Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat. Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

Printed in Germany

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in Eurostatistik veröffentlichten Daten stammen aus der Datenbank New Cronos. New Cronos setzt sich zusammen aus dem alten Cronos sowie REGIO und ist nicht mehr in Form von Zeitreihen, sondern in Form von multidimensionalen Tabellen dargestellt. New Cronos ist somit eines der Produkte zur Verbreitung statistischer Daten, das direkt aus der Eurostat - Referenzdatenbank gespeist wird. Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Anpassung des Wechselkursmechanismus

Die spanische Peseta und der portugiesische Escudo wurden im Rahmen des Wechselkursmechanismus am 6. März um 7 % bzw. 3,5 % abgewertet. Zuvor war die Peseta auf den Devisenmärkten unter zunehmenden Abgabedruck geraten und hatte am 3. März gegenüber der D-Mark einen historischen Tiefststand erreicht. Die neuen Leitkurse der Peseta und des Escudo gegenüber dem ECU liegen bei 162,493 bzw. 195,792.

Die wichtigste Entwicklung der Finanzmärkte in den letzten Wochen, die in dieser Abwertung gipfelte, war die Stärkung der D-Mark gegenüber den Währungen der meisten ihrer wichtigsten Handelspartner, insbesondere dem US-Dollar. Von Anfang Februar bis zum 7. März verbuchte die D-Mark einen Wertzuwachs von 8 % gegenüber dem US-Dollar, 12 % gegenüber der Lira, 6 % gegenüber dem Pfund Sterling und 3 % gegenüber dem französischen Franc, der ebenso wie die schwedische Krone, die Lira und die Peseta auf einen neuen Tiefststand gegenüber der Mark sank. Zu verschiedenen Zeitpunkten wurden in Italien, Spanien, Irland, Frankreich, Dänemark und Belgien die Zinssätze erhöht, um die Währungen zu stützen. Gegenüber dem holländischen Gulden und dem österreichischen Schilling ist die D-Mark jedoch relativ stabil geblieben. Die Schwächung des US-Dollar erfolgte trotz der am 1. Februar von der US-Notenbank bekanntgegebenen Erhöhung der US-Zinssätze, nämlich des Diskontsatzes und der Zielvorgabe für den Tagesgeldsatz um 0,5 % auf 5,25 % bzw. 6 %. Es war die siebte Erhöhung der kurzfristigen US-Zinssätze seit Februar 1994, die auf den Finanzmärkten als weiterer Schritt zur Inflationsbekämpfung weitgehend erwartet worden war: die US-Wirtschaft wuchs 1994 auf das Jahr umgerechnet um 4,5 %, eine Wachstumsrate, die ohne weitere Erhöhung der Inflation als unhaltbar angesehen wird.

Am folgenden Tag gab die Bank von England die Erhöhung der Basisausleihesätze um 0,5 % auf 6,25 % bekannt, und zwar ebenfalls als weitere Maßnahme zur Inflationsbekämpfung. Es handelt sich um die dritte Erhöhung der Zinssätze des UK in etwas mehr als fünf Monaten. Anfangs war das Pfund Sterling von der Ankündigung kaum berührt, erreichte später im Zusammenhang mit politischen Problemen jedoch einen historischen Tiefststand gegenüber der D-Mark und schloß am 7. März in London mit 2,261 DM ab. Das Pfund Sterling wurde Ende Februar vom Konkurs der britischen Barings-Bank, einer Merchant Bank, beeinflusst, der für einige Unruhe auf den internationalen Finanzmärkten sorgte.

Wie bereits erwähnt geriet auch die italienische Lira in den letzten Wochen unter verstärkten Druck und fiel gegenüber der D-Mark erneut. Sie fiel Mitte Februar auf 1087 LIT, in der zweiten Februarhälfte und Anfang März sank sie noch weiter und wurde zeitweilig unter 1200 LIT gehandelt. Dies bedeutet eine Abwertung von mehr als 12 % seit Jahresbeginn und von rund 24 % seit April 1994. Auch eine Erhöhung des italienischen Diskontsatzes um 0,75 % auf 8,25 % am 21. Februar konnte die Lira nicht stützen.

RENDITEN VON STAATSANLEIHEN: einigermaßen stabile Renditen im Januar 1995

Im Januar waren die Renditen von Staatsanleihen einigermaßen stabil, und blieben in den Vereinigten Staaten, Japan, Dänemark, Deutschland, den Niederlanden, Österreich und Finnland im Durchschnitt entweder konstant oder schwankten um weniger als 0,1 %. Auch in Luxemburg und Belgien änderten sich die Renditen kaum.

Dagegen stiegen die spanischen und portugiesischen Renditen im Januar um 0,6 % auf 11,7 %, was für beide Länder den Höchststand seit Mitte 1993 bedeutet. Die Renditen spanischer Staatsanleihen haben nach einem Tiefstand von 7,8 % im Januar 1994 stetig zugenommen.

Die realen (inflationsbereinigten) Renditen stiegen 1994 stark an: die durchschnittlichen realen Renditen in den EU-Mitgliedstaaten stiegen von 3,5 % Ende 1993 auf 6 % Ende 1994. Finnland und Schweden wiesen während des Jahres die höchsten realen Renditen auf, da relativ hohe normale Renditen zusammen mit einer niedrigen Inflation 1994 meist reale Renditen zwischen 8 % und 9 % ergaben.

GELDVOLUMEN: Wachstum der Geldmenge M4 im UK gerade noch im Zielbereich

Die Wachstumsrate von M4 im Vereinigten Königreich bis Dezember betrug 3,6 % und war damit gerade noch im Zielbereich der Bank von England, der bei 3-9 % liegt. Die Bank von England hat auch einen

Zielbereich für die Wachstumsrate von M0 festgesetzt, d. h. der Banknoten und Münzen und der Guthaben der Banken bei der Bank von England. 1994 wuchs diese Menge um 7,3 %, verglichen mit dem Ziel von 0-4 % Wachstum. 1994 wich das Verhalten dieses Aggregats jedoch von dem der Einzelhandelsumsatz- und Inflationsdaten ab, so daß es jetzt als Variable, für die Zieldaten vorgegeben werden, weniger stark berücksichtigt wird.

Die Wachstumsrate von M2 in den Niederlanden schlug in den 12 Monaten bis Dezember 1994 ins Negative um, nachdem sie sich während des Jahres meistens verlangsamte.

