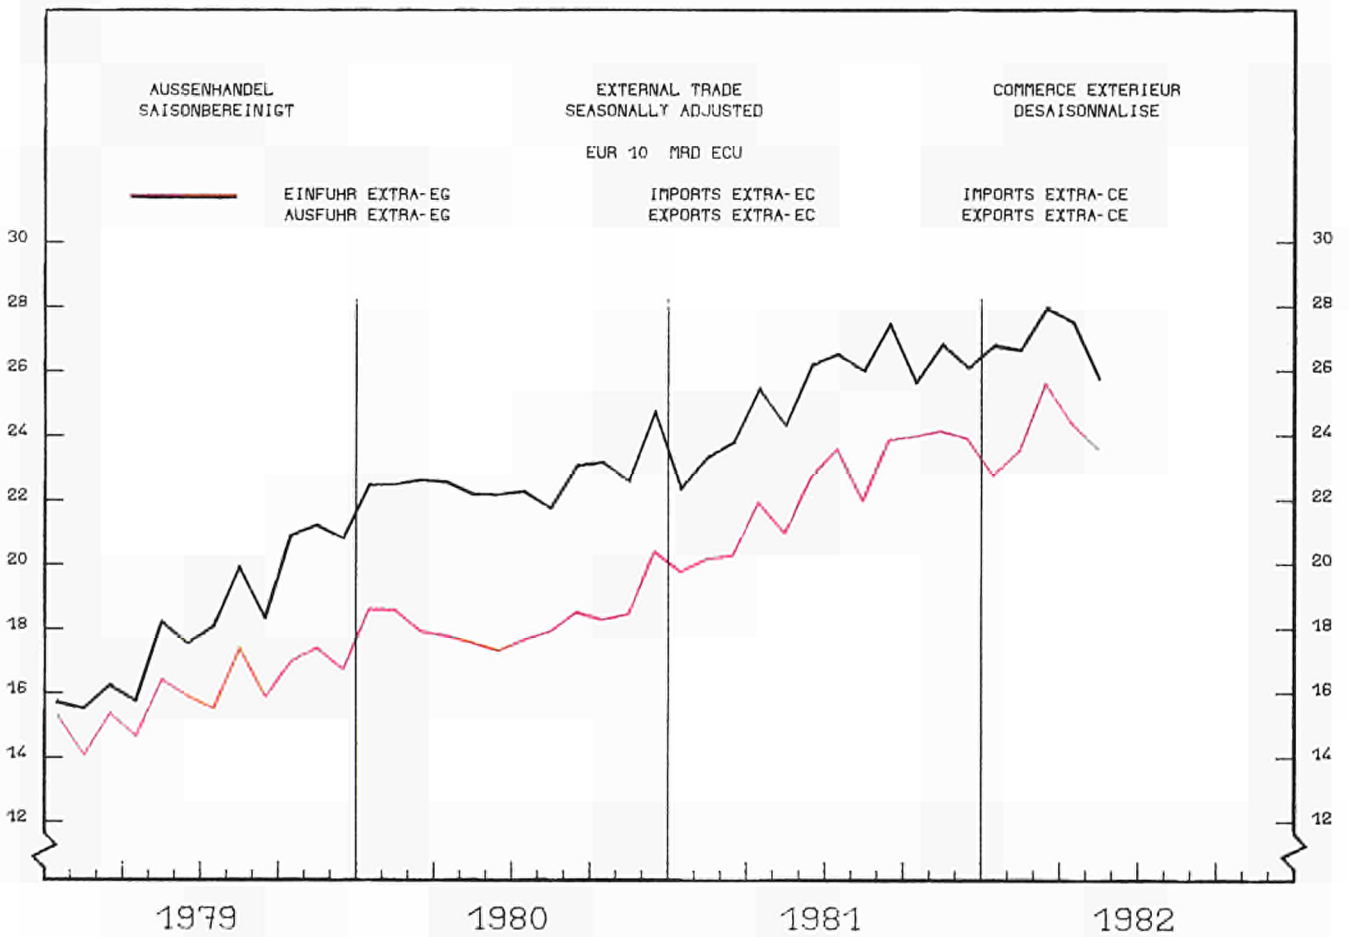

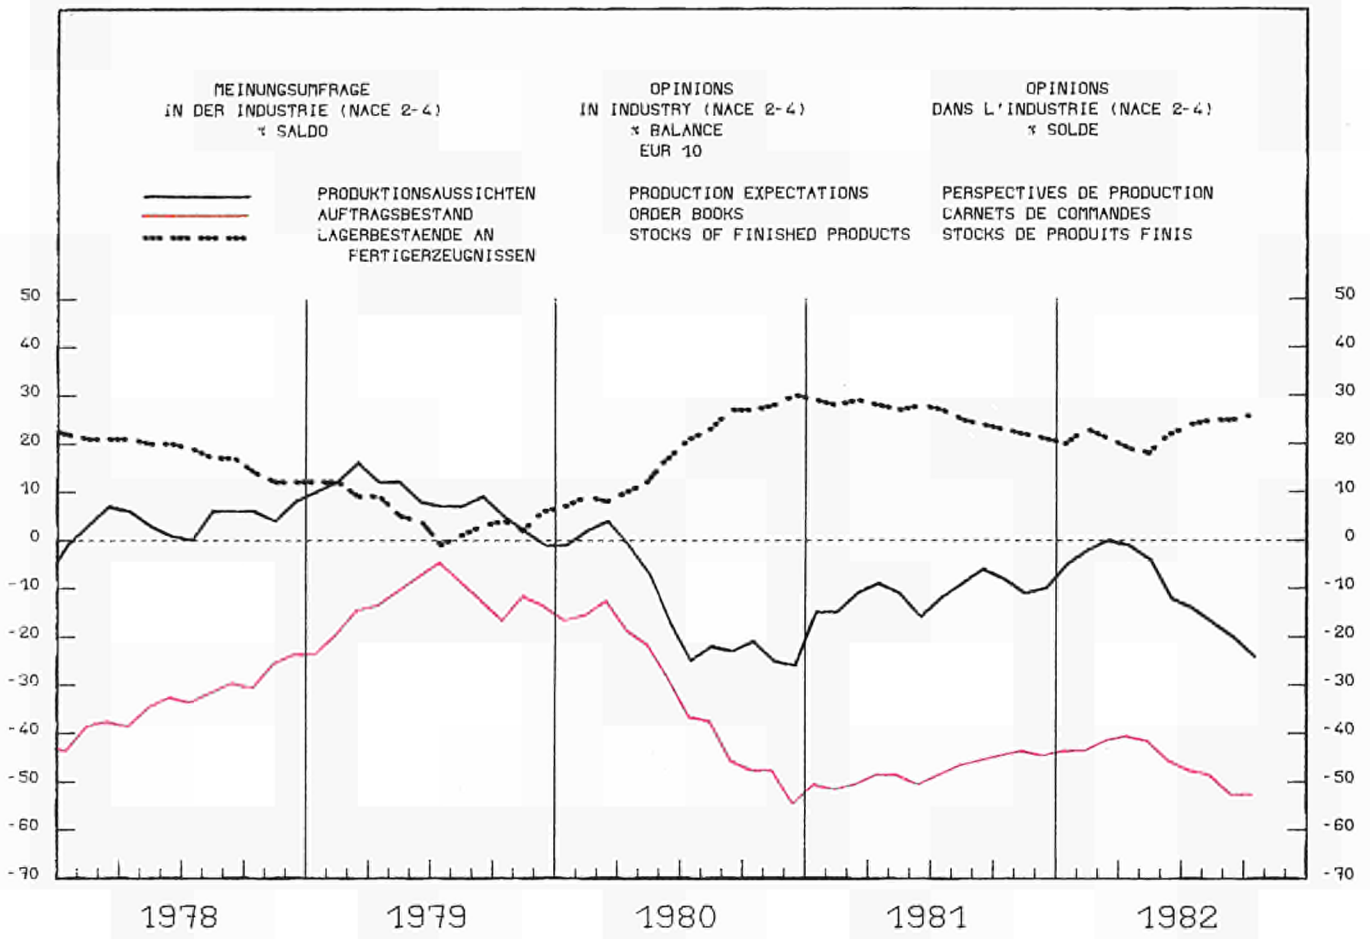

La Federal Reserve des États-Unis a de nouveau souligné son intention d'assouplir sa politique monétaire en diminuant son taux d'escompte de 9,5 à 9,1% le 19 novembre dernier.

