Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat. Encomendas: serviços de venda cujos endereços estão indicados na contracapa.

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Beruhigung an den Devisenmärkten

In der Zeit nach der Einführung der erweiterten Bandbreiten Ende Juli gab es relativ wenig Bewegung im Verhältnis der europäischen Währungen zueinander. Der durchschnittliche Wertverlust der früher den sogenannten „harten Kern“ bildenden Währungen (französischer und belgischer/luxemburgischer Franc, dänische Krone und holländischer Gulden) gegenüber der D-Mark belief sich von Ende Juli bis zum 24. September auf rund 2,3 %. Dabei ist jedoch der holländische Gulden nicht berücksichtigt, der während dieses Zeitraums gegenüber der D-Mark so gut wie unverändert blieb.

Der relativ geringe Kursrückgang ist dadurch zu erklären, daß die EG-Mitgliedstaaten ihre Zinssätze nicht so rasch zurücknahmen, wie dies von den Finanzmärkten erwartet worden war. Die belgische Zentralbank erhöhte sogar Mitte August und ein weiteres Mal Anfang September ihre kurzfristigen Zinssätze, um den Franc vor weiteren Kursverlusten zu schützen; der von der belgischen Nationalbank für Ausleihungen oberhalb des Plafonds erhobene Zinssatz wurde während der Wechselkursspannungen Ende Juli auf 13 % und danach am 2. September nochmals auf 14 % angehoben.

Die am 6. September 1993 bekanntgegebene Entscheidung der Bundesbank, sowohl den Diskontsatz als auch den Lombardsatz um 0 % auf 6,25 % bzw. 7,25 % zu senken, machte den Weg frei für eine weitere Zinssenkungsrunde in anderen europäischen Ländern: In den darauffolgenden Tagen wurden in Belgien, Frankreich, Italien, Dänemark, den Niederlanden und Österreich die Zinssätze zurückgenommen. In Belgien und in Dänemark ist das Zinssatzniveau trotzdem noch immer höher als vor der Erweiterung der EWS-Bandbreiten, und in Frankreich ist der Zinssatz der Banque de France für Wertpapierpensionsgeschäfte im Wege des Tenderverfahrens, der die Untergrenze für die Geldmarktsätze angibt, seit dem 2. Juli unverändert geblieben.

Ein Grund für die Ruhe an den europäischen Devisenmärkten war die vom US-Dollar in der letzten Zeit nach den politischen Umwälzungen in Rußland an den Tag gelegte Stärke: Der Dollar wird weiterhin als „Fluchtwährung“ in Zeiten der Unsicherheit betrachtet. Nachdem er im August und in den ersten beiden Septemberwochen gegenüber der D-Mark beständig an Wert verloren hatte, legte er zwischen dem 15. und dem 24. September nahezu 6 Pfennig (rund 4 %) zu. Als sich abzeichnete, daß die russischen Probleme im internationalen Kontext weniger schwerwiegend waren als zunächst angenommen, gab der Dollar erneut nach, wobei Ängste angesichts der Schwäche der US-Wirtschaft und die Möglichkeit eines weiteren Nachgebens der US-Zinssätze diese Negativentwicklung beeinflussten.

Gegenüber dem Yen jedoch konnte der Dollar seine Wertsteigerung, die nach der massiven Intervention der amerikanischen Notenbank Mitte August eingetreten war, erhalten. Am 29. September stand der Yen gegenüber dem Dollar bei knapp über 105 und somit in einiger Entfernung von der Marke von 100 Yen für 1 Dollar, die an einem bestimmten Punkt bedroht gewesen war. Dies kann als Beispiel einer erfolgreichen Devisenmarktintervention angesehen werden, im Gegensatz zu zahlreichen Gelegenheiten, wenn derartige Interventionen aufgrund des enormen Umfangs der Weltdevisenmärkte im Vergleich zu den begrenzten verfügbaren Ressourcen der Zentralbanken fehlschlagen.

Der ungarische Forint, der an einen der gleichen Teilen aus Ecu und US-Dollar zusammengesetzten Währungskorb geknüpft ist, wurde, nachdem er bereits am 8. Juli um 3 % abgewertet worden war, am 29. September erneut um 4,5 % abgewertet. Der Forint liegt nun um rund 15 % unter seinem Vorjahreswert. Die ungarische Zentralbank hat ihren wichtigsten Zinssatz in der vergangenen Woche bereits um 3 % erhöht, er beträgt nunmehr 22 %.

RENDITEN VON STAATSANLEIHEN: In allen Ländern rückläufige oder gleichbleibende Renditen

Die Renditen von Staatsanleihen waren in allen hier betrachteten Ländern, aus denen Daten für den August vorliegen, entweder rückläufig oder unverändert. Die stärksten Rückgänge waren in Spanien (um 0,8 %) und im Vereinigten Königreich (um 0,6 %) zu verzeichnen. In sechs der elf EG-Länder, für die Daten über die Renditen von Staatsanleihen verfügbar sind, liegen die Renditen derzeit unter 7 %.

Die Renditerückgänge waren in den ersten acht Monaten des Jahres 1993 recht dramatisch: Im EG-Durchschnitt ist die Rendite von Staatsanleihen von 9,2 % im Dezember 1992 auf 7,2 % im August 1993 gesunken. In absoluten Werten gingen die Renditen erwartungsgemäß am stärksten in denjenigen Ländern zurück, in denen sie am höchsten gewesen waren, nämlich in Italien und Spanien.

In zahlreichen Ländern liegen die Renditen von Staatsanleihen gegenwärtig auf oder nahe bei einem historischen Tiefstand.

Der jüngste Rückgang der amerikanischen Renditen von Staatsanleihen, die in den ersten acht Monaten des Jahres 1993 um 1,1 % nachgegeben haben, setzte sich auch Anfang September fort, als die US-Schatzanweisung mit 30jähriger Laufzeit, die als Referenzwert für US-Renditen von Staatsanleihen gilt, erstmals seit dem 16jährigen Bestehen dieser Obligation mit Renditen knapp unter 6 % gehandelt wurde. Der rückläufigen Entwicklung der US-Renditen von Staatsanleihen ging ein schwaches Wirtschaftswachstum und infolgedessen eine Korrektur der Inflationsprognosen nach unten voraus.

GELDVOLUMEN: M3-Zuwachsrates in Frankreich unterhalb des Zielkorridors

Die Zuwachsrates von M3 in Frankreich betrug im Juni, auf Jahresbasis umgerechnet, 3,3 % und blieb somit etwas unter dem für 1993 angestrebten Zielkorridor von 4 % - 6,5 %. Die Tatsache, daß nunmehr bereits im dritten aufeinanderfolgenden Monat eine Verlangsamung des Geldmengenwachstums festzustellen ist, kann als Hinweis auf die wirtschaftliche Depression in Frankreich angesehen werden. Die Zielvorgabe für das Geldmengenwachstum war allerdings zu einem Zeitpunkt gesetzt worden, als die Vorausschätzungen für das französische Wirtschaftswachstum noch besser waren als die derzeitigen Prognosen.

Auch in Portugal und in Griechenland ist das Geldmengenwachstum weiterhin langsam. In Portugal hat sich L- in den letzten drei Monaten, auf das Jahr umgerechnet, um weniger als 10 % erhöht, und in Griechenland liegt die Zuwachsrates von M3 noch immer erheblich unter den angestrebten 9 % - 12 %: Im Juli betrug sie, auf Jahresbasis umgerechnet, nur knapp 4 %.

In den Niederlanden und in Italien hingegen hat sich das Geldmengenwachstum in den vergangenen Monaten beschleunigt, in Italien näherte sich die M2-Zuwachsrates sogar der Obergrenze ihres Zielkorridors von 5 % - 7 %.

Außerhalb der EG verzeichnete Japan in acht der neun Monate bis Mai 1993 negative Zuwachsrates für M2; in den Vereinigten Staaten verläuft das M2-Wachstum zwar weiterhin langsam, lag jedoch im Mai erstmals seit Januar dieses Jahres oberhalb 1 %.

AMTLICHE WÄHRUNGSRESERVEN: Anstieg der Währungsreserven

In allen hier betrachteten Ländern, aus denen Daten für Juli vorliegen, war in diesem Monat ein Anstieg der Währungsreserven zu verzeichnen. Am höchsten war die Zunahme in Dänemark, das sich durch die Begebung mehrerer Euroanleihen Devisen verschaffte. Auch in Griechenland, Irland und den Niederlanden waren Anstiege der Währungsreserven zu beobachten.

Diese Zunahme der Reserven mag überraschen in Anbetracht der Tatsache, daß während des Betrachtungszeitraums die Währungen mehrerer Länder an den Devisenmärkten erheblich unter Druck standen. Im Falle Dänemarks wurden die dadurch verursachten Reservenabflüsse jedoch durch die Zuflüsse infolge der Emissionen von Euroanleihen mehr als aufgewogen. Aus Frankreich liegen zwar noch keine aktuellen Daten für Juli vor, den vorläufigen Daten ist jedoch zu entnehmen, daß die Nettoreserveposition Frankreichs Ende Juli negativ war, nachdem die Banque de France interveniert hatte, um den Abfluß französischer Francs einzudämmen.

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Im ersten Quartal 1993: Rückläufiges Wirtschaftswachstum (BIP -0,9 %), Wiederanstieg der Inflation (+0,8 %).