AMTLICHE WÄHRUNGSRESERVEN: Zufluß von Reserven nach Italien

In Italien war im Dezember ein Zufluß amtlicher Reserven von rund 3,6 Mrd. ECU zu verzeichnen, wodurch die italienischen Reserven Ende 1994 auf etwas über 25 Mrd. ECU stiegen. Dies entspricht ungefähr dem Stand von Ende 1993, obwohl die Reserven 1994 zwischen 29 Mrd. ECU und 21,5 Mrd. ECU schwankten. Im November 1994 legte Italien eine Anleihe über 450 Mrd. Yen auf, deren Erlös zur Erhöhung der amtlichen Währungsreserven beigetragen haben mag.

Die griechischen Reserven stiegen 1994 um fast 70 %. Mit etwa 11,8 Mrd. ECU sind sie um etwa 5 Mrd. ECU höher als Ende 1993.

VOLKSWIRTSCHAFTLICHE GESAMTRECHNUNGEN: In den ersten drei Quartalen 94, BIP der EU um 2,5 % Zugelegt

Das Bruttoinlandsprodukt der EU war im dritten Quartal '94 um 0,7% höher als im Vorquartal. Die Zunahme der Wirtschaftsleistung ist für die „EU der 12“ und die „EU der 15“ gleich hoch.

In den ersten drei Quartalen '94 ist das Bruttoinlandsprodukt damit um 2,5 % gegenüber dem gleichen Zeitraum des Vorjahres gestiegen — dies gilt sowohl für die „EU der 12“ als auch für die „EU der 15“.

Den größten Anstieg im dritten Quartal hatte Finnland mit 1,4 %. Danach folgt Italien mit 1 %. Nur zwei Mitgliedstaaten meldeten eine Abnahme. In Dänemark ging das Bruttoinlandsprodukt um 1 % zurück. In Schweden verzeichnete man einen leichten Rückgang um 0,1 %.

Wie die Tabelle zeigt, ist die Wachstumsrate der EU nur geringfügig niedriger als die der Vereinigten Staaten, Kanadas und Japans.

BIP — Veränderung des Volumens in Prozent gegenüber dem Vorquartal

EU 12 & 15 (nicht alle Mitgliedstaaten verfügbar) und einige ausgewählte Länder

	Q1/ 1994	Q2/ 1994	Q3/ 1994		Q1/ 1994	Q2/ 1994	Q3/ 1994

(*) auf der Basis der Länder mit regelmäßigen Vierteljahresergebnissen

INFLATIONSRATE

Die Teuerung lag im Januar bei 3,1 %. Das ist der gleiche Wert, der im Dezember für „die 12“ ermittelt wurde. Ohne den Einfluß der neuen Mitgliedsländer wäre die Inflationsrate der EU (12) im Januar auf 3,2 % gestiegen.

Rückrechnungen haben ergeben, daß sich die Inflationsrate für die „EU der 15“ seit Anfang '93 zwischen 3,7 % und 3 % bewegte. Im Januar letzten Jahres lag sie bei 3,3 %. In der zweiten Jahreshälfte '94 blieb sie relativ unverändert, bei 3,1 % und 3 %.

FRANKREICH, weist mit 1,7 % weiterhin die geringste Teuerung auf. FINNLAND und BELGIEN hatten im Januar die zweitniedrigste Inflationsrate (1,9 %). SCHWEDEN mit 2,5 % und ÖSTERREICH mit 2,7 % blieben ebenfalls unter dem Durchschnitt. Das VEREINIGTE KÖNIGREICH hat mit 3,3 % den Durchschnitt überschritten.

Für die Inflationsraten der Mitgliedsländer im Januar — mit entsprechenden Vorjahreszahlen — ergibt sich folgende ansteigende Reihenfolge:

	Jan 95 Jan 94	Jan 94 Jan 93		Jan 95 Jan 94	Jan 94 Jan 93
FRANKREICH	1,7 %	1,9 %	SCHWEDEN	2,5 %	1,7 %
BELGIEN	1,9 %	2,4 %	ÖSTERREICH	2,7 %	3,1 %
FINNLAND	1,9 %	0,3 %	VER. KÖNIGREICH	3,3 %	2,5 %
DÄNEMARK	2,3 %	1,7 %	ITALIEN	4,0 % p	4,4 %
DEUTSCHLAND*	2,3 %	3,5 %	SPANIEN	4,4 %	4,9 %
LUXEMBURG	2,3 %	2,6 %	PORTUGAL	4,5 %	6,3 %
NIEDERLANDE	2,4 %	3,0 %	GRIECHENLAND	11,1 %	11,1 %
IRLAND**	2,4 %	1,4 %			
EUR-15	3,1 %				

* Der Verbraucherpreisindex für die Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3.10.90

** Nov 94 / Nov 93 und Nov 93 / Nov 92

p Vorläufig

Die Inflationsraten in einigen anderen Staaten: USA 2,8 % (2,5 %), KANADA im Dezember 0,2 % (1,7 %), JAPAN 0,7 % (1,2 %), SCHWEIZ 1 % (2,1 %), NORWEGEN 2,6 % (1,3 %) und ISLAND 1,7 % (3,2 %).

INDUSTRIEPRODUKTION : Stetiger Aufschwung ungebremst

Die Industrieproduktion in der Europäischen Union steigt zur Zeit stetig an, vor allem in den Wirtschaftszweigen der Investitionsgüterindustrie. Saisonbereinigt lag der EU Produktionsindex (1990=100) der Industrie im Oktober 1994 bei 100,3, im November bei 100,7 und im Dezember bei 103,3.

Betrachtet man die glatte Komponente des Produktionsindex, bereinigt also die Reihen vom Saisoneinfluss und von irregulären Schwankungen, so ist im Vergleich des vierten Quartals zum dritten Quartal ein Wachstum von +1,3 für EUR 12 zu verzeichnen.

In den USA entspricht die vergleichbare Veränderungsrate einem Wert von +1,1%, in Japan +0,9%.

In den Mitgliedsstaaten zeigt die Veränderungsrate, soweit verfügbar, im Dreimonatsvergleich der glatten Komponente des Industrie-Produktionsindex folgende Werte: Schweden +3,4%, Irland +2,6% (geschätzt), Dänemark +1,7%, Italien +1,7%, Spanien +1,5%, Deutschland +1,5%, Österreich +1,5% (geschätzt), Finnland +1,3%, Vereinigtes Königreich +1,1%, Frankreich +0,9%, Niederlande +0,5% Griechenland -0,4%, Portugal -1,1% (geschätzt).

