Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat. Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3<sup>a</sup> pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat. Encomendas: serviços de venda cujos endereços estão indicados na contracapa.

*Printed in Germany*

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

*Eurostatistik* enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

Soweit nicht anders angegeben, beziehen sich die Angaben auf den Gebietsstand der Bundesrepublik Deutschland vor dem 3. 10. 1990; sie schließen Berlin (West) ein.

### WECHSELKURSE: Dollarschwäche hält an

Nachdem er sich während des Sommers meist um die 1,55 DM-Marke bewegt hatte, gab der Kurs des US-Dollar Ende September und Anfang Oktober wieder nach und sank am 25. Oktober auf 1,4845 DM, seinen tiefsten Stand seit 2 Jahren. Auch an den folgenden Tagen blieb er unter 1,50 DM. Der US-Diskontsatz liegt 0,5 % über dem deutschen, doch sind langfristige Anleiherenditen in den Vereinigten Staaten nun höher als in Deutschland.

Der Dollar fiel auch gegenüber dem japanischen Yen und schloß am 25. Oktober mit 96,35 Yen, einem weiteren Nachkriegstiefstand nach den historischen Tiefs des Sommers.

Portugal ist einer der wenigen EU-Mitgliedstaaten, in denen sich die Leitzinssätze der Notenbank in den vergangenen Wochen verändert haben. So hat der Banco de Portugal seinen Satz für die regelmäßige Liquiditätsabschöpfung von 8,75 auf 8,5 % gesenkt. Dieser Schritt hatte keine unmittelbare Auswirkung auf den Escudo, der sich in den vergangenen drei Monaten relativ stabil zeigte.

Die deutschen Zinssätze wurden bei der ersten Sitzung des Zentralbankrates nach den Bundestagswahlen am 27. Oktober nicht verändert. Der Zinssatz der Bundesbank für Wertpapierpensionsgeschäfte liegt seit 27. Juli bei 4,85 %, Diskont- und Lombardsatz betragen 4,5 bzw. 6 %.

Die italienische Lira, die sich von dem Tiefstand Mitte August erholt hatte, gewann im September leicht an Wert. Anfang Oktober jedoch kam es erneut zu einer Abschwächung, so daß die italienische Währung am 25. Oktober mit 1024 LIT für 1 DM gehandelt wurde.

Der Kurs der schwedischen Krone hat in den vergangenen Wochen angezogen. Grund hierfür sind die zunehmende Wahrscheinlichkeit eines positiven Ausgangs des Referendums zum EU-Beitritt und die Ankündigung eines öffentlichen Sparprogramms. Mit der Ankündigung der Riksbank vom 27. Oktober, den Zinssatz für Wertpapierpensionsgeschäfte um 0,2 % auf 7,4 % anzuheben, gab der Kurs der Krone jedoch wieder leicht nach. Mit diesem Schritt sollte dem Inflationsdruck in der schwedischen Wirtschaft entgegengewirkt werden. Die letzte Anhebung der Zinssätze in Schweden war Mitte August erfolgt. Auch die Finnmark festigte sich, nachdem sich die Finnen am 16. Oktober für den EU-Beitritt ausgesprochen hatten.

Der Schweizer Franken, der Mitte September den höchsten Stand gegenüber der D-Mark seit fast drei Jahren erreichte, konnte diesen Stand behaupten und schloß am 27. Oktober mit 0,836 Sfr für 1 DM.

### RENDITEN VON STAATSANLEIHEN: Weiterer Anstieg der Renditen

In allen EU-Mitgliedstaaten setzte sich der bestehende Aufwärtstrend der Renditen von Staatsanleihen im September fort. Den stärksten Anstieg hatte Spanien zu verzeichnen, wo sich die Renditen um 0,6 auf 11 % erhöhten. Damit liegen sie um 3 % höher als zu Jahresbeginn, und dies trotz eines gleichzeitigen Rückgangs der kurzfristigen Leitzinsen um 1,5 %, d. h. daß die Zinsertragskurve eine ziemlich steile positive Steigung aufweist.

In den übrigen EU-Mitgliedstaaten sind die Renditen im September nicht so stark gestiegen wie in Spanien. In Spanien, Italien und Portugal werden nun über 10 % und in Belgien, Irland sowie dem Vereinigten Königreich zwischen 8,5 und 9 % erzielt. Nur in Luxemburg liegen die Renditen von Staatsanleihen unter 7 %. In Deutschland und den Niederlanden sind die Renditen zwar niedriger als in anderen Ländern, doch haben sie sich seit Jahresbeginn um etwa 3 % erhöht.

Auch in den Vereinigten Staaten stiegen die Renditen weiter an und erreichten im September einen Durchschnitt von 7,8 % gegenüber 7,6 % im August und 6,2 % zu Jahresbeginn. Am 24. Oktober überschritt die Rendite von langfristigen Anleihen, die als Bezugsgröße für den Markt für Staatsanleihen in den USA gilt, erstmals seit zweieinhalb Jahren die 8 %-Marke. Im zweiten Halbjahr 1993 hatte sie dagegen bei etwa 5,8 % gelegen. Diese Entwicklung steht sicher im Zusammenhang mit der Sorge an den Kapitalmärkten über eine mögliche Konjunkturüberhitzung und den Anstieg der kurzfristigen Zinssätze in den Vereinigten Staaten.