Im ersten Quartal 1993 war für die Wirtschaft in der Gemeinschaft insgesamt ein weiterer Wachstumsrückgang zu verzeichnen (BIP -0,9 %). Dieses Ergebnis, das weitgehend mit den makroökonomischen Vorausschätzungen für das Jahr 1993 übereinstimmt, läßt vermuten, daß sich die wirtschaftliche Lage im Laufe des Jahres noch ungünstiger als 1992 entwickeln wird. Den meisten Wirtschaftswissenschaftlern zufolge sind nur schwer Anzeichen für eine kurzfristige Erholung der Wirtschaft in der Gemeinschaft festzustellen. Dagegen läßt die amerikanische Wirtschaft gewisse - zwar relativ schwache und zuweilen widersprüchliche - Anzeichen für einen Aufschwung erkennen. Völlig offen bleibt jedoch zur Zeit die Frage, inwieweit die Volkswirtschaften der Gemeinschaft angesichts ihrer internen Probleme von diesem neuen Aufwärtstrend in den Vereinigten Staaten profitieren können. Auf der letzten Konferenz der G-7 wurde betont, daß der Aufschwung der Weltwirtschaft von drei Hauptfaktoren abhängt: dem Wiederaufschwung des Außenhandels, der eng verbunden ist mit der positiven Entwicklung der GATT-Verhandlungen; der Wiederbelebung der Inlandsnachfrage, vor allem nach Gütern des letzten Verbrauchs; dem Abbau der staatlichen Defizite in allen Ländern. Für die Gemeinschaft ist außerdem ein Abbau der monetären Spannungen zu nennen, die sich auf die Stabilität des monetären Systems sehr ungünstig ausgewirkt haben. Im ersten Quartal des laufenden Jahres sind die Zinssätze dank der nachlassenden Spannung auf dem Devisenmarkt und des geringeren Inflationsdrucks langsam gesenkt worden, was vor allem dem Zweck diente, die Inlandsnachfrage zu fördern.

Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so ist ein leichtes Wiederanziehen der vierteljährlichen Inflationsrate (+0,8 %) festzustellen, während die jährliche Rate weiterhin rückläufig ist (+3,0 %). Diese günstige Preisentwicklung ist zweifellos durch die schwache Inlandsnachfrage beeinflusst worden, die selbst in den Ländern, in denen Abwertungen vorgenommen wurden, dazu geführt hat, daß die Inflationsrate weiter gesunken ist.

Bei den Bestandteilen des BIP muß auf den vierten aufeinanderfolgenden und bisher stärksten Rückgang der Investitionstätigkeit (-2,4 %) hingewiesen werden. Die Entwicklung des privaten ebenso wie des öffentlichen Verbrauchs ist ebenfalls negativ (-0,8 % bzw. 0,6 %).

Was die Situation in den einzelnen Mitgliedstaaten angeht, ist eine Verschärfung der negativen Phase in den Niederlanden (BIP -0,5 %), in Frankreich (BIP -0,7 %), in Dänemark (BIP -1,6 %) und vor allem in Deutschland (BIP -2,3 %) zu beobachten. In Italien scheint sich die Rezessionstendenz, die in den letzten drei Quartalen festzustellen war, zu verlangsamen (BIP -0,1 %). Nur in einem Land, im Vereinigten Königreich, ist eine positive Entwicklung mit mäßiger Steigerungsrate zu verzeichnen (BIP +0,4 %). Was die Inflation betrifft, wird ein deutlicher Rückgang aus Italien (+0,7 %) und vor allem aus Deutschland (+0,2 %) gemeldet. Dagegen hat sich in Frankreich der Inflationsdruck verschärft (+1,1 %), ebenso wie im Vereinigten Königreich und in Dänemark (+1,2 % bzw. +1,3 %), vor allem, wenn man berücksichtigt, daß in diesen beiden Staaten im vierten Quartal 1992 eine relativ starke Deflation zu beobachten war. Für Frankreich und die Niederlande weisen die vorläufigen Daten für das zweite Quartal 1993 auf eine Stagnation der Produktion hin (BIP -0,0 % bzw. +0,0 %).

Für die Vereinigten Staaten liegen bereits die Zahlen für das zweite Quartal 1993 vor; dort ist ein leichter Anstieg des Wirtschaftswachstums (BIP +0,4 %) bei einem gleichzeitigen leichten Rückgang der vierteljährlichen wie jährlichen Inflationsrate (+0,6 % bzw. +2,5 %) zu beobachten. Bei den Komponenten des BIP ist die anhaltende positive Entwicklung der Investitionstätigkeit (+1,7 %) sowie der Wiederanstieg des privaten Verbrauchs (+0,9 %) zu nennen.

In Japan deuten die Zahlen für das zweite Quartal 1993 auf ein Anhalten der Phase der Unsicherheit hin: Die Produktion ist erneut zurückgegangen (BIP -0,5 %) und die vierteljährliche Inflationsrate ist erheblich gestiegen, wohingegen die jährliche Inflationsrate rückläufig ist (+0,7 %). Bei den Komponenten des BIP ist ein Rückgang des privaten Verbrauchs (-0,6 %) und der Investitionstätigkeit (-0,3 %) festzustellen.

PREISE : Die Jahresinflationsrate der EG unverändert bei 3,5 % im August

Die Jahresinflationsrate der EG insgesamt gemessen mit dem Verbraucherpreisindex für EUR-12 blieb unverändert bei 3,5 % von Juni auf August. Vor Jahresfrist lag diese Zahl bei 4,0 %.

Die Zahl für den Monat August zeigt erneut die Stabilität der Inflationsrate für die EG insgesamt; z.B. zwischen November 1992 und August 1993 blieb diese Rate immer zwischen 3,7 % und 3,4 %.

Zur Zeit liegen die jährlichen Inflationsraten in 4 der 12 EG-Länder über denen des Vorjahres: Belgien (3,2 % gegenüber 2,1 %), Deutschland (4,2 % gegenüber 3,5 %), Frankreich (2,2 % gegenüber 2,0 %) und Luxemburg (3,7 % gegenüber 3,1 %), während sie in den übrigen Mitgliedstaaten unter dem Niveau des Vorjahres liegen und zwar in einigen dieser Länder bedeutend unter diesem Niveau. Niederlande (1,9 % gegenüber 3,6 %), Vereinigtes Königreich (1,7 % gegenüber 3,6 %) und Portugal (5,6 % gegenüber 9,3 %).

Zwischen Juli und August stieg der Monatsindex für EUR-12 um 0,2 % an (dieselbe Steigerung wie im Vormonat). Niedrig bis gemäßigt waren die Preisanstiege in Italien

(0,1 %), Dänemark (0,2 %) und Luxemburg (0,3 %), ebenso in Belgien, Griechenland, in den Niederlanden, im Vereinigten Königreich und in Portugal (0,4 %), nur Spanien verzeichnete eine stärkere Preissteigerung im August (0,6 %).

Der Vierteljahresindex Irlands für Mitte August lag bei Redaktionsschluß noch nicht vor und wird deshalb erst in der nächsten Ausgabe dieses Bulletin erscheinen.

In ansteigender Reihenfolge nach der derzeitigen Inflation sind die Inflationsraten und die entsprechenden Zahlen des Vorjahres für die einzelnen Mitgliedstaaten wie folgt:

	AUG. '93 AUG. '92	AUG. '92 AUG. '91		AUG. '93 AUG. '92	AUG. '92 AUG. '91
Irland**	0,9 %	3,6 %	Luxemburg	3,7 %	3,1 %
Dänemark	1,2 %	2,1 %	Deutschland*	4,2 %	3,5 %
Ver. Königreich	1,7 %	3,6 %	Spanien	4,6 %	5,7 %
Niederlande	1,9 %	3,6 %	Italien	4,9 % ^p	5,1 %
Frankreich	2,2 % ^p	2,0 %	Portugal	5,6 %	9,3 %
Belgien	3,2 %	2,1 %	Griechenland	14,6 %	15,3 %

* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990

** Mai 1993/Mai 1992

p = vorläufig

Die entsprechenden Daten für die Beitrittskandidaten-ebenfalls in aufsteigender Reihenfolge – sind wie folgt: Finnland 2,1 % (2,3 %), Norwegen 2,2 % (2,0 %), Österreich 3,4 % (3,8 %) und Schweden 5,2 % (2,0 %).

Die Jahresinflationsraten für die Vereinigten Staaten und Japan lagen im August bei 2,8 % (3,1 %) bzw. 2,1 % (1,7 %).

INDUSTRIEPRODUKTION: Erholung noch nicht in Sicht

Im Industriesektor Europas fällt die Produktion weiterhin, eine Stabilisierung ist nicht in Sicht. Besonders die Investitionsgüterproduktion, die eigentlich der Motor des nächsten Aufschwungs sein sollte, sinkt spürbar.

Für die Europäische Gemeinschaft (EUR12) betrug die Veränderungsrate des arbeitstäglichen bereinigten Produktionsindex gegenüber dem Wert des gleichen Monats ein Jahr zuvor im Juni 1993 –4,1 %, im Mai waren es –4,2 %. Für Westdeutschland betragen die entsprechenden Veränderungsrate –8,0 % (Juni) bzw. –9,4 % (Mai).

Betrachtet man die letzten drei verfügbaren Monate April bis Juni 1993, so beläuft sich für EUR12 die Veränderungsrate des saisonbereinigten Produktionsindex gegenüber den drei davor liegenden Monaten Januar bis März auf –0,7 %.

Für die grossen Güterkategorien ergibt sich folgendes Bild (Änderung der letzten drei Monate gegenüber den drei Vormonaten):

– Grundstoffindustrie:	EUR 12	–1,3 %	USA	+0,6 %
– Investitionsgüterindustrie:	EUR 12	–1,6 %	USA	+1,1 %
– Konsumgüterindustrie:	EUR 12	–0,6 %	USA	–0,4 %

Im Baubegewerbe (NACE 5) der Europäischen Gemeinschaft könnte eine leichte Erholung einsetzen: während im ersten Quartal 1993 noch eine Veränderungsrate von –2 % gegenüber dem letzten Quartal des Vorjahres zu verzeichnen war, beträgt die (geschätzte) Veränderungsrate im zweiten Quartal gegenüber Januar bis März +0,5 %.

