REMARQUE PRELIMINAIRE

Toutes les données, reprises dans cette publication (prix, prélèvements, e.a.) peuvent être considérées comme définitives, sous réserve toutefois des fautes d'impression éventuelles ou des modifications, apportées ultérieurement aux données, qui ont servi de base pour le calcul des moyennes.

VORBEMERKUNG

Alle in diesem Heft aufgenommenen Angaben (Preise, Abschöpfungen) können als endgültig angesehen werden, jedoch unter dem Vorbehalt eventueller Druckfehler und etwaigen nachträglichen Änderungen derjenigen Angaben, die zur Berechnung von Durchschnitten gedient haben.

PRELIMINARY NOTE

The data contained in this publication (prices, levies, etc..) may be regarded as definitive, subject to any printing errors or to changes subsequently made to the data used for calculating averages.
The Continental practice of using commas rather than decimal points has been followed throughout this publication.

NOTA PRELIMINARE

Tutti i dati ripresi in questa pubblicazione (prezzi, prelievi ed altri) possono essere considerati come definitivi, con riserva tuttavia ad eventuali errori di stampa o ad ulteriori modifiche apportate ai dati che sono serviti da base per il calcolo delle medie.

OPMERKING VOORAF

Alle in deze publicatie opgenomen gegevens (prijzen, heffingen, e.d.) kunnen als definitief worden beschouwd, onder voorbehoud echter van eventuele drukfouten en van wijzigingen die achteraf werden aangebracht in de grondgegevens, die als basis dienden voor de berekening van gemiddelden.

INDLEDENDE BEMÆRKNING

Alle de i dette hæfte opførte angivelser (priser, importafgifter o.a.) kan betragtes som endelige, dog under forbehold af eventuelle trykfejl og senere ændringer af de angivelser, som har tjent til beregning af gennemsnit.

VIANDE PORCINE

Et l'aircissements concernant le prix de la viande de porc (prix fixés et prix de marché) et les prélevements à l'importation repris dans cette publication

INTRODUCTION

Il a été prévu, par la voie du Règlement n° 20/62/CEE du 4.4.1962 (Journal Officiel n° 30 du 20.4.1962), que l'organisation commune des marchés verrait, dans le secteur de la viande de porc, établie graduellement à partir du 30 juillet 1962 et que cette organisation de marché comporterait principalement un régime de prélevements intracommunautaires et de prélevements envers les reys tiers, calculé notamment sur la base des prix des céréales fourragères.

L'instauration, à partir du 1er juillet 1967, d'un régime de prix unique des céréales dans la Communauté a conduit à la réalisation à cette date d'un marché unique dans le secteur de la viande de porc. Il en est résulté la suppression des prélevements intracommunautaires.

I. REGIME DES PRIX

A. Prix fixés

Prix de base (Règlement n° 121/67/CEE - art. 4)

Conformément à l'art. 4 du Règlement n° 121/67/CEE du 13.6.1967 (Journal Officiel n° 117, 10ème année, du 19.6.1967) portant organisation commune des marchés dans le secteur de la viande de porc, le Conseil, statuant sur proposition de la Commission, fixe annuellement pour la Communauté avant le 1er août, un prix de base valable pour la campagne de commercialisation qui suit et qui dure du 1er novembre au 31 octobre. Ce prix de base est fixé pour les porcs abattus de la qualité type à un niveau tel qu'il contribue à assurer la stabilisation des cours sur les marchés tout en n'entraînant pas la formation d'excédents structurels dans la Communauté.

Prix d'écluse : (Règlement n° 121/67/CEE - Art. 12)

La Commission, après consultation du Comité de gestion, fixe pour la Communauté des prix d'écluse. Ces prix d'écluse sont fixés à l'avance pour chaque trimestre et sont valables à partir du 1er novembre, du 1er février, du 1er mai et du 1er août. Lors de leur fixation, il est tenu compte de la valeur de la quantité d'aliments nécessaires à la production d'un kg de viande de porc, c'est-à-dire de la valeur, sur le marché mondial, des céréales fourragères et de la valeur des autres aliments. Il est également tenu compte des frais généraux de production et de commercialisation.