Da der Anstieg der Renditen in den meisten Ländern nicht mit einer echten Beschleunigung der Inflation einherging, haben sich auch die inflationsbereinigten Renditen von Staatsanleihen in den letzten Monaten erhöht. Im September lagen die realen langfristigen Renditen in allen

EU-Mitgliedstaaten mit Ausnahme Deutschlands, Luxemburgs und der Niederlande bei über 6 % und hatten damit ein historisches Hoch erreicht. In den Vereinigten Staaten und Japan sind die realen Renditen niedriger als in der EU, wobei die realen und die nominalen Renditen in Japan nur wenig voneinander abweichen, da die Preise in Japan derzeit nahezu stabil sind.

### GELDVOLUMEN: Verlangsamung des Geldmengenwachstums in Deutschland

In Deutschland ist für die zwölf Monate bis August 1994 eine M3-Wachstumsrate von knapp über 8 % zu verzeichnen, während die auf Jahresbasis umgerechnete Zuwachsrate in den ersten Monaten des Jahres über 11 % betrug. Damit liegt das M3-Wachstum noch nicht innerhalb des von der Bundesbank für 1994 vorgesehenen Zielkorridors von 4–6 %.

Ansonsten ist weiterhin ein langsames Geldmengenwachstum festzustellen, wobei sich das negative M3-Wachstum in Frankreich fortsetzt und die jährliche M2-Wachstumsrate in den Niederlanden von 7 % im Januar auf knapp über 2 % im August zurückgegangen ist. In Spanien allerdings liegt die ALP-Wachstumsrate für das Jahr bis Juli nur knapp außerhalb des von der spanischen Zentralbank für 1994 vorgegebenen Zielkorridors von 4,5–7,5 %.

### AMTLICHE WÄHRUNGSRESERVEN: Weiterer Anstieg der japanischen Reserven

Die amtlichen Währungsreserven Japans haben sich im Juli und im August weiter erhöht, so daß die japanischen Reserven Ende August einen Umfang von über 98 Milliarden ECU erreichten. Dies sind 11 mehr als zu Jahresbeginn. Dies ist darauf zurückzuführen, daß die japanische Notenbank am Devisenmarkt zur Stützung des Dollar intervenierte, der, wie bereits erwähnt, in diesem Jahr nahezu kontinuierlich gegenüber dem Yen an Wert verlor. Zu diesem Zweck hat die Bank of Japan Yen gegen Dollar verkauft und so ihre Währungsreserven erhöht.

Mit 70 Milliarden ECU haben die Reserven Deutschlands im August etwa den doppelten Umfang der Reserven Spaniens, das in der Reihe der EU-Mitgliedstaaten an zweiter Stelle steht. Allerdings liegen die deutschen Reserven um 20 Milliarden ECU unter dem Niveau vom August 1993, als jedoch die kritische Situation innerhalb des Wechselkursmechanismus zum Tragen kam.

### VIERTELJÄHRICHE GESAMTRECHNUNGEN: Zweites Quartal 1994: Weiterhin positive wirtschaftliche Entwicklung in der Europäischen Union (BIP + 0,9 %)

Im zweiten Quartal 1994 zeigen die ersten verfügbaren Ergebnisse für die Wirtschaft der Europäischen Union insgesamt eine Fortsetzung des realen Wirtschaftswachstums (BIP + 0,9 %). Dieses Ergebnis bedeutet eine Steigerung im ersten Halbjahr gegenüber dem ersten Halbjahr des Vorjahres um 2,2 % und ist damit das positivste Ergebnis seit 1990.

Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so war ein leichter Anstieg der Inflationsrate festzustellen (+0,5 %). Daraufhin haben einige Mitgliedstaaten im August die Zinssätze erhöht.

Bezüglich der Bestandteile des BIP ist der starke Anstieg bei den Investitionen (+1,9 %) und die positive Entwicklung des privaten Verbrauchs (+0,8 %) bei stagnierendem Staatsverbrauch (+0,1 %) hervorzuheben.

Was die Situation in den einzelnen Mitgliedstaaten angeht, so ist eine starke Steigerung des BIP in Italien (+1,4 %), im Vereinigten Königreich (+1,2 %) sowie in Frankreich und in den Niederlanden (+1,0 %) und eine relativ geringe Steigerung in Spanien und Dänemark (jeweils +0,6 %) sowie in Deutschland (+0,5 %) festzustellen.

In den Vereinigten Staaten geht die positive Entwicklung des Wirtschaftswachstums (BIP +0,9 %) mit einer stabilen Inflationsrate (+0,7 %) einher. Bei den Bestandteilen der Inlandsnachfrage ist ein starker Anstieg der Investitionen (+2,1 %) zu erwähnen. Der private Verbrauch verlangsamt seine Entwicklung hingegen merklich (+0,4 %), während der Staatsverbrauch weiterhin rückläufig ist (–0,4 %).

In Japan ist die Produktion wieder rückläufig (-0,4 %), während die Inflationsrate leicht gestiegen ist (+0,4 %). Was die Komponenten der Inlandsnachfrage betrifft, so ist eine leichte Zunahme der Investitionen (+0,6 %) und ein starker Rückgang des privaten Verbrauchs (-0,7 %) festzustellen. Der Staatsverbrauch hingegen weist einen eher schwachen Zuwachs auf (+0,3 %).

#### PREISE: Die Jahresinflation der EU bei 3,0 % im September

Nachdem die Jahresinflation der EU im Juli (revidiert) und August bei 3,1 % verblieb, fiel sie im September auf 3,0 %, den niedrigsten Stand seit siebenundeinhalb Jahren (im März 1987 betrug sie ebenfalls 3,0 %). Im September 1993 belief sie sich auf 3,4 %. Von August auf September stieg der monatliche Index für EUR -12 um 0,3 %. Leichte bis gemässigte Preissteigerungen waren zu verzeichnen in Deutschland (0,1 %), in Portugal und im Vereinigten Königreich (0,2 %), sowie in Frankreich, Italien, Spanien und Luxemburg (0,3 %). Ein bedeutender Anstieg von 0,8 % gab es in den Niederlanden.

