Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat. Encomendas: serviços de venda cujos endereços estão indicados na contracapa.

Printed in Germany

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in Eurostatistik veröffentlichten Daten stammen aus der Datenbank New Cronos. New Cronos setzt sich zusammen aus dem alten Cronos sowie REGIO und ist nicht mehr in Form von Zeitreihen, sondern in Form von multidimensionalen Tabellen dargestellt. New Cronos ist somit eines der Produkte zur Verbreitung statistischer Daten, das direkt aus der Eurostat - Referenzdatenbank gespeist wird. Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Senkung der deutschen Zinssätze

Am 30. März gab die Bundesbank eine Senkung der deutschen Zinssätze bekannt: Der Diskontsatz wurde um 0,5 % auf 4 % und der Zinssatz für Wertpapierpensionsgeschäfte um 0,35 % auf 4,5 % zurückgenommen. Es war dies die erste Änderung des letztgenannten Zinssatzes seit Juli 1994 und die erste Änderung des Diskontsatzes seit Mai 1994.

Die Senkung der deutschen Zinssätze war auf den Kapitalmärkten nicht in vollem Umfang vorhergesehen worden. Auf sie folgten ähnliche Herabsetzungen der Zinssätze durch die Zentralbanken von Belgien, den Niederlanden, Österreich und der Schweiz.

Im Anschluß an die Bekanntgabe der Zinssatzsenkung war eine Abschwächung der D-Mark gegenüber den Währungen anderer EU-Mitgliedstaaten zu verzeichnen: Sie büßte nahezu 4 Centimes gegenüber dem französischen Franc ein, der am 30. März in London bei 3,492 FF schloß, und 1 Pfennig (auf 2,2525 DM) gegenüber dem Pfund Sterling, das am 17. März bei einem historischen Tiefstand von 2,189 DM gelegen hatte.

Der US-Dollar mußte während des ganzen Monats März weitere Kursverluste hinnehmen und fiel erstmals seit September 1992 unter die Marke von 1,40 DM. Obgleich er sich unmittelbar nach dem Beschluß der Bundesbank wieder etwas festigen konnte und am 30. März in London mit 1,4107 DM schloß, fiel er am folgenden Tag erneut auf nur 1,3685 DM zurück. Gegenüber dem japanischen Yen verzeichnete der Dollar ein neues Nachkriegs-Rekordtief: Am 23. März wurde er mit 87,95 Yen und am 31. März mit 86,20 Yen gehandelt.

Zuvor hatten bereits die italienische Lira, das Pfund Sterling und die schwedische Krone gegenüber der deutschen Währung an Wert eingebüßt. Die Lira lag gegenüber der D-Mark bei 1275 LIT, konnte jedoch Ende März wieder auf etwa 1240 LIT anziehen. Die schwedische Krone schloß am 29. März bei 5,32 Skr und lag damit um rund 11 % unter ihrem Stand zu Jahresbeginn, während auf den Kapitalmärkten wegen der Situation der öffentlichen Finanzen Schwedens einige Nervosität herrschte. Nach der deutschen Zinssatzsenkung stieg die Krone wieder geringfügig auf 5,27 Skr, die Erholung war allerdings nur von kurzer Dauer, denn am 31. März hatte sie erneut einen Tiefstand von 5,39 Skr erreicht.

Im Anschluß an die Abwertung der Peseta innerhalb des Wechselkursmechanismus am 6. März gaben die spanischen Behörden am 14. März eine Anhebung des Satzes für Zehntages-Wertpapierpensionsgeschäfte um 0,5 % bekannt. Die spanischen kurzfristigen Zinssätze liegen nun wieder auf dem gleichen Stand wie vor 12 Monaten. Zinserhöhungen gab es auch in Irland, wo der Satz für kurzfristige Fazilitäten gleich zweimal innerhalb einer Woche angehoben wurde: am 6. März von 6,25 % auf 6,75 % und danach am 9. März auf 7,25 %. Als Ziel dieser Maßnahmen wurde die Aufrechterhaltung der relativen Position des irischen Pfund innerhalb des Wechselkursmechanismus genannt.

Ende März stand an der Spitze des Wechselkursmechanismus weiterhin der holländische Gulden, gefolgt vom belgischen Franc, der D-Mark, dem Schilling, dem Escudo, der dänischen Krone, dem französischen Franc, dem irischen Pfund und der Peseta.

Eine Abwertung des Forint, der an einen Korb von 70/30 ECU/US-\$ geknüpft ist, um 9 % wurde am 13. März von der ungarischen Regierung bekanntgegeben. Überdies wurden weitere monatliche Abwertungen um jeweils 1,9 % für die nächsten drei Monate sowie um 1,3 % pro Monat in der zweiten Jahreshälfte angekündigt. Mit der Abwertung sollen die Defizite in der ungarischen Handels- und Leistungsbilanz abgebaut werden.

RENDITEN VON STAATSANLEIHEN: Im Februar 1995 in vielen Ländern rückläufige Renditen

Die Renditen von Staatsanleihen waren im Februar in allen beobachteten Ländern, aus denen Daten vorliegen, entweder rückläufig oder konstant. Die stärksten Rückgänge wurden in Italien, Spanien, Schweden und Japan verzeichnet.

Innerhalb der EU liegen die Renditen auf dem niedrigsten Stand in Luxemburg, gefolgt von Deutschland und Österreich, die höchsten Renditen verzeichnen Spanien und Portugal, wo sie jeweils bei über 11 % liegen.

In den Vereinigten Staaten sind die Renditen von Staatsanleihen nunmehr deutlich unter 8 % zurückgefallen (Durchschnittswert im Februar: 7,7 %), nachdem sie im letzten Quartal 1994 bei Werten zwischen 8 % und 8,2 % gelegen hatten. Nichtsdestoweniger sind sie noch immer höher als die deutschen Renditen.

Mit 3,3 % im Februar verzeichneten die Renditen in Japan ihren niedrigsten Stand seit Mitte 1994.

GELDEVOLUMEN: Wachstum der Geldmenge M3 in Deutschland innerhalb des Zielkorridors für 1994

Die Wachstumsrate der Geldmenge M3 in Deutschland hat sich im zweiten Halbjahr 1994 beträchtlich verlangsamt, so daß die Bundesbank ihre Zielvorgabe für 1994 erreichen konnte. Vergleicht man das vierte Quartal 1994 mit dem gleichen Zeitraum 1993, so lag die Wachstumsrate von M3 bei durchschnittlich 5,7 % und somit gerade noch innerhalb des Zielkorridors von 4-6 %. Für 1995 bleibt dieser Zielbereich für das M3-Wachstum unverändert.