Mesures d'intervention (Règlement n° 121/67/CEE - art. 4, par. 2 et art. 5 par. 1)

Dans le cas où des mesures d'intervention sont décidées, un prix d'achat à l'intervention est fixé, qui, pour le porc abattu de la qualité type, ne peut être supérieur à 92 % ni inférieur à 85% du prix de base.

B. Qualité (type) (Règlement n° 192/67/CEE - art. 2)

Le prix de base et le prix d'intervention s'appliquent à des porcs abattus d'une qualité moyenne (qualité type), représentative de l'offre et caractérisée par des prix sensiblement rapprochés. A la qualité type répondent les carcasses de porcs de la classe II de la grille communautaire de classement des carcasses de porcs déterminée par le règlement (CEE) n° 2108/70, à l'exclusion de celles d'un poids inférieur à 70 kilogrammes et de celles d'un poids égal ou supérieur à 160 kilogrammes.

II. REGIME DES ECHANGES AVEC LES PAYS TIERS

Prélèvements à l'importation : (Règlement n° 121/67/CEE - art. 8)

Ils sont fixés à l'avance pour chaque trimestre et sont applicables aux produits visés à l'art. 1er du Règl. n° 121/67/CEE. En ce qui concerne le calcul des divers prélevements à l'importation, il faut se référer aux art. 9 et 10 du Règlement n° 121/67/CEE.

Restitutions à l'exportation (Règlement n° 121/67/CEE - art. 15)

Pour permettre l'exportation des produits dans le secteur de la viande porcine, sur la base des cours ou des prix de ces produits sur le marché mondial, la différence entre ces cours ou prix et les prix dans la Communauté peut être couverte par une restitution à l'exportation. Cette restitution est la même pour toute la Communauté et peut être différenciée selon les destinations.

III. PRIX SUR LE MARCHÉ INTÉRIEUR

Il a été établi pour le prix des porcs abattus, il a été arrêté la liste suivante des marchés représentatifs (Règlement n° 213/67/CEE-2112/EU-2000/70-224/72-2708/72)

Erläuterungen zu den nachstehend aufgeführten Preisen für Schweinefleisch (festgesetzte Preise und Marktpreise) und Abschöpfungen bei der Einfuhr

EINLEITUNG

In der Verordnung Nr. 20/62/EWG vom 4.4.1962 (Amtsblatt Nr. 30 vom 20.4.1962) wurde bestimmt, dass die gemeinsame Marktororganisation für Schweinefleisch ab 30. Juli 1962 schrittweise errichtet wird, und dass die auf diese Weise errichtete Marktororganisation im wesentlichen eine Regelung von Abschöpfungen für den Warenverkehr zwischen den Mitgliedstaaten und mit dritten Ländern umfassen wird, bei deren Berechnung insbesondere die Futtergetreidepreise zugrunde gelegt werden.

Im Zuge der Einführung einheitlicher Getreidepreise in der Gemeinschaft ab 1. Juli 1967 wird zu diesem Zeitpunkt ein gemeinsamer Markt für Schweinefleisch hergestellt. Damit entfallen die innergemeinschaftlichen Abschöpfungen.

I. PREISREGELUNG

A. Festgesetzte Preise

Grundpreis: (Verordnung Nr. 121/67/EWG - Art. 4)

Gemäß Artikel 4 der Verordnung Nr. 121/67/EWG vom 13.6.1967 (Amtsblatt vom 19.6.1967, 10. Jahrgang Nr. 117) über die gemeinsame Marktororganisation für Schweinefleisch setzt der Rat auf Vorschlag der Kommission jährlich vor dem 1. August einen Grundpreis fest; der Grundpreis gilt für die nächste Verkaufssaison, die vom 1. November bis 31. Oktober läuft, für geschlachtete Schweine einer Standardqualität, und zwar so, dass er dazu beiträgt, die Preisstabilisierung auf den Märkten zu gewährleisten, ohne zur Bildung struktureller Überschüsse in der Gemeinschaft zu führen.