Für die einzelnen Mitgliedstaaten der EG ergibt sich für die saisonbereinigte Industrie-Produktion folgende Veränderungsrate der letzten drei Monate gegenüber den Vormonaten: Griechenland +3,1 %, Luxemburg +2,1 % [geschätzt], Belgien +1,4 % [geschätzt], Irland +1,3 % [geschätzt], Vereinigtes Königreich +0,8 %, Italien –0,5 %, Deutschland (West) –0,9 %, Spanien –0,9 % [geschätzt], Frankreich –1,1 %, Niederlande –1,2 %, Portugal –2,2 % [geschätzt], Dänemark –3,0 %. Demnach sank auch in den Sommermonaten in vielen Mitgliedstaaten die Produktion oder sie stagnierte bei geringen positiven Änderungsraten. Von den grossen EG Mitgliedsstaaten zeigt nur das Vereinigte Königreich Zeichen eines tragenden Aufschwungs.

In den einzelnen Wirtschaftszweigen der EG-Industrie sank die Produktion in der Herstellung von Metallwaren (NACE 31), der Nahrungsmittelindustrie (NACE 41/42), der Textilindustrie (NACE 43) und der Schuh- und Bekleidungsindustrie (NACE 45). Eine leichte Erholung ist zu verzeichnen in der Erzeugung von Metallen (NACE 22), der Industrie Steine – Erden (NACE 24) und der chemischen Industrie (NACE 25). Auch die Automobilindustrie (NACE 35) zeigt zumindest keine sinkende Produktion mehr. Luxemburg, den 14.9.1993

ZAHLUNGSBILANZ – Gesamttendenzen – vorläufige Zahlen für das erste Quartal 1993:

Bedingt durch die Einführung von INTRASTAT, dem neuen System für die Erhebung von Daten über den innergemeinschaftlichen Handel, ist es zu erheblichen Verzögerungen bei der Datensammlung gekommen. Infolgedessen konnten die Zahlungsbilanzdaten für das erste Quartal 1993 nicht aktualisiert werden.

Die Angaben stimmen daher bis auf einige von den Mitgliedstaaten selbst vorgenommene Änderungen mit den in der vorhergehenden Nummer veröffentlichten Zahlen überein. Bis heute (29. September 1993) liegen uns die Zahlen für die Vereinigten Staaten, Japan, Dänemark, Deutschland, das Vereinigte Königreich und teilweise für die Niederlande und Griechenland vor, die zur Information veröffentlicht werden. Schätzungen für die gesamte Gemeinschaft für das erste Quartal 1993 sind jedoch nicht möglich.

AUSSENHANDEL: Ergebnisse für März 1993

Im ersten Quartal 1993 belief sich das Außenhandelsdefizit der Gemeinschaft auf 12,6 Mrd. ECU, das entspricht einer Verbesserung um 7,3 Mrd. ECU gegenüber dem entsprechenden Vorjahreszeitraum. Die außergemeinschaftlichen Einfuhren gingen um 4,8 % zurück, während die Ausfuhren nur wenig stiegen (1,3 %). Die Differenz der Entwicklungsraten von Ausfuhren und Einfuhren stieg von 2 Prozentpunkten im ersten Quartal 1992 auf 6 Prozentpunkte im selben Zeitraum des Jahres 1993.

Das Handelsbilanzdefizit der USA belief sich im ersten Quartal 1993 auf 22,1 Mrd. ECU, entsprechend einer Verschlechterung um 8 Mrd. ECU gegenüber dem selben Zeitraum des Vorjahres. Die Einfuhren der USA stiegen in Ecu um 16,4 % und in Dollar um 10 %. Die Ausfuhren der USA sind weniger stark gestiegen: um 8,5 % in Ecu und um 2,4 % in Dollar.

Der Handelsbilanzüberschuß Japans erreichte im ersten Quartal 1993 fast 25 Mrd. ECU, gegenüber 20 Mrd. ECU im ersten Quartal 1992. Die Ausfuhren Japans stiegen um 10,4 % in Ecu und um 4 % in Dollar, stagnierten aber in Yen. Die Einfuhren Japans stiegen im ersten Quartal 1993 um 5,7 % gegenüber dem entsprechenden Zeitraum des Vorjahres; sie stagnierten in Dollar und gingen in Yen um 3,4 % zurück.

Deutschland erzielte im außergemeinschaftlichen Handel von Januar bis März 1993 einen Überschuß von 4,1 Mrd. ECU gegenüber 0,6 Mrd. ECU im gleichen Zeitraum des Vorjahres. Dänemark erzielte im ersten Quartal 1993 einen Überschuß von 0,6 Mrd. ECU im außergemeinschaftlichen Handel. Der außergemeinschaftliche Handel Irlands war ausgeglichen. Italien, Portugal, Griechenland und die BLWU verzeichneten ein leichtes Defizit von jeweils 0,3, 0,6, 0,8 und 0,8 Mrd. ECU. Die Bilanz Italiens und der BLWU verbesserte sich um 1,8 Mrd. ECU bzw. 1,3 Mrd. ECU gegenüber dem ersten Quartal 1993. Das Defizit Spaniens betrug 1,6 Mrd. ECU und war damit nur noch halb so hoch wie im gleichen Zeitraum des Vorjahres. Das Defizit Frankreichs im außergemeinschaftlichen Handel vergrößerte sich um 2,2 Mrd. ECU auf 3,3 Mrd. ECU im ersten Quartal 1993. Das Defizit der Niederlande im außergemeinschaftlichen Handel war im ersten Quartal 1993 mit 3,9 Mrd. ECU um 1,1 Mrd. ECU geringer als im gleichen Zeitraum des Vorjahres. Das höchste Defizit im außergemeinschaftlichen Handel verzeichnete im ersten Quartal 1993 das Vereinigte Königreich mit 6 Mrd. ECU.

Foreword

EN

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (the notes regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on *Eurostatistics* can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: calmer period in foreign exchange markets

There was a relatively small amount of movement in European currencies vis-à-vis one another in the period after the introduction of wide currency bands at the end of July: the average depreciation against the Deutschmark of the former so-called 'hard core' currencies (French and Belgian/Luxembourg francs, Danish krone and Dutch guilder) was around 2.3% between the end of July and September 24. However, this figure excludes the Dutch guilder which was more or less unchanged against the mark in this period.

This relatively small depreciation can be explained by the fact that EC Member States did not reduce interest rates as quickly as had been expected by the financial markets. The Belgian central bank even increased its short-term interest rates in mid-August and again in early September in order to protect the franc from further depreciation; the rate charged by the National Bank of Belgium on banks' advances above ceiling was increased to 13% during the period of exchange rate pressure at the end of July and was again increased to 14% on September 2.

However, the Bundesbank's decision on September 9 to reduce both its discount and lombard rates by ½% to 6.25 and 7.25% respectively allowed a further round of interest rate cuts in other European countries: in the following days rates were reduced in Belgium, France, Italy, Denmark, the Netherlands and Austria. In Belgium and Denmark however, rates remain at levels higher than before the widening of the ERM bands, and in France the Banque de France's auction rate, which marks the floor for money market rates, has remained unchanged since July 2.

One reason for the calm in the European foreign exchange markets has been the recent strength of the US dollar following the political upheavals in Russia: the dollar continues to be perceived as a 'safe haven' in times of uncertainty. Having depreciated steadily against the DM in August and the first two weeks of September, the dollar gained almost 6 pfennigs (around 4%) between September 15 and 24. When it became clear that the Russian problems were less serious in international terms than had previously been thought, the dollar depreciated once more, with fears of the weakness of the US economy and the possibility of a further reduction in US interest rates both negatively influencing the dollar.

Against the yen however the dollar maintained the appreciation which occurred following the bout of Federal Reserve intervention in mid-August. On September 29 it stood at just over 105 against the dollar, some way from the 100 point which had been threatened at one point. This is an example of foreign exchange intervention which was successful, in contrast to many occasions when it fails as a result of the huge size of the global foreign currency markets compared to the limited resources available to the central banks.

Following the 3% devaluation on July 8, the Hungarian forint, which is linked to a basket of currencies made up of equal parts of the ecu and the US dollar, was further devalued by 4.5% on September 29. The forint is now around 15% lower than its value a year ago. The Hungarian central bank had already increased its main interest rate by 3% the previous week: it now stands at 22%.

GOVERNMENT BOND YIELDS: yields lower or constant in all countries surveyed

The yield on government bonds either fell or was constant in all countries surveyed for which August data are available. The largest falls during August occurred in Spain (down 0.8%) and the UK (down 0.6%). Six out of the 11 EC countries for which data on government bond yields exist are now experiencing yields at less than 7%.

The falls in yields have been fairly dramatic in the first eight months of 1993: the average yield on government bonds in the EC has fallen from 9.2% in December 1992 to 7.2% in August 1993. As might be expected, yields have fallen by the largest amounts in absolute terms in the countries where they were highest, that is to say Italy and Spain.

For many countries, government bond yields currently stand at or near all time lows.

The recent fall in American government bond yields, which have fallen 1.1% in the first eight months of 1993, continued into early September, when the 30-year US Treasury bond, which is considered as the benchmark for US government bond yields, traded at yields of slightly below 6% for the first time in the bond's 16 year existence. The falls in US government bond yields have come about after sluggish economic growth and thus a downwards revision of inflationary expectations.