In Spanien betrug die ALP-Wachstumsrate im Jahresdurchschnitt etwas mehr als 7 % und lag somit Ende 1994 ebenfalls knapp innerhalb ihres Zielkorridors von 4,5-7,5 %.

In Dänemark und in den Niederlanden war 1994 eine Geldverknappung zu beobachten. In Frankreich hingegen lag die Geldmenge M3 Ende 1994 nach mehreren Monaten negativer Wachstumsraten um 2,3 % höher als im Dezember 1993.

AMTLICHE WÄHRUNGSRESERVEN: Abfluß von Reserven aus Belgien

Belgien verzeichnete im Januar 1995 einen Abfluß seiner amtlichen Währungsreserven in Höhe von rund 0,6 Mrd. Ecu, dies entspricht rund 5,7 % seiner Gesamtreserven. Ein prozentual ähnlich hoher Devisenabfluß war im gleichen Monat in Dänemark zu beobachten.

Die drei neuen EU-Mitglieder Österreich, Finnland und Schweden verzeichneten 1994 allesamt Devisenzuflüsse. Im Falle Finnlands beliefen sich diese Zuflüsse auf nahezu 80 %, so daß die finnischen Gesamtreserven ohne Gold Ende 1994 bei 8,7 Mrd. Ecu lagen. Während dieses Zeitraums gewann die Finnmark gegenüber dem Ecu 10 % und gegenüber dem US-Dollar 18 % an Wert.

EU-TEUERUNG Im Februar leicht verstärkt

Die jährliche Inflationsrate der EU lag im Februar bei 3,1 %. Die Preise haben sich damit gegenüber dem berichtigten Januarwert von 3 % leicht erhöht. Auch in den drei Monaten davor hatte die Rate konstant bei 3 % gelegen; im Februar letzten Jahres betrug sie 3,3 %.

Frankreich hatte mit vorläufig 1,7 % wiederum die niedrigste Inflationsrate. Eine geringe Teuerung hatten auch Finnland und Belgien, beide 1,8 %. Die beiden anderen neuen Mitgliedsländer Österreich (2,4 %) und Schweden (2,6 %) blieben ebenfalls noch unter dem EU-Durchschnitt.

Für die Inflationsraten der Mitgliedsländer im Februar — mit entsprechenden Vorjahreszahlen — ergibt sich folgende ansteigende Reihenfolge (Die Daten für das Vereinigte Königreich und Irland waren nicht rechtzeitig verfügbar und wurden deshalb für die Ermittlung des EU-Wertes von Eurostat geschätzt):

	Feb 95	Feb 94		Feb 95	Feb 94
	Feb 94	Feb 93		Feb 94	Feb 93
FRANKREICH	1,7 % p	1,8 %	NIEDERLANDE	2,4 %	3,0 %
BELGIEN	1,8 %	2,5 %	SCHWEDEN	2,6 %	1,8 %
FINNLAND	1,8 %	0,3 %	VER.		
LUXEMBURG	2,2 %	2,6 %	KÖNIGREICH***	3,3 %	2,5 %
DÄNEMARK	2,3 %	1,8 %	ITALIEN	4,3 % p	4,3 %
IRLAND**	2,4 %	1,4 %	PORTUGAL	4,6 %	6,1 %
DEUTSCHLAND*2,4 %	3,4 %		SPANIEN	4,8 %	5,0 %
ÖSTERREICH	2,4 %	3,2 %	GRIECHENLAND	10,4 %	11,0 %
EUR-15	3,1 % p	3,3 %			

* Der Verbraucherpreisindex für die Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3.10.90. In den neuen Ländern betrug die Inflationsrate im Februar 2 % gegenüber dem Vorjahresmonat.

** Nov 94 / Nov 93 und Nov 93 / Nov 92

*** Jan 95 / Jan 94 und Jan 94 / Jan 93

p Vorläufig

Die Inflationsraten in einigen anderen Staaten: USA 2,5 % (2,5 %), Kanada im Januar 0,6 % (0,2 %), Japan 0,2 % (1,1 %), Schweiz 1,5 % (1,9 %), Norwegen 2,6 % (1,4 %) und Island 1,7 % (2,5 %).

EU-Arbeitslosenquote im Februar bei 11 %

Eurostat schätzt die saisonbereinigte Arbeitslosenquote für die Europäische Union der 15 im Februar auf 11 %, unverändert gegenüber den drei Monaten zuvor. Für die ehemals 12 Mitgliedstaaten wurde ebenfalls eine Quote von 11 % ermittelt.

Eurostat hat in Übereinstimmung mit der OECD und den nationalen statistischen Ämtern die Methode überarbeitet, die zur Ermittlung vergleichbarer EU-Arbeitslosenquoten verwendet wurde. Die Schätzungen beruhen nun auf neuen, zuverlässigeren Erhebungen und entsprechen nach wie vor den Empfehlungen der ILO. Als eine Folge dieser Veränderung unterscheiden sich die Daten für einige Mitgliedstaaten von den vorher veröffentlichten. Die heute bekanntgegebenen Zahlen beruhen erstmals auf der neuen Basis und sind gleichzeitig auch die ersten für die Union der 15.

Nach den Schätzungen weist Finnland (17,9 % — Daten für Januar) nach Spanien (23,5 %) die zweithöchste Arbeitslosenquote auf. Irland liegt mit 14,8 % ebenfalls deutlich über dem EU-Durchschnitt. Schweden bleibt mit 9,1 % unter dem EU-Wert. Die Zahlen für Österreich sind noch nicht verfügbar. Es ist aber zu erwarten, daß die Quote zu den niedrigsten innerhalb der EU gehören wird.

Die bei weitem niedrigste Quote hat gegenwärtig Luxemburg (3,7 %).

Nach den Schätzungen von Eurostat waren im Februar EU-weit etwa 18,1 Millionen Menschen arbeitslos. Dabei handelt es sich um eine saisonbereinigte Zahl, die sich an den Kriterien der Internationalen Arbeitsorganisation (ILO) orientiert.

Anmerkungen

Die Arbeitslosenquote und die Zahl der Arbeitslosen werden nach den Empfehlungen der ILO und unter Berücksichtigung der unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit geschätzt.

INDUSTRIEPRODUKTION: Industrieproduktion in der Europäischen Union der 12 steigt weiter an

In der Europäischen Union der 12 ist die Industrieproduktion im vierten Quartal '94 gegenüber dem Quartal davor saisonbereinigt um 1,3 % gestiegen. Damit verzeichneten die zwölf Mitgliedstaaten im letzten Jahr ein Plus von 4,8 % gegenüber 1993.

In Japan hatte sich der industrielle Output im vierten Quartal um 0,9 % und in den USA um 1,1 % erhöht.