Der griechische Index verzeichnete einen scharfen Anstieg um 3,3 %, der sowohl die Preisanpassungen nach dem Auslaufen der starken Reduzierungen während des Sommerschussverkaufs, sowie die zusätzlichen Preiserhöhungen für die neuen Saisonvorräte von Bekleidung und Schuhe (+ 9 %), Haushaltsgüter (+ 8 %) und Freizeitsartikel (+ 9 %) wiedergibt. Schließlich wurde in Belgien ein leichter Preisrückgang festgestellt, teilweise als Ergebnis verbilligter Ferienreisen ins Ausland.

Im aufsteigender Reihenfolge nach der derzeitigen Inflation geordnet sind die Raten wie folgt :

|                | Sept. '94<br>Sept. '93 | Sept. '93<br>Sept. '92 |              | Sept. '94<br>Sept. '93 | Sept. '93<br>Sept. '92 |
|----------------|------------------------|------------------------|--------------|------------------------|------------------------|
| Frankreich     | 1,6 % <sup>P</sup>     | 2,3 %                  | Niederlande  | 2,7 %                  | 2,8 %                  |
| Luxemburg      | 2,2 %                  | 3,7 %                  | Deutschland* | 3,0 %                  | 4,0 %                  |

\*\* August 94/August 93 und August 93/August 92

<sup>P</sup> Vorläufig

<sup>E</sup> Eurostat Schätzung

Die Raten der Beitrittskandidaten sind: Norwegen 1,8 % (2,2 %), Finnland 1,9 % (1,7 %), Schweden 2,5 % (4,2 %) und Österreich (August) 3,2 % (3,4 %).

Die entsprechenden Zahlen für einige weitere Länder : Vereinigte Staaten 3,0 % (2,7 %), Japan 0,1 % (1,5 %), Kanada (August) 0,2 % (1,7 %) und Schweiz 0,6 (3,4 %).

#### INDUSTRIEPRODUKTION: Aufschwung setzt sich fort

Die Industrieproduktion in der Europäischen Gemeinschaft (EU) steigt weiterhin an. Seit einem halben Jahr sind positive Wachstumsraten zu verzeichnen. Allerdings sind die Wachstumsraten eher verhalten.

Die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex der Industrie betrug im Juli 1994 gegenüber dem Wert des gleichen Monats ein Jahr zuvor +5,4 %. Betrachtet man für die EU die Veränderungsrate des saisonbereinigten Produktionsindex der letzten drei verfügbaren Monate Mai bis Juli gegenüber den drei Monaten zuvor, so beläuft sie sich auf +1,8 %.

In den USA beträgt die Veränderungsrate Mai bis Juli 1994 gegenüber den Vormonaten für die Industrieproduktion +1,0, der Aufschwung ist also eher schwach. Das gleiche gilt für Japan mit +0,4 %.

Für die Hauptgütergruppen ist in der Europäischen Union folgendes Bild zu verzeichnen (Veränderungsrate Mai bis Juli gegenüber den drei Vormonaten):

- Vorleistungsgüterindustrie: +1,8 % (USA: 1,4 %, Japan 1,7 %)
- Investitionsgüterindustrie: +2,6 % (USA: 0,5 %, Japan 0,4 %)
- dauerhafte Konsumgüterindustrie: +4,0 % (USA: 0,9 %, Japan -4,8 %)
- nicht-dauerhafte Konsumgüterindustrie: +0,6 % (USA: 1,5 %, Japan -1,0 %)

Demnach stagniert zur Zeit nur der Bereich nicht-dauerhafter Konsumgüter (Nahrungsmittel, Textil, Bekleidung).

Für die einzelnen Mitgliedstaaten der Europäischen Union ergeben sich, soweit vorhanden, für die saisonbereinigte Industrieproduktion folgende Veränderungsrate Mai-Juli, gegenüber den drei Vormonaten: Dänemark +5,3 %, Italien +3,4 %, Vereinigtes Königreich +2,3 %, Deutschland +1,4 %, Spanien +1,0 %, Frankreich +1,0 % (geschätzt), Luxemburg +0,9 % (geschätzt), Griechenland +0,7 % (geschätzt), Niederlande +0,5 % (geschätzt), Portugal -0,9 % (geschätzt). Somit ist zumindest in neun Mitgliedstaaten (für Belgien und Irland liegen keine aktuellen Zahlen vor) der Abschwung überwunden, Portugal stagniert zur Zeit.

*Eurostatistics - data for short-term economic analysis* is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

*Eurostatistics* does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (instructions regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

#### EXCHANGE RATES: dollar weakness continues

Having fluctuated around the DM 1.55 level for much of the summer, the US dollar weakened in late September and early October, to touch DM 1.4845 on October 25, its lowest level for around two years. It remained below DM 1.50 in the following days. The US discount rate is 0.5% higher than its German counterpart, but long-term bond yields are now higher in the United States than in Germany.

The dollar was also weaker against the Japanese yen, against which it touched Y 96.35 on October 25, a further post-1945 low following the lows already reached in the summer of this year.

Portugal was one of the few EU countries where central bank headline interest rates have changed in recent weeks: on 26 October the Banco de Portugal cut its rate on regular liquidity draining from 8.75 to 8.5%. This move had no immediate effect on the escudo, which has been fairly stable for the past three months.