MONEY SUPPLY: French M3 growth below target range

The growth rate of M3 in France grew by a 3.3% in the 12 months to June, slightly below its 1993 target range for growth of 4-6.5%. This is the third consecutive month of slowing growth, and is an indication of the depressed state of the French economy. The monetary target was set however when forecasts for French growth were higher than current projections.

Monetary growth continues to slow too in Portugal and Greece. In Portugal, L- has grown at an annualised rate of less than 10% for the last three months, and in Greece M3 continues to grow at a rate far below its 9-12% target range, standing at just 4% in the year to July.

In contrast, monetary growth in the Netherlands and in Italy has been quickening in recent months, with M2 growth in Italy towards the top of its target range of 5-7%.

Outside the EC, the growth of M2 in Japan has been negative in eight of the nine months up to May 1993, and although M2 growth in the United States continues to be slow, it was above 1% in May for the first time since January of this year.

FOREIGN OFFICIAL RESERVES: inflows of reserves

There were inflows of reserves in July into all countries surveyed for which July data are available. The largest inflow was into Denmark, which raised foreign currency by issuing several eurobonds in July. There were also large inflows into Greece, Ireland and the Netherlands.

In some ways these inflows might be seen as surprising, given that the period under consideration saw the currencies of some of the countries surveyed under severe pressure in the foreign exchange markets. However, in the case of Denmark, these outflows were obviously outweighed by inflows resulting from the bond issues. Although actual data are not yet available for France for July, provisional data indicate that France's net foreign

reserve position was actually negative at the end of July, following the Banque de France's intervention in an attempt to stem the flows out of the French franc.

QUARTERLY ACCOUNTS: In the first quarter of 1993: economic growth declined (GDP -0.9%) and inflation resumed (+0.8%).

The first quarter of 1993 saw another decline in economic growth in the Community economy as a whole (GDP -0.9%). This result is in line with macroeconomic forecasts for 1993 and presages an even less favourable economic situation throughout the current year than in 1992. Most economists agree that it is very difficult to pinpoint any signs of short-term recovery in the Community economy. However, signs of recovery, although relatively weak and occasionally contradictory, are discernible in the American economy. The real unknown factor at this stage is the capacity of the Community economies, given their internal problems, to profit from this new economic trend in the United States. As underlined at the last G7 meeting, world economic recovery is linked to three main factors: a recovery in external trade, closely linked to a positive outcome of the GATT negotiations; a recovery in domestic demand, particularly in terms of final consumption; and a reduction in the primary public deficit in all countries. For the Community, a further condition is a reduction in the monetary tensions which have created enormous problems for the stability of the monetary system. To stimulate some recovery in internal demand, interest rates began to fall slowly in the first part of the year, thanks to a reduction in tension on the foreign exchange markets and to weaker inflationary pressure.

Where price development measured by the implicit GDP deflator is concerned, prices showed a slight inflationary trend over the quarter (+0.8%), while the annual rate continued to fall (+3.0%). This favourable price trend was doubtless influenced by the weakness of domestic demand, as a result of which inflation continued to fall even in countries which had devalued their currency.

With regard to the components of GDP, it should be stressed that the fourth consecutive fall in investment was also the most pronounced (-2.4%). Both private and public consumption also contracted (-0.8% and -0.6% respectively).

In the Member States, the negative trend gained pace in the Netherlands (GDP -0.5%), in France (GDP -0.7%), in Denmark (GDP -1.6%) and especially in Germany (GDP -2.3%). In Italy, the recession which has persisted over the last three quarters seems to be easing (GDP -0.1%). By contrast, the only country showing a positive, albeit modest, upturn is the United Kingdom (GDP +0.4%). As for inflation, the rate fell sharply in Italy (+0.7%) and particularly so in Germany (+0.2%). On the other hand, increases were evident in France (+1.1%), in the United Kingdom and in Denmark (+1.2% and 1.3% respectively), particularly considering that these two Member States had enjoyed quite substantial deflation in the fourth quarter of 1992. In France and the Netherlands, for which preliminary data are available for the second quarter of 1993, production is stagnant (GDP -0.0% and +0.0% respectively).

The United States, for which the data are available for the second quarter of 1993, saw some slight recovery in economic growth (GDP +0.4%) accompanied by a slight dip in both quarterly and annual inflation (+0.6% and +2.5% respectively). Of the components of GDP, investment continues to show a rising trend (+1.7%) and private consumption is recovering (+0.9%).

Japan, for which the data are available for the second quarter of 1993, is still going through a period of uncertainty characterised by a further fall in production (GDP -0.5%), accompanied by a marked rise in quarterly inflation, although the annual rate is down (+0.7%). Of the components of GDP, private consumption (-0.6%) and investment (-0.3%) are falling.

PRICES: EC annual inflation unchanged at 3.5% in August

The inflation rate for the Community as a whole as measured by the CPI remained unchanged from July to August at a level of 3.5%. A year ago the rate was 4.0%.

The August figure confirms the near stability of the inflation rate for the Community e.g. from November 1992 to August 1993 the rate has remained throughout between 3.7% and 3.4%.

At present annual inflation rates are higher than a year ago in 4 out of the 12 Member States: Belgium (3.2% against 2.1%), Germany* (4.2% against 3.5%), France (2.2% against 2.0%) and Luxembourg (3.7% against 3.1%), whilst they are lower in all the other Member States, and considerably lower in some of them: Netherlands 1.9% against 3.6%, United Kingdom 1.7% against 3.6%, Portugal 5.6% against 9.3%.

From July to August the monthly index for EUR 12 rose by 0.2% the same rate as the month before.

Low to moderate rises were recorded in Italy (0.1%), Denmark (0.2%), Luxembourg (0.3%), and Belgium, Greece, Netherlands, United Kingdom and Portugal (all 0.4%), whereas Spain had a somewhat higher increase in August (0.6%).

The quarterly index for Ireland for mid-August was not available at the closing date of this bulletin and will be published in the next issue.

In order of increasing current inflation the rates for the Member States are as follows: (August 1993 compared with August 1992 and August 1992 compared with August 1991)

	AUG. '93	AUG. '92		AUG. '93	AUG. '92
	AUG. '92	AUG. '91		AUG. '92	AUG. '91
Ireland**	0.9%	3.6%	Luxembourg	3.7%	3.1%
Denmark	1.2%	2.1%	Germany*	4.2%	3.5%
United Kingdom	1.7%	3.6%	Spain	4.6%	5.7%
Netherlands	1.9%	3.6%	Italy	4.9% ^p	5.1%
France	2.2% ^p	2.0%	Portugal	5.6%	9.3%
Belgium	3.2%	2.1%	Greece	14.6%	15.3%

* The CPI for the Federal Republic of Germany continues to reflect borders prior to 3 October 1990.

** May figures

^p = provisional

The corresponding data for the applicant Member States are - also in ascending order of current inflation - as follows: Finland 2.1% (2.3%), Norway 2.2% (2.3%), Austria 3.4% (3.8%) and Sweden 5.2% (2.0%).

August inflation rates for the United States and Japan were 2.8% (3.1%) and 2.1% (1.7%) respectively.

INDUSTRIAL PRODUCTION Still no sign of recovery

Production in European industry is still falling, with no signs of levelling off. Particularly production of capital goods, which should provide momentum for the next upturn, is declining notably.

The rate of change of the production index adjusted for the number of working days for the European Community (EUR 12) was -4.1% in June 1993 and -4.2% in May 1993 compared with the same months in 1992. The corresponding figures for West Germany are -8.0% in June and -9.4% in May.

The figures for the most recent three-month period, i.e. April to June 1993, show a rate of change in the seasonally-adjusted production index for EUR 12 which is 0.7% down on the previous three months (January to March).

The picture is as follows for the major goods categories (change in the last three months compared with the previous three months):

- Intermediate goods:	EUR 12	-1.3%	USA	+0.6%
- Capital goods:	EUR 12	-1.6%	USA	+1.1%
- Consumer goods:	EUR 12	-0.6%	USA	-0.4%

Production in construction (NACE 5) in the European Community saw a slight recovery: whilst the rate of change in the first quarter of 1993 compared with the last quarter in 1992 was -2%, the (estimated) rate for the second quarter of 1993 compared with the first quarter is +0.5%.

The rate of change in seasonally-adjusted industrial production for the individual Community Member States in the last three months compared with the previous three months is as follows: Greece +3.1%, Luxembourg +2.1% [estimated], Belgium +1.4% [estimated], Ireland +1.3% [estimated], United Kingdom +0.8%, Italy -0.5%, Germany (West) -0.9%, Spain -0.9% [estimated], France -1.1%, Netherlands -1.2%, Portugal -2.2% [estimated], Denmark -3.0%. Thus production in the summer months is falling in many Member States or showing only very slight positive rates of change. The United Kingdom is the only major Member State to show signs of a substantial upturn.

Production fell in the following individual sectors of EC industry: manufacture of metal articles (NACE 31), food, drink and tobacco (NACE 41/42), textile industry (NACE 43) and footwear and clothing (NACE 45). There was a slight recovery in production and preliminary processing of metals (NACE 22), manufacture of non-metallic mineral products (NACE 24) and chemical industry (NACE 25). Production also ceased to decline in the motor vehicle manufacturing sector (NACE 35).

BALANCE OF PAYMENTS – world trends – preliminary figures for the first quarter of 1993:

Following the introduction of Intrastat, a new system for collecting statistics on intra-Community trade, there have been major delays in collecting data. Consequently, it has not been possible to update the balance of payments figures for the first quarter of 1993. These figures therefore bear a close resemblance to those published in the previous issue, apart from one or two revisions made by the countries themselves. To date (29 September 1993), we have the figures for the United States, Japan, Denmark, Germany and the United Kingdom, and some of the figures for the Netherlands and Greece. These figures are given for information only. It is impossible to make estimates for the EUR12 total for the first quarter of 1993.