In den Mitgliedstaaten sind die Daten für das vierte Quartal wie folgt (* = geschätzt):

EU 12	1,3 %	Frankreich	0,9 %
Irland*	2,6 %	Niederlande	0,5 %
Dänemark	1,7 %	Griechenland	-0,4 %
Italien	1,7 %	Portugal*	-1,1 %
Spanien	1,5 %	Schweden	3,4 %
Deutschland	1,5 %	Österreich*	1,5 %
Ver. Königreich	1,1 %	Finnland	1,3 %

AUSSENHANDEL

Im dritten Quartal 1994 verzeichnete die Europäische Union einen Handelsbilanzüberschuß von 0,4 Mrd. ECU. Infolgedessen ging das kumulierte Defizit für Januar-September 1994 von 9,4 Mrd. ECU im Vorjahr auf 2,6 Mrd. ECU zurück. Diese Erholung der Handelsbilanz ist hauptsächlich auf die dynamische Entwicklung der Extra-EU-Ausfuhren zurückzuführen, die in den ersten neun Monaten 1994 gegenüber dem gleichen Zeitraum 1993 um 12,2 % zunahmen, während die Einfuhren um 9,9 % stiegen.

Von Januar bis September 1994 weitete sich das Handelsbilanzdefizit der Vereinigten Staaten gegenüber dem gleichen Zeitraum 1993 um 22,2 Mrd. ECU aus und erreichte 108,4 Mrd. ECU (127,7 Mrd. US-Dollar).

Die Veränderungsrate der Einfuhren zwischen den ersten neun Monaten 1993 und dem gleichen Zeitraum 1994 war in ECU gerechnet höher als die der Ausfuhren (14 % gegenüber 10,5 %); in Dollar ausgedrückt beliefen sich diese Werte auf 13,2 % bzw. 9,4 %.

Im September 1994 betrug der Handelsbilanzüberschuß Japans 7,6 Mrd. ECU, womit der kumulierte Überschuß für die ersten neun Monate 1994 bei 78,2 Mrd. ECU lag, gegenüber 75 Mrd. ECU im entsprechenden Zeitraum 1993.

Dieses Ergebnis könnte im wesentlichen durch die Wertsteigerung des Yen zu erklären sein (9,6 % gegenüber dem ECU in den ersten drei Monaten 1994). In japanischer Währung gemessen verringerte sich der japanische Überschuß zwischen diesen Zeiträumen um 0,7 Mrd. Yen, was hauptsächlich auf die negative Wachstumsrate der Ausfuhren (-1,2 %) bei gleichzeitigem Anstieg der Einfuhren (+1,6 %) zurückzuführen war. Gemessen in ECU waren die Veränderungsrate sowohl der Ausfuhren als auch der Einfuhren positiv: 8,4 % bzw. 10,7 %.

Der Extra-EU-Handelsbilanzüberschuß Deutschlands (der höchste aller EU-Länder) schnellte auf 17,6 Mrd. ECU empor, verglichen mit 11,9 Mrd. ECU im Jahr 1993.

In der Zeit von Januar bis September 1994 stiegen die Ausfuhren Deutschlands gegenüber dem entsprechenden Vorjahreszeitraum um 13 %, während die Ausfuhren nur um 9,1 % zunahmen.

Die Ausfuhren Italiens stiegen während der ersten neun Monate 1994 gegenüber dem gleichen Vorjahreszeitraum schneller als die Einfuhren, die jeweilige Wachstumsrate betrug 12,8 % bzw. 7 %.

Die Handelsbilanz Italiens ließ eine Erhöhung des Überschusses von 5,9 Mrd. ECU 1993 auf 9,1 Mrd. ECU, also um 3,2 Mrd. ECU, erkennen.

In der Zeit von Januar bis September 1994 hatte das Vereinigte Königreich von allen EU-Ländern mit 15,6 Mrd. ECU das höchste Außenhandelsdefizit zu verzeichnen.

Aufgrund der positiven Differenz zwischen der Wachstumsrate der Ausfuhren und der der Einfuhren (+2,7 Prozentpunkte) erzielte das VK eine leichte Verbesserung seiner außenwirtschaftlichen Position (0,2 Mrd. ECU) gegenüber dem gleichen Zeitraum des Jahres 1993.

Die Extra-EU-Einfuhren der Niederlande — zu denen auch Waren zählen, die über niederländische Häfen in die Union gelangen und danach an andere Mitgliedstaaten geliefert werden — stiegen in den ersten neun Monaten 1994 sehr stark an (+21,2 %), während die Veränderungsrate der Ausfuhren leicht unter dem EU-Durchschnitt lag (11,9 %).

Infolgedessen weitete sich im gleichen Zeitraum das niederländische Defizit im Extra-EU-Handel von 10,1 Mrd. ECU 1993 auf 14,3 Mrd. ECU aus.

In der Zeit von Januar bis September 1994 wies der Extra-EU-Handel der BLWU und Irlands im Vergleich zum Vorjahr von allen EU-Mitgliedstaaten die höchsten Zuwachsraten aus.

In beiden Ländern lag die prozentuale Veränderung der Einfuhren um 0,7 % bzw. 3,1 % über der der Ausfuhren.

In den ersten drei Quartalen 1994 verschlechterte sich die außenwirtschaftliche Position der BLWU verglichen mit dem entsprechenden Zeitraum 1993 (ihr Defizit erhöhte sich von 0,5 Mrd. ECU auf 0,8 Mrd. ECU), während Irland in beiden Zeiträumen den gleichen Überschuß von 0,7 Mrd. ECU auswies.

Der Extra-EU-Handelsbilanzüberschuß Frankreichs erhöhte sich zwischen dem obengenannten Zeitraum 1993 und 1994 geringfügig (von 5,6 Mrd. ECU 1993 auf 6,5 Mrd. ECU 1994). Sowohl die Einfuhren als auch die Ausfuhren verzeichneten Veränderungsrate weit unter dem EU-Durchschnitt (6,5 % bzw. 7,5 %).

In den ersten neun Monaten 1994 verzeichneten die Einfuhren Dänemarks im Vergleich zum entsprechenden Vorjahreszeitraum eine höhere Zuwachsrate als die Ausfuhren (15,2 % gegenüber 13,6 %). Im gleichen Zeitraum verbesserte Dänemark aber seinen Außenhandelsüberschuß, der auf 1,8 Mrd. ECU anstieg, gegenüber 1,7 Mrd. ECU im entsprechenden Zeitraum des Vorjahres.

Zwischen den Zeiträumen Januar-September 1993 und 1994 verringerten Spanien und Griechenland ihre Handelsbilanzdefizite um 0,3 Mrd. ECU bzw. um 0,9 Mrd. ECU.

Von allen EU-Ländern war Griechenland das einzige mit einer negativen Wachstumsrate seiner Einfuhren (-16 % gegenüber dem Vorjahr), während die Ausfuhren nach der kräftigen Zunahme von 1993 nur um 2 % anstiegen.

