Printed in Germany

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in Eurostatistik veröffentlichten Daten stammen aus der Datenbank New Cronos. New Cronos setzt sich zusammen aus dem alten Cronos sowie REGIO und ist nicht mehr in Form von Zeitreihen, sondern in Form von multidimensionalen Tabellen dargestellt. New Cronos ist somit eines der Produkte zur Verbreitung statistischer Daten, das direkt aus der Eurostat - Referenzdatenbank gespeist wird. Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

Wechselkurse: Senkung der japanischen Zinssätze

Am 14. April senkte die Bank of Japan ihren amtlichen Diskontsatz um 0,75 % auf ein neues Rekordtief von 1 %. Die Zinssenkung ging einher mit einem Ausgaben- und Deregulierungspaket der japanischen Regierung. Mit diesen Maßnahmen sollte die japanische Wirtschaft angekurbelt werden, die sich nur langsam von der Rezession erholt und die durch die Aufwertung der japanischen Währung gegenüber dem Dollar um mehr als 20 % seit Jahresbeginn zusätzlichen Belastungen ausgesetzt ist.

Der japanische Yen schloß am 10. April auf den asiatischen Devisenmärkten mit 80,15 Yen gegenüber dem Dollar und verzeichnete damit einen neuen Höchststand. Diese ausgeprägte Abwärtsbewegung der amerikanischen Währung ist darauf zurückzuführen, daß die asiatischen Zentralbanken im Zuge der Diversifizierung ihrer amtlichen Währungsreserven verstärkt Dollar absetzen. Die japanische Zinssenkung bewirkte nur eine geringfügige Erholung des Dollar, der am 19. April zum ersten Mal seit Kriegsende unter die Marke von 80 Yen fiel, sich allerdings später wieder etwas erholte und am 26. April mit 84,125 Yen schloß.

Die Schwäche des Dollar gegenüber der D-Mark war nicht ganz so ausgeprägt wie die gegenüber dem Yen, denn es wurden keine Rekordtiefs verzeichnet. Fast den gesamten Monat April hindurch lag der Wechselkurs der amerikanischen Währung zwischen 1,36 DM und 1,40 DM, wenngleich dies gegenüber dem Jahresbeginn einen Wertverlust von rund 17 % darstellt.

Innerhalb der EU hat der Druck auf die Wechselkurse in den letzten Wochen etwas nachgelassen, so daß sich einige Währungen gegenüber der D-Mark wieder erholen konnten. Im Anschluß an die Ende März vorgenommene Zinssenkung in Deutschland wurden in Belgien die Leitzinsen zweimal zurückgenommen und liegen jetzt bei 4,75 %, das ist der niedrigste Stand seit einiger Zeit. Nach einer gewissen Festigung in den letzten Wochen mit Wechselkursen unterhalb der Marke von 3,50 FF verlor der französische Franc nach der ersten Runde der Präsidentschaftswahlen in Frankreich am 23. April geringfügig an Wert, erholte sich in den darauffolgenden Tagen jedoch wieder und schloß am 26. April in London bei 3,522 FF.

Die italienische Lira wies nach den Einbußen von Anfang März im April wieder eine größere Kursstabilität auf und wurde gegenüber der D-Mark mit 1230-1250 LIT gehandelt. Ein recht uneinheitliches Bild bot die schwedische Krone: Ihr Kurs fiel Anfang April auf einen neuen Tiefststand von 5,428 Skr gegenüber der D-Mark, zog dann wieder etwas an auf 5,22 Skr, bevor gegen Ende des Monats ein erneuter Rückgang auf 5,38 Skr mit einem anschließenden Kursanstieg auf 5,308 Skr zu verzeichnen war.

Am 25. April stand an der Spitze des Wechselkursmechanismus weiterhin der holländische Gulden, gefolgt vom belgischen Franc, der D-Mark, dem Schilling, der dänischen Krone, dem Escudo, der Peseta, dem französischen Franc und dem irischen Pfund.

Renditen von Staatsanleihen: Im März 1995 in vielen Ländern weiterhin rückläufige Renditen

Die Renditen von Staatsanleihen waren im März in sechs der beobachteten Länder rückläufig. Die stärksten Rückgänge wurden in Japan verzeichnet, wo die Renditen erstmals seit Mai 1994 unter 4 % fielen, sowie in Schweden, wo die Renditen von Staatsanleihen im März um 0,5 Prozentpunkte auf 10,2 % zurückgingen, und in den Niederlanden, die zusammen mit Deutschland und Österreich die niedrigsten Renditen in der EU ohne Luxemburg aufwiesen.

Steigende Renditen verzeichneten dagegen sowohl Italien als auch Spanien mit einem Zuwachs von jeweils 0,7 %, beides Länder, deren Währungen im Monat März unter Druck gestanden hatten, was sich im Falle der Peseta in Kursverlusten und im Falle der Lira in einem Rekordtief gegenüber der D-Mark äußerte. In Spanien wurden im März zudem die kurzfristigen Zinsen gesenkt.

In den Vereinigten Staaten waren die Renditen von Staatsanleihen im März erneut rückläufig und fielen auf durchschnittlich 7,5 %, was in etwa dem Jahresdurchschnitt von 1994 entspricht.

Geldvolumen: Langsames Wachstum der Geldmenge M2 in Italien

Die Wachstumsrate der Geldmenge M2 in Italien hat sich in den letzten Monaten beträchtlich verlangsamt. Sie betrug im Dezember 1994 auf Jahresbasis umgerechnet 1,7 % und im Januar 1995 nur noch 0,2 % und

lag damit erheblich unterhalb dem von der Banca d'Italia für 1994 vorgegebenen Zielkorridor von 5-7 %. Das Geldmengenziel für 1995 ist auf 5 % reduziert worden.