Einschleusungspreise: (Verordnung Nr. 121/67/EWG, Art. 12)

Die Kommission setzt nach Anhörung des zuständigen Verwaltungsausschusses für die Gemeinschaft Einschleusungspreise fest. Die Einschleusungspreise werden für jedes Vierteljahr im voraus festgesetzt und gelten ab 1. November, 1. Februar, 1. Mai und 1. August. Die Festsetzung erfolgt anhand des Wertes der für die Erzeugung von 1 kg Schweinefleisch erforderlichen Futtermenge, ausgedrückt in Weltmarktpreisen für Futtergetreide und Futtermittel. Außerdem werden die allgemeinen Erzeugungs- und Vermarktungskosten berücksichtigt.

Interventionsmaßnahmen: (Verordnung Nr. 121/67/EWG, Art. 4 Abs. 2 und Art. 5 Abs. 1)

Wenn es Interventionsmaßnahmen gibt, wird ein aus dem Grundpreis abgeleiteter Interventionspreis festgesetzt. Der Kaufpreis für geschlachtete Schweine der Standardqualität darf dann nicht höher als 92 v.H. und nicht niedriger als 85 v.H. des Grundpreises sein.

B. Qualität (Standard) (Verordnung Nr. 192/67/EWG - Art. 2)

Der Grundpreis und der Interventionspreis gelten für geschlachtete Schweine mittlerer Qualität (Standardqualität), die für das Angebot repräsentativ ist und deren Kennzeichen darin besteht, dass die Preise nahe beieinander liegen. Standardqualität sind Schweinhälften, die unter die Handelsklasse II des in der Verordnung (EWG) Nr. 2108/70 festgelegten gemeinschaftlichen Handelsklassenschemas für Schweinhälften fallen, mit Ausnahme derjenigen mit einem Zweihälftengewicht von weniger als 70 oder mehr als 160 kg.

II. REGELUNG DES HANDELS MIT DRITTEN LÄNDERN

Abschöpfungen bei der Einfuhr: (Verordnung Nr. 121/67/EWG, Art. 8)

Für die in Artikel 1 der Verordnung Nr. 121/67/EWG genannten Zollpositionen wird vierteljährlich im voraus eine Abschöpfung festgesetzt.

Was die Berechnung der einzelnen Abschöpfungen betrifft, wird auf die Artikel 9 und 10 der Verordnung Nr. 121/67/EWG hingewiesen.

Erstattungen bei der Ausfuhr (Verordnung Nr. 121/67/EWG - Art. 15)

Um die Ausfuhr der Erzeugnisse dieses Sektors auf der Grundlage der Notierungen oder Preise zu ermöglichen, die auf dem Weltmarkt für diese Erzeugnisse gelten, kann der Unterschied zwischen diesen Notierungen oder Preisen und den Preisen der Gemeinschaft durch eine Erstattung bei der Ausfuhr ausgeglichen werden.

Die Erstattung ist für die gesamte Gemeinschaft gleich und kann je nach Bestimmung oder Bestimmungsgebiet unterschiedlich sein.

III. PREISE AUF DEM INLAENDERISCHEN MARKT

Die Preise für geschlachtete Schweine werden für folgende repräsentative Märkte festgesetzt (Verordnung Nr. 213/67/EWG - 2112/69-2090/70-224/72-2708/72)

EXPLANATORY NOTE ON THE PIGMEAT PRICES (FIXED PRICES AND MARKET PRICES) AND IMPORT LEVIES SHOWN IN THIS PUBLICATION

INTRODUCTION

Regulation No 20 of 4.4.1962 (Official Journal No 30, 20.4.1962) provided that the common organization of the market in pigmeat should be established progressively from 30 July 1962 and that the main feature of the market organization would be a system of intra-Community levies and levies on imports from third countries. These levies would be calculated with particular reference to feed grain prices.