In Spanien beliefen sich diese prozentualen Veränderungen auf 8,4 % bzw. 12,2 %.

Zwischen den Zeiträumen Januar-September 1993 und 1994 blieb die Außenbilanz Portugals unverändert (Defizit von 2 Mrd. ECU): Während die prozentuale Veränderung der portugiesischen Ausfuhren gegenüber dem entsprechenden Vorjahreszeitraum bei 9 % lag, nahmen die Einfuhren nur um 5,6 % zu.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from Eurostat's on-line database, New Cronos. New Cronos includes old Cronos and Regio, both represented not by chronological series but through multi-dimensional tables. New Cronos is a dissemination product directly from Eurostat's Reference Environment. The data are also available via the Commission host Eurobases in the Eurocron database.

Further information on Eurostat and its products can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: German interest rates cut

On March 30 the Bundesbank announced a reduction in German interest rates: a 0.5% cut in the discount rate to 4% and a 0.35% reduction to 4.5% in the rate to be applied to the following week's repo. This was the first change in the latter rate since July 1994 and the first in the discount rate since May 1994.

The reduction in German rates had not been fully anticipated by the financial markets. It was followed by similar rate decreases by the central banks of Belgium, the Netherlands, Austria and Switzerland.

In the aftermath of the announcement the Deutschemark weakened against the currencies of other EU members, losing almost 4 centimes against the French franc, which closed in London on March 30 at FF 3.492, and 1 pfennig (to DM 2.2525) against sterling, which had touched an all-time low of DM 2.189 on March 17.

The US dollar continued to be weak throughout March, falling below DM 1.40 for the first time since September 1992. Although it strengthened slightly immediately after the Bundesbank's decision, closing in London on March 30 at DM 1.4107, the following day it weakened again to close at DM 1.3685. Against the Japanese yen it reached further post second-war lows: on March 23 it touched 87.95, and on March 31 86.20.

Earlier in March new lows against the German currency were reached by the Italian lire, the UK pound and the Swedish krone. The lire touched LIT 1275 against the mark, although by the end of March it had recovered to around LIT1240. The Swedish krone touched SKr 5.32 on March 29, some 11% lower than its level at the start of the year, amid market nervousness regarding the situation of Sweden's public finances. It recovered slightly after the reduction in German interest rates, to Skr 5.27, although again this recovery was short-lived, since it fell to a further low of Skr 5.39 on March 31.

Following the devaluation of the peseta within the ERM on March 6, the Spanish authorities announced a 0.5% increase in its rate on 10-day repos on March 14. Spanish short-term interest rates are now at the same levels as 12 months ago. There were also interest rate increases in Ireland, where the short-term facility rate was increased twice in one week: from 6.25 to 6.75% on March 6 and then to 7.25% on March 9. The aim of these increases was stated to be the maintenance of the punt's relative position in the ERM.

At the end of March the Dutch guilder remained at the top of the ERM grid, followed by the Belgian franc, mark, schilling, escudo, Danish krone, French franc, punt and peseta.

A 9% devaluation of the forint, which is linked to a 70/30 ECU/US\$ basket, was announced by the Hungarian government on March 13. It was also announced that there would be further monthly devaluations of 1.9% for the next three months, and of 1.3% per month in the second half of the year. The devaluation was aimed at reducing Hungary's trade and current account deficits.

GOVERNMENT BOND YIELDS: yields fall in many countries in February 1995

The yield on government bonds either fell or was stable in February in all countries surveyed for which data are available. The largest falls occurred in Italy, Spain, Sweden and Japan.

Within the EU, yields are lowest in Luxembourg, followed by Germany and Austria, and are highest in Spain and Portugal, where in both cases yields are above 11%.

In the United States government bond yields are now firmly below 8%, averaging 7.7% in February, after having been between 8 and 8.2% for the last quarter of 1994. They remain higher than those of Germany however.

At 3.3% in February, yields in Japan stood at their lowest level since the middle of 1994.

MONEY SUPPLY: Germany's M3 growth within target range for 1994

Germany's M3 growth slowed dramatically in the second half of 1994, allowing the Bundesbank to meet its target for 1994. If the fourth quarter of 1994 is compared to the same period of 1993, M3 growth averaged 5.7%, just inside the target range of 4-6%. For 1995 this target range for M3 growth remains unchanged.

In Spain, the growth rate of ALP was also just within its target range of 4.5-7.5% at the end of 1994, growing at a rate of slightly over 7% over the year.

There was a contraction in the money stock in Denmark and the Netherlands in 1994. However, M3 in France stood 2.3% higher at the end of 1994 as compared to December 1993, following many months of negative growth rates.

FOREIGN OFFICIAL RESERVES: Outflow of reserves from Belgium

Belgium experienced an outflow of some 0.6 billion ecu of foreign official reserves in January 1995, a figure that represents around 5.7% of its total. A similar outflow in percentage terms was experienced by Denmark in the same month.

The three newest entrants to the European Union, Austria, Finland and Sweden, all experienced inflows of reserves in 1994. In the case of Finland, this inflow amounted to almost 80%, to bring its total reserves excluding gold figure to 8.7 billion ecus at the end of 1994. During this period the Finnish markka has appreciated by around 10% against the ecu and 18% against the US dollar.

EU ANNUAL INFLATION: Up slightly in February

EU annual inflation stood at 3.1% in February 1995. This was up slightly on January's revised 3%. The figure for the three previous months was also 3%. Last February it was 3.3%.

France had the lowest rate – a provisional 1.7%; Finland shared the second lowest rate with Belgium (1.8%). Other new Members Austria (2.4%) and Sweden (2.6%) were both below the average.

February rates in Member States, in ascending order of inflation, with corresponding figures for a year earlier, are as follows. Data for the United Kingdom and Ireland were not available in time and were estimated by Eurostat for the compilation of the EU figure.

	Feb 95	Feb 94		Feb 95	Feb 94
	Feb 94	Feb 93		Feb 94	Feb 93
FRANCE	1.7% p	1.8%	NETHERLANDS	2.4%	3.0%
BELGIUM	1.8%	2.5%	SWEDEN	2.6%	1.8%
FINLAND	1.8%	0.3%	UNITED		
LUXEMBOURG	2.2%	2.6%	KINGDOM***	3.3%	2.5%
DENMARK	2.3%	1.8%	ITALY	4.3% p	4.3%
IRELAND**	2.4%	1.4%	PORTUGAL	4.6%	6.1%
GERMANY*	2.4%	3.4%	SPAIN	4.8%	5.0%
AUSTRIA	2.4%	3.2%	GREECE	10.4%	11.0%
EUR 15	3.1%	3.3%			

* The CPI for Germany continues to reflect the geographical borders prior to 3 October 1990. Inflation in the new Länder in February was 2% compared with February 1994

** Nov 94 / Nov 93 and Nov 93 / Nov 92

*** Jan 95 / Jan 94 and Jan 94 / Jan 93

p Provisional

Corresponding rates in some other non-EU countries were: United States 2.5% (2.5%), Canada (Jan) 0.6% (0.2%), Japan 0.2% (1.1%), Switzerland 1.5% (1.9%), Norway 2.6% (1.4%) and Iceland 1.7% (2.5%).