AUßENHANDEL: Ergebnisse für August 1994

Das Außenhandelsdefizit der Europäischen Union ging in den ersten acht Monaten 1994 von 8,6 Mrd. ECU im Vorjahr auf 1,9 Mrd. ECU zurück. Diese Erholung der Handelsbilanz ist hauptsächlich auf die dynamische Entwicklung der Extra-EU-Ausfuhren zurückzuführen, die in den ersten acht Monaten 1994 gegenüber demselben Zeitraum 1993 um 12,5 % zunahm, während die Einfuhren um 10 % stiegen.

In der Zeit von Januar bis August 1994 hatte das Vereinigte Königreich von allen EU-Ländern mit 14,1 Mrd. ECU das höchste Außenhandelsdefizit zu verzeichnen.

Die Extra-EU-Einfuhren der Niederlande (einschließlich der über niederländische Häfen in andere Mitgliedstaaten versandten Waren) stiegen in den ersten acht Monaten 1994 sehr stark an (+20,7 %), während die Veränderungsrate der Ausfuhren unter dem EU-Durchschnitt lag (11,4 %).

In der Zeit von Januar bis August 1994 wies der Extra-EU-Handel der BLWU und Irlands im Vergleich zum Vorjahr von allen EU-Mitgliedstaaten die höchsten Zuwachsraten aus. Bei den Einfuhren hatten beide eine prozentuale Veränderung von 23,2 % zu verzeichnen, während die Ausfuhren der BLWU um 24,1 % und die Irlands um 19,3 % stiegen.

Der Extra-EU-Handelsüberschuß Deutschlands (der höchste aller EU-Länder) schnellte auf 16 Mrd. ECU empor, verglichen mit 10,8 Mrd. ECU im Jahr 1993.

Die italienischen Ausfuhren stiegen während der ersten acht Monate 1994 gegenüber demselben Zeitraum des Vorjahres schneller als die Einfuhren, die jeweilige Wachstumsrate betrug 13,2 % bzw. 6,2 %.

Der Extra-EU-Handelsbilanzüberschuß Frankreichs erhöhte sich zwischen dem obengenannten Zeitraum 1993 und 1994 leicht (von 5 Mrd. ECU 1993 auf 5,5 Mrd. ECU 1994). Sowohl die Einfuhren als auch die Ausfuhren verzeichneten Veränderungsrate weit unter dem EU-Durchschnitt (6,6 % bzw. 6,9 %).

In den ersten acht Monaten 1994 verzeichnete Dänemark einen Handelsbilanzüberschuß in fast der gleichen Höhe wie im entsprechenden Zeitraum des Vorjahres (1,6 Mrd. ECU). Zwischen diesen beiden Zeiträumen wiesen die Veränderungsrate der dänischen Einfuhren und Ausfuhren ganz ähnliche Werte aus, nämlich 14,4 % und 14 %.

Zwischen den Zeiträumen Januar-August 1993 und 1994 verringerte Spanien sein Handelsbilanzdefizit um 0,3 Mrd. ECU. Die Extra-EU-Ausfuhren Spaniens wiesen eine um 4,2 Prozentpunkte höhere Veränderungsrate aus als die Einfuhren (11,5 % gegenüber 7,3 %).

Im Zeitraum Januar bis August 1994 verzeichneten Griechenland und Portugal das gleiche Handelsbilanzdefizit (1,9 Mrd. ECU). Während Griechenland seine außenwirtschaftliche Position gegenüber dem Vorjahr um 0,8 Mrd. ECU verbessern konnte, nahm das portugiesische Defizit um 0,1 Mrd. ECU zu.

EU-AGRARPREISE: Grösster Anstieg seit 1989

Die Preise in der Landwirtschaft haben innerhalb der EU (12) kräftig zugelegt; es ist der stärkste Anstieg seit 1989.

Die realen Erzeugerpreise landwirtschaftlicher Produkte (Output) sind im dritten Quartal 1994 im Vergleich zum Vorjahresquartal um 2,8 % gestiegen. Dies ist eine Umkehrung der von 1989 bis zum ersten Quartal 1994 anhaltenden Abwärtsentwicklung bei diesem Index.

Die realen Erzeugerpreise stiegen in sechs Mitgliedsländern der EU: am stärksten in Spanien (+9,7 %) und in Italien (+5,8 %). In Luxemburg fiel der Rückgang mit -4,9 % am deutlichsten aus.

Stark gestiegen sind die realen Erzeugerpreise für pflanzliche Produkte, um 8,9 %. Dies ist hauptsächlich auf den Anstieg der Preise für Hackfrüchte (+29,8 %) zurückzuführen, der wiederum seine Ursache in erster Linie in den um 75,1 % höheren Preisen für Speisekartoffeln hat. Auch bei Frischgemüse (+24,3 %), Obst (+12,1 %) sowie Weinmost und Wein (+8,7 %) waren Preisanstiege zu beobachten. Dagegen gingen die Preise für Getreide und Reis als Folge der Reform der Gemeinsamen Agrarpolitik bereits im fünften Quartal in Folge zurück (-6,9 %).

Die realen Erzeugerpreise für Tiere und tierische Produkte sind um 2 % gesunken, insbesondere für Milch (-2,1 %), Rinder (-4,2 %), Kälber (-8,3 %) und Eier (-10,7 %). Dagegen legten die realen Erzeugerpreise für Schweine wieder deutlich zu (+5,4 %), nachdem sie in mehreren Quartalen stark rückläufig waren. „Nach der Viehzählung vom August '94 wurde eine Abnahme des Schweinebestandes um 2,2 % gegenüber dem Jahr zuvor ermittelt, was möglicherweise ein Ende der Krise in diesem Sektor ankündigt.“ so EUROSTAT.

Der reale Index für die Einkaufspreise landwirtschaftlicher Betriebsmittel (Input) fiel um 1,7 % und setzte somit die in allen Quartalen seit 1989 beobachtete Entwicklung fort.

Insgesamt ergab sich somit im dritten Quartal gegenüber dem Vorjahresquartal eine deutliche Verbesserung der realen Terms of Trade der Landwirtschaft um 4,7 %. Das Niveau ist jedoch noch immer um etwa 6,7 % niedriger als 1985. Luxemburg (-2,8 %) und Irland (-2,3 %) sind die einzigen EU-Länder, in denen sich die Terms of Trade im dritten Quartal verschlechterten. Der Anstieg der Preise für pflanzliche Produkte hat sich bei ihnen insgesamt nur wenig niedergeschlagen, weil dieser Bereich im Vergleich zur Viehwirtschaft relativ klein ist.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from Eurostat's on-line database, New Cronos. New Cronos includes old Cronos and Regio, both represented not by chronological series but through multi-dimensional tables. New Cronos is a dissemination product directly from Eurostat's Reference Environment. The data are also available via the Commission host Eurobases in the Eurocron database.