In Griechenland belief sich die Wachstumsrate der Geldmenge M3 für die zwölf Monate bis Februar 1995 auf knapp 20 % und hat sich damit gegenüber der ersten Jahreshälfte 1994 erheblich beschleunigt. Die Inflationsrate lag in Griechenland das ganze Jahr 1994 hindurch zwischen 10 % und 11 %.

Im Vereinigten Königreich betrug die Wachstumsrate von M4 auf Jahresbasis umgerechnet rund 4 % und lag damit am unteren Ende des von der Bank of England vorgegebenen Zielkorridors von 3-9 %.

Amtliche Währungsreserven:Riksbank trifft Swap-Abkommen mit EWI

Die schwedische Riksbank hat am 11. April 20 % ihrer US-Dollar- und Goldreserven im Rahmen eines Swap-Abkommens mit dem Europäischen Währungsinstitut gegen Ecu eingetauscht. Sie hält damit derzeit gut 1 Mrd. ECU als amtliche Währungsreserve. Diese Maßnahme steht in Zusammenhang mit dem Beitritt Schwedens zum Europäischen Währungssystem im Januar 1995. Österreich und Finnland hatten bereits Mitte Januar entsprechende Schritte eingeleitet und halten nunmehr rund 2 Mrd. ECU bzw. 620 Mio. ECU als amtliche Währungsreserven.

Die belgische Zentralbank hat am 25. April 5 627 Feinunzen ihrer Goldreserven verkauft, das sind ca. 22 % ihrer Goldbestände. Der Erlös in Fremdwährungen diente der Aufstockung der belgischen Fremdwährungsreserven um 30 %. Offiziellen Angaben zufolge sollte mit diesem Schritt der Anteil des Goldes an den gesamten amtlichen Währungsreserven des Landes an die Verhältnisse in den Nachbarländern angeglichen werden.

INFLATIONSRATE: Europäischen Union der 15 Verstärkter Preisauftrieb im März 1995

Die jährliche Inflationsrate der Europäischen Union der 15 lag im März 1995 bei 3,3 %. Sie ist damit gegenüber dem berichtigten Wert des Vormonats von 3,2 % leicht angestiegen.

Der Preisauftrieb, der seit Beginn des Jahres in Italien, Portugal und Spanien zu beobachten ist, findet in diesem jüngsten Anstieg seinen Niederschlag. Dennoch weist die EU-Rate beachtliche Stabilität auf: Seit Juli 1992 bewegt sie sich in einer Bandbreite von 3 % bis 4 %.

Belgien und Finnland hatten mit 1,7 % die niedrigste Inflationsrate, dahinter folgt Frankreich mit 1,8 %.

Für die Inflationsraten der Mitgliedsländer im März — mit entsprechenden Vorjahreszahlen — ergibt sich folgende ansteigende Reihenfolge:

	März 95	März 94		März 95	März 94
	März 94	März 93		März 94	März 93
Belgien	1,7 %	2,3 %	Irland**	2,5 %	1,7 %
Finnland	1,7 %	0,4 %	Schweden	3,0 %	1,8 %
Frankreich	1,8 %	1,5 %	Ver. Königreich	3,5 %	2,3 %
Deutschland *	2,3 %	3,2 %	Portugal	4,5 %	6,0 %
Niederlande	2,3 %	3,0 %	Italien	4,8 % ^p	4,3 %
Luxemburg	2,3 %	2,3 %	Spanien	5,1 %	4,9 %
Österreich	2,4 %	3,1 %	Griechenland	10,3 %	10,2 %
Dänemark	2,5 %	1,7 %			
EUR 15	3,3 % ^p	3,1 %			

* Der Verbraucherpreisindex für die Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3.10.90. In den neuen Ländern war der Preisindex im März um 1,9 % höher als vor Jahresfrist.

** Feb 95 / Feb 94 und Feb 94 / Feb 93

^p Vorläufig

EU-ARBEITSLOSENQUOTE im März 1995 auf 10,8 % gesunken

Die Arbeitslosenquote der Europäischen Union der 15 betrug im März 1995 saisonbereinigt 10,8 %. Im Februar lag die Quote bei revidiert 10,9 %, im März des Vorjahres bei 11,3 %.

Am deutlichsten ging die Arbeitslosigkeit im Jahresverlauf in Spanien zurück, von 24,3 % auf 23,2 % — gleichzeitig die höchste Quote in der Europäischen Union der 15. Finnland (von 19,7 % auf 16,5 %) mit der zweithöchsten Quote in der Europäischen Union der 15, Dänemark (von

10,7 % auf 9,2 %) und das Vereinigte Königreich (von 9,8 auf 8,5 %) weisen ebenfalls starke Rückgänge aus. In Deutschland sank die Arbeitslosenquote von 8,5 % auf 8 %.

Bei den Männern war der Rückgang der Arbeitslosigkeit im Jahresverlauf mit 10,2 % auf 9,6 % ausgeprägter als bei den Frauen (von 12,8 % auf 12,6 %). Eurostat vermutet daher, daß sich kurzfristige wirtschaftliche Trends in geringerem Maß auf die Arbeitslosigkeit der Frauen auswirken.

Nach den Schätzungen von Eurostat waren im März EU-weit etwa 17,9 Millionen Menschen arbeitslos. Dabei handelt es sich um eine saisonbereinigte Zahl, die sich an den Kriterien der Internationalen Arbeitsorganisation (ILO) orientiert.