German interest rates were left unchanged on October 27 at the first meeting of the Bundesbank's Council since the German elections. The Bundesbank's repo rate has stood at 4.85% since July 27, the discount and lombard rates at 4.5 and 6% respectively.

Having recovered from the lows reached in mid-August, the Italian lire recovered slightly in September. However, it weakened once again early October, to stand at LIT 1024 on October 25. There have been no further changes in Italian central bank headline interest rates since the increase in the discount and Lombard rates in mid-August.

The Swedish krona has strengthened in recent weeks, following the increasing likelihood that there will be a positive outcome to the referendum on membership of the European Union, and the announcement of a fiscal austerity programme. However it weakened slightly on October 27 with the Riksbank's announcement of a 0.2% increase in its repo rate to 7.4%. This move was intended to counter inflationary pressures in the Swedish economy; Swedish interest rates were last increased in mid-August. The Finnish marka also strengthened following Finland's vote on October 16 in favour of joining the EU.

The Swiss franc has held on to the gains which it made against the mark in mid-September, when it appreciated to its highest level against the Deutschmark for almost three years. On October 27 it closed at Sfr 0.836.

#### GOVERNMENT BOND YIELDS: rise in yields continues

The yield on government bonds rose in all EC countries in September, a continuation of previous trends. The largest increase occurred in Spain, where yields rose by 0.6% to 11%. This is over 3% higher than the level at the beginning of the year, and has occurred despite a fall of around 1.5% in short-term official interest rates over the same period, thus giving a fairly steep positively sloped yield curve.

Yields rose by smaller amounts than in Spain in all other EU countries in September, and now stand at over 10% in Spain, Italy and Portugal, and between 8.5 and 9% in Belgium, Ireland and the UK. Only Luxembourg has government bond yields of less than 7%; although Germany and the Netherlands are experiencing lower yields than other economies, they have still risen by around 3% since the beginning of the year.

In the United States yields also continued to rise, averaging 7.8% in September, up from 7.6% in August and 6.2% at the start of the year. On October 24 the yield on the US long bond, which is regarded as the benchmark for the US Treasury bond market, rose above 8% for the first time for 21½ years. This compares to a yield of around 5.8% in the latter part of 1993, and can be seen in the light of financial market worries about overheating in the US economy and the rising trend in short-term US interest rates.

Since there have been increases in yields in most countries without any real pickup in inflation, the inflation-adjusted yield on government bonds has also increased in recent months. In September real long-term yields stood at over 6% in all EU economies with the exception of Germany, Luxembourg and the Netherlands, a very high level by historical standards. In the United States and Japan real yields are lower than in the EU: Japan's real and nominal yields are at roughly the same level since Japan is currently experiencing a situation of almost stable prices.

#### MONEY SUPPLY: Germany's monetary growth slows

Germany's M3 grew by just over 8% in the 12 months to August 1994, down from an annualised growth rate of over 11% in the first few months of the year. M3 growth is still not within the Bundesbank's 1994 target of 4–6% growth, but is clearly far closer than in the first half of the year. Elsewhere, monetary growth continues to be sluggish, with the period of negative M3 growth continuing in France, and a slowdown in M2 growth in the Netherlands, where it has moved from around 7% year-on-year in January to just over 2% in August. However, in the year to July ALP growth in Spain remains just outside the Banco de España's target range for 1994 of 4.5–7.5%.

#### FOREIGN OFFICIAL RESERVES: Japan's reserves continue to rise

The inflow of foreign official reserves into Japan continued in July and August, so that Japan's reserves stood at over 98 billion ecu at the end of August. This is over 11% higher than their level at the beginning of the year. This inflow of reserves can be seen in the light of the Bank of Japan's foreign exchange market interventions aimed at providing support for the dollar, which as noted elsewhere has been depreciating steadily against the yen for much of this year. To this end, the Bank of Japan has sold yen for dollars, thus increasing its foreign exchange reserves.

At almost 70 billion ecu in August, Germany's reserves now stand at around twice the level of those of Spain, the EU Member with the next largest reserves. This is despite Germany's reserves being 20 billion ecu lower than in August 1993, which was however the time of the ERM currency upheavals.

#### QUARTERLY ACCOUNTS: Second quarter of 1994: positive performance of European Union economy continues (GDP +0.9%).

The earliest available results indicate that during the second quarter of 1994 the economy of the European Union as a whole continued to expand in real economic terms (GDP +0.9%). Thanks to this performance, growth during the first half of the year was up by 2.2% compared with the corresponding period of the previous year. This was the best performance since 1990.

There was a slight upturn in inflation (+0.5%), measured by the implicit deflator of GDP. This prompted some Member States to raise interest rates in August.

As for the components of GDP, investment showed a strong recovery (+1.9%) and private consumption also performed well (+0.8%), but public consumption showed little change (+0.1%).

The situation in the individual Member States was marked by a sharp increase in GDP in Italy (+1.4%), the United Kingdom (+1.2%) and France (+1.0%), whereas growth was more contained in Denmark and Spain (both +0.6%) and in Germany (+0.5%).

The upturn in economic growth (GDP +0.9%) in the United States was accompanied by a steady rate of inflation (+0.7%). Among the components of internal demand, there was continued strong growth in investment (+2.1%). On the other hand, private consumption slowed down (+0.4%) while public consumption continued its downward slide (–0.4%).

In Japan, another downturn in production (–0.4%) was accompanied by a slight upturn in inflation (+0.4%). Among the components of internal demand, there was a slight recovery in investment (+0.6%), while private consumption fell sharply (–0.7%). Public consumption was up slightly (+0.3%).