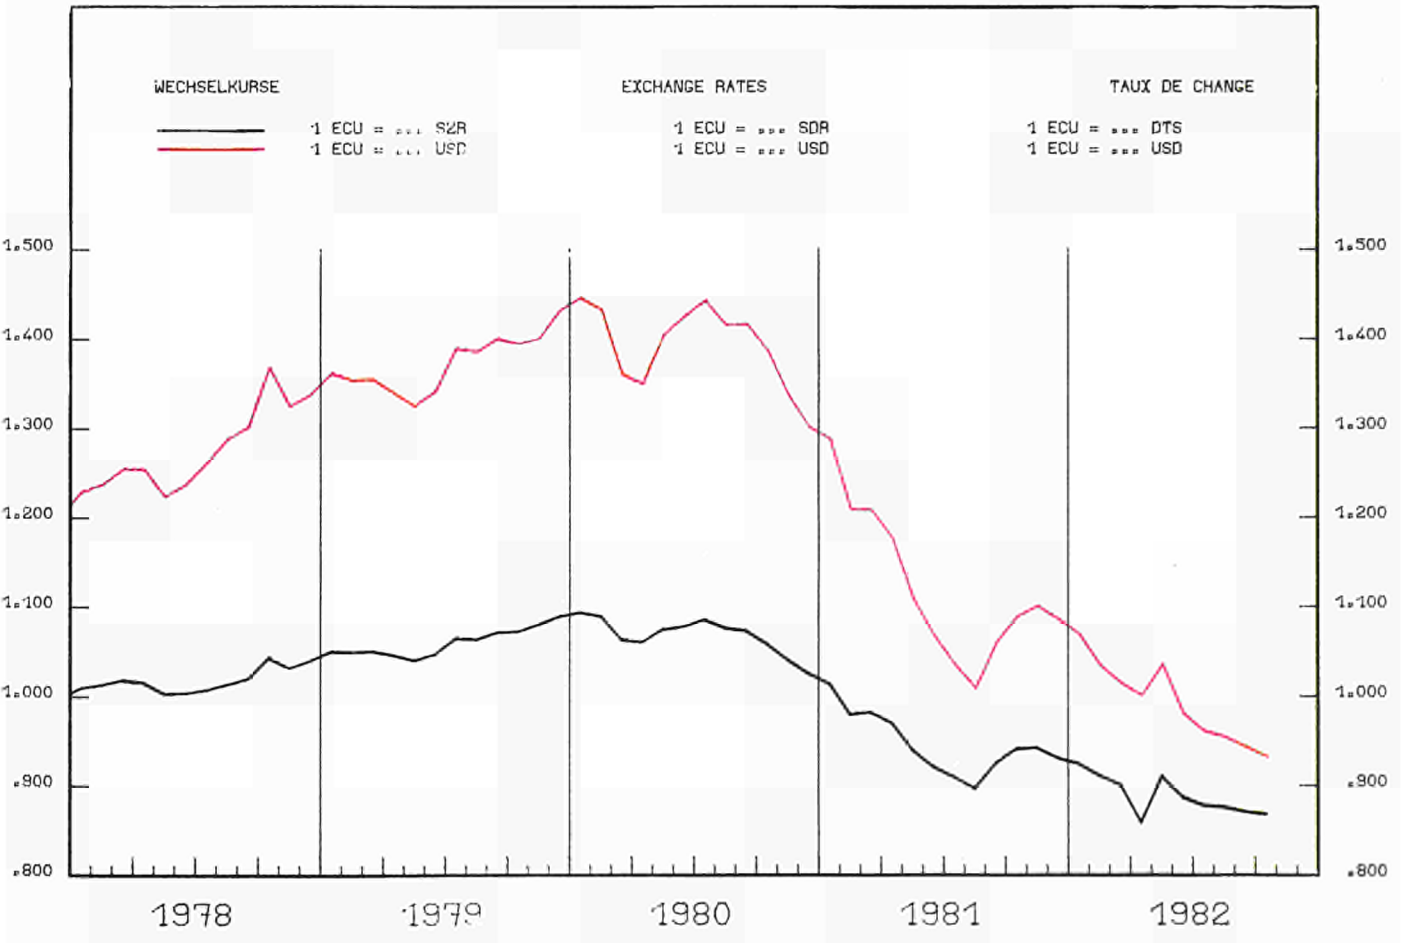

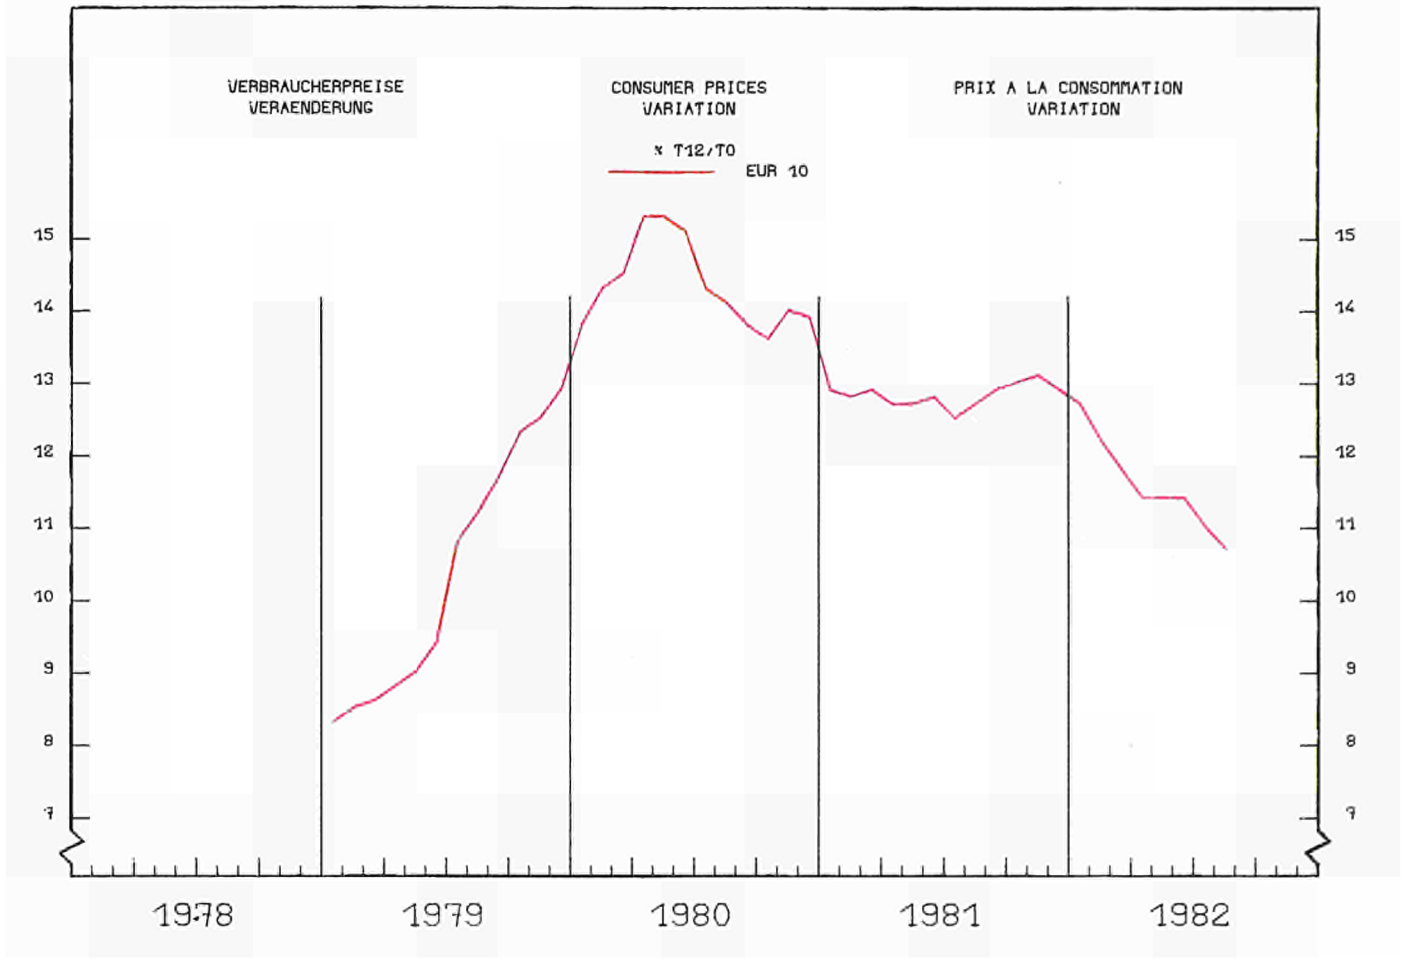

En novembre la Livre Sterling a fait l'objet de pressions importantes. Le taux de change pour la Livre a baissé de 1,82353 ECU début novembre à 1,73942 ECU le 24 novembre : une perte de valeur de 4,8%. La Livre Sterling se trouve maintenant à son plus bas taux contre l'ECU depuis septembre 1981.