Anmerkungen

Die Arbeitslosenquote und die Zahl der Arbeitslosen werden nach den Empfehlungen der ILO und unter Berücksichtigung der unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit geschätzt.

INDUSTRIEPRODUKTION in der Europäischen Union der 15 erneut gestiegen

Die positive Entwicklung der Industrieproduktion in der Europäischen Union der setzte sich auch im Januar weiter fort. Von November bis Januar stieg der Konjunkturtrend (Produktionsindex saison- und restebereinigt) im Dreimonatsvergleich um 1,3 %.

Laut Eurostat zeigt sich auch weiterhin keine Abschwächung des Aufschwungs. Das Niveau des Produktionsindex (1990 = 100) betrug im Januar allerdings nur 100,1 Punkte. Der Abschwung der Jahre '92 und '93 wurde durch den Aufschwung des letzten Jahres also gerade ausgeglichen.

Auch in den USA ist der Aufschwung stabil. Die Industrieproduktion erhöhte sich hier im gleichen Zeitraum um 1,2 %.

AUSSENHANDEL: In den ersten zehn Monaten 1994 stiegen die Ausfuhren der Europäischen Union stärker als die Einfuhren (+1,5 Prozentpunkte)

Im Oktober 1994 verzeichnete die Europäische Union einen Handelsbilanzüberschuß von 1,4 Mrd. ECU gegenüber 3 Mrd. ECU im Vergleichsmonat des Vorjahres. Dennoch lag das kumulierte Defizit für Januar-

Oktober 1994 bei 1,1 Mrd. ECU, also weit unter den 6,5 Mrd. ECU des Vorjahres.

In den ersten zehn Monaten 1994 nahmen die Extra-EU-Ausfuhren mit einer Steigerungsrate von 11,5 % stärker zu als die Einfuhren (10 %). Diese Differenz ist der Hauptgrund für die Erholung der Handelsbilanz, auch wenn sie geringer war als im entsprechenden Vorjahreszeitraum.

In der Zeit von Januar bis Oktober 1994 verzeichnete Deutschland nicht nur den höchsten Extra-EU-Überschuß aller EU-Mitgliedstaaten (20,3 Mrd. ECU), sondern auch die höchsten Steigerungsraten gegenüber dem entsprechenden Vorjahreszeitraum (6,3 Mrd. ECU).

Der italienische Handelsbilanzüberschuß erhöhte sich um 2,6 Mrd. ECU auf 10,1 Mrd. ECU, während er 1993 bei 7,5 Mrd. ECU gelegen hatte.

Das Vereinigte Königreich hatte in den Monaten Januar bis Oktober 1994 von allen EU-Mitgliedstaaten das größte Handelsbilanzdefizit zu verzeichnen. Es belief sich auf 17,6 Mrd. ECU. Im Vergleich zum entsprechenden Vorjahreszeitraum hat sich die Position des Vereinigten Königreichs leicht verschlechtert (0,7 Mrd. ECU), obwohl die Ausfuhren stärker zugenommen haben als die Einfuhren (-0,8 Prozentpunkte).

Am meisten ausgeweitet hat sich zwischen Januar-Oktober 1994 und dem Vergleichszeitraum des Vorjahres das Extra-EU-Defizit der Niederlande. Es hat sich um 4,9 Mrd. ECU auf 15,6 Mrd. ECU vergrößert.

In der Zeit von Januar bis Oktober 1994 wies der Extra-EU-Handel der BLWU und Irlands, verglichen bei beiden verschlechterte sich die außenwirtschaftliche Position in den ersten zehn Monaten 1994 gegenüber dem Vergleichszeitraum 1993. Das Defizit der BLWU stieg von 0,4 Mrd. ECU auf 0,9 Mrd. ECU, während in Irland der Überschuß leicht zurückging.

Der Extra-EU-Handelsbilanzüberschuß Frankreichs hat sich zwischen dem genannten Zeitraum 1993 und dem entsprechenden Zehnmonatszeitraum 1994 um 1,4 Mrd. ECU, von 6,7 Mrd. ECU auf 8,1 Mrd. ECU, erhöht.

Die außenwirtschaftliche Position Dänemarks und Portugals zeigte sich zwischen Januar-Oktober 1993 und 1994 weitgehend stabil (Überschuß von 2 Mrd. ECU bzw. Defizit von 2,3 Mrd. ECU).

Spanien und Griechenland haben ihre Handelsbilanz zwischen Januar und Oktober 1994 im Vergleich zum entsprechenden Vorjahreszeitraum verbessert. Beide Mitgliedstaaten konnten ihr Defizit im Extra-EU-Handel abbauen, und zwar um 0,2 Mrd. ECU bzw. 1,1 Mrd. ECU. Griechenland ist der einzige aller EU-Mitgliedstaaten, dessen Einfuhren im Vergleich zum Vorjahr zurückgingen (-11,8 %), während die Ausfuhren um 15,7 % anstiegen.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from Eurostat's on-line database, New Cronos. New Cronos includes old Cronos and Regio, both represented not by chronological series but through multi-dimensional tables. New Cronos is a dissemination product directly from Eurostat's Reference Environment. The data are also available via the Commission host Eurobases in the Eurocron database.

EXCHANGE RATES: Reduction in Japanese interest rates

On April 14 the Bank of Japan announced a 0.75% reduction in its official discount rate, which now stands at a record low of 1%. The rate reduction was accompanied by a government package of public spending and deregulation. These moves were intended to boost the Japanese economy, which is already recovering only slowly from recession, and is further suffering from the yen's more than 20% appreciation against the dollar so far in this year.