#### PRICES: EU annual inflation at 3.0% in September

After having remained at 3.1% in July (revised figure) and August, the annual inflation rate for the EU—as measured by the CPI—fell to 3.0% in September, the lowest rate for seven and a half years (March 1987 was also 3.0%). In September 1993 it was 3.4%.

Between August and September the monthly index for EUR-12 rose by 0.3%.

Low to moderate increases were recorded in Germany (0.1%), in Portugal and the United Kingdom (0.2%) as well as in France, Italy, Spain and Luxembourg (0.3%).

There was a marked increase of 0.8% in the index of the Netherlands. The Greek index recorded a sharp increase of 3.3% reflecting both price recoveries following the steep reductions in the summer sales, and additional increases as the new seasons stocks for clothing and footwear (+9%), for household goods (+8%), and for recreation (+9%) entered the shops.

Finally there was a slight decrease in the index of Belgium, partly as a result of price reductions for package holidays.

In ascending order of current inflation the rates for the individual Member States for September—and those for the corresponding period a year ago—are :

|                | Sept. '94<br>Sept. '93 | Sept. '93<br>Sept. '92 |             | Sept. '94<br>Sept. '93 | Sept. '93<br>Sept. '92 |

\*\* August 94/August 93 and August 93/August 92

P Provisional

E Eurostat estimate

The rates for the applicant Member States are: Norway 1.8% (2.2%), Finland 1.9% (1.7%), Sweden 2.5% (4.2%) and Austria (August) 3.2% (3.4%).

The corresponding rates for other countries are : United States 3.0% (2.7%), Japan 0.1% (1.5%), Canada (August) 0.2% (1.7%) and Switzerland 0.6% (3.4%).

## INDUSTRIAL: PRODUCTION Upswing continues

Industrial production in the European Union (EU) continues to grow. A positive rate of increase can be observed for the last six months, although the growth rates are rather moderate.

The rate of change in July 1994 in the industrial production index, adjusted for working days, was up 5.4% on the figure for the corresponding month of the previous year. The rate of change in the EU's seasonally adjusted production index for the last three available months (May to July) was 1.8% up on the preceding three-month period.

In the USA, the rate of change in industrial production for May to July 1994 was 1.0% up on the preceding months, thus the upswing is rather weak. The same is true for Japan with +0.4%.

The following picture emerges for the main end-use groups in the European Union (rate of change for May to July over the preceding three months):

- intermediate goods industry: 1.8% (USA: 1.4%, Japan 1.7%)
- capital goods industry: 2.6% (USA: 0.5%, Japan 0.4%)
- consumer durables industry: 4.0% (USA: 0.9%, Japan -4.8%)
- non-durable consumer goods industry: 0.6% (USA: 1.5%, Japan -1.0%)

The upswing is currently only weak in the non-durable consumer goods sectors (food, textiles, clothing).

For the individual Member States of the European Union, figures (where available) for the seasonally-adjusted change in industrial production for May to July over the previous three months are as follows: Denmark +5.3%, Italy +3.4%, the United Kingdom +2.3%, Germany +1.4%, Spain +1.0%, France +1.0% (estimated), Luxembourg 0.9% (estimated), Greece +0.7% (estimated), the Netherlands +0.5% (estimated), Portugal -0.9% (estimated). This means that the downturn is over in at least nine of the Member States (current figures are not available for Belgium and Ireland); only in Portugal is there still a fall in production.

Luxembourg, 17.10.94

*Eurostatistiques - Données pour l'analyse de la conjoncture* est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

*Eurostatistiques* ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

Sauf indications contraires, les données portent sur le territoire de la République fédérale d'Allemagne avant le 3.10.1990, Berlin-Ouest inclus.

**TAUX DE CHANGE: faiblesse persistante du dollar**

Après avoir fluctué autour de 1,55 DM pendant une grande partie de l'été, le dollar des États-Unis s'est affaibli fin septembre et début octobre pour plonger à 1,4845 DM le 25 octobre, son plus bas niveau depuis près de deux ans. Il est resté inférieur à 1,50 DM les jours suivants. Le taux d'escompte des États-Unis dépasse de 0,5 % le taux allemand, mais les rendements des obligations à long terme sont à présent plus élevés aux États-Unis qu'en Allemagne.

Le dollar s'est également affaibli par rapport au yen japonais; le 25 octobre, il est tombé au niveau extrêmement bas de 96,35 Y, dans le prolongement des plus bas niveaux historiques de toute la période post-1945 déjà enregistrés cet été.

Le Portugal est l'un des rares pays de l'UE où la banque centrale a modifié ses taux directeurs au cours des dernières semaines: le 26 octobre, la Banco de Portugal a ramené son taux normal de drainage des liquidités de 8,75 % à 8,5 %. Cette mesure n'a pas eu d'effet immédiat sur l'escudo qui est resté relativement stable durant les trois derniers mois.

Les taux d'intérêts allemands n'ont pas été modifiés le 27 octobre, date de la première réunion du conseil de la Bundesbank depuis les élections allemandes. Le taux de prise en pension de la Bundesbank s'établit à 4,85 % depuis le 27 juillet, le taux d'escompte et le taux Lombard à 4,5 % et 6 % respectivement.

Après ses accès de faiblesse de la mi-août, la lire italienne s'est légèrement redressée en septembre. Elle s'est cependant à nouveau affaiblie au début du mois d'octobre, pour atteindre le niveau de 1024 LIT le 25 octobre. Il n'y a pas eu de modifications des taux d'intérêt directeurs de la banque centrale italienne depuis le relèvement, mi-août, du taux d'escompte et du taux Lombard.