EXCHANGE RATES: Realignment of the ERM

The Spanish peseta and Portuguese escudo were devalued within the exchange rate mechanism of the ERM on March 6, by 7 and 3.5%. This followed a period when the peseta had been under increasing selling pressure on the foreign exchange markets, and had touched all-time lows against the Deutschemerk on March 3. The new central rates of the peseta and escudo against the ecu are 162.493 and 195.792 respectively.

The main trend in financial markets in recent weeks which culminated in this devaluation has been the strengthening of the Deutschemerk against the currencies of most of its major trading partners, and in particular against the US dollar. Between the beginning of February and March 7 the mark appreciated by around 8% against the US dollar, 12% against the lire, 6% against sterling and 3% against the French franc, which fell to new record lows against the mark, as did the Swedish krone, the lire and the peseta. Interest rates were increased at various points in Italy, Spain, Ireland, France, Denmark and Belgium in order to lend support to currencies. However, against the Dutch guilder and Austrian schilling the mark has remained relatively stable.

The weakness of the dollar occurred despite the increase in US interest rates announced by the Federal Reserve on February 1, when both the discount rate and the Fed's target for the rate charged on Federal Funds were increased by 1/2%, to stand at 5.25 and 6% respectively. This was seventh time that US short-term interest rates have risen since February 1994, and had been widely expected by financial markets as a further move against inflation: the US economy grew at an annualised rate of 4.5% in 1994, a growth rate that is considered unsustainable without engendering further inflation.

The following day the Bank of England signalled that bank base rates should be increased by 1/2% to 6.75%, also intended as a further strike against inflation. It was the third increase in UK interest rates in just over five months. Initially, sterling was hardly affected by the announcement, but later, amid political problems, touched all-time lows against the mark, closing in London on March 7 at DM2.2611. Sterling was not helped by the failure of Barings, a UK merchant bank, at the end of February, an event that caused some degree of volatility in world financial markets.

As noted above, the Italian lire has also come under further pressure in recent weeks, falling to more new lows against the mark. It fell to LIT1087 in mid February, and then fell further in the second half of February and the beginning of March, trading below LIT1200 at one point. This value represents a depreciation of over 12% since the beginning of the year, and around 24% since April 1994. The lire gained no support from a 0.75% increase in the Italian discount rate on February 21, which was increased to 8.25%.

GOVERNMENT BOND YIELDS: some stability in yields in January 1995

There was some degree of stability in government bond yields in January, with yields remaining on average either constant or varying by less than 0.1% in the United States, Japan, Denmark, Germany, the Netherlands, Austria and Finland. Yields also changed by very little in Luxembourg and Belgium.

In contrast, both Spanish and Portuguese yields rose by 0.6% in January to 11.7%, which for both countries is their highest level since mid-1993. The yield on Spanish government bonds has increased steadily since reaching a low of 7.8% in January 1994.

There was a sharp increase in the level of real (inflation adjusted) yields during 1994: the average level of real yields in the EU Member States increased from 3.5% at the end of 1993 to 6% at the end of 1994. Finland and Sweden experienced the highest real yields throughout the year, since relatively high nominal yields were combined with low inflation to give real yields of between 8 and 9 per cent for much of 1994.

MONEY SUPPLY: UK M4 growth close to bottom of monitoring range

The rate of growth of M4 in the United Kingdom was 3.6% in the year to December, close to the bottom of the Bank of England's 3-9% monitoring range. The Bank of England also has a target range for the rate of growth of M0, broadly notes and coin and bank's operational deposits at the Bank. In 1994 this aggregate grew by 7.3%, as compared to its target range of 0-4% growth. However, in 1994 the behaviour of this aggregate

has diverged from that of retail sales and inflation data, and thus less emphasis is being placed upon it as a targeted variable.

The growth rate of M2 in the Netherlands turned negative in the 12 months to December 1994, after slowing for much of the year.

FOREIGN OFFICIAL RESERVES: Inflow of reserves into Italy

Italy experienced an inflow of foreign official reserves in December of around 3.6 billion ecu, to take its reserves to just over 25 billion ecu at the end of 1994. This is roughly the same level as at the end of 1993, although during 1994 they have varied between 29 and 21.5 billion ecu. Italy issued a 450 billion bond in November 1994, the proceeds from which may have added to its foreign exchange reserves.

Greece's reserves increased by almost 70% in 1994. At around 11.8 billion ecu, they stand around 5 billion ecu higher than at the end of 1993.

NATIONAL ACCOUNTS: EU GDP up 2.5% in first 9 months of '94

EU gross domestic product rose by 0.7% between second and third quarters of last year. The growth is the same for EU 12 or 15.

This means that in the first nine months of '94 EU GDP was 2.5% up on the same period in '93 - for both 12 and 15.

Largest Q3 rise was in Finland, 1.4%. Next came Italy, 1%. Denmark's GDP fell by 1%. Sweden was the only other Member State to record a fall (0.1%).

The table shows EU growth slightly lower than for United States, Canada and Japan.

ANNUAL INFLATION

The figure - for January - is 3.1%. This is the same as it was for EU 12 in December. Without the addition of the new Member States it would have risen to 3.2% in January.

Retrospective data show that since the beginning of 1993 the EU 15 rate has remained between 3.7% and 3%. In January last year it was 3.3%. During the second half of '94 the annual rate was almost stable (3.1% or 3%).

In January FRANCE remained the lowest with 1.7%. FINLAND shared the second lowest rate with BELGIUM (1.9%). SWEDEN (2.5%) and AUSTRIA (2.7%) were below the average. The UNITED KINGDOM (3.3%) had climbed above the average.

January rates in Member States, in ascending order of inflation, with corresponding figures for a year earlier, are:

	Jan 95 Jan 94	Jan 94 Jan 93		Jan 95 Jan 94	Jan 94 Jan 93
FRANCE	1.7%	1.9%	SWEDEN	2.5%	1.7%
BELGIUM	1.9%	2.4%	AUSTRIA	2.7%	3.1%
FINLAND	1.9%	0.3%	UNITED KINGDOM	3.3%	2.5%

IRELAND**	2.4%	1.4%			
EUR-15	3.1%				

* The CPI for Germany continues to reflect the geographical borders prior to 3 October 1990

** Nov 94 / Nov 93 and Nov 93 / Nov 92

p Provisional

Corresponding rates in some other non-EU countries were: UNITED STATES 2.8% (2.5%), CANADA (Dec) 0.2% (1.7%) JAPAN 0.7% (1.2%), SWITZERLAND 1% (2.1%), NORWAY 2.6% (1.3%) and ICELAND 1.7% (3.2%).