I. PRICES

A. Fixed prices

Basic price (Regulation No 121/67/EEC - Article 4)

Article 4 of Regulation No 121/67/EEC of 13.6.1967 (Official Journal No 117, 19.6.1967) on the common organization of the market in pigmeat, stipulates that the Council, acting on a proposal from the Commission, must fix a basic price for the Community before 1 August each year. This price is valid for the following marketing year running from 1 November to 31 October. It is fixed for standard quality pig carcases at a level which contributes towards stabilizing market prices without however leading to the formation of structural surpluses within the Community.

Sluice-gate prices (Regulation No 121/67/EEC - Article 12)

The Commission fixes sluice-gate prices for the Community following consultation with the Management Committee.

These sluice-gate prices are fixed in advance for each quarter and are valid from 1 November, 1 February, 1 May and 1 August respectively. When the prices are being fixed, the value of the quantity of feeding-stuffs required for the production of one kilogramme of pigmeat is taken into account, i.e. the value of feed grain and other feeding-stuffs on the world market. General production and marketing costs are also taken into consideration.

Intervention (Regulation No 121/67/EEC - Article 4(2) and Article 5(1))

Where intervention measures are to be taken, a buying-in price for standard quality pig carcases is fixed which may not be more than 92 % nor less than 85 % of the basic price.

B. (Standard) quality (Regulation No 121/67/EEC - Article 2)

The basic price and the intervention price apply to average quality (standard quality) pig carcases which are representative of supply and which are characterized by the fact that their prices are very similar. Pig carcases graded as Class II on the Community scale for grading pig carcases laid down by Regulation (EEC) No 2108/70, excluding carcases weighing less than 70 kilogrammes and those weighing 160 kilogrammes or more, correspond to the standard quality.

II. TRADE WITH THIRD COUNTRIES

Import levies (Regulation No 121/67/EEC - Article 8)

These are fixed in advance for each quarter and apply to the products listed in Article 1 of Regulation No 121/67/EEC.

Rules for calculating the various import levies are contained in Article 9 and Article 10 of Regulation No 121/67/EEC.

Export refunds (Regulation No 121/67/EEC - Article 15)

To enable pigmeat products to be exported on the basis of quotations or prices for these products on the world market, the difference between those quotations or prices and prices within the Community may be covered by an export refund. This refund is the same for the whole Community and may be varied according to destination.

III. PRICES ON THE INTERNAL MARKET

The following list of representative markets was drawn up for the purpose of establishing prices for pig carcases (Regulations Nos 213/67/EEC - 2112/69 - 2090/70 - 224/72 - 2708/72)

Spiegazioni relative ai prezzi delle carni suine che figurano nella presente pubblicazione
(prezzi fissati e prezzi di mercato) e sui prelievi all'importazione

INTRODUZIONE

Con il Regolamento n. 20/62/CEE del 4.4.1962 (Gazzetta Ufficiale n. 30 del 20.4.1962) è stato stabilito che l'organizzazione comune dei mercati nel settore delle carni suine sarebbe stata gradualmente istituita a decorrere dal 30 luglio 1962 e che tale organizzazione di mercato comporta principalmente un regime di prelievi fra gli Stati membri e nei confronti dei paesi terzi, calcolati in particolare sulla base dei prezzi dei cereali da foraggio.

L'inistaurazione, a decorrere dal 1° luglio 1967, di un regime di prezzi unici dei cereali nella Comunità comporta la realizzazione, alla stessa data, di un mercato unico nel settore delle carni suine. Di conseguenza sono venuti a cadere i prelievi intracomunitari.