La couronne suédoise s'est renforcée au cours des dernières semaines, suite à l'annonce d'un programme d'austérité fiscale et eu égard au fait que le «oui» semble avoir de plus en plus de chances de l'emporter au référendum sur l'adhésion à l'Union européenne. Elle s'est cependant légèrement affaiblie le 27 octobre, lorsque la Riksbank a fait savoir qu'elle relevait son taux de prise en pension de 0,2 % pour le porter à 7,4 %. Cette décision visait à contrer les tensions inflationnistes apparues dans l'économie suédoise; la dernière augmentation des taux d'intérêt suédois datait de la mi-août. Le mark finlandais s'est lui aussi renforcé à la suite du vote du 16 octobre en faveur de l'adhésion de la Finlande à l'UE.

Le franc suisse s'est maintenu au niveau élevé qu'il a atteint par rapport au mark à la mi-septembre, date où il a enregistré son plus haut cours face au DM depuis près de trois ans. Le 27 octobre, il a clôturé à 0,836 SFR.

**RENDEMENT DES OBLIGATIONS D'ÉTAT: poursuite de la hausse des rendements**

En septembre, les rendements des obligations d'État ont poursuivi leur mouvement de hausse dans tous les pays de la CE. L'accroissement le plus important a été enregistré en Espagne, où ils ont augmenté de 0,6 % pour s'établir à 11 %. Cette hausse de plus de 3 % par rapport au début de l'année a été réalisée malgré une baisse d'environ 1,5 % des taux d'intérêt officiels à court terme au cours de la même période, ce qui se traduit par une pente positive relativement forte dans la courbe des rendements.

Dans tous les autres pays de l'UE, les rendements ont progressé en septembre de manière moins marquée qu'en Espagne. Ils sont actuellement supérieurs à 10 % en Espagne, en Italie et au Portugal et compris entre 8,5 % et 9 % en Belgique, en Irlande et au Royaume-Uni. Le Luxembourg est le seul pays où les obligations d'État ont un rendement inférieur à 7 %. En Allemagne et aux Pays-Bas, les rendements, tout en étant plus faibles que dans d'autres pays, se sont néanmoins accrus de 3 % environ depuis le début de l'année.

Aux États-Unis, les rendements ont également continué à augmenter; ils s'élevaient en moyenne à 7,8 % en septembre, contre 7,6 % en août et 6,2 % au début de l'année. Le 24 octobre, le rendement de l'obligation à long terme qui est considérée comme la valeur de référence du marché des obligations du Trésor américain a dépassé la barre des 8 % pour la première fois depuis deux ans et demi. Cette progression par rapport au niveau de 5,8 % atteint à la fin de 1993 peut être interprétée comme une conséquence des préoccupations du marché financier quant à une surchauffe de l'économie américaine ainsi que de la tendance à la hausse des taux d'intérêt à court terme aux États-Unis.

Comme la plupart des pays ont connu un accroissement des rendements sans véritable redémarrage de l'inflation, le rendement corrigé de l'inflation s'est lui aussi accru au cours des derniers mois. En septembre, les rendements réels à long terme étaient supérieurs à 6 % dans tous les pays de l'UE, exception faite de l'Allemagne, du Luxembourg et des Pays-Bas, ce qui est un niveau très élevé du point de vue historique. Aux États-Unis et au Japon, les rendements réels sont plus faibles que dans l'UE: au Japon, les rendements réels et nominaux sont à peu près de même niveau, puisque ce pays connaît actuellement une situation de prix quasiment stables.

**DISPONIBILITÉS MONÉTAIRES: ralentissement de la croissance de la masse monétaire en Allemagne**

En Allemagne, M3 s'est accru d'un peu plus de 8 % au cours de la période de 12 mois se terminant en août 1994, alors que durant les premiers mois de l'année, le taux de croissance annualisé avait été supérieur à 11 %. Ce taux n'entre pas encore dans la fourchette de 4 %-6 % visée par la Bundesbank pour 1994, mais il en est bien plus proche que durant la première moitié de l'année.

Dans les autres pays, la croissance monétaire reste molle. En France, la période de croissance négative de M3 se poursuit, tandis qu'aux Pays-Bas, le taux d'accroissement de M2 est passé - en chiffres annualisés - d'environ 7 % en janvier à un peu plus de 2 % en août. En Espagne, le rythme de croissance de l'agrégat ALP au cours des 12 mois se terminant en juillet ne se situe cependant pas encore tout à fait dans la fourchette des 4,5 %-7,5 % que la Banco de España s'était fixée pour 1994.

**RÉSERVES OFFICIELLES DE CHANGE: nouvelle augmentation des réserves du Japon**

L'afflux de réserves officielles de change au Japon s'est poursuivi aux mois de juillet et d'août, de sorte que les réserves japonaises étaient supérieures à 98 milliards d'écus à la fin août, dépassant ainsi de 11 % leur niveau du début de l'année. Cet accroissement des réserves peut être interprété à la lumière des interventions faites par la Banque du Japon sur le marché des devises dans le but de soutenir le dollar qui, comme cela est dit plus haut, s'est déprécié de façon continue par rapport au yen pendant une grande partie de cette année. À cet effet, la Banque du Japon a vendu du yen contre du dollar, augmentant ainsi ses réserves de change.