The yen had reached a new low in Asian trading on April 10, when it traded at 80.15 against the dollar. This particular downwards move was attributed to Asian central banks diversifying their foreign official reserves away from the dollar. The dollar seemed to take little support from the cut in Japanese rates, and on April 19 dipped below 80 for the first time in the post-1945 period. However, it later strengthened slightly to close at 84.125 on April 26.

The dollar's weakness against the mark has not been quite as marked as against the yen, since it has not touched historic lows, trading between DM1.36 and DM1.40 for much of April, although this represents a depreciation of around 17% since the start of 1995.

Within the EU, currency pressures have receded somewhat in recent weeks, with several currencies strengthening against the mark. Following the reduction in German rates at the end of March, official interest rates were reduced twice in Belgium, where the central rate now stands at 4.75%, its lowest level for some time. Having strengthened below the FF 3.50 level in recent weeks, the French franc weakened slightly after the first round of the Presidential elections on April 23, but recovered in the following days, to close in London on April 26 at FF 3.522.

After depreciating in early March, the Italian lire was rather more stable in April, trading at around 1230-1250 to the mark. The performance of the Swedish krona was rather mixed: it reached a further low against the mark of Skr 5.428 in early April, then recovered somewhat to around Skr 5.22, before falling again to Skr 5.38 towards the end of the month and then recovering to Skr 5.308.

On April 25 the Dutch guilder remained at the top of the ERM grid, followed by the Belgian franc, mark, schilling, Danish krone, escudo, peseta, French franc and punt.

GOVERNMENT BOND YIELDS: continuation of falling yields in many countries in March 1995

The yield on government bonds fell in six of the countries surveyed in March. The largest falls occurred in Japan, where yields fell below 4% for the first time since May 1994. Sweden, where government bond yields fell 0.5 percentage points in March to stand at 10.2%, and the Netherlands, which together with Germany and Austria has the lowest level of government bond yields in the EU with the exception of Luxembourg.

However, yields increased by 0.7% in both Italy and Spain, countries whose currencies were under pressure during March with the devaluation of the peseta and all-time lows reached by the lire against the mark. Spanish short-term interest rates were also increased in March.

In the United States government bond yields fell again in March, to an average level of 7.5%, a roughly similar level to their average during the whole of 1994.

MONEY SUPPLY: Slow M2 growth in Italy

The growth rate of M2 in Italy has slowed fairly dramatically in recent months, to stand at an (annualised) rate of just 1.7% in December 1994 and 0.2% in January 1995. This is well below the Banca d'Italia's 1994 target of M2 growth of 5-7%, which has been reduced to a target of 5% for 1995.

The growth rate of M3 in Greece was just under 20% over the 12 months to February, a substantially faster growth rate than that achieved in the first half of 1994. Inflation in Greece stood at around 10-11% for the whole of 1994.

In the UK M4 remains at an annualised rate of around 4%, towards the bottom of the Bank of England's monitoring range of 3-9%.

FOREIGN OFFICIAL RESERVES: Riksbank enters ecu swap arrangements with the EMI

On April 11 the Swedish central bank, the Riksbank, announced that in an agreement with the European Monetary Institute it was exchanging 20%

of its US dollar and gold reserves for ecus. This means that it now holds just over 1 billion ecu of official ecu reserves. The Swedish move is related to Sweden's membership of the European Monetary System, which it joined in January 1995, and follows that of Austria and Finland in mid-January, which hold around 2 billion and 620 million ecu of ecu reserves respectively.

On April 25 the National Bank of Belgium sold 5.627 troy ounces of its gold holdings. This figure represents around 22% of its total gold holdings and the proceeds of the sale were received in foreign currency, which allows a 30% increase in Belgium's foreign currency reserves. Official sources indicated that the sale was intended to bring the share of gold in its total foreign official reserves into line with that of neighbouring central banks.

ANNUAL INFLATION: European Union of fifteen annual inflation up in March 1995

European Union of fifteen annual inflation stood at 3.3% in March. This was up slightly on February's revised 3.2%.

The rise reflects rising inflation in Italy, Portugal and Spain since the start of this year. However, the European Union of fifteen rate still shows considerable stability: since July 1992 it has remained within the range of 3% to 4%.

Belgium and Finland shared the lowest rate - 1.7%. France was next with 1.8%.

March rates in Member States, in ascending order of inflation, with corresponding figures for a year earlier, are as follows:

	Mar 95	Mar 94		Mar 95	Mar 94
	Mar 94	Mar 93		Mar 94	Mar 93
Belgium	1.7%	2.3%	Ireland**	2.5%	1.7%
Finland	1.7%	0.4%	Sweden	3.0%	1.8%
France	1.8%	1.5%	United Kingdom	3.5%	2.3%

* The CPI for Germany continues to reflect the geographical borders prior to 3 October 1990. Inflation in the new Länder in March was 1.9% compared with March 1994

** Feb 95 / Feb 94 and Feb 94 / Feb 93

p Provisional

Corresponding rates in some other non-EU countries were: United States 2.9% (2.5%), Canada 2.2% (0.2%), Japan -0.3% (1.3%), Switzerland 1.5% (1.3%), Norway 2.7% (1%) and Iceland 1.4% (2.6%).

UNEMPLOYMENT: European Union of fifteen seasonally-adjusted unemployment down to 10.8% in March 1995

Eurostat estimates European Union of fifteen seasonally-adjusted unemployment in March 1995 at 10.8%. This compares with February's revised 10.9% and a rate of 11.3% in March 1994.