I. REGIME DEI PREZZI

A. Prezzi fissati

Prezzo di base (Regolamento n. 121/67/CEE - art. 4)

Conformemente all'articolo 4 del Regolamento n. 121/67/CEE del 13.6.1967 (Gazzetta Ufficiale del 19.6.1967, 10° anno, n. 117) che prevede un'organizzazione comune dei mercati nel settore delle carni suine, il Consiglio deliberando su proposta della Commissione, fissa ogni anno anteriormente al 1° agosto, per il successivo anno di commercializzazione, che inizia il 1° novembre e termina il 31 ottobre, un prezzo base per la Comunità. Detto prezzo viene fissato per i suini macellati di qualità tipo ad un livello tale che contribuisca ad assicurare la stabilizzazione dei corsi sui mercati senza determinare al tempo stesso la formazione di eccedenze strutturali nella Comunità.

Prezzi limite : (Regolamento n. 121/67/CEE - art. 12)

La Commissione sentito il parere del Comitato di gestione, fissa i prezzi limite. I prezzi limite sono fissati in anticipo per ciascun trimestre ed entrano in applicazione a decorrere dal 1° novembre, 1° febbraio, 1° maggio e 1° agosto. Nella determinazione di tali prezzi viene tenuto conto della quantità di cereali da foraggio necessaria per la produzione di un Kg di carne suina, ossia del valore dei cereali da foraggio ai prezzi del mercato mondiale e del valore degli altri foraggi. Inoltre si tiene conto delle spese generali di produzione e di commercializzazione.

Misure d'intervento (Regolamento n. 121/67/CEE - art. 4, par. 2 e art. 5, par. 1)

Nel caso che misure d'intervento siano decise è fissato un prezzo d'acquisto all'intervento, che, per i suini macellati della qualità tipo, non può essere superiore a 92% né inferiore a 85% del prezzo di base.

B. Qualità (tipo) (Regolamento n. 192/67/CEE - art. 2)

Il prezzo di base e il prezzo d'intervento si riferiscono ai suini macellati di una qualità media (qualità tipo) ritenuta rappresentativa dell'offerta e caratterizzata dal fatto che i prezzi risultino sensibilmente vicini. Alla qualità tipo corrispondono le carcasse di suino della classe II della tabella comunitaria di classificazione delle carcasse di suino determinata dal Regolamento (CEE) n. 2108/70, escluse quelle di peso inferiore a 70 chilogrammi e quelle di peso uguale o superiore a 160 chilogrammi.

II. REGIME DEGLI SCAMBI CON I PAESI TERZI

Prelievi all'importazione : (Regolamento n. 121/67/CEE - art. 8)

Detto prelievo viene fissato in anticipo per ciascun trimestre per le voci tariffarie figurano nell'articolo 1 del Regolamento n. 121/67/CEE.

Per il calcolo dei vari prelievi all'importazione si rinvia al Regolamento n. 121/67/CEE - art. 9 e 10.

Restituzioni all'esportazione (Regolamento n. 121/67/CEE - art. 15)

Per consentire l'esportazione dei prodotti nel settore della carne suina, in base ai corsi o ai prezzi di tali prodotti praticati sul mercato mondiale, la differenza tra questi corsi o prezzi e i prezzi nella Comunità può essere coperta da una restituzione all'esportazione. Detta restituzione è la stessa per tutta la Comunità. Essa può essere differenziata secundo le destinazioni.