EU UNEMPLOYMENT – 11% In February 1995

Eurostat estimates EU 15 seasonally-adjusted unemployment in February at 11% – same as the three months before. The February figure for the previous 12 Member States is also 11%.

Eurostat, in agreement with OECD and national statistical offices, has revised the methods used to calculate comparable EU unemployment rates; the estimates are based on new and more reliable surveys and were already in line with ILO recommendations. As a result, data for some Member States are different to previously published. Today's figures are first on the new basis, as well as the first for EU 15.

The estimates show that Finland (17.9% – January figure) has the second highest rate after Spain (23.5%). Ireland (14.8%) is also significantly higher than the EU average. Sweden (9.1%) is below the average and the figure for Austria, when available, is expected to be one of the lowest. Lowest by far at present is Luxembourg's 3.7%.

Eurostat estimates that around 18.1 million people were unemployed in the EU in February. This is a seasonally-adjusted figure in line with ILO criteria.

Note

The unemployment rate and numbers of unemployed are estimated according to ILO recommendations after taking account of the differences between national methods of recording unemployment.

INDUSTRIAL PRODUCTION: European Union of twelve industrial production still rising

European Union of twelve industrial production, seasonally adjusted, rose by 1.3% in the fourth quarter last year compared to the previous quarter. This means that industrial production rose by 4.8% in 1994 compared to 1993.

In comparison quarterly output in Japan was up 0.9% and in the USA 1.1%.

Figures for Q4 are (* = estimate):

EU 12	1.3%	France	0.9%
Ireland*	2.6%	Netherlands	0.5%
Denmark	1.7%	Greece	-0.4%
Italy	1.7%	Portugal*	-1.1%
Spain	1.5%	Sweden	3.4%
Germany	1.5%	Austria*	1.5%
United Kingdom	1.1%	Finland	1.3%

EXTERNAL TRADE

In the third quarter of 1994 the European Union recorded a trade surplus of ECU 0.4 billion: as a consequence the cumulated deficit for January-September 1994 fell to ECU 2.6 billion from ECU 9.4 registered a year earlier.

The trade balance recovery is mainly due to the dynamic of the extra-EU exports that increased by 12.2% in the first nine months of 1994 compared to the same period in 1993 while, at the same time, imports went up by 9.9%.

From January to September 1994 the United States' trade deficit recorded an ECU 22.2 billion increase compared to the same period in 1993, reaching ECU 108.4 billion (US dollars 127.7 billion).

In ECU terms the imports' rate of change between the first nine months of 1993 and 1994 was larger than that of exports (14% against 10.5%); if measured in US dollars these figures were respectively 13.2% and 9.4%.

In September 1994 Japan's trade surplus totaled ECU 7.6 billion which lead the cumulated surplus for the 1994's first nine months to ECU 78.2 billion, compared to ECU 75 billion recorded in the same period of 1993.

This result could be explained mainly by the appreciation of the YEN (9.6% against the ECU in the first three months of 1994). As a matter of fact, if measured in the Japanese currency, the Japanese surplus showed

a reduction of YEN 700 billion between these two periods, mainly due to the exports' negative rate of growth (-1.2%) while imports grew by 1.6%.

In ECU terms the rates of change of exports and imports were both positive: respectively 8.4% and 10.7%.

The extra-EU trade surplus of Germany (the largest among the EU countries) soared to ECU 17.6 billion compared to ECU 11.9 billion registered in 1993.

In the period January-September 1994 German exports showed a 13% increase compared to the corresponding period of the previous year, while imports grew only by 9.1%.

During the first nine months of 1994 the Italian exports increased faster than imports compared to the same period a year earlier, the growth rate being respectively 12.8% and 7%.

The Italian trade balance improved its surplus by ECU 3.2 billion, reaching ECU 9.1 billion, from ECU 5.9 billion recorded in 1993.

In the period January-September 1994 the United Kingdom was the EU country that experienced the largest trade deficit which reached ECU 15.6 billion.

The UK's trade position showed a slight improvement (ECU 0.2 billion) with reference to the same period of 1993 due to the positive gap between the exports' and imports' growth rates (+2.7 points).

The Netherlands' extra-EU imports – which include goods entering the Union via Dutch harbours and than delivered to other member states – grew very fast in the first nine months of 1994 (+21.2%) while the exports' rate of change was slightly under the EU average (11.9%).

As a consequence in the same period the Dutch extra-EU deficit increased to ECU 14.3 billion compared to 1993's ECU 10.1 billion.

During the period January to September 1994 the BLEU's and Ireland's extra-EU trade recorded the largest rates of growth among the EU member states compared to the same period a year earlier.

Imports of both countries registered a percentage change larger than exports respectively by 0.7% and 3.1%.

In the first three quarters of 1994 the external trade position of the BLEU worsened if compared to the same period in 1993 (the deficit went up to ECU 0.8 billion from ECU 0.5 billion), while Ireland showed in both periods the same ECU 0.7 billion surplus.

France's extra-EU trade surplus improved between the above mentioned period in 1994 and a year earlier (from ECU 5.6 billion in 1993 to ECU 6.5 billion in 1994). Both imports and exports recorded rates of change well under the EU average (6.5% and 7.5% respectively).

In the first nine months of 1994 Danish imports recorded a rate of growth larger than exports (15.2% against 13.6%) compared to the same period a year earlier. In the same period Denmark still improved its external surplus reaching ECU 1.8 billion compared to ECU 1.7 billion registered in the corresponding period one year earlier.

Between the periods January-September 1993-1994 Spain and Greece reduced their trade deficits respectively by ECU 0.3 billion and ECU 0.9 billion.

Among the EU countries Greece was the only which experienced a negative rate of growth of its imports (-16% compared to the previous year) while exports, after the boom experienced in 1993, went up of only 2%.

As far as Spain is concerned these percentage changes were respectively 8.4% and 12.2%.

Between the periods January-September 1993 and 1994 the external balance of Portugal remained unchanged (ECU 2 billion deficit); while Portuguese exports percentage change on the correspondent period of the previous year was 9% the imports went up by only 5.6%.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent de la base de données New Cronos. New Cronos se compose de l'ancien Cronos et de Regio, représentés non plus sous forme de séries chronologiques mais de tableaux multidimensionnels. New Cronos constitue en fait un des produits de diffusion émanant directement de l'environnement de Référence. Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

Sauf indications contraires, les données portent sur le territoire de la République fédérale d'Allemagne avant le 3.10.1990, Berlin-Ouest inclus.