INDUSTRIAL PRODUCTION: Steady rise unchecked

Industrial production in the European Union is currently rising steadily, particularly in the capital goods branches. The seasonally-adjusted EU production index (1990 = 100) for industry was 100.3 in October 1994, 100.7 in November and 103.3 in December.

If we consider the smooth component in the production index, i.e. adjust the series to take account of seasonal and irregular fluctuations, there was an increase of +0.3 for EUR 12 in the fourth quarter over the third quarter.

The corresponding figure for the United States was +1.1%, in Japan +0.9%.

In the Member States, the available rates of change in this component in the industrial production index over the quarters in question were as follows: Sweden +3.4%, Ireland +2.6% (estimate), Denmark +1.7%, Italy +1.7%, Spain +1.5%, Germany +1.5%, Austria +1.5% (estimate), Finland +1.3%, United Kingdom +1.1%, France +0.9%, Netherlands +0.5%, Greece -0.4%, Portugal -1.1% (estimate).

EXTERNAL TRADE : Results for August 1994

The European Union's trade deficit fell to ECU 1.9 billion in the first eight months of 1994 from ECU 8.6 a year earlier.

The trade balance recovery is mainly due to the dynamic of the extra-EU exports that increased by 12.5% in the first eight months of 1994 compared to the same period in 1993 while, at the same time, imports went up by 10%.

In the period January-August 1994 the United Kingdom was the EU country that experienced the largest trade deficit which reached ECU 14.1 billion.

The Netherlands' extra-EU imports (including goods consigned to other member states via Dutch harbours) grew very fast in the first eight months of 1994 (+20.7%) while the exports' rate of change was under the EU average (11.4%).

During the period January to August 1994 the BLEU's and Ireland's extra-EU trade recorded the largest rates of growth among the EU member states compared to the same period a year earlier. Imports of both countries registered a percentage change of 23.2%, while the BLEU's exports grew by 24.1% and the Irish by 19.3%.

The extra-EU trade surplus of Germany (the largest among the EU countries) soared to ECU 16 billion compared to ECU 10.8 billion registered in 1993.

During the first eight months of 1994 the Italian exports increased faster than imports compared to the same period a year earlier, respectively 13.2% and 6.2% grow rate.

France's extra-EU trade surplus slightly improved between the above mentioned period in 1994 and a year earlier (from ECU 5 billion in 1993 to ECU 5.5 billion in 1994). Both imports and exports recorded rates of change well under the EU average (6.6% and 6.9% respectively).

In the first eight months of 1994 Denmark experienced almost the same trade surplus registered in the corresponding period one year earlier (ECU 1.6 billion). Between these two periods Danish imports' and exports' rates of change recorded rather close values: respectively 14.4% and 14%.

Between the periods January-August 1993-1994 Spain reduced its trade deficit by ECU 0.3 billion. Spanish extra-EU exports showed a rate of change larger than imports by 4.2 points (respectively 11.5% and 7.3%).

In the period January-August 1994 Greece and Portugal experienced the same trade deficit (ECU 1.9 billion): while Greece improved his external position by ECU 0.8 billion compared to one year earlier, the Portuguese deficit increased by ECU 0.1 billion.

EU AGRICULTURAL PRICES – Largest rise since 1989

EU (12) agricultural prices have seen their largest real increase since 1989.

Producer prices of agricultural products (output) in real terms rose by 2.8% in third quarter 1994 compared to Q3 93. This indicates a reversal of the sustained downward trend in this index from 1989 to first quarter 1994.

Real prices rose in six EU countries – most strongly in Spain (9.7%) and Italy (5.8%). Sharpest fall was in Luxembourg (down 4.9%).

Real prices for crop products rose strongly by 8.9%. This was due mainly to rises for root crops (29.8% – resulting principally from a 75.1% increase in the price of potatoes for consumption); fresh vegetables (24.3%); fruit (12.1%); and wine must and wine (8.7%). However, cereals and rice were down for the fifth successive quarter (by 6.9%) – a consequence of CAP reform.

In contrast to crops, real producer prices for animals and animal products were down by 2%, notably milk (-2.1%), cattle (-4.2%), calves (-8.3%) and eggs (-10.7%). However, real prices for pigs, after falling steeply for several quarters, rose strongly by 5.4%. EUROSTAT comments: „The pig population survey of August 1994 showed a decline of 2.2% over the year, perhaps heralding an end to the crisis in this sector.“

The real index for purchase prices for agricultural production (input) fell by 1.7%, continuing the trend in each quarter since 1989.

As a result, real agricultural terms of trade in the EU rose strongly by 4.7% from Q3 93 to Q3 94. However, the level is still around 6.7% down on 1985. Luxembourg (-2.8%) and Ireland (-2.3%) were the only countries to record a fall in Q3: they have small crop sectors and drew little benefit from the rises in crop product prices.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent de la base de données New Cronos. New Cronos se compose de l'ancien Cronos et de Regio, représentés non plus sous forme de séries chronologiques mais de tableaux multidimensionnels. New Cronos constitue en fait un des produits de diffusion émanant directement de l'environnement de Référence. Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX DE CHANGE: Réalignement du MTC

La peseta espagnole et l'escudo portugais ont été dévalués au sein du mécanisme des taux de change (MTC) le 6 mars de, respectivement, 7 et 3,5 %, après une période au cours de laquelle la peseta avait fait l'objet de pressions à la vente croissantes sur les marchés de change étrangers, descendant le 3 mars à son niveau le plus bas jamais enregistré par rapport au deutsche mark. Les nouveaux taux pivots de la peseta et de l'escudo par rapport à l'écu sont de, respectivement, 162,493 et 195,792.