III. PREZZI SUL MERCATO INTERNO

Per la determinazione dei prezzi dei suini macellati sono considerati rappresentativi i seguenti mercati (Regolamento n. 213/67/CEE - 2112/69-2090/70 - 224/72 - 2708/72)

Toelichting op de in deze publicatie voorkomende prijzen voor varkensvlees
(vastgestelde prijzen en marktprijzen) en invoerheffingen

INLEIDING

Bij Verordening nr. 20/62/EEG van 4.4.1962 (Publicatieblad nr. 30 dd. 20.4.1962) werd beseind, dat de gemeenschappelijke ordening van de markten in de sector varkensvlees met ingang van 30 juli 1962 geleidelijk tot stand zou worden gebracht en dat deze marktordering hoofdzakelijk een stelsel omvatte van intracommunautaire heffingen en heffingen tegenover derde landen, die onder meer berekend werden op basis van de voedergranaatprijzen.

De invoering in de Gemeenschap, per 1 juli 1967, van een uniforme prijsregeling voor granen bracht met zich mee, dat op bedoelde datum ook een gemeenschappelijke markt in de sector varkensvlees tot stand werd gebracht. De intracommunautaire heffingen kwamen daarmee te vervallen.

I. PRIJSREGELING

A. Vastgestelde prijzen

Basisprijs : (Verordening nr. 121/67/EEG - art. 4)

Overeenkomstig art. 4 van Verordening nr 121/67/EEG van 13.6.1967 (Publicatieblad van 19.6.1967 - 10e jaargang, nr 117) houdende een gemeenschappelijke ordening der markten in de sector varkensvlees, stelt de Raad, op voorstel van de Commissie, jaarlijks voor 1 augustus voor het daaropvolgend verkoopseizoen, dat loopt van 1 november tot 31 oktober voor de Gemeenschap een basicprijs vast voor geslachte varkens van de standaardkwaliteit en wel op een zodanig peil, dat daardoor wordt bijgedragen tot de stabilisatie van de marktprijzen, zonder dat zulke leidt tot het ontstaan van structurele overschotten in de Gemeenschap.

Sluisprijzen : (Verordening nr 121/67/EEG - art. 12)

Sluisprijzen worden door de Commissie, na ingewonnen advies van het Beheerscomité, voor elk kwartaal van tevoren vastgesteld, en zijn van toepassing met ingang van 1 november, 1 februari, 1 mei en 1 augustus. Bij de vaststelling ervan wordt rekening gehouden met de waarde van de hoeveelheid voeder, benodigd voor de productie van 1 kg varkensvlees, t.w. de waarde tegen wereldmarktprijzen van het voedergranaat en de waarde van de andere voeders. Bovendien wordt rekening gehouden met de algemene productie- en commercialisatiekosten.

Interventiematregelen (Verordening nr 121/67/EEG - art. 4 par. 2 en art. 5 par. 1)

In geval van interventiematregelen wordt een interventieprijs vastgesteld, afgeleid van de basisprijs. In dit geval mag de aankoopprijs voor geslachte varkens van de standaardkwaliteit niet meer bedragen dan 92 % en niet minder dan 85 % van de basisprijs.

B. Kwaliteit (standaard) (Verordening nr 192/67/EEG - art. 2)

De basisprijs en de interventieprijs hebben betrekking op geslachte varkens van gemiddelde kwaliteit (standaardkwaliteit), die representatief is voor het aanbod en waarvan een kenmerk is, dat de prijzen nagenoeg gelijk zijn. Tot de standaardkwaliteit behoren de geslachte varkens van klasse II van het in Verordening (EEG) nr 2108/70 vastgestelde communautaire indelingsschema, met uitzondering van de geslachte varkens met een gewicht van minder dan 70 kilogram en die met een gewicht van 160 kilogram en meer.

II. REGELING VAN HET HANDELSVERKEER MET DERDE LANDEN

Heffingen bij invoer : (Verordening nr 121/67/EEG - art. 8)

Deze worden voor elk kwartaal van tevoren vastgesteld voor de in art. 1 van Verordening nr 121/67/EEG opgenomen tariefposten.

Wat de berekening van de diverse invoerheffingen betreft zij verwezen naar Verordening nr 121/67/EEG, art. 9 en 10.