Biggest falls in the last year have been in Spain (24.3% to 23.2% - the highest European Union rate), Finland (19.7% to 16.5% - second highest European Union rate), Denmark (10.7% to 9.2%) and the United Kingdom (9.8% to 8.5%). Germany fell from 8.5% to 8%.

The fall over the year has been more marked for men (10.2% to 9.6%) than women (12.8% to 12.6%). Eurostat says this suggests female unemployment is less influenced by short-term economic trends.

Eurostat estimates that around 17.9 million people were unemployed in the European Union of fifteen in March 1995. This is a seasonally-adjusted figure in line with ILO criteria.

Note

The unemployment rate and numbers of unemployed are estimated according to ILO recommendations after taking account of the differences between national methods of recording unemployment.

INDUSTRIAL OUTPUT: European Union of fifteen industrial production up again in January 1995

The trend of European Union of fifteen industrial production rose by 1.3% in November to January compared to the three previous months.

Eurostat comments that output continues to rise with no sign of faltering. However, the January index (1990 = 100) was 100.1, which means the 1992-93 downturn has only just been made up for.

Recovery in the United States is also firm with a rise of 1.2% in November-January.

EXTERNAL TRADE: European Union of twelve's exports increased more than imports during the first ten months of 1994 (+1.5 percentage points).

In October 1994 the European Union's external trade recorded a surplus of ECU 1.4 billion compared to the ECU 3 billion registered in the same month in 1993. Nevertheless, the cumulated deficit for January-October 1994 narrowed to ECU 1.1 billion from ECU 6.5 registered a year earlier.

During the first ten months of 1994, the extra-EU exports increased more than imports: respectively 11.5% and 10%. This positive gap was the main reason for the trade balance recovery even if it has narrowed compared to the same period in 1993.

In the period January-October 1994, Germany registered both the largest extra-EU surplus among the EU member states (ECU 20.3 billion) and the most important improvement compared to the same period a year earlier (ECU 6.3 billion).

During the first ten months of 1994, the Italian trade balance improved its surplus by ECU 2.6 billion, reaching ECU 10.1 billion from ECU 7.5 billion recorded in 1993.

In the period January-October 1994, the United Kingdom was the European Union country that experienced the largest trade deficit which reached ECU 17.6 billion. The UK's trade position showed a slight deterioration (ECU 0.7 billion) with reference to the same period of 1993, even if the gap between the exports' and imports' growth rates was positive (+0.8 percentage points).

The Dutch extra-EU deficit recorded the most important deterioration between January-October 1993 and 1994 (ECU 4.9 billion) reaching ECU 15.6 billion.

In the first ten months of 1994, the external position of BLEU and Ireland worsened if compared to the same period in 1993. The BLEU's deficit went up to ECU 0.9 billion from ECU 0.4 billion, while the Irish surplus was slightly reduced.

France's extra-EU trade surplus improved by ECU 1.4 billion between the above mentioned period in 1994 and a year earlier (from ECU 6.7 billion to ECU 8.1 billion).

Between the periods January-October 1993 and 1994, the external trade positions of Denmark and Portugal were almost stable (respectively ECU 2 billion surplus and ECU 2.3 billion deficit).

From January to October 1994 Spain and Greece improved their trade balances compared to the corresponding period a year earlier: both countries reduced their extra-EU deficits respectively by ECU 0.2 billion and ECU 1.1 billion. Among the EU countries Greece was the only which experienced a negative rate of growth of its imports (-11.8% compared to the previous year) while exports went up by 15.7%.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent de la base de données New Cronos. New Cronos se compose de l'ancien Cronos et de Regio, représentés non plus sous forme de séries chronologiques mais de tableaux multidimensionnels. New Cronos constitue en fait un des produits de diffusion émanant directement de l'environnement de Référence. Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

De plus amples informations concernant Eurostat et ses produits peuvent être obtenues aux adresses suivantes:

TAUX DE CHANGE: Baisse des taux d'intérêts japonais

Le 14 avril, la banque du Japon a annoncé une baisse de 0,75 % de son taux d'escompte officiel qui s'établit désormais à 1 %, un record à la baisse. Cette baisse de taux s'est accompagnée d'un train de mesures gouvernementales concernant les dépenses publiques et la dérégulation. Ces mesures ont pour objectif de relancer l'économie japonaise qui sort lentement de la récession et continue de souffrir de l'appréciation du yen contre le dollar déjà supérieur à 20 % pour l'année en cours.

Le yen a atteint un nouveau point bas sur les marchés asiatiques le 10 avril lorsqu'il s'est traité à 80,15 contre le dollar. Ce mouvement particulier à la baisse est attribué aux banques centrales asiatiques qui diversifient leurs réserves de change officiel en dehors du dollar. Celui-ci n'a guère tiré partie de la réduction des taux japonais et le 19 avril il a plongé au-dessous des YEN 80 pour la première fois depuis 1945. Cependant, il s'est légèrement ressaisi pour clôturer à YEN 84,125 le 26 avril.

La faiblesse du dollar contre le mark n'a pas été aussi marquée que contre le yen dans la mesure où il n'a pas touché de bas historiques, se traitant entre DM 1,36 et DM 1,40 pendant la plus grande partie d'avril, bien que cela représente une dépréciation d'environ 17 % depuis le début de l'année 1995.