TAUX DE CHANGE: baisse des taux d'intérêt allemands

Le 30 mars, la Bundesbank a annoncé une réduction de ses taux d'intérêt de 0,5 % à 4 % pour le taux d'escompte et de 0,35 % à 4,5 % pour le taux de prise en pension à une semaine. L'un et l'autre n'avaient pas été modifiés depuis mai et juillet 1994, respectivement.

La réduction des taux allemands n'a pas été entièrement anticipée par les marchés financiers. Elle a été suivie de réductions de taux similaires par les banques centrales belge, néerlandaise, autrichienne et suisse.

À la suite de cette annonce, le Deutschemark s'est affaibli par rapport aux monnaies des autres États membres de l'UE, perdant presque 4 centimes par rapport au franc français, lequel clôturait à FF 3,492 le 30 mars à Londres, et 1 pfennig (à DM 2,2525) par rapport à la livre sterling qui avait atteint, le 17 mars, son plus bas historique à DM 2,189.

Le dollar américain est resté faible durant tout le mois de mars, tombant en dessous de DM 1,40 pour la première fois depuis septembre 1992. Bien qu'il se soit légèrement raffermi immédiatement après la décision de la Bundesbank, clôturant à Londres à DM 1,4017 le 30 mars, il s'est à nouveau affaibli le lendemain pour terminer la journée à DM 1,3685. Par rapport au Yen japonais, il a atteint à deux reprises son niveau le plus bas de l'après-guerre: le 23 mars, à Y 87,95 puis le 31 mars, à Y 86,20.

Plus tôt en mars, la lire italienne, la livre britannique et la couronne suédoise ont touché de nouveaux plus bas par rapport à la monnaie allemande. La lire s'est échangée à LIT 1275 mais s'est redressée à environ LIT 1240 pour 1 mark à la fin mars. La couronne suédoise s'échangeait à Skr 5,32 pour 1 mark le 29 mars, en repli de quelque 11 pour cent par rapport à son niveau du début de l'année, dans un marché nerveux en raison de la situation des finances publiques suédoises. Elle s'est légèrement rétablie à Skr 5,27 après la baisse des taux d'intérêt allemands, mais cette reprise a été de courte durée car elle est retombée à Skr 5,39 le 31 mars.

À la suite de la dévaluation de la peseta à l'intérieur du MTC, le 6 mars, les autorités espagnoles ont annoncé, le 14 mars, une baisse de 0,5 % de leur taux de prise en pension à 10 jours. Les taux d'intérêt espagnols à court terme sont à présent aux mêmes niveaux qu'il y a 12 mois. Des hausses des taux d'intérêt ont également été enregistrées en Irlande, où le taux de crédit à court terme a été relevé deux fois en une semaine: de 6,25 % à 6,75 % le 6 mars puis à 7,25 % le 9 mars. Le but déclaré de ces hausses était de soutenir la position relative de la livre irlandaise dans le MTC.

Fin mars, le florin néerlandais était toujours au sommet de la grille du MTC, suivi par le franc belge, le mark allemand, le schilling, l'escudo, la couronne danoise, le franc français, la livre irlandaise et la peseta.

Le 13 mars, le gouvernement hongrois a annoncé une dévaluation de 9 % du forint, qui est lié à un panier 70/30 ECU/US\$. Il a également annoncé qu'il y aurait d'autres dévaluations mensuelles de 1,9 % au cours des trois prochains mois puis de 1,3 % au cours des six derniers mois de l'année. Ces dévaluations ont pour but de réduire les déficits commerciaux et en compte courant de la Hongrie.

RENDEMENT DES OBLIGATIONS D'ÉTAT: les rendements ont diminué dans plusieurs pays en mars 1995

En février, les rendements des obligations d'État ont baissé ou sont restés stables dans tous les pays observés pour lesquels des données étaient disponibles. Les baisses les plus fortes ont été enregistrées en Italie, en Espagne, en Suède et au Japon.

Dans l'UE, les rendements les plus faibles ont été enregistrés au Luxembourg, suivi de l'Allemagne et de l'Autriche, et les plus élevés en Espagne et au Portugal, où ils ont dépassé 11 %.

Aux États-Unis, les rendements des obligations d'État sont à présent nettement inférieurs à 8 %, la moyenne de février ayant été de 7,7 % après avoir oscillé entre 8 et 8,2 % au cours du dernier trimestre 1994. Ils sont toutefois restés plus élevés qu'en Allemagne.

À 3,3 % en février, les taux japonais ont atteint leur niveau le plus faible depuis le milieu de 1994.

MASSE MONÉTAIRE: le taux de croissance de M3 en Allemagne est dans la fourchette cible pour 1994

En Allemagne, la croissance de M3 s'est fortement ralentie au cours des six derniers mois de 1994, ce qui a permis à la Bundesbank d'atteindre son objectif pour 1994. Si l'on compare le quatrième trimestre de 1994 à la même période en 1993, la croissance de M3 a atteint 5,7 % et se situe donc tout juste dans la fourchette cible de 4 à 6 %. En 1995, la fourchette cible pour la croissance de M3 reste inchangée.

En Espagne, à la fin de 1994, le taux de croissance d'ALP était également de justesse dans la fourchette cible de 4,5 à 7,5 %, le progression ayant été légèrement supérieure à 7 % pour l'ensemble de l'année.

Une contraction de la masse monétaire a été observée en 1994 au Danemark et aux Pays-Bas. En France, à la fin de 1994, M3 était en revanche supérieur de 2,3 % au niveau de décembre 1993, après avoir enregistré des taux de croissance négatifs pendant plusieurs mois.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: hémorragie des réserves belges

En janvier 1995, la Belgique a perdu quelque 0,6 milliard d'écus de ses réserves officielles sur l'étranger, ce qui représente environ 5,7 % du total de ces réserves. Au cours du même mois, les réserves danoises ont enregistré une hémorragie similaire en pourcentage.

Les trois nouveaux membres de l'Union européenne, l'Autriche, la Finlande et la Suède, ont tous accru leurs réserves en 1994. Dans le cas de la Finlande, cet accroissement a atteint presque 80 % et porté le total des réserves autres qu'en or à 8,7 milliards d'écus à la fin de 1994. Durant cette période, le mark finlandais s'est apprécié d'environ 10 % par rapport à l'écu et de 18 % par rapport au dollar américain.