EXTRA-COMMUNITY TRADE

In the first quarter of 1993, Community external trade showed a deficit of ECU 12.6 bn, an improvement of ECU 7.3 bn on the first quarter of 1992. The recovery was due to a fall of 4.8% in imports from outside the Community and a slight rise in exports (1.3%). The gap between the export and import rates widened from 2 points in January-March 1992 to 6 points for the same period in 1993.

The United States recorded a trade deficit of ECU 22.1 bn for the first three months of 1993, a deterioration of ECU 8 bn on the first quarter of 1992. US imports were up 16.4% in ecus and 10% in dollars. US exports showed slower growth: 8.5% in terms of ecus and 2.4% in terms of dollars.

Japan's trade surplus was close to ECU 25 bn in the first quarter of 1993, as against ECU 20 bn for the first three months of 1992. Japanese exports were up 10.4% in ecus and 4% in dollars, but were stagnant in yen. Japanese imports rose by 5.7% in ecus between the first quarter of 1992 and 1993; they held stable in dollars but fell by 3.4% in yen.

In the first quarter of 1993, German trade outside the Community showed a surplus of ECU 4.1 bn, compared with ECU 0.6 bn in January-March 1992. Denmark recorded a surplus of ECU 0.6 bn in its extra-Community trade for the first three months of 1993. Ireland's extra-Community trade was in balance. Italy, Portugal, Greece and the BLEU had slight deficits (of ECU 0.3, 0.6, 0.8 and 0.8 bn respectively). Italy and the BLEU showed improvements of ECU 1.8 bn and 1.3 bn on the first quarter of 1992. Spain halved its deficit of January-March 1992 to ECU 1.6 bn. France's extra-Community deficit grew by ECU 2.2 bn to ECU 3.3 bn in the first quarter of 1993. The Netherlands saw its deficit fall by 1.1 bn year on year to ECU 3.9 bn in January-March 1993. The United Kingdom recorded the greatest deficit in the first quarter of 1993 (ECU 6 bn).

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Elles sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

De plus amples informations concernant *Eurostatistiques* peuvent être obtenues aux adresses suivantes :

TAUX DE CHANGE: ACCALMIE SUR LES MARCHÉS DES CHANGES

Relativement peu de mouvement sur les devises européennes entre elles au cours de la période qui a suivi l'introduction des larges marges de fluctuation à la fin de juillet: la dépréciation moyenne contre le deutsche mark de l'ancien «noyau dur» de monnaies (franc français et franc belgo-luxembourgeois, couronne danoise et florin néerlandais) a été environ de 2,3 % entre la fin de juillet et le 24 septembre. Cependant, ce chiffre exclut le florin qui est resté plus ou moins inchangé contre le mark au cours de cette période.

Cette dépréciation relativement faible s'explique par le fait que les États membres CE n'ont pas réduit leur taux d'intérêt aussi rapidement que l'avaient espéré les marchés. La banque centrale de Belgique les a même relevés à court terme d'abord à la mi-août puis au début de septembre pour protéger le franc d'un nouveau glissement; le taux de la Banque nationale de Belgique sur les avances bancaires au-dessus du plafond a atteint 13 % alors qu'elle a dû faire pression fin juillet et de nouveau 14 % le 2 septembre.

Cependant, la décision de la Bundesbank du 9 septembre de réduire son taux d'escompte et son taux Lombard d'un demi-point à 6,25 et 7,25 respectivement a permis une nouvelle baisse des taux d'intérêt dans les pays européens: dans les jours suivants, les taux ont baissé en Belgique, France, Italie, Danemark, Pays-Bas et Autriche. Mais en Belgique et au Danemark, les taux sont demeurés à des niveaux supérieurs à ceux précédant l'élargissement des marges de fluctuation du MCE, et en France, le taux d'adjudication de la Banque de France qui indique le plancher pour les taux du marché monétaire, est resté inchangé depuis le 2 juillet.

Le calme sur les marchés des changes européens s'explique par la récente fermeté du dollar US consécutive à l'agitation politique en Russie: le dollar continue d'être perçu comme une «valeur refuge» en période d'incertitude. Après avoir constamment perdu du terrain contre le DM en août et au cours des deux premières semaines de septembre, le dollar a regagné près de 6 pfennigs (environ 4 %) entre le 15 et le 24 septembre. Lorsque les opérateurs ont compris que les problèmes de la Russie étaient moins sérieux au niveau international qu'ils ne l'avaient pensé précédemment, le dollar a repris le chemin de la baisse sous l'influence négative de deux éléments: la crainte de voir l'économie s'affaiblir et une nouvelle réduction possible des taux d'intérêt US.

Cependant, contre le yen, le dollar a conservé l'avance qu'il avait acquise à la suite de l'intervention de la réserve fédérale à la mi-août. Le 29 septembre, il se situait juste au-dessus des 105 yens et s'éloignait du 100 yens qu'il avait atteint. Ceci est un exemple d'intervention réussie sur le marché des changes alors que dans de nombreuses occasions, une telle intervention est vouée à l'échec en raison de la dimension colossale de l'ensemble des marchés des changes comparée aux ressources limitées des banques centrales.

Après une dévaluation de 3 % le 8 juillet, le florin hongrois qui est lié à un panier de monnaies constitué à parts égales de l'Ecu et du dollar US, a subi une nouvelle dévaluation de 4,5 % le 29 septembre. Le florin accuse actuellement une baisse d'environ 15 % par rapport à sa valeur d'il y a un an. La banque centrale hongroise a déjà relevé son principal taux d'intérêt de 3 % la semaine dernière: il se situe maintenant à 22 %.

RENDEMENT DES OBLIGATIONS D'ÉTAT: rendement en baisse ou constant dans tous les pays examinés

Les rendements des obligations d'État ont soit baissé ou sont restés constants dans tous les pays examinés pour lesquels on dispose de données pour le mois d'août. La plus forte baisse a eu lieu en Espagne (-0,8 %) et au RU (-0,6 %). Dans six sur onze pays CE pour lesquels on dispose de données sur les rendements des obligations d'État, les taux pratiqués sont maintenant inférieurs à 7 %.

Les chutes des rendements ont été assez sérieuses au cours des huit premiers mois de 1993: le rendement moyen des obligations publiques dans la CE est tombé de 9,2 % en décembre 1992 à 7,2 % en août 1993. Comme on pouvait s'y attendre, les taux se sont plus réduits en valeur absolue dans les pays où ils étaient les plus élevés, c'est-à-dire en Italie et en Espagne.

Pour de nombreux pays, les rendements des obligations publiques se trouvent actuellement tout près sinon à leurs plus bas historiques.

La récente chute des rendements des titres de rentes américains qui ont perdu 1,1 % au cours des premiers huit mois de 1993, s'est poursuivie début septembre lorsque la rente à 30 ans qui est considérée comme le taux de référence pour les titres d'État US, s'est traitée à des taux légèrement inférieurs à 6 % pour la première fois en seize ans d'existence du titre. Les chutes des rendements des titres d'État américains sont dues à la faiblesse du taux de croissance de l'économie, ce qui a conduit à une révision à la baisse des pronostics sur l'inflation.

MASSE MONÉTAIRE: croissance de M3 en France inférieure à la fourchette prévue

Le taux de croissance de M3 en France a été de 3,3 % au cours des douze mois de juin à juin, c'est-à-dire légèrement au-dessous de la fourchette fixée pour 1993 de 4 à 6,5 %. C'est le troisième mois consécutif de ralentissement de la croissance et le signe d'un état déprimé de l'économie française. Toutefois, cette fourchette avait été fixée lorsque les prévisions de croissance française étaient supérieures aux actuelles projections.

La croissance monétaire continue de se ralentir également au Portugal et en Grèce. Au Portugal, L- a eu un taux de croissance annualisé inférieure à 10 % pour les trois derniers mois, et en Grèce, M3 continue de croître à un rythme nettement inférieur à la fourchette prévue de 9 à 12 % et se maintient tout juste au niveau de 4 % l'an à juillet.

En revanche, la croissance monétaire aux Pays-Bas et en Italie s'est accélérée au cours des derniers mois, la croissance de M2 en Italie atteignant le niveau supérieur de la fourchette de 5 à 7 %.

En dehors de la CE, la croissance de M2 au Japon a été négative au cours de huit mois sur neuf jusqu'en mai 1993, et bien que la croissance de M2 aux États-Unis continue de se ralentir, elle a dépassé 1 % en mai pour la première fois depuis janvier de cette année.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: rentrées de réserves

Il y a eu rentrées de réserves en juillet dans tous les pays examinés pour lesquels des données étaient disponibles pour ce mois. Les plus fortes rentrées ont eu lieu au Danemark

qui a levé des devises étrangères en émettant plusieurs euro-obligations en juillet. La Grèce, l'Irlande et les Pays-Bas ont également connu de fortes rentrées.

D'une certaine manière, ces rentrées sont assez surprenantes étant donné qu'au cours de la période considérée, les monnaies de plusieurs pays examinés ont été sérieusement attaquées sur les marchés des changes. Cependant, dans le cas du Danemark, ces sorties ont été apparemment compensées par des rentrées résultant de l'émission de titres. Bien que l'on ne dispose actuellement d'aucune donnée concrète pour la France pour juillet, les prévisions indiquent que la position nette de la France en matière de réserves sur l'étranger est en fait négative à la fin de juillet, à la suite de l'intervention de la Banque de France pour essayer d'endiguer les sorties de francs français.

COMPTES TRIMESTRIELS: Au cours du premier trimestre 1993: fléchissement de la croissance économique (PIB -0,9 %); reprise de l'inflation (+0,8 %).