Restituties bij uitvoer (Verordening nr. 121/67/EEG - art. 15)

Om de uitvoer van de produkten in de sektor varkensvlees, op basis van de noteringen of de prijzen van deze produkten op de wereldmarkt mogelijk te maken, kan het verschil tussen deze noteringen of prijzen en de prijzen van de Gemeenschap overbrugd worden door een restitutie bij uitvoer die periodiek wordt vastgesteld. Deze restitutie is gelijk voor de gehele Gemeenschap en kan al naar gelang van de bestemming gedifferentieerd worden.

III. PRIJZEN OP DE BINNENLANDSE MARKT

Voor de vaststelling van de prijzen van geslachte varkens werden volgende representatieve markten vastgesteld (Verordening nr. 213/67/EEG - 2112/69 - 2090/70-224/72-2708/72)

<u>België</u>	De gezamenlijke markten van:	Genk, Lokeren, Charleroi, Brugge, Herve en Anderlecht

Forklaringer til de nedenfor anfoerte priser paa svinekoed (fastsatte priser og markedspriser) og importafgifter

INTRODUKTION

I forordning nr. 20/62/ECAF af 4.4.1962 (De europæiske Fællesskabers Tidende nr. 30 af 20.4.1962) er det bestemt, at den fælles markedsordning for svinekoed skal gennemføres gradvis fra 30. juli 1962, og at den saaledes oprettede markedsordning først og fremmest skulle omfatte et system af importafgifter for vareudvekslingen mellem medlemsstaterne og med tredjelande, som isser betegnes paa grunlag af priserne for foderkorn.

Indførslen fra 1. juli 1967 af fælles kornpriser inden for Fællesskabet medførte, at der paa det tidspunkt oprettedes et enhedsmarked for svinekoed.

Dermed bortfaldt Fællesskabets interne importafgifter.

I. PRISREGLER

A. Fastsatte priser

Basispris: (Forordning nr. 121/67/EOEF, artikel 4)

I henhold til artikel 4 i forordning nr. 121/67/EOEF af 13.6.1967 (De europæiske Fællesskabers Tidende af 19.6.1967, 10. afgang nr. 177) om den fælles markedsordning for svinekoed fastsætter Raadet efter forslag fra Kommissionen hvert år før 1. august en basispris for Fællesskabet, der gælder for den næste salgssæson, som løber fra 1. november til 31. oktober. Denne basispris er fastsat for slagtede svin af standardkvalitet paa et saadtant niveau, at den bidrager til at sikre prisstabiliseringen via markederne uden at føre til dannelse af strukturelle overskud i Fællesskabet.

Slusepriser: (Forordning nr. 121/67/EOEF, artikel 12)

Kommissionen fastsætter slusepriser for Fællesskabet efter høring af den kompetente forvaltningskomité. Slusepriserne fastsættes forud for hvert kvartal og gælder fra 1. november, 1. februar, 1. maj og 1. august. Fastsættelsen sker paa grundlag af værdien af den fodermaengde, der er nødvendig til produktion af 1 kg svinekoed, udtrykt i verdensmarkedspriser for foderkorn o. andre foderstoffer. Desuden tages der hensyn til de almindelige produktions- og salgsomkostninger.

Interventionsforanstaltninger: (Forordning nr. 121/67/EOEF, artikel 4, stk. 2 og artikel 5, stk. 1)

Saaftent er truffet beslutning om interventionsforanstaltninger, fastsættes der en interventionspris afledt af basisprisen. Høbsprisen for slagtede svin af standardkvalitet maa ses ikke være højere end 92% og ikke lavere end 85% af basisprisen.