Les réserves de l'Allemagne - près de 70 milliards d'écus en août - sont à peu près deux fois plus élevées que celles de l'Espagne, pays de l'UE venant en deuxième position par ordre d'importance des réserves, et ce, bien que les réserves allemandes comptent 20 milliards d'écus de moins qu'en août 1993, époque marquée, il est vrai, par des turbulences monétaires au sein du mécanisme de change.

**COMPTES TRIMESTRIELS: Deuxième trimestre 1994: poursuite de l'évolution positive de l'économie de l'Union européenne (PIB +0,9 %)**

Au cours du deuxième trimestre 1994, on a constaté, sur la base des premiers résultats disponibles, pour l'économie de l'Union européenne dans son ensemble, la poursuite de la phase d'expansion de l'économie réelle (PIB +0,9 %). Grâce à ce résultat, la croissance au cours du premier semestre a été de 2,2 % sur le semestre correspondant de l'année précédente. Ceci est le résultat le plus positif depuis 1990.

En ce qui concerne l'inflation, mesurée par le déflateur implicite du PIB, on constate une légère reprise (+0,5 %). Suite à cela certains Etats membres ont décidé, au cours du mois d'août, une hausse du taux d'intérêt.

En ce qui concerne les composantes du PIB, il nous semble utile de mettre en évidence la forte reprise des investissements (+1,9 %) et l'évolution positive de la consommation privée (+0,8 %), tandis que la consommation publique reste stagnante (+0,1 %).

En ce qui concerne la situation dans les Etats membres, on doit constater la forte progression du PIB en Italie (+1,4 %), au Royaume-Uni (+1,2 %) et en France et aux Pays-Bas (+1,0 %). Tandis que la croissance est relativement plus faible en Espagne et au Danemark (+0,6 % respectivement) et en Allemagne (+0,5 %).

Aux Etats-Unis, évolution positive de la croissance économique (PIB +0,9 %) accompagnée, par une inflation stable (+0,7 %). Parmi les composantes de la demande interne, on constate la poursuite de la phase de forte croissance des investissements (+2,1 %). Par contre, la consommation privée ralentie de manière sensible (+0,4 %) tandis que la consommation publique continue dans sa phase négative (-0,4 %).

Au Japon, nouveau fléchissement de la production (-0,4 %) accompagné par une légère reprise de l'inflation (+0,4 %). Parmi les composantes de la demande interne, on constate une légère reprise des investissements (+0,6 %) accompagnée par une forte baisse de la consommation privée (-0,7 %). Tandis que la consommation publique est caractérisée par une évolution plutôt faible (+0,3 %).

**PRIX: l'inflation annuelle de l'UE à 3,0 % en septembre**

Après être restée à 3,1 % en juillet (chiffre révisé) et août, l'inflation annuelle de l'UE - mesurée par l'IPC - est tombée à 3,0 % en septembre, le taux le plus bas depuis sept ans et demi (mars 1987 était aussi de 3,0 %). En septembre 1993, ce taux était de 3,4 %.

Entre août et septembre, le taux mensuel pour EUR-12 a augmenté de 0,3 %.

Des accroissements faibles à modérés ont été enregistrés en Allemagne (0,1 %), au Portugal et au Royaume-Uni (0,2 %), ainsi qu'en France, Italie, Espagne et au Luxembourg (0,3 %).

On a observé une hausse sensible de 0,8 % de l'indice des Pays-Bas. L'indice grec a enregistré une très forte hausse de 3,3 %, reflétant à la fois le rattrapage des prix après les fortes réductions pendant les soldes d'été et les hausses dues à l'introduction des nouveaux stocks de l'habillement et des chaussures (+9 %), des biens de ménage (+8 %) et de loisirs (+9 %) dans les magasins.

Enfin, il y a eu un léger recul de l'indice belge, grâce à des réductions de prix pour les voyages touristiques.

Dans l'ordre croissant de l'inflation actuelle, les taux annuels des Etats membres pour - septembre et ceux d'il y a un an - sont:

|             | Sept. '94 | Sept. '93 |            | Sept. '94 | Sept. '93 |
|-------------|-----------|-----------|------------|-----------|-----------|
|             | Sept. '93 | Sept. '92 |            | Sept. '93 | Sept. '92 |
| France      | 1,6 %P    | 2,3 %     | Pays-Bas   | 2,7 %     | 2,8 %     |
| Luxembourg  | 2,2 %     | 3,7 %     | Allemagne* | 3,0 %     | 4,0 %     |
| Danemark    | 2,2 %E    | 1,2 %     | Italie     | 3,9 %     | 4,5 %     |
| Royaume-Uni | 2,2 %     | 1,8 %     | Espagne    | 4,5 %     | 4,3 %     |
| Belgique    | 2,5 %     | 2,8 %     | Portugal   | 4,7 %     | 5,9 %     |
| Irlande**   | 2,5 %     | 1,3 %     | Grèce      | 11,9 %    | 12,8 %    |

\* L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale d'avant le 3 octobre 1990.

\*\* Août 94/Août 93 et Août 93/Août 92

P Provisoire

E Estimation Eurostat

Les taux des Etats candidats à l'adhésion à l'UE sont: Norvège 1,8 % (2,2 %), Finlande 1,9 % (1,7 %), Suède 2,5 % (4,2 %) et Autriche (août) 3,2 % (3,4 %).

Les taux correspondants de quelques autres pays sont: Etats-Unis 3,0 % (2,7 %), Japon 0,1 % (1,5 %), Canada (août) 0,2 % (1,7 %) et Suisse 0,6 % (3,4. %).

**PRODUCTION INDUSTRIELLE: Essor continue**

La production industrielle dans la Communauté européenne (UE) continue à augmenter. Depuis une demi année le taux de croissance est positif, même si les taux de croissance sont modérés.