Le premier trimestre 1993 a été caractérisé, pour l'économie communautaire dans son ensemble, par un nouveau fléchissement de la croissance économique (PIB -0,9 %). Ce résultat, d'ailleurs en ligne avec les prévisions macro-économiques pour l'année 1993, indique comment au cours de l'année la situation économique devrait se présenter avec des caractéristiques encore moins favorables qu'en 1992. Selon la plupart des économistes, il est très difficile d'identifier des signaux de reprise à court terme pour l'économie communautaire. D'autre part, des signaux de reprise, même si assez faibles et parfois contradictoires viennent de l'économie américaine. La vraie inconnue de cette phase est représentée par la capacité des économies communautaires, étant donné leurs problèmes internes, de profiter de cette nouvelle phase économique aux États-Unis. Comme souligné dans la dernière réunion du G7 la reprise de l'économie mondiale est liée à trois facteurs principaux: la reprise du commerce extérieur strictement liée au développement positif des négociés GATT; la reprise de la demande interne, surtout des biens de consommation finale; la réduction du déficit primaire public dans tous les pays. A ces conditions il faut rajouter, pour la Communauté, une réduction des tensions monétaires qui ont créé des gros problèmes à la stabilité du système monétaire. Dans le but de favoriser une certaine reprise de la demande interne, dans la première partie de l'année en cours, grâce d'un côté à une réduction de tension sur le marché des changes, et de l'autre côté à une plus faible pression inflationniste, les taux d'intérêt ont commencé lentement à descendre.

En ce qui concerne l'évolution des prix, mesurée par le déflateur implicite du PIB, on enregistre une légère reprise de l'inflation en rythme trimestriel (+0,8 %), tandis qu'en rythme annuel on constate la poursuite de la baisse (+3,0 %). Cette évolution favorable des prix a été sans doute influencée par la faiblesse de la demande interne grâce à laquelle, même dans les pays où il y a eu une dévaluation des devises, l'inflation a continué à baisser.

En ce qui concerne les composantes du PIB, il faut souligner le quatrième fléchissement consécutif des investissements qui d'ailleurs est le plus remarquable (-2,4 %). La consommation, tant privée que publique, présente aussi une évolution négative (-0,8 % et -0,6 % respectivement).

En ce qui concerne la situation dans les États membres, on constate une accentuation de la phase négative aux Pays-Bas (PIB -0,5 %), en France (PIB -0,7 %), au Danemark (PIB -1,6 %) et surtout en Allemagne (PIB 2,3 %). En Italie la phase de récession qui continue depuis trois trimestres semble ralentir (PIB -0,1 %). Par contre le seul pays où l'on constate une évolution positive, même avec un rythme modéré, est le Royaume-Uni (PIB +0,4 %). En ce qui concerne l'inflation, on constate une sensible réduction en Italie (+0,7 %) et surtout en Allemagne (+0,2 %). Par contre une reprise se vérifie en France (+1,1 %) ainsi qu'au Royaume-Uni et au Danemark (+1,2 % et +1,3 % respectivement) surtout si l'on considère qu'au cours du quatrième trimestre 1992 dans ces deux États membres on avait enregistré une déflation assez importante. Pour la France et les Pays-Bas, dont on dispose des données préliminaires pour le deuxième trimestre 1993, on observe une stagnation de la production (PIB -0,0 % et +0,0 % respectivement).

Aux États-Unis, dont on dispose des données pour le deuxième trimestre 1993, on constate une légère reprise de la croissance économique (PIB +0,4 %) accompagnée par une légère baisse de l'inflation, tant en rythme trimestriel qu'annuel (+0,6 % et +2,5 % respectivement). Parmi les composantes du PIB, on constate la poursuite de l'évolution positive des investissements (+1,7 %) ainsi que la reprise de la consommation privée (+0,9 %).

Pour le Japon, dont on dispose des données pour le deuxième trimestre 1993, on constate la poursuite de la phase d'incertitude caractérisée par une nouvelle baisse de la production (PIB -0,5 %) accompagnée par une considérable reprise de l'inflation trimestrielle, tandis qu'en rythme annuel on observe une réduction (+0,7 %). Parmi les composantes du PIB, on constate le fléchissement de la consommation privée (-0,6 %) et des investissements (-0,3 %).

PRIX: L'inflation annuelle de la CE se maintient à 3,5 % en août

Le taux d'inflation pour l'ensemble de la Communauté mesuré par l'IPC est resté inchangé au niveau de 3,5 % entre juillet et août. Il y a un an ce taux était de 4,0 %.

Les données pour le mois d'août confirment la quasi-stabilité de l'inflation dans la Communauté; par exemple, entre novembre 1992 et août 1993, le taux a toujours varié entre 3,7 % et 3,4 %.

Actuellement, les taux d'inflation annuels sont supérieurs à ceux d'il y a un an dans 4 des 12 États membres: Belgique (3,2 % contre 2,1 %), Allemagne* (4,2 % contre 3,5 %), France (2,2 % contre 2,0 %) et Luxembourg (3,7 % contre 3,1 %). Dans tous les autres États membres, l'inflation est à présent en-dessous du niveau de la période correspondante de l'année passée; dans certains États membres ce taux est même considérablement plus bas: les Pays-Bas (1,9 % contre 3,6 %), le Royaume-Uni (1,7 % contre 3,6 %) et le Portugal (5,6 % contre 9,3 %).

L'indice mensuel pour EUR 12 entre juillet et août a augmenté de 0,2 % (même taux que le mois précédent). Des hausses faibles à modérées ont été enregistrées en Italie (0,1 %), au Danemark (0,2 %), au Luxembourg (0,3 %) ainsi qu'en Belgique, en Grèce, aux Pays-Bas, au Royaume-Uni et au Portugal (tous 0,4 %); seule l'Espagne affichait une hausse plus importante en août (0,6 %).

L'indice trimestriel de l'Irlande pour mi-août n'était pas disponible à la fin de la rédaction de ce bulletin; il sera publié dans le prochain numéro.

Dans l'ordre croissant de l'inflation actuelle, les taux sur les 12 derniers mois et ceux de la période correspondante de l'année précédente sont les suivants:

	AOUT '93	AOUT '92	AOUT '91		AOUT '93	AOUT '92	AOUT '91
Irlande**	0,9 %	3,6 %		Luxembourg	3,7 %	3,1 %	
Danemark	1,2 %	2,1 %		R.F. d'Allemagne*	4,2 %	3,5 %	
Royaume-Uni	1,7 %	3,6 %		Espagne	4,6 %	5,7 %	
Pays-Bas	1,9 %	3,6 %		Italie	4,9 % ^p	5,1 %	
France	2,2 % ^p	2,0 %		Portugal	5,6 %	9,3 %	
Belgique	3,2 %	2,1 %		Grèce	14,6 %	15,3 %	

* L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale avant le 3 octobre 1990.

** Chiffres pour mai.
p = provisoire.

Les taux pour les Etats candidats à l'adhésion à la CE — également dans l'ordre croissant de l'inflation actuelle — sont: Finlande 2,1 % (2,3 %), Norvège 2,2 % (2,3 %), Autriche 3,4 % (3,8 %) et Suède 5,2 % (2,0 %).

Les Etats-Unis et le Japon ont enregistré une inflation respectivement de 2,8 % (3,1 %) et 2,1 % (1,7 %).

PRODUCTION INDUSTRIELLE: Toujours aucune reprise en vue

Dans le secteur industriel européen, la production continue de baisser et aucune stabilisation n'est en vue. En particulier, la production des biens d'investissement, qui devrait être le véritable moteur de la prochaine reprise, enregistre une baisse sensible.

Pour la Communauté européenne (EUR 12) et par rapport à la valeur du mois correspondant de l'année précédente, le taux de variation de l'indice de la production industrielle corrigé du nombre de jours ouvrables est de -4,1 % en juin 1993 et de -4,2 % en mai. Pour l'Allemagne de l'Ouest, les taux de variation correspondants sont de -8,0 % en juin et de -9,4 % en mai.

En considérant les chiffres des trois derniers mois disponibles (avril, mai, juin 1993), on constate que, pour EUR 12, le taux de variation de l'indice de production corrigé des variations saisonnières est de -0,7 % par rapport aux trois mois précédents (janvier, février, mars).

En ce qui concerne les grandes catégories de marchandises, on obtient les pourcentages suivants (variation des trois derniers mois par rapport aux trois mois précédents):

- Biens intermédiaires:	EUR 12	-1,3 %	USA	+0,6 %
- Biens d'investissement:	EUR 12	-1,6 %	USA	+1,1 %
- Biens de consommation:	EUR 12	-0,6 %	USA	-0,4 %

Au sein de la Communauté européenne, l'industrie du bâtiment (NACE 5) semble peut-être amorcer une légère reprise: alors qu'au premier trimestre 1993, le taux de variation était de -2 % par rapport au dernier trimestre de l'année précédente, le taux de variation, pour le deuxième trimestre, est estimé à 0,5 % par rapport aux trois mois précédents (janvier, février, mars).

Dans les différents Etats membres de la Communauté européenne, les taux de variation corrigés des variations saisonnières de la production industrielle des trois derniers mois par rapport aux mois précédents, sont les suivants: Grèce +3,1 %, Luxembourg +2,1 % [estimation], Belgique +1,4 % [estimation], Irlande +1,3 % [estimation], Royaume-Uni +0,8 %, Italie -0,5 %, Allemagne (de l'Ouest) -0,9 %, Espagne -0,9 % [estimation], France -1,1 %, Pays-Bas -1,2 %, Portugal -2,2 % [estimation], Danemark -3,0 %. On constate donc que dans de nombreux Etats membres, la production a également baissé au cours des mois d'été ou elle s'est maintenue à des taux de variation positifs faibles. Parmi les grands Etats membres de la Communauté européenne, seul le Royaume-Uni affiche une reprise soutenue.