INFLATION ANNUELLE DANS L'UE: Légère hausse en février 1995

L'inflation annuelle dans l'UE s'élève à 3,1 % au mois de février 1995. L'inflation est donc en légère hausse par rapport aux 3 % (chiffre révisé) enregistrés en janvier. Le taux observé au cours des trois mois précédents était également de 3 %. En février 1994, l'inflation était de 3,3 %. La France enregistre le taux le plus bas avec 1,7 % (provisoire). La Finlande et la Belgique enregistrent le deuxième plus faible taux (1,8 %). Les autres nouveaux États membres, l'Autriche (2,4 %) et la Suède (2,6 %) se situent en-dessous de la moyenne.

Voici les taux enregistrés en février, classés par ordre croissant, pour chaque État membre ainsi que les chiffres correspondants pour l'année précédente. Les données pour le Royaume-Uni et l'Irlande n'étaient pas disponibles à temps et ont été estimées par Eurostat pour obtenir le chiffre UE.

	fév 95	fév 94		fév 95	fév 94

*** Jan 95 / jan 94 et jan 94 / jan 93

p Provisoire

Les taux correspondants dans quelques autres pays non membres de l'UE sont les suivants: États-Unis 2,5 % (2,5 %), Canada (jan) 0,6 % (0,2 %), Japon 0,2 % (1,1 %), Suisse 1,5 % (1,9 %), Norvège 2,6 % (1,4 %) et Islande 1,7 % (2,5 %).

LE CHOMAGE DANS L'UE: 11 % en février 1995

Le chômage dans l'Union européenne des Quinze, corrigé des variations saisonnières, est estimé à 11 % en février; ce taux est identique à celui des trois mois précédents. Le chiffre pour février pour les anciens 12 États Membres est également de 11 %.

En accord avec l'OCDE et les Instituts Nationaux de Statistique, Eurostat a révisé les méthodes utilisées pour calculer les taux de chômage comparables pour l'UE; les estimations sont basées sur des enquêtes nouvelles et plus fiables et étaient déjà en accord avec les recommandations du BIT. En conséquence, les données pour certains États Membres diffèrent de celles publiées antérieurement. Les chiffres d'aujourd'hui sont les premiers publiés sur cette nouvelle base et les premiers pour l'Union des Quinze.

Les estimations indiquent que la Finlande (17,9 % – chiffre de janvier) enregistre le deuxième taux le plus élevé après l'Espagne (23,5 %). L'Irlande (14,8 %) a également un taux nettement plus élevé que la moyenne de l'UE. La Suède (9,1 %) est en-dessous de la moyenne et l'on s'attend à ce que le chiffre pour l'Autriche, lorsqu'il sera disponible, soit l'un des plus bas.

Le taux de loin le plus faible est celui du Luxembourg (3,7 %). Eurostat estime qu'environ 18,1 millions de personnes étaient au chômage dans l'UE au mois de février. Ce chiffre, corrigé des variations saisonnières, est établi en accord avec les critères du Bureau International du Travail (BIT).

Remarque

Le taux de chômage et le nombre de chômeurs sont estimés selon les recommandations du BIT après correction des différences entre les méthodes nationales de recensement du chômage.

PRODUCTION INDUSTRIELLE: La production industrielle dans l'Union européenne des Douze encore en hausse

La production industrielle dans l'Union européenne des Douze, corrigée des variations saisonnières, a augmenté de 1,3 % au cours du quatrième trimestre 1994 par rapport au trimestre précédent. Ceci signifie que la production industrielle a augmenté de 4,8 % en 1994 par rapport à 1993.

En comparaison, la production trimestrielle est en hausse de 0,9 % au Japon et de 1,1 % aux États-Unis.

Voici les taux pour le quatrième trimestre 1994 dans les États membres pour lesquels les données sont disponibles (* = estimation):

UE 12	1,3 %	France	0,9 %
Irlande*	2,6 %	Pays-Bas	0,5 %
Danemark	1,7 %	Grèce	-0,4 %
Italie	1,7 %	Portugal*	-1,1 %
Espagne	1,5 %	Suède	3,4 %
Allemagne	1,5 %	Autriche*	1,5 %
Royaume-Uni	1,1 %	Finlande	1,3 %

COMMERCE EXTERIEUR

Au cours du troisième trimestre de 1994, l'Union européenne a enregistré un excédent commercial de 0,4 milliard d'écus. En conséquence, le déficit cumulé pour janvier-septembre 1994 a été ramené à 2,6 milliards d'écus alors qu'il était de 9,4 milliards un an auparavant. Ce redressement de la balance commerciale est dû essentiellement au dynamisme des exportations extra-UE qui ont augmenté de 12,2 % au cours des neuf premiers mois de 1994, comparé à la même période de 1993 alors que, dans le même temps, les importations ont progressé de 9,9 %.

De janvier à septembre 1994, le déficit commercial des États-Unis a enregistré une augmentation de 22,2 milliards d'écus par rapport à la même période de 1993, pour atteindre 108,4 milliards d'écus (127,7 milliards de dollars US).

En termes d'écus, le taux de variation des importations entre les neuf premiers mois de 1993 et de 1994 a été plus important que celui des exportations (14 % contre 10,5 %); en dollars US, les chiffres étaient de 13,2 % et 9,4 % respectivement.

En septembre 1994, l'excédent commercial du Japon a totalisé 7,6 milliards d'écus, ce qui porte l'excédent cumulé pour les neuf premiers mois de 1994 à 78,2 milliards d'écus, comparé à 75 milliards d'écus enregistrés au cours de la même période de 1993.

Ce résultat s'explique principalement par l'appréciation du yen (9,6 contre l'écu au cours des trois premiers mois de 1994). En fait, mesuré en yens, l'excédent japonais est en baisse de 700 milliards de yens entre ces deux périodes en raison principalement du taux de croissance négatif des exportations (-1,2 %) alors que les importations ont augmenté de 1,6 %.

En termes d'écus, les taux de variation des exportations et des importations ont été positifs l'un et l'autre: 8,4 % et 10,7 % respectivement. L'excédent commercial extra-UE de l'Allemagne (le plus élevé de tous les pays de l'UE) a fait un bond pour atteindre 17,6 milliards d'écus comparé à 11,9 milliards d'écus enregistrés en 1993. Au cours de la période janvier-septembre 1994, les exportations allemandes ont progressé de 13 % par rapport à la période correspondante de l'année précédente, tandis que les importations n'ont augmenté que de 9,1 %.

Durant les neuf premiers mois de 1994, les exportations italiennes ont augmenté plus rapidement que les importations, comparé à la même période de l'année précédente, respectivement 12,8 % et 7 %.

L'excédent de la balance commerciale italienne s'est amélioré, passant de 5,9 milliards d'écus en 1993 à 9,1 milliards d'écus en 1994.