La principale tendance sur les marchés financiers au cours de ces dernières semaines, qui s'est terminée par cette dévaluation, a été le redressement du deutsche mark par rapport aux monnaies de la plupart de ses principaux partenaires commerciaux et, en particulier, au dollar US. Entre le début de février et le 7 mars, le mark s'est apprécié d'environ 8 % par rapport au dollar US, de 12 % par rapport à la lire, de 6 % par rapport à la livre sterling et de 3 % par rapport au franc français, qui a enregistré de nouvelles baisses record par rapport au mark, de même que la couronne suédoise, la lire et la peseta. Afin de soutenir les monnaies, les taux d'intérêt ont augmenté sur diverses places financières d'Italie, d'Espagne, d'Irlande, de France, du Danemark et de Belgique. Toutefois, le mark est resté relativement stable par rapport au florin néerlandais et au shilling australien.

Le dollar a faibli malgré la hausse des taux d'intérêt aux États-Unis, annoncée par le Federal Reserve System le 1er février, date à laquelle le taux d'escompte et l'objectif du taux de change des fonds fédéraux ont augmenté de 1/2 % pour s'établir à, respectivement, 5,25 et 6 %. C'était la septième fois que les taux d'intérêt à court terme augmentaient aux États-Unis depuis février 1994, hausse largement attendue par les marchés financiers, comme nouvelle mesure destinée à faire échec à l'inflation: la croissance annualisée de l'économie américaine atteignait 4,5 % en 1994, taux considéré comme impossible à maintenir sans risquer d'engendrer une nouvelle inflation.

Le jour suivant, la Banque d'Angleterre a indiqué que les taux de base bancaires devaient être relevés de 1/2 % pour s'établir à 6,75 %, mesure destinée, par ailleurs, à réduire encore l'inflation. C'était la troisième hausse des taux d'intérêt au Royaume-Uni en un peu plus de cinq mois. La livre sterling que cette annonce n'avait, sur le moment, guère ébranlée, a, plus tard – des problèmes politiques venant s'ajouter – chuté à son plus bas historique contre le deutsche mark, pour atteindre en clôture 2,2611 DM à Londres le 7 mars. L'état de la livre sterling ne s'est pas amélioré avec la faillite de la Banque commerciale britannique Barings, fin février, événement qui a entraîné une forte instabilité sur les marchés financiers mondiaux.

Comme indiqué ci-dessus, la lire italienne a, elle aussi, subi de nouvelles pressions ces dernières semaines, enregistrant de nouveaux plus bas contre le deutsche mark. Descendue à 1 087 liras à la mi-février, elle a enregistré une nouvelle baisse dans la deuxième quinzaine et au début de mars, pour s'échanger au dessous de 1 200 liras à un moment donné, ce qui représente une dépréciation de plus de 12 % depuis le début de l'année, et d'environ 24 % depuis avril 1994. La lire n'a pas profité de la hausse de 0,75 % du taux d'escompte italien qui a été porté à 8,25 % le 21 février.

RENDEMENT DES OBLIGATIONS D'ÉTAT: une certaine stabilisation des rendements en janvier 1995

L'on observait en janvier une certaine stabilité des rendements des obligations d'État, qui, en moyenne, se sont maintenus ou ont varié de moins de 0,1 % aux États-Unis, au Japon, au Danemark, en Allemagne, aux Pays-Bas, en Autriche et en Finlande. Les rendements ont également très peu varié au Luxembourg et en Belgique.

En revanche, en Espagne et au Portugal, les rendements ont augmenté de 0,6 % en janvier pour atteindre 11,7 %, leur plus haut niveau dans ces deux pays depuis le milieu de 1993. Le rendement sur les obligations d'État en Espagne a augmenté régulièrement depuis son point le plus bas de 7,8 % atteint en janvier 1994.

En 1994, le niveau des rendements réels (corrigé pour tenir compte de l'inflation) a accusé une nette hausse: le niveau moyen des rendements réels dans les États membres de l'UE est passé de 3,5 % à la fin de 1993 à 6 % à la fin de 1994. La Finlande et la Suède ont connu la plus forte hausse des rendements réels pendant toute l'année; en effet, des rendements nominaux relativement élevés se sont combinés à une

inflation faible pour donner des rendements réels compris entre 8 et 9 % pendant la plus grande partie de 1994.

MASSE MONÉTAIRE: le taux de croissance de M4 au Royaume-Uni presque au niveau plancher à l'intérieur de la fourchette indicative fixée

Au Royaume-Uni, le taux de croissance de M4 a été de 3,6 % au cours de l'année se terminant en décembre, soit presque au niveau plancher à l'intérieur de la fourchette indicative de 3-9 % fixée par la Banque d'Angleterre. Par ailleurs, la Banque d'Angleterre a fixé une fourchette pour le taux de croissance de M0, généralement la monnaie fiduciaire et les dépôts des banques commerciales auprès de la Banque. En 1994, cet agrégat a augmenté de 7,3 % par comparaison avec la fourchette de 0-4 % visée. Toutefois, en 1994, le comportement de cet agrégat a divergé de celui des ventes au détail et des données sur l'inflation, le rendant ainsi moins intéressant en tant que variable cible.

Aux Pays-Bas, le taux de croissance de M2 est devenu négatif au cours de la période de douze mois se terminant en décembre 1994, après avoir marqué un certain ralentissement pendant une grande partie de l'année.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: entrée de réserves en Italie

L'Italie a enregistré en décembre des entrées de devises pour environ 3,6 milliards d'écus, portant ainsi ses réserves à un peu plus de 25 milliards d'écus à la fin de 1994. Le niveau est à peu près le même qu'à la fin de 1993, encore qu'elles aient oscillé entre 29 et 21,5 milliards d'écus. L'Italie a procédé à une émission obligataire à hauteur de 450 milliards de yens en novembre 1994, dont le montant peut s'être ajouté à ses réserves officielles de change.

Les réserves de la Grèce ont augmenté de près de 70 % en 1994. Avec environ 11,8 milliards d'écus, elles dépassent d'environ 5 milliards d'écus leur niveau de la fin de 1993.

COMPTES NATIONAUX : Le PIB de l'UE en hausse de 2,5 % sur les 9 premiers mois de 1994

Le Produit Intérieur Brut de l'UE a augmenté de 0,7 % entre le deuxième et le troisième trimestre de 1994. La croissance est la même que ce soit pour l'UE des 12 ou l'UE des 15.

Ceci indique que sur les neuf premiers mois de 1994, le PIB de l'UE est en hausse de 2,5 % par rapport à la même période en 1993 pour „les 12“ ainsi que pour „les 15“.

La Finlande a enregistré la plus forte croissance au cours du troisième trimestre (1,4 %). L'Italie vient ensuite avec +1 %. Le PIB du Danemark a baissé de 1 %. La Suède est le seul autre Etat-membre à enregistrer une baisse (-0,1 %).