Le taux de variation de l'indice de la production industrielle corrigé des jours ouvrables s'est élevé en juillet 1994 par rapport à la valeur du même mois un an auparavant à +5,4 %. Si l'on considère le taux de variation de l'indice de la production désaisonnalisée de l'UE des trois derniers mois disponibles de mai à juillet par rapport aux trois mois précédents, il s'élève à +1,8 %.

Aux Etats-Unis, le taux de variation de mai à juillet 1994 par rapport aux mois précédents pour la production industrielle s'est élevé à +1,0, c'est-à-dire une hausse plutôt faible. Il en est de même pour le Japon avec un +0,4 %.

Pour les groupes de biens principaux, on observe dans l'Union européenne le tableau suivant (taux de variation de mai à juillet par rapport aux trois mois précédents):

- industrie des biens intermédiaires: +1,8 % (USA: +1,4 %, Japon +1,7 %)
- industrie des biens d'investissement: +2,6 % (USA: +0,5 %, Japon +0,4 %)
- industrie des biens de consommation durables: +4,0 % (USA: +0,9 %, Japon -4,8 %)
- industrie des biens de consommation non durables: +0,6 % (USA: +1,5 %, Japon -1,0 %)

Ces chiffres montrent que la hausse ne continue de stagner que dans les domaines des biens de consommation non durables (alimentation, textile, habillement).

Pour les différents Etats membres de l'Union européenne, les taux de variation de la production industrielle désaisonnalisée, dans la mesure où ils sont disponibles, pour le mois de mai à juillet par rapport aux trois mois précédents, se présentent comme suit: Danemark +5,3 %, Italie +3,4 %, Royaume-Uni +2,3 %, Allemagne +1,4 %, Espagne +1,0 %, France +1,0 % (estimé), Luxembourg +0,9 % (estimé), Grèce +0,7 % (estimé), Pays-Bas +0,5 % (estimé), Portugal -0,9 % (estimé). Ainsi, dans au moins huit Etats membres (aucun chiffre actuel n'étant disponible pour la Belgique et l'Irlande), la période de récession a été surmontée, la stagnation ne se poursuivant qu'au Portugal.

## „On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

| Land<br>XX                                                                                                                                                    | Sektor<br>XX | Tabelle<br>XXXX                                                                                    | Periodizität und Einheit<br>X                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 06 EUR 12*<br>03 EUR 10<br>11 D*<br>14 F<br>16 I<br>18 NL<br>21 UEBL<br>22 B<br>24 L<br>26 UK<br>28 IRL<br>30 DK<br>32 E<br>34 GR<br>36 P<br>42 USA<br>46 JAP | 93           | Variablen<br>tabelle<br><br>XXXX<br>vierstelliger Wert,<br>der im Titel jeder<br>Tabelle erscheint | 0 jährlich, Angaben in Prozent<br>1 vierteljährlich, Angaben in Prozent<br>2 monatlich, Angaben in Prozent<br>3 jährlich, Indexangaben (1985 = 100)<br>4 vierteljährlich, Indexangaben (1985 = 100)<br>5 monatlich, Indexangaben (1985 = 100)<br>6 jährlich, Angaben in absoluten Werten<br>7 vierteljährlich, Angaben in absoluten Werten<br>8 monatlich, Angaben in absoluten Werten<br>9 Gewicht. EUR 10 = 100 bzw. EUR 12 = 100 |

\* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

## ‘On-line’ consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

| Country<br>XX                                                                                                                                                 | Sector<br>XX | Table<br>XXXX                                                                           | Periodicity and unit<br>X                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 06 EUR 12*<br>03 EUR 10<br>11 D*<br>14 F<br>16 I<br>18 NL<br>21 UEBL<br>22 B<br>24 L<br>26 UK<br>28 IRL<br>30 DK<br>32 E<br>34 GR<br>36 P<br>42 USA<br>46 JAP | 93           | Table by indicator<br><br>XXXX<br>4-digit value quoted<br>in the title of<br>each table | 0 annual in %<br>1 quarterly in %<br>2 monthly in %<br>3 annual index 1985 = 100<br>4 quarterly index 1985 = 100<br>5 monthly index 1985 = 100<br>6 annual absolute value<br>7 quarterly absolute value<br>8 monthly absolute value<br>9 weighting EUR 10 = 100 or EUR 12 = 100 |

\* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

## Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

| Pays<br>XX                                                                                                                                                    | Secteur<br>XX | Tableau<br>XXXX                                                                                         | Périodicité et unité<br>X                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 06 EUR 12*<br>03 EUR 10<br>11 D*<br>14 F<br>16 I<br>18 NL<br>21 UEBL<br>22 B<br>24 L<br>26 UK<br>28 IRL<br>30 DK<br>32 E<br>34 GR<br>36 P<br>42 USA<br>46 JAP | 93            | Tableaux par variable<br><br>XXXX<br>valeur à 4 chiffres<br>figurant dans le titre<br>de chaque tableau | 0 annuelle exprimée en pourcentage<br>1 trimestrielle exprimée en pourcentage<br>2 mensuelle exprimée en pourcentage<br>3 annuelle exprimée en indice 1985 = 100<br>4 trimestrielle exprimée en indice 1985 = 100<br>5 mensuelle exprimée en indice 1985 = 100<br>6 annuelle exprimée en valeur absolue<br>7 trimestrielle exprimée en valeur absolue<br>8 mensuelle exprimée en valeur absolue<br>9 pondération EUR 10 = 100 ou EUR 12 = 100 |

\* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