Dans les différentes branches économiques de l'industrie communautaire, la production a baissé dans le secteur de la fabrication d'ouvrages en métaux (NACE 31), dans l'industrie des produits alimentaires, des boissons et du tabac (NACE 41/42), dans l'industrie textile (NACE 43), dans l'industrie des chaussures et de l'habillement (NACE 45). La production et première transformation des métaux (NACE 22), l'industrie des produits minéraux non métalliques (NACE 24) et l'industrie chimique (NACE 25) enregistrent une légère reprise. Dans le secteur de la construction d'automobiles et pièces détachées (NACE 35), la production, sans toutefois reprendre, ne baisse plus.

BALANCE DES PAIEMENTS — tendances mondiales — chiffres préliminaires pour le premier trimestre de 1993:

Suite à la mise en place d'Intrasat, nouveau système de collecte des statistiques des échanges de biens intra-communautaires, des retards importants sont apparus dans la collecte des données. En conséquence, les chiffres de la balance des paiements n'ont pas pu être mis à jour pour le premier trimestre 1993.

Ces chiffres sont donc semblables à ceux publiés dans le précédent numéro exceptées quelques révisions effectuées par les pays eux-mêmes. A ce jour, 29 septembre 1993, nous disposons des chiffres des Etats-Unis, du Japon, du Danemark, de l'Allemagne, du Royaume-Uni et partiellement des Pays-bas et de la Grèce. Ces chiffres sont donnés à titre d'information. Il est impossible d'établir des estimations concernant le total Europe-12 pour le premier trimestre de 1993.

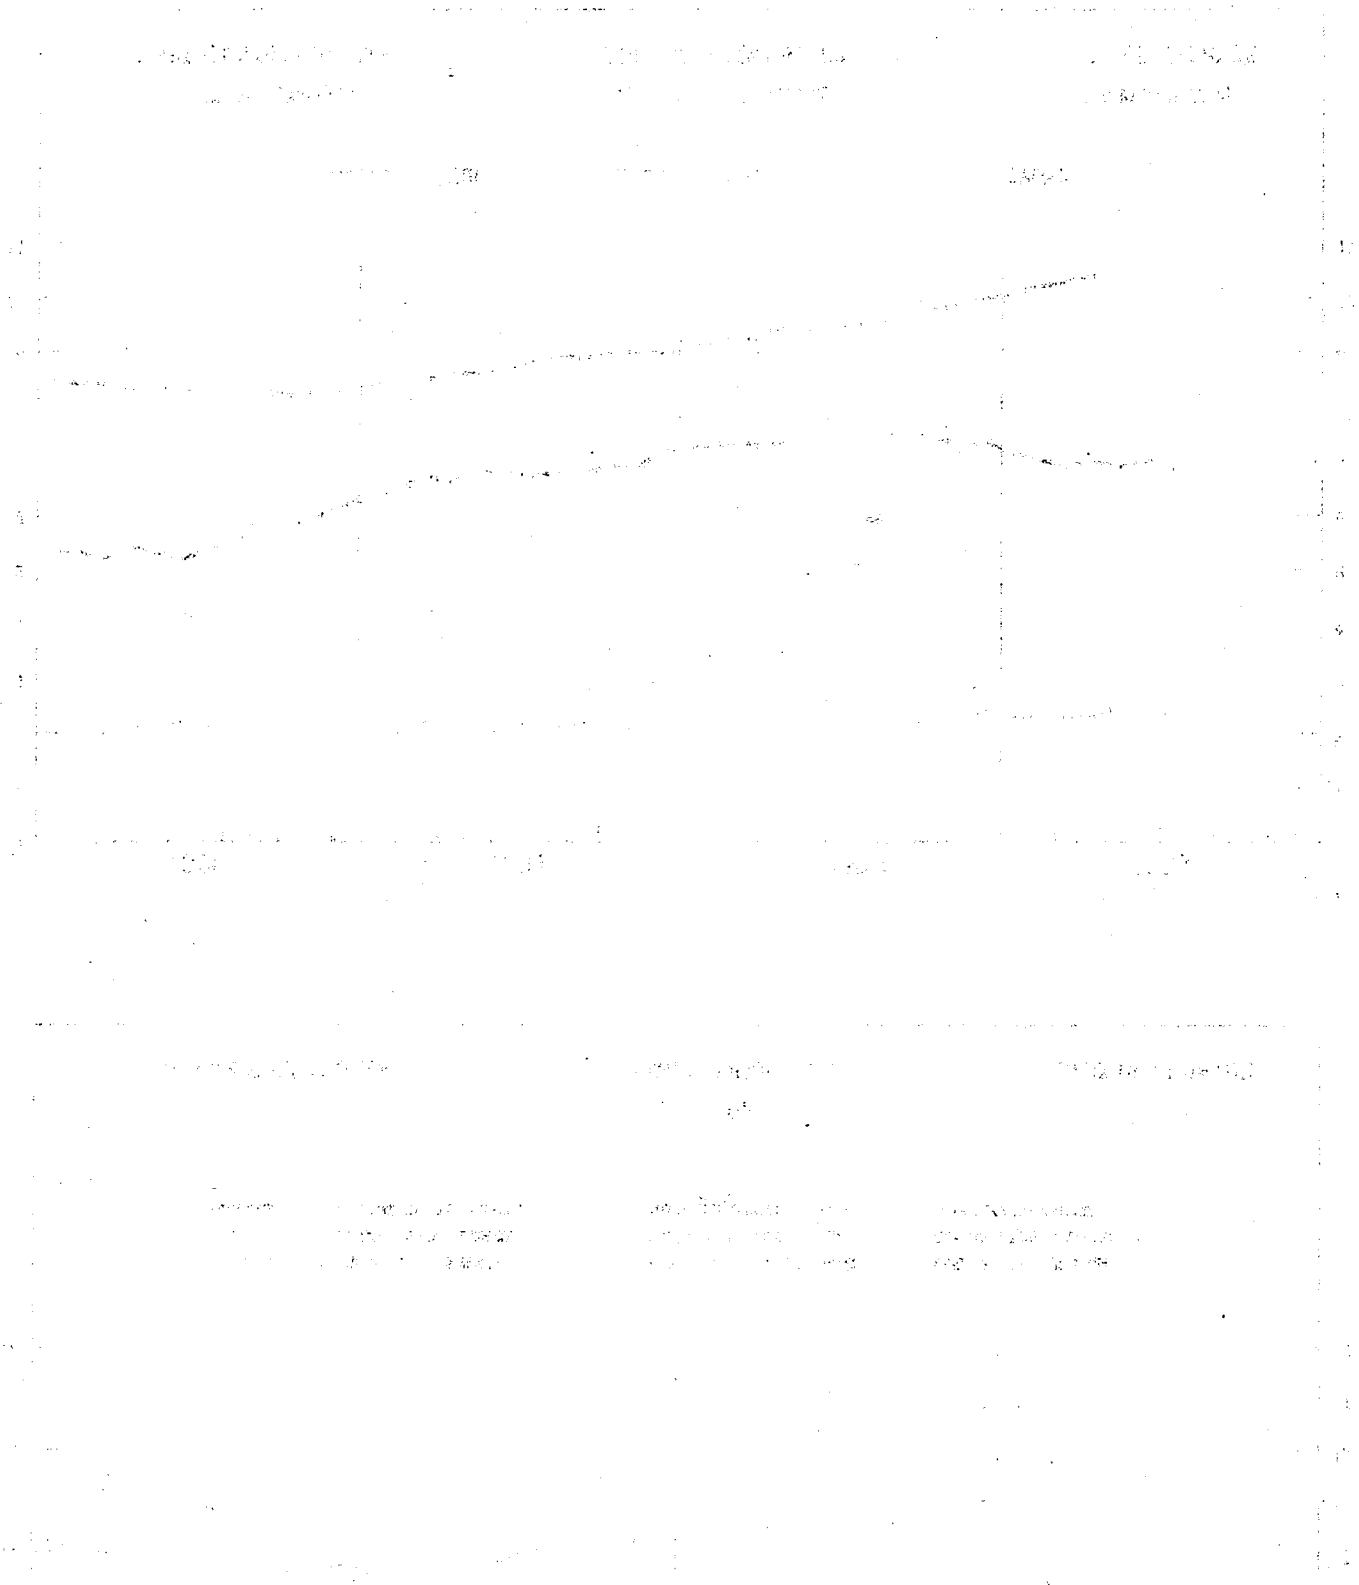

COMMERCE EXTERIEUR

Au premier trimestre 1993 les échanges extra-communautaires affichent un déficit de 12,6 Mrds d'écus, allégé de 7,3 Mrds par rapport au premier trimestre 1992. Cette amélioration est liée au repli des importations extra-communautaires: -4,8 %, alors que les exportations progressent faiblement (1,3 %). L'écart entre taux d'évolution des exportations et des importations passe de 2 points en janvier-mars 1992 à 6 points pour la même période de 1993.

Les Etats-Unis présentent un bilan commercial déficitaire de 22,1 Mrds d'écus pour les trois premiers mois de 1993, soit une dégradation de 8 Mrds d'écus par rapport aux résultats du premier trimestre 1992. Les importations des Etats-Unis progressent de 16,4 % en écus, de 10 % en dollars. Les flux exportés des Etats-Unis sont en augmentation moins rapide: 8,5 % en écus, et 2,4 % en dollars.