Le tableau montre que la croissance pour l'UE est plus faible que pour les États-Unis, le Canada et le Japon.

INFLATION ANNUELLE

Le taux est de 3,1 % pour janvier. Il est le même que celui de décembre pour l'„UE des 12“. Sans l'influence des nouveaux Etats Membres, l'inflation aurait augmenté; le taux serait passé en janvier à 3,2 % pour les „12“.

FR

Des données retrospectives montrent que depuis le début de 1993, le taux de l'UE des 15^e a oscillé entre 3,7 % et 3 %. En janvier 1994, il était de 3,3 %. Durant les six derniers mois de l'année 1994, le taux était presque stable (3,1 % ou 3 %).

En janvier, la FRANCE avait toujours le taux le plus bas (1,7 %). La FINLANDE et la BELGIQUE se sont partagé le second taux le plus bas (1,9 %). La SUEDE (2,5 %) et l'AUTRICHE (2,7 %) étaient en dessous de la moyenne. Le ROYAUME-UNI (3,3 %) est passé au-dessus de la moyenne.

Voici les taux enregistrés en janvier, classés par ordre croissant, pour chaque Etat membre ainsi que les chiffres correspondants pour l'année précédente:

	Jan 95	Jan 94		Jan 95	Jan 94
	Jan 94	Jan 93		Jan 94	Jan 93
FRANCE	1,7 %	1,9 %	SUEDE	2,5 %	1,7 %
BELGIQUE	1,9 %	2,4 %	AUTRICHE	2,7 %	3,1 %
FINLANDE	1,9 %	0,3 %	ROYAUME-UNI	3,3 %	2,5 %
DANEMARK	2,3 %	1,7 %	ITALIE	4,0 % p	4,4 %
ALLEMAGNE*	2,3 %	3,5 %	ESPAGNE	4,4 %	4,9 %

* L'IPC pour l'Allemagne continue de refléter les frontières d'avant le 3 octobre 1990

** nov 94 / nov 93 et nov 93 / nov 92

p Provisoire

Voici les taux correspondants pour quelques autres pays non membres de l'UE: ETATS-UNIS 2,8 % (2,5 %), CANADA (Dec) 0,2 % (1,7 %), JAPON 0,7 % (1,2 %), SUISSE 1 % (2,1 %), NORVEGE 2,6 % (1,3 %) et l'ISLANDE 1,7 % (3,2 %).

PRODUCTION INDUSTRIELLE : Reprise stable et sans entraves

La production industrielle de l'Union européenne est en croissance constante pour le moment, notamment dans les branches économiques de l'industrie des biens d'investissement. L'indice de la production UE (1990=100), corrigé des variations saisonnières, de l'industrie a atteint 100,3 en octobre 1994, 100,7 en novembre et 103,3 en décembre. Si l'on considère la composante tendance-cycle de l'indice de production, i.e. si l'on élimine les fluctuations saisonnières et irrégulières, au quatrième trimestre, nous constatons une hausse de +0,3 % de EUR12 par rapport au trimestre précédent.

Aux USA, le même taux de croissance s'est élevé à +1,1 %, et à +0,9 % au Japon.

Dans les Etats membres, le taux de variation, dans la mesure où il est disponible, de la tendance-cycle de l'indice de production dans la comparaison trimestrielle se présente comme suit: Suède +3,4 %, Irlande +2,6 % (estimation), Danemark +1,7 %, Italie +1,7 %, Espagne +1,5 %, Allemagne +1,5 %, Autriche +1,5 % (estimation), Finlande +1,3, Royaume-Uni +1,1 %, France +0,9 %, Pays-Bas +0,5 %, Grèce -0,4 %, Portugal -1,1 % (estimation).

COMMERCE EXTÉRIEUR : Résultats d'août 1994

Au cours des huit premiers mois de 1994, le déficit du commerce extérieur de l'Union européenne a été ramené à 1,9 milliard d'écus alors qu'il était de 8,6 milliards d'écus un an auparavant.

Ce redressement de la balance commerciale est dû essentiellement au dynamisme des exportations extra-UE qui ont augmenté de 12,5 % au cours des huit premiers mois de 1994 comparé à la même période de 1993 alors que, dans le même temps, les importations ont progressé de 10 %.

Au cours de la période de janvier à août 1994, le Royaume-Uni a, parmi les pays UE, enregistré le plus fort déficit commercial (14,1 milliards d'écus).

Les importations extra-UE des Pays-Bas (y compris les marchandises destinées à d'autres Etats membres et transitant par les ports néerlandais) ont augmenté très rapidement au cours des huit premiers mois de 1994 (+20,7 %) alors que le taux de variation des exportations était inférieur à la moyenne UE (11,4 %).

Entre janvier et août 1994, le commerce extra-UE de l'UEBL et de l'Irlande a enregistré les plus forts taux de croissance des Etats membres de l'UE, comparé à la même période une année auparavant. Les importations de ces deux pays ont progressé de 23,2 %, alors que les exportations de l'UEBL augmentaient de 24,1 % et les exportations irlandaises de 19,3 %.

L'excédent commercial extra-UE de l'Allemagne (le plus élevé de tous les pays UE) a fait un bond pour atteindre 16 milliards d'écus comparé à 10,8 milliards d'écus en 1993.

Durant les huit premiers mois de 1994, les exportations italiennes ont augmenté plus rapidement que les importations comparé à la même période de l'année précédente, respectivement 13,2 % et 6,2 %.

L'excédent commercial extra-UE de la France s'est légèrement amélioré entre la période susmentionnée de 1994 et la même période de l'année précédente (passant de 5 milliards d'écus en 1993 à 5,5 milliards d'écus en 1994). Les importations et les exportations ont toutes deux enregistré des taux de variation nettement inférieurs à la moyenne UE (6,6 % et 6,9 % respectivement).

Au cours des huit premiers mois de 1994, le Danemark a réalisé presque le même excédent commercial que l'année précédente pour la même période (1,6 milliard d'écus). Entre ces deux périodes, les taux de variation des importations et des exportations ont été très proches: 14,4 % et 14 %.

Entre les périodes janvier-août 1993 et 1994, l'Espagne a réduit son déficit commercial de 0,3 milliard d'écus. Les exportations extra-UE de l'Espagne accusaient un taux de variation supérieur de 4,2 points à celui des importations (11,5 % et 7,3 % respectivement).