Dans l'UE, les pressions monétaires se sont légèrement relâchées au cours des dernières semaines avec un raffermissement de plusieurs monnaies contre le mark. Dans la foulée de la réduction des taux allemands à la fin mars, la Belgique a baissé deux fois ses taux d'intérêts officiels et le taux central s'établit désormais à 4,75 %, son plus bas niveau depuis un certain temps. Après être revenu au-dessous de FF 3,50 ces dernières semaines, le franc français a légèrement faibli à l'issue du premier tour des élections présidentielles le 23 avril, mais a récupéré les jours suivants pour clôturer à Londres le 26 avril à FF 3,522.

Après s'être dépréciée début mars, la lire italienne s'est plutôt assagie en avril se traitant autour de 1230-1250 contre le mark. Les performances de la couronne suédoise ont été plutôt mitigées: elle a enfoncé un nouveau bas contre le mark à SKR 5,428 au début d'avril, s'est ensuite raffermie quelque peu autour de SKR 5,22, avant de rechuter à SKR 5,38 vers la fin du mois pour se reprendre ensuite à SKR 5,308.

Le 25 avril, le florin néerlandais est resté accroché au sommet de la grille du MTC suivi par le franc belge, le mark, le shilling, la couronne danoise, l'escudo, la peseta, le franc français et la livre irlandaise.

RENDEMENTS DES OBLIGATIONS D'ÉTAT: Poursuite de la chute des rendements dans de nombreux pays en mars 1995

Parmi les pays observés, le rendement des obligations d'État a baissé dans six d'entre eux. Les plus fortes chutes ont eu lieu au Japon où les rendements sont baissés au-dessous de 4 % pour la première fois depuis mai 1994, en Suède, où les rendements des obligations d'État ont perdu 0,5 point en pourcentage en mars pour s'établir à 10,2 %, et aux Pays-Bas qui en compagnie de l'Allemagne et de l'Autriche détiennent le niveau de rendement d'obligations d'État le plus bas de l'UE à l'exception du Luxembourg.

Cependant, les rendements ont progressé de 0,7 % tant en Italie qu'en Espagne, pays dont les monnaies ont traversé au cours de mars une dépression entraînant la dévaluation de la peseta et des records historiques à la baisse de la lire contre le mark. Les taux d'intérêts à court terme espagnols ont également été relevés en mars.

Aux États-Unis, les rendements des obligations d'État ont rechuté en mars à un niveau moyen de 7,5 %, pratiquement similaire à leur moyenne de l'ensemble de 1994.

MASSE MONÉTAIRE: Ralentissement de la croissance de M2 en Italie

Le taux de croissance de M2 en Italie s'est très sérieusement ralenti au cours des derniers mois pour s'établir à un taux (annualisé) de tout juste 1,7 % en décembre 1994 et de 0,2 % en janvier 1995, ce qui est nettement inférieur aux objectifs de croissance de M2 de 5-7 % fixés par la banque d'Italie pour 1994 et réduits à 5 % pour 1995.

Le taux de croissance de M3 en Grèce a été à peine inférieur à 20 % au cours de la période des douze mois se terminant en février, un taux de croissance nettement plus rapide que celui enregistré au cours du premier semestre de 1994. L'inflation en Grèce s'est située aux alentours de 10-11 % pour l'ensemble de 1994.

Au Royaume-Uni, M4 demeure à un taux annualisé d'environ 4 %, c'est-à-dire orienté vers le bas de la fourchette des objectifs fixés par la banque d'Angleterre de 3-9 %.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: la Riksbank conclut des accords de swap en écus avec l'IME

Le 11 avril, la Banque centrale suédoise, la Riksbank, a annoncé qu'aux termes d'un accord avec l'Institut monétaire européen, elle échangeait 20 % de ses dollars US et de ses réserves en or contre des écus. Cela signifie qu'elle détient désormais un peu plus d'un milliard d'écus de réserves en écus officiels. Cette opération s'inscrit dans le cadre de l'entrée de la Suède dans le système monétaire européen en janvier 1995, faisant suite à l'entrée de l'Autriche et de la Finlande à la mi-janvier qui détiennent environ 2 milliards et 620 millions d'écus de réserves en écus officiels respectivement.

Le 25 avril, la banque nationale de Belgique a vendu 5 627 onces troy sur ses avoirs en or. Ce chiffre représente environ 22 % de ses réserves totales en or et les produits de la vente ont été encaissés en devises ce qui permet à la Belgique d'accroître de 30 % ses réserves en devises étrangères. De source officielle, on apprenait que cette vente avait pour objectif de ramener la part de l'or dans ses réserves totales sur l'étranger dans les proportions similaires à celles des banques centrales voisines.

INFLATION ANNUELLE: Hausse de l'inflation annuelle dans l'Union européenne des Quinze en mars 1995

L'inflation annuelle dans l'Union européenne des Quinze s'élève à 3,3 % en mars 1995 selon les chiffres publiés par Eurostat. L'inflation est donc en légère hausse par rapport aux 3,2 % (chiffre révisé) enregistrés en février.

Cette augmentation reflète l'inflation en hausse en Italie, au Portugal et en Espagne depuis le début de cette année. Cependant, le taux pour l'ensemble de l'Union européenne est toujours très stable: depuis juillet 1992, il se maintient entre 3 % et 4 %.

La Belgique et la Finlande enregistrent le taux le plus bas avec 1,7 %. La France arrive en deuxième position avec 1,8 %.