L'excédent commercial japonais approche 25 Mrds d'écus au premier trimestre 1993, contre 20 Mrds pour les trois premiers mois de 1992. Les exportations du Japon croissent de 10,4 % en écus, de 4 % en dollars, mais stagnent en terme de yens. Les importations du Japon sont en progrès de 5,7 % en écus entre le premier trimestre 1992 et 1993; elles restent stables en dollars, mais baissent de 3,4 % en yens.

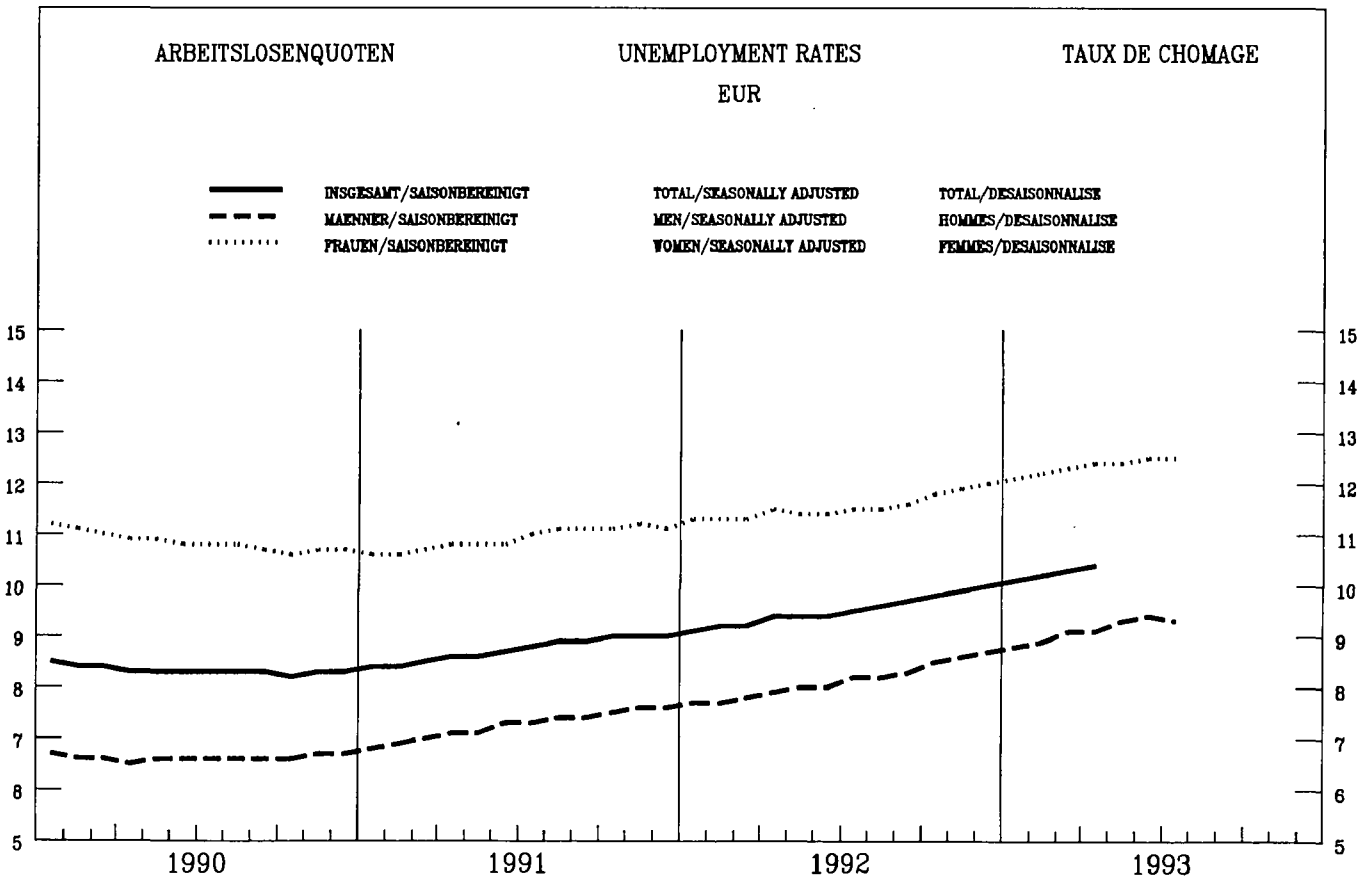

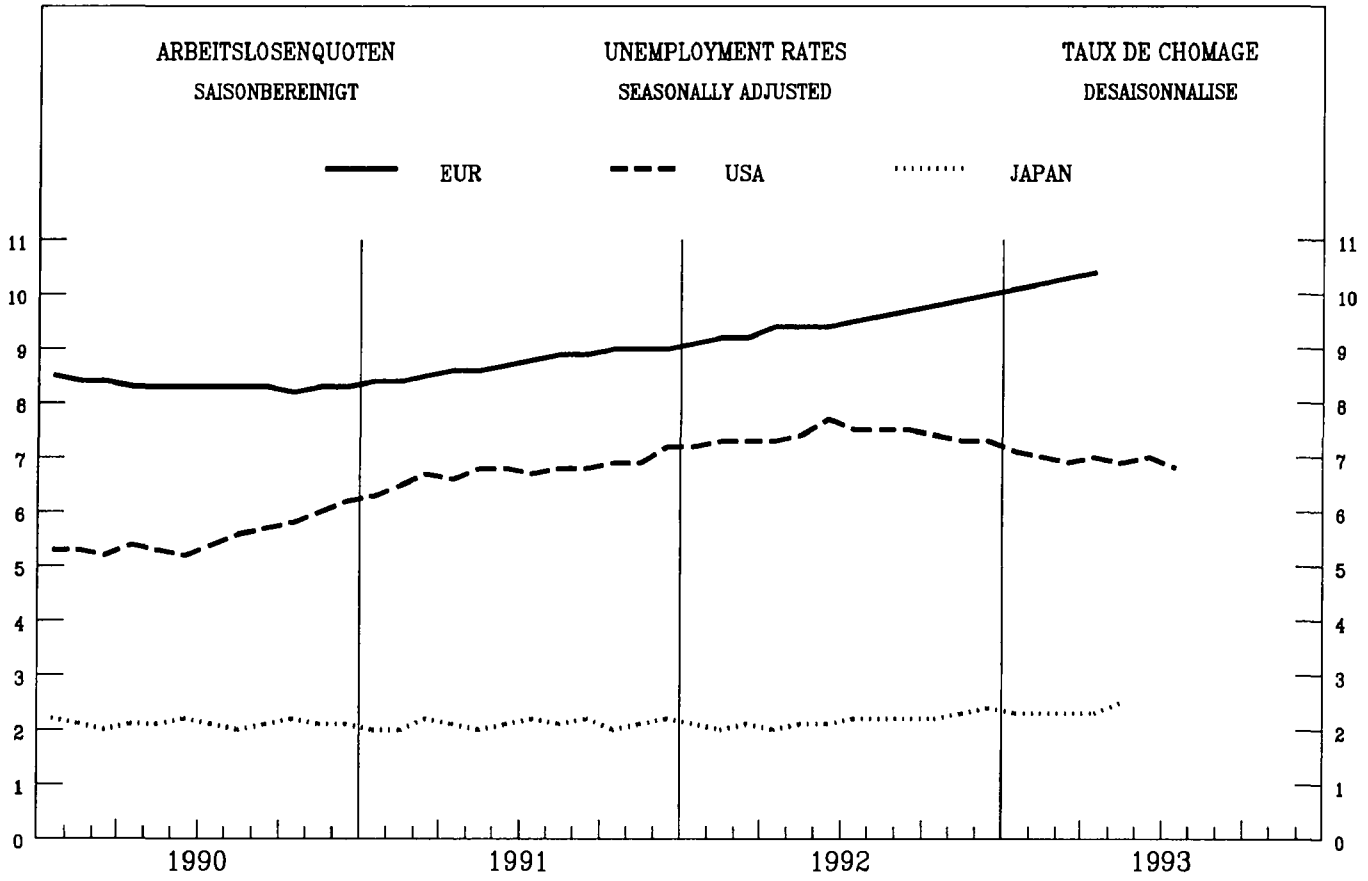

Au premier trimestre 1993 les échanges extra communautaires de l'Allemagne sont excédentaires de 4,1 Mrds d'écus, contre 0,6 Mrd d'écus en janvier-mars 1992. Le Danemark dégage un solde positif de 0,6 Mrd d'écus pour le commerce extra des trois premiers mois de 1993. Les échanges extra de l'Irlande sont équilibrés. Les bilans de l'Italie, du Portugal, de la Grèce et de l'UEBL sont faiblement déficitaires (respectivement de 0,3, 0,6, 0,8, 0,8 Mrd d'écus). Les soldes de l'Italie et de l'UEBL s'améliorent de 1,8 Mrd d'écus et 1,3 Mrd d'écus par rapport au premier trimestre 1992. Le déficit de l'Espagne, réduit de moitié par rapport à janvier-mars 1992, atteint 1,6 Mrd d'écus. Le bilan déficitaire des échanges extra français se creuse de 2,2 Mrds d'écus; il est de 3,3 Mrds d'écus au premier trimestre 1993. Le commerce extra des Pays-Bas affiche un solde négatif en janvier-mars 1993 (-3,9 Mrds d'écus), allégé de 1,1 Mrd comparé à la même période de 1992. Les échanges du Royaume-Uni sont les plus fortement déficitaires au premier trimestre 1991 (-6 Mrds d'écus).

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Code gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 28 UK 28 IRL 30 DK 32 E 34 GR 38 P 42 USA 46 JAP	93	Variablen Tabellen XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Code 14 93 0304 8 einzugeben.

'On-line' consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sektor XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 38 P 42 USA 46 JAP	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 38 P 42 USA 46 JAP	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