Au cours de la période janvier-août 1994, la Grèce et le Portugal ont enregistré le même déficit commercial (1,9 milliard d'écus): alors que la Grèce améliorait sa position extérieure de 0,8 milliard d'écus par rapport à l'année précédente, le déficit portugais augmentait de 0,1 milliard d'écus.

LES PRIX AGRICOLES DANS L'UE: La plus forte hausse depuis 1989

Les prix agricoles dans l'UE (des 12) enregistrent une hausse en termes réels la plus importante depuis 1989.

Les prix à la production des produits agricoles (output) en termes réels ont augmenté de 2,8 % entre les troisième trimestres de 1993 et 1994. Ceci indique un renversement de la tendance à la baisse de cet indice observée de 1989 jusqu'au premier trimestre de 1994.

Les prix réels ont augmenté dans six Etats membres de l'UE, les hausses les plus importantes étant enregistrées en Espagne (9,7 %) et en Italie (5,8 %). Le Luxembourg enregistre la baisse la plus importante (-4,9 %).

Les prix réels des végétaux ont augmenté fortement (+8,9 %). Cette hausse est due principalement à celle des prix réels des plantes sarclées (+29,8 %, résultant essentiellement de la flambée des prix des pommes de terre de consommation (+75,1 %)), des légumes frais (24,3 %), des fruits (12,1 %) du moût et du vin (8,7 %). Cependant, les céréales et le riz ont baissé pour le cinquième trimestre consécutif (-6,9 %), cette diminution étant une conséquence de la réforme de la PAC.

Contrairement aux produits végétaux, les prix réels des animaux et produits animaux ont régressé de 2 %. Des baisses sont notamment observées pour le lait (-2,1 %), les bovins (-4,2 %), les veaux (-8,3 %) et les oeufs (-10,7 %). Cependant, les prix réels des porcins, qui avaient fortement diminué pendant plusieurs trimestres, ont augmenté nettement (+5,4 %). EUROSTAT indique que: „L'enquête sur la population porcine, menée en août 1994, fait apparaître une réduction du cheptel porcin (-2,2 %) par rapport à l'année précédente, ce qui annonce peut-être la fin de la crise dans ce secteur.“

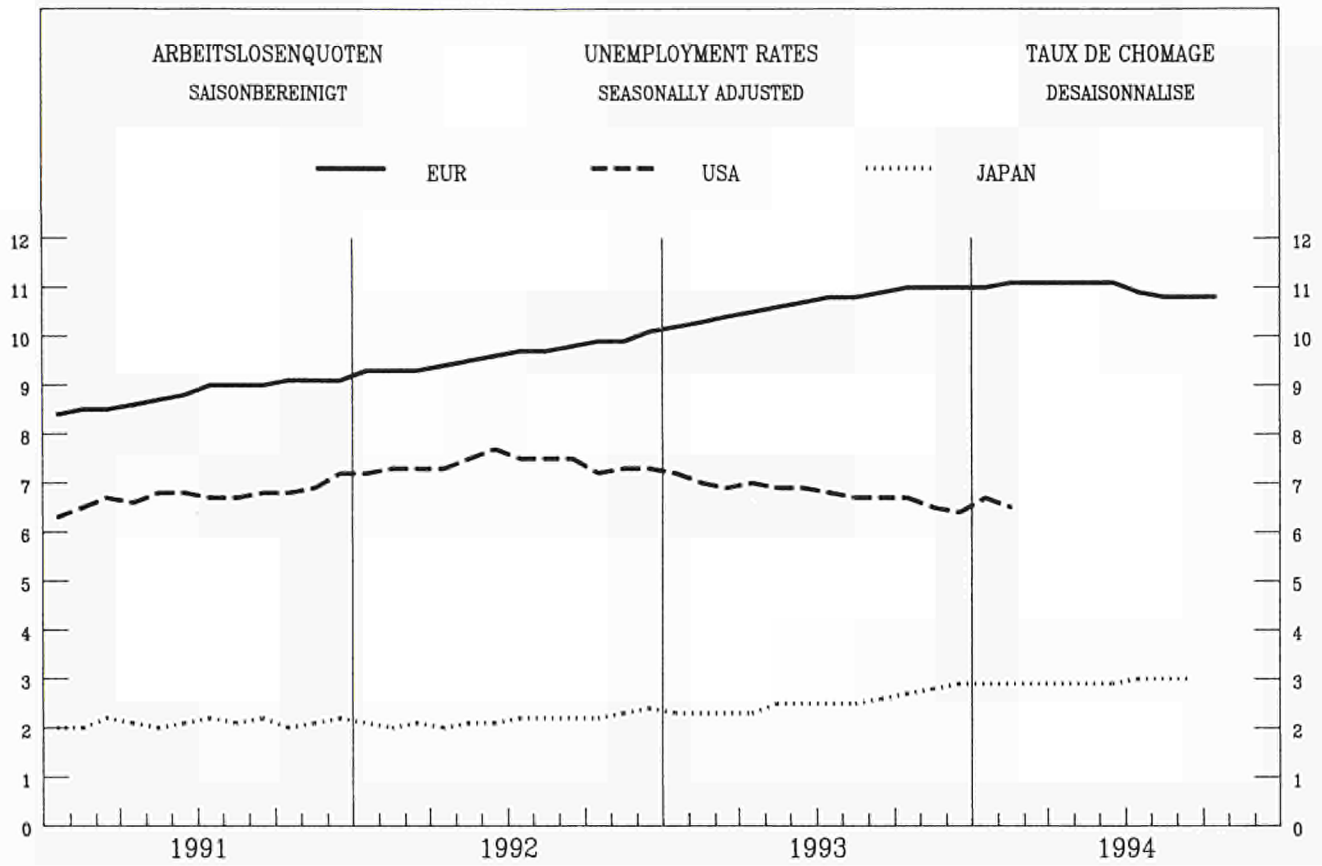

L'indice des prix réels d'achat des moyens de production agricole (input) a reculé de 1,7 %, poursuivant ainsi la tendance observée au cours de chaque trimestre depuis 1989.

Il en résulte une forte augmentation (+4,7 %) des termes de l'échange réels dans l'UE entre les troisième trimestres de 1993 et 1994. Cependant, l'indice est encore inférieur d'environ 6,7 % au niveau de 1985. Le Luxembourg (-2,8 %) et l'Irlande (-2,3 %) sont les seuls pays à enregistrer une baisse au cours du troisième trimestre: Ces deux pays ont des secteurs de la production végétale peu développés et profitent ainsi moins des hausses des prix des produits végétaux.