Voici les taux enregistrés en mars, classés par ordre croissant, pour chaque Etat membre ainsi que les chiffres correspondants pour l'année précédente:

	mars 95	mars 94		mars 95	mars 94
	mars 95	mars 94		mars 95	mars 94
Belgique	1,7 %	2,3 %	Irlande**	2,5 %	1,7 %
Finlande	1,7 %	0,4 %	Suède	3,0 %	1,8 %
France	1,8 %	1,5 %	Royaume-Uni	3,5 %	2,3 %
Allemagne*	2,3 %	3,2 %	Portugal	4,5 %	6,0 %
Pays-Bas	2,3 %	3,0 %	Italie	4,8 % ^p	4,3 %
Luxembourg	2,3 %	2,3 %	Espagne	5,1 %	4,9 %
Autriche	2,4 %	3,1 %	Grèce	10,3 %	10,2 %
Danemark	2,5 %	1,7 %			
EUR 15	3,3 % ^p	3,1 %			

* L'IPC pour l'Allemagne continue de refléter les frontières d'avant le 3 octobre 1990. En mars, l'inflation dans les nouveaux Länder était de 1,9 % comparé à mars 1994.

** Fév 95 / fév 94 et fév 94 / fév 93

^p Provisoire

Les taux correspondants dans quelques autres pays non membres de l'Union Européenne sont les suivants: États-Unis 2,9 % (2,5 %), Canada 2,2 % (0,2 %) Japon -0,3 % (1,3 %), Suisse 1,5 % (1,3 %), Norvège 2,7 % (1 %) et Islande 1,4 % (2,6 %).

CHOMAGE: Le chômage dans l'Union européenne des Quinze en baisse: 10,8 % en mars 1995

Le chômage dans l'Union européenne des Quinze, corrigé des variations saisonnières, est estimé à 10,8 % en mars 1995. Ce taux est à comparer aux 10,9 % (taux révisé) enregistrés en février et aux 11,3 % de mars 1994.

Entre mars 1994 et mars 1995, les plus fortes baisses sont observées en Espagne (où le taux est passé de 24,3 % à 23,2 %, taux le plus élevé dans l'Union européenne), en Finlande (de 19,7 % à 16,5 %, deuxième taux le plus élevé de l'Union européenne), au Danemark (de 10,7 % à 9,2 %) et au Royaume-Uni (de 9,8 % à 8,5 %). L'Allemagne est passée de 8,5 % à 8 %.

La baisse au cours des douze derniers mois est plus marquée chez les hommes (leur taux de chômage est passé de 10,2 % à 9,6 %) que chez les femmes (de 12,8 % à 12,6 %). Eurostat indique que ceci semble confirmer la moindre sensibilité du chômage féminin à la conjoncture. Eurostat estime qu'environ 17,9 millions de personnes sont au chômage dans l'Union européenne des Quinze au mois de mars 1995. Ce chiffre, corrigé des variations saisonnières, est établi en accord avec les critères du Bureau International du Travail (BIT).

Remarque

Le taux de chômage et le nombre de chômeurs sont estimés selon les recommandations du BIT après correction des différences entre les méthodes nationales de recensement du chômage.

PRODUCTION INDUSTRIELLE : La production industrielle dans l'Union européenne des Quinze encore en hausse en janvier 1995

La tendance de la production industrielle dans l'Union européenne est à la hausse: +1,3 % de novembre à janvier par rapport aux trois mois précédents.

Eurostat indique que la production continue de progresser sans montrer aucun signe de ralentissement. Cependant, l'indice de production en janvier était de 100,1 (1990=100), ce qui signifie que la récession de 1992-1993 vient seulement d'être compensée.

Aux États-Unis, la reprise est également solide avec une progression de 1,2 % de novembre à janvier comparé aux trois mois précédents.

COMMERCE EXTERIEUR : Les exportations de l'Union européenne des Douze ont augmenté davantage que les importations au cours des dix premiers mois de 1994 (+1,5 points en pourcentage).

En octobre 1994, le commerce extérieur de l'Union européenne a enregistré un excédent commercial de 1,4 milliard d'écus contre 3 milliards d'écus pour le même mois en 1993. Cependant, le déficit cumulé pour janvier-octobre 1994 a été ramené à 1,1 milliard d'écus alors qu'il était de 6,5 milliards d'écus un an auparavant. Au cours des dix premiers mois de 1994, les exportations extra-UE ont augmenté davantage que les importations: respectivement 11,5 % et 10 %. Ce différentiel positif a été la raison principale du redressement de la balance commerciale, même si celui-ci s'est contracté, comparé à la même période de 1993.

Au cours de la période janvier-octobre 1994, l'Allemagne a enregistré l'excédent extra-UE le plus important des États membres de l'UE (1,3 milliard d'écus) et la hausse la plus forte par rapport à la même période de l'année précédente (6,3 milliards d'écus).

Au cours des dix premiers mois de 1994, l'excédent de la balance commerciale italienne s'est accru de 2,6 milliards d'écus, atteignant 10,1 milliards d'écus contre 7,5 milliards d'écus en 1993.

Au cours de la période janvier-octobre 1994, le Royaume-Uni a, parmi les pays de l'Union européenne, enregistré le plus fort déficit commercial (17,6 milliards d'écus). La position commerciale du Royaume-Uni s'est légèrement détériorée (0,7 milliard d'écus) par rapport à la même période de 1993, même si le différentiel entre les taux de croissance des exportations et des importations était positif (+0,8 points en pourcentage).

Le déficit extra-UE néerlandais a enregistré la plus forte détérioration entre janvier-octobre 1993 et 1994 (4,9 milliards d'écus) atteignant 15,6 milliards d'écus.