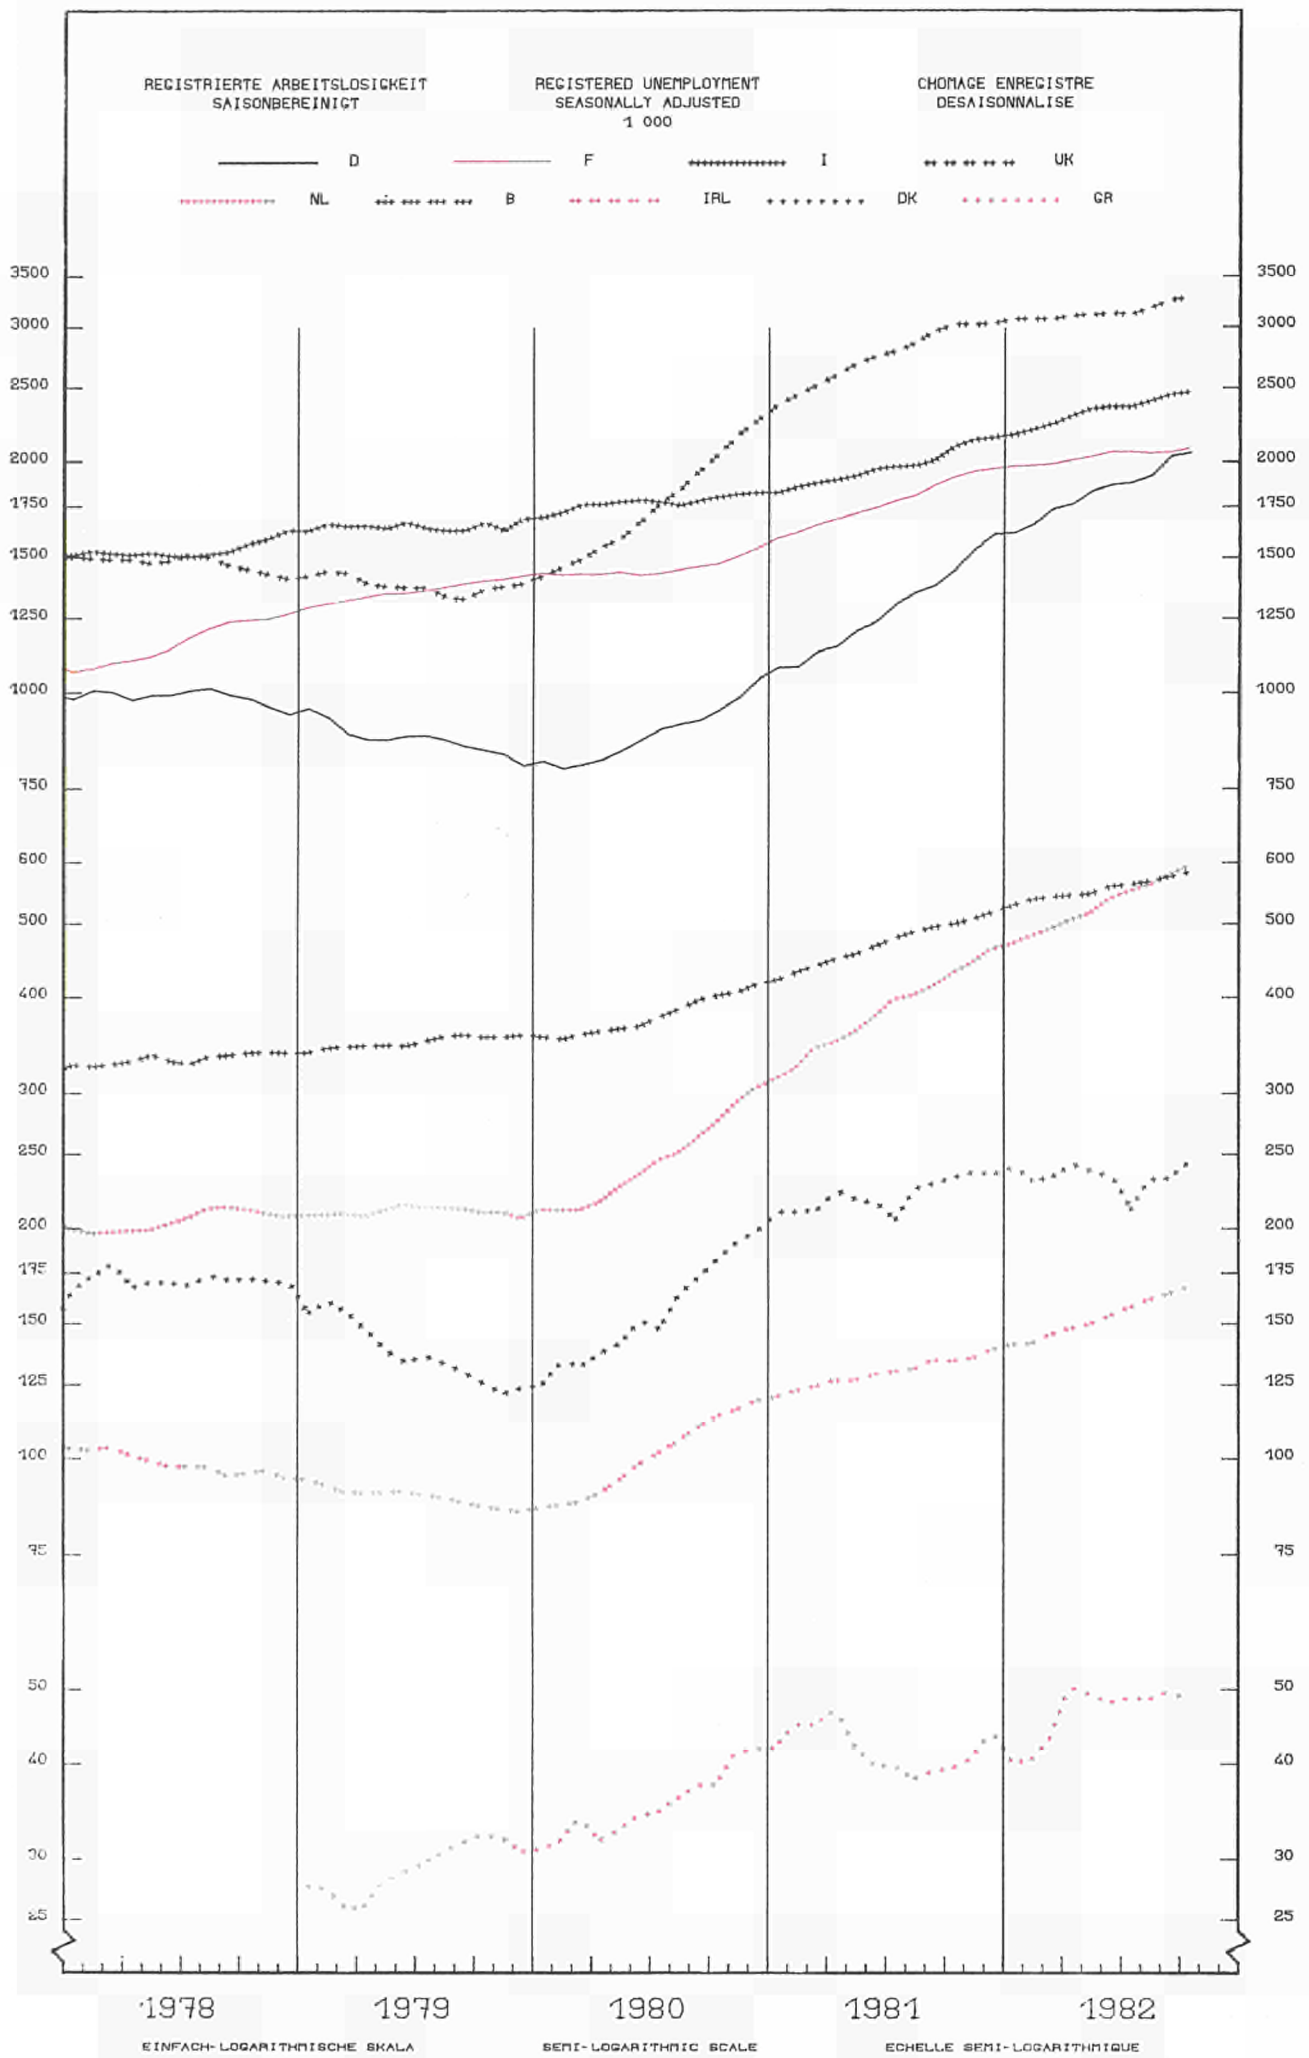

Note technique

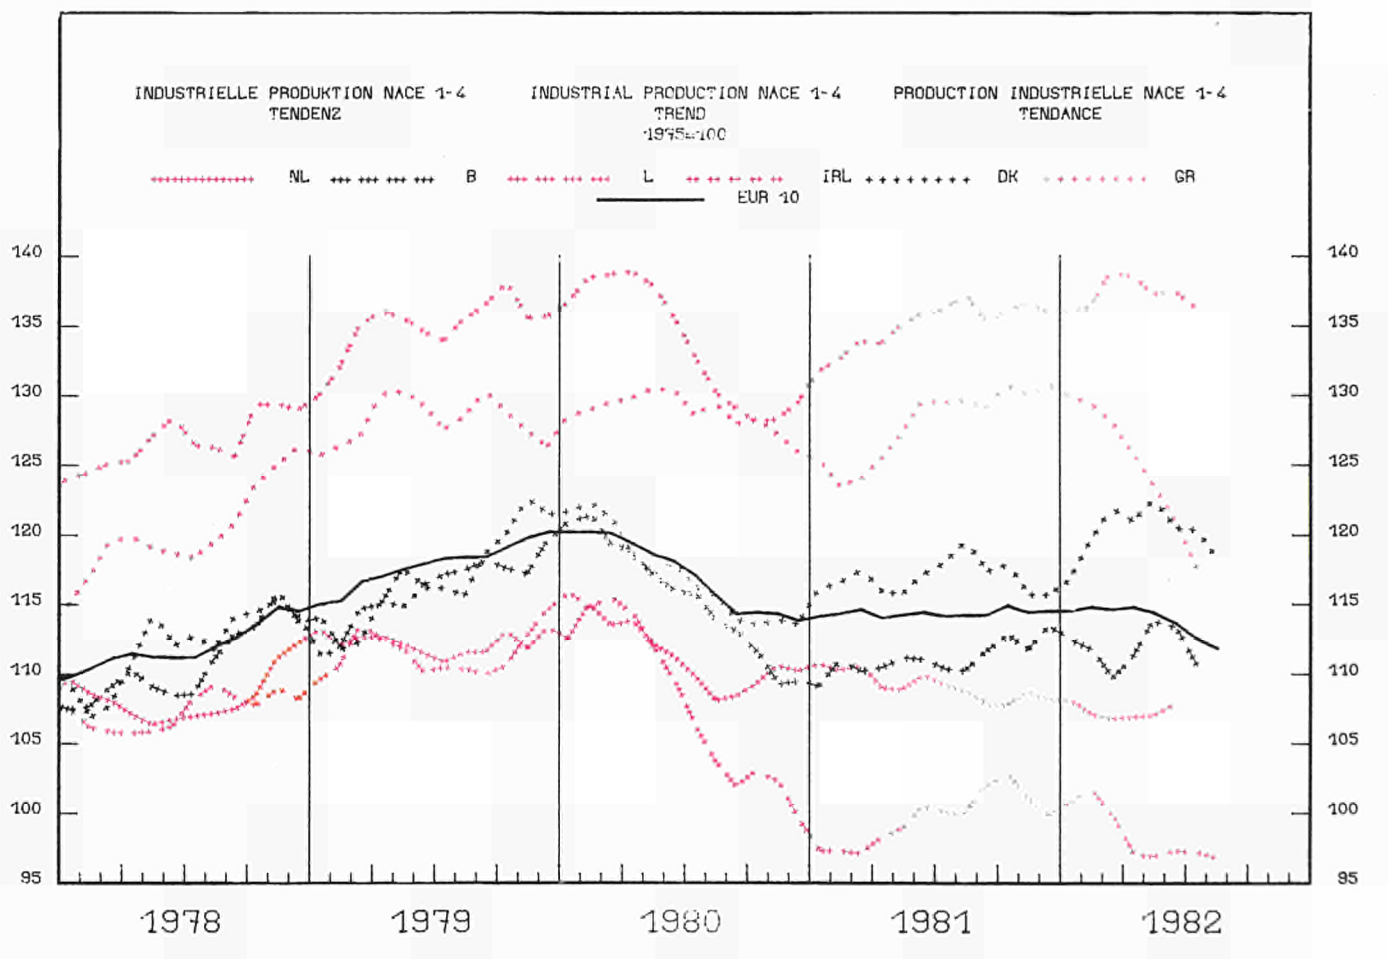

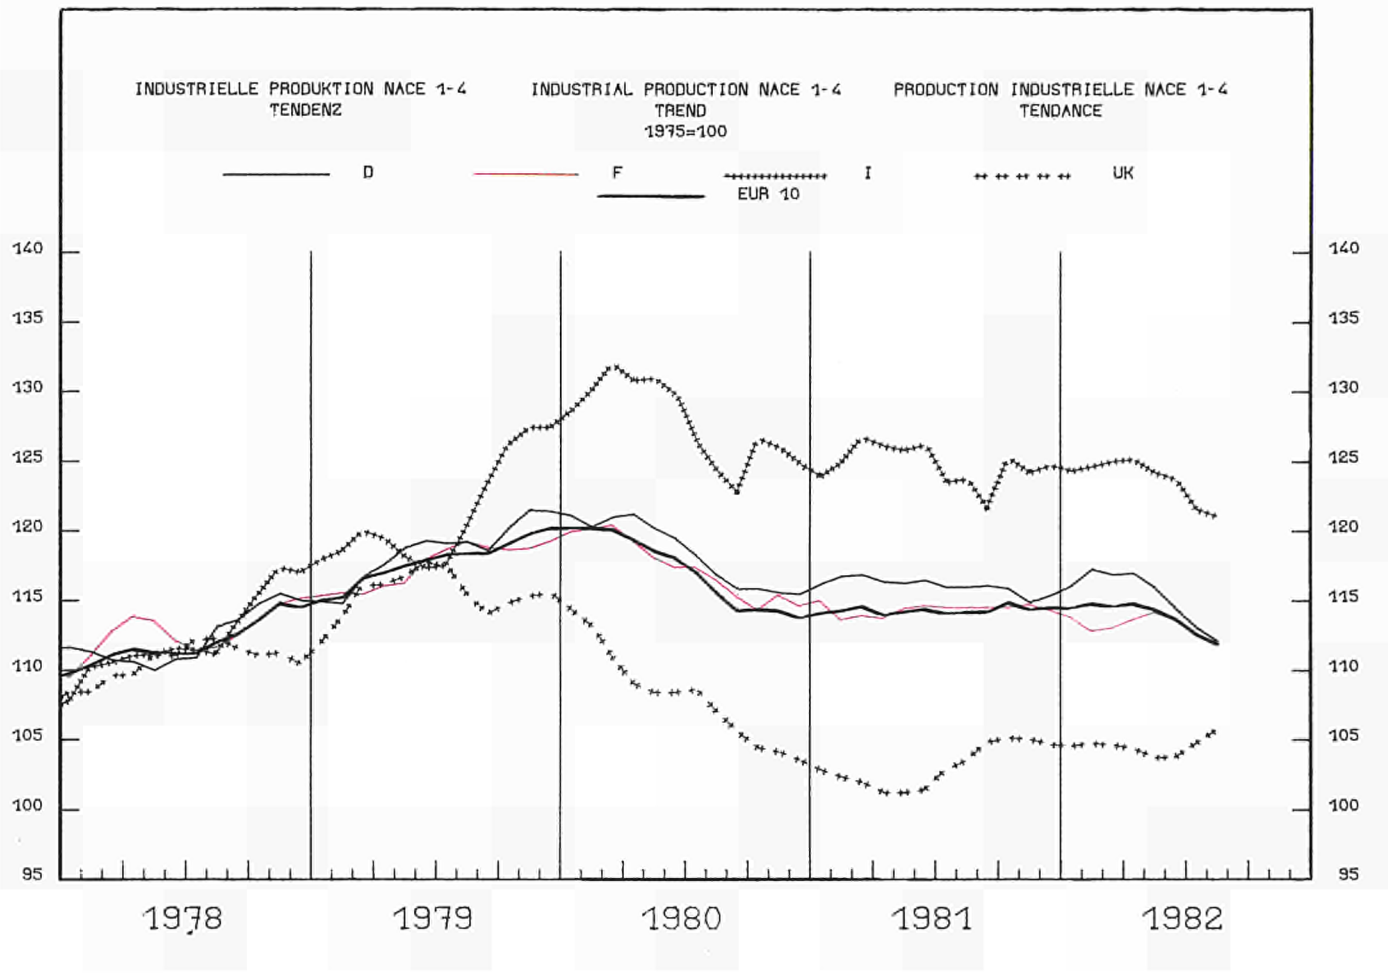

En raison des grèves dans les administrations publiques du Royaume-Uni, les chiffres pour le commerce extérieur de février à août 1981 ne sont pas disponibles pour ce pays et EUR 10. En outre la plupart des données du commerce extérieur pour la Grèce et EUR 10 ne peut pas être publiée pour des raisons techniques. Les séries seront complétées dès que possible.