Au cours de la période janvier-septembre 1994, le Royaume-Uni a, parmi les pays UE, enregistré le plus fort déficit commercial (15,6 milliards d'écus).

La position commerciale du Royaume-Uni s'est légèrement améliorée (0,2 milliards d'écus) par rapport à la même période de 1993 grâce à l'écart positif entre les taux de croissance des exportations et des importations (+2,7 points).

Les importations extra-UE des Pays-Bas (y compris les marchandises destinées à d'autres États membres et transitant par les ports néerlandais) ont augmenté très rapidement au cours des neuf premiers mois de 1994 (+21,2 %) alors que le taux de variation des exportations était légèrement inférieur à la moyenne UE (11,9 %).

Par conséquent, au cours de la même période, le déficit extra-UE néerlandais est passé de 10,1 milliards d'écus en 1993 à 14,3 milliards d'écus.

Au cours de la période janvier-septembre 1994, le commerce extra-UE de l'UEBL et de l'Irlande a enregistré les plus forts taux de croissance des États membres de l'UE comparé à la même période une année auparavant.

Les importations de ces deux pays ont enregistré un taux de variation plus fort que les exportations, respectivement 0,7 % et 3,1 %.

Au cours des trois premiers trimestres de 1994, la position du commerce extérieur de l'UEBL s'est détériorée par rapport à la même période de 1993 (le déficit est passé de 0,5 milliard à 0,8 milliard d'écus), tandis que l'excédent de l'Irlande n'a pas varié au cours de ces deux périodes à 0,7 milliard d'écus.

L'excédent commercial extra-UE de la France s'est amélioré entre la période susmentionnée de 1994 et la même période de l'année précédente (passant de 5,6 milliards d'écus en 1993 à 6,5 milliards d'écus en 1994). Les importations et les exportations ont toutes deux enregistré des taux de variation nettement inférieurs à la moyenne UE (6,5 % et 7,5 % respectivement).

Au cours des neuf premiers mois de 1994, les importations danoises ont enregistré un taux de croissance supérieur à celui des exportations (15,2 % contre 13,6 %) comparé à la même période un an auparavant. Au cours de la même période, le Danemark a encore amélioré son excédent commercial à 1,8 milliard d'écus contre 1,7 milliard d'écus au cours de la même période un an auparavant.

Entre les périodes janvier-septembre 1993 et 1994, l'Espagne et la Grèce ont réduit leurs déficits commerciaux respectivement de 0,3 milliard d'écus et 0,9 milliard d'écus.

Parmi les pays de l'UE, la Grèce a été le seul à enregistrer un taux de croissance négatif de ses importations (-16 % comparé à l'année précédente), alors que ses exportations n'ont progressé que de 2 % après le boom enregistré en 1993.

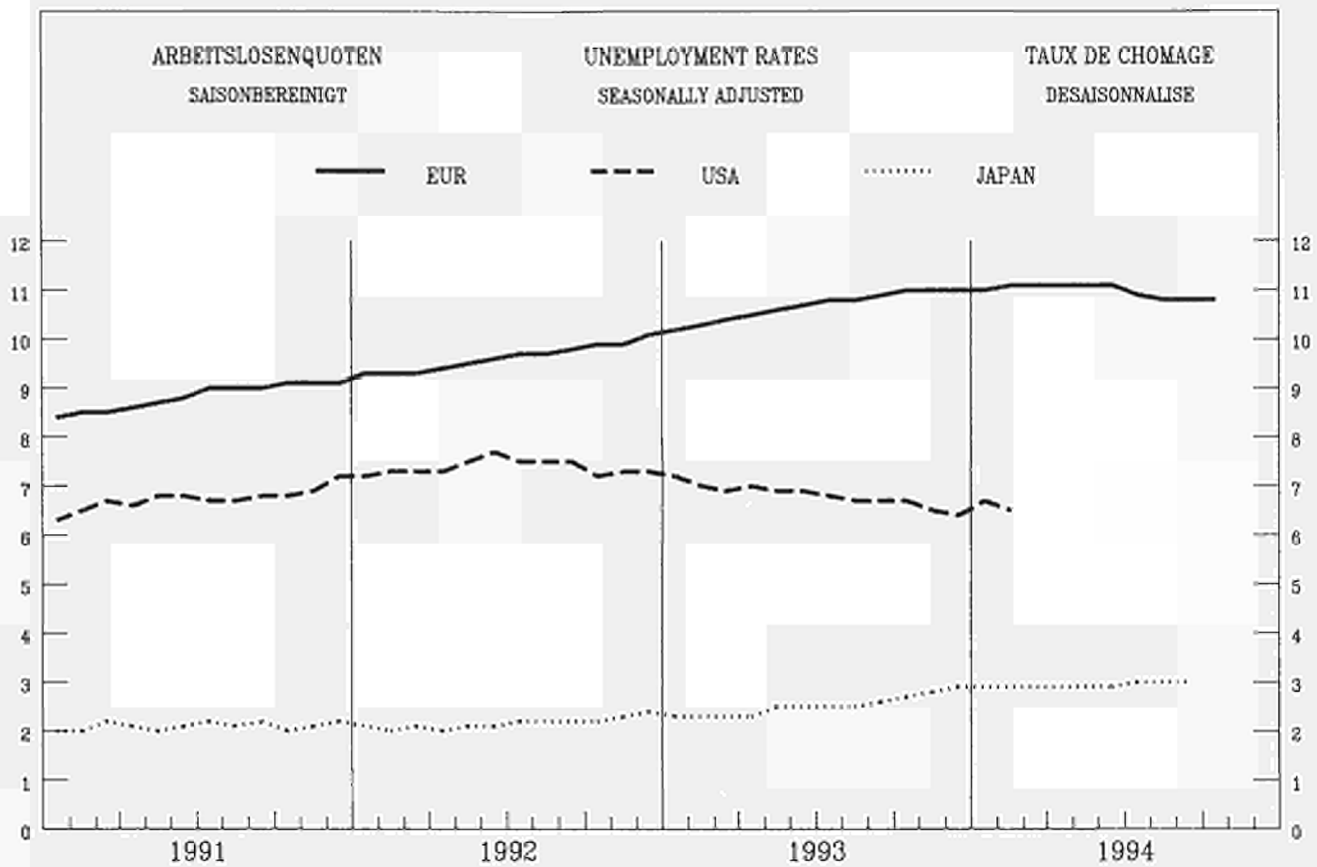

Concernant l'Espagne, ces variations en pourcentage étaient respectivement de 8,4 % et 12,2 %.

Entre les périodes janvier-septembre 1993 et 1994, la balance extérieure du Portugal n'a pas varié (2 milliards d'écus de déficit): les variations en pourcentage par rapport à l'année précédente étaient de 9 % pour les exportations et de seulement 5,6 % pour les importations.