Au cours de la période janvier-octobre 1994, le commerce extra-UE de l'UEBL et de l'Irlande a enregistré les plus forts taux de croissance des États membres de l'Union européenne comparé à la même période une année auparavant. Pour les importations, ces taux étaient respectivement de 23,1 % et 21,3 %, tandis que les exportations enregistraient des taux inférieurs (21,3 % et 16,3 % respectivement). Au cours des dix premiers mois de 1994, la position extérieure de ces deux États membres s'est détériorée par rapport à la même période de 1993. Le déficit de l'UEBL est passé de 0,4 milliard d'écus à 0,9 milliard d'écus, tandis que l'excédent irlandais s'est légèrement tassé.

L'excédent commercial extra-UE de la France s'est accru de 1,4 milliard d'écus entre la période susmentionnée de 1994 et à la même période de l'année précédente (passant de 6,7 milliards d'écus à 8,1 milliards d'écus).

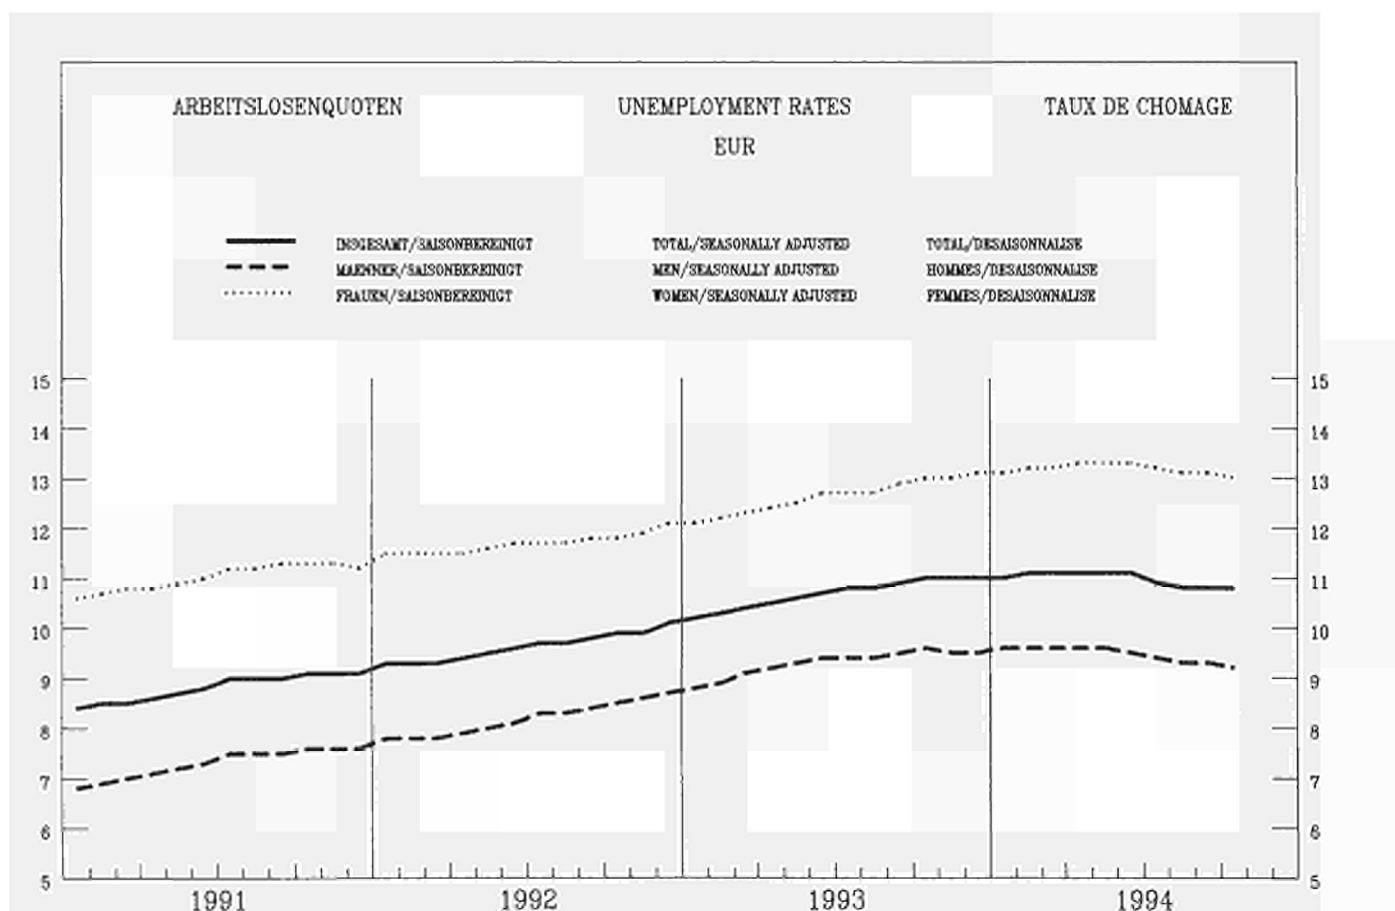

Entre les périodes janvier-octobre 1993 et 1994, les positions du commerce extérieur du Danemark et du Portugal étaient pratiquement stables (respectivement 2 milliards d'écus d'excédent et 2,3 milliards d'écus de déficit).

De janvier à octobre 1994, l'Espagne et la Grèce ont amélioré leur balance commerciale par rapport à la période correspondante de l'année précédente: les deux pays ont réduit leur déficit extra-UE respectivement de 0,2 milliard d'écus et de 1,1 milliard d'écus. Parmi les pays de l'UE, la Grèce a été le seul à enregistrer un taux de croissance négatif de ses importations (-11,8 % par rapport à l'année précédente) tandis que ses exportations se sont accrues de 15,7 %.