Öffentliche Preise in Luxemburg (ohne MwSt.) □ Price (excluding VAT) in Luxembourg
 Prix publics au Luxembourg (TVA exclue)

| | ECU | BFR | DM | FF | IRL | UKL | USD |
|---|-------|-----|------|-----|-----|-------|------|
| Einzelpreis • Single copy • Prix par numéro | 2.95 | 120 | 7.20 | 18 | 2 | 1.75 | 3.25 |
| Abonnement • Subscription | 23.32 | 950 | 57 | 142 | 16 | 13.80 | 27 |

Das Jahresabonnement beginnt am 1. Januar und endet am 31. Dezember.

The annual subscription runs from 1 January to 31 December of each year.

Les abonnements sont annuels; ils portent sur une période allant du 1^{er} janvier au 31 décembre de chaque année.

Zahlungen können nur an die auf Umschlagseite 3 angegebenen Vertriebsbüros geleistet werden.

Payments to be made only to the agents in the countries listed on page 3 of the cover.

Les versements doivent être adressés aux bureaux de vente indiqués à la page 3 de la couverture.

Die Versandkosten für Luftpostzustellung sind im Preis nicht enthalten. Die Bedingungen für Luftpostabonnements sind bei den Vertriebsbüros zu erfragen.

These are surface mail rates; for air subscription rates please apply to the agents.

Les prix ne comprennent pas les frais d'expédition par avion; pour les conditions d'abonnement par avion, consulter les bureaux de vente.