B. Kvalitet (standard) (Forordning nr. 192/67/EOEF, artikel 2)

Basisprisen og interventionsprisen gælder for slagtede svin af middelkvalitet (standardkvalitet), som er repræsentative for tilbuddet, og for hvilke det er karakteristisk, at priserne ligger tæt op ad hinanden. Standardkvalitet vil sige svinekroppe, som falder under handelsklasse II i Fællesskabets handelsklasseskema for svinekroppe fastlagt i forordning (EOEF) nr. 2108/70, med undtagelse af dem, som har en vægt paa under 70 kg eller lig med eller over 160 kg.

II. REGLER FOR SAMHANDELEN MED TREDJELANDE

Importafgifter: (Forordning nr. 121/67/EOEF, artikel 8)

For de i artikel 1 i forordning nr. 121/67/EOEF nævnte toldpositioner fastsættes der forud for hvert kvartal en importafgift. Hvad angår beregningen af de enkelte importafgifter, henvises til artikel 9 og 10 i forordning nr. 121/67/EOEF.

Eksportrestitutioner: (Forordning nr. 121/67/EOEF, artikel 15)

For at muliggøre udførsel af produkter inden for denne sektor paa grundlag af de noteringer eller priser, der gælder paa verdensmarkedet for disse produkter, kan forskellen mellem disse noteringer eller priser og priserne inden for Fællesskabet udligges ved en eksportrestitution. Denne restitution er den samme for hele Fællesskabet og kan differentieres alt efter bestemmelsesstedet.

III. PRISER PAA HJEMMEMARKEDET

Priserne paa slagtede svin fastsættes for følgende repræsentative markeder (Forordning nr. 213/67/EOEF - 2112/69-2090/70-224/72-2708/72)

ECLAIRCISSEMENTS CONCERNANT LE GRAPHIQUE : "EVOLUTION DES PRIX
DES PORCS DANS LES PAYS DE LA CEE"
(moyenne mobile de 12 mois en UC par 100 kg poids abattu)

Les prix, qui ont servi de base pour l'établissement du graphique, se rapportaient, pour la période qui précédait l'instauration, au 1er juillet 1967, d'un marché unique pour la viande porcine, aux qualités de référence sur les marchés représentatifs des Etats membres. A la rigueur, ces prix ont été corrigés afin de les rendre comparables entre eux. Pour les prix valables à partir du 1er juillet 1967, il faut se référer aux éclaircissements page 7.

o o o

Note: Pour la France et l'Italie, les prix pour la qualité de référence, respectivement pour les années 1950-1957 et 1950-1956, n'étaient pas disponibles. Les calculs ont donc été faits sur base d'autres données.

1. Pour la France : ont été pris en considération les prix des porcs vivants cat. I sur le marché de La Villette, lesquels ont été convertis en prix poids abattu ($\times 1,3$). Vu la différence de qualité (les cotations de La Villette étant, pendant la période de 1958-1964, inférieures de 2,3 % à celles de la qualité "Belle coupe" aux Halles centrales de Paris), il y eut lieu d'ajuster ces prix ($\times 1,0235$).
2. Pour l'Italie : ont été reprises les cotations sur le marché de Milano pour les porcs de 150 kg poids vif, qui ont été converties ensuite en prix poids abattu ($\times 1,3$).

ERLÄUTERUNGEN ZUM SCHAUBILD : "ENTWICKLUNG DER SCHWEINEPREISE IN DEN LÄNDERN DER EWG"
(Gleitender 12-Monatsdurchschnitt - RE je 100 kg Schlachtgewicht)

Die diesem Schaubild zugrunde liegenden Preise waren Preise auf den Referenzmärkten für Schweine der Referenzqualität zum Zeitpunkt vor der Errichtung eines gemeinsamen Marktes für Schweinefleisch am 1. Juli 1967. Die Preise sind teilweise berichtigt worden, damit sie untereinander vergleichbar sind. Für die Preise, die ab 1. Juli 1967 gültig sind, gelten die Erläuterungen auf Seite 8

o o o

Bemerkung : Für Frankreich und Italien sind die Preise für die Referenzqualität für die Jahre 1950-1957 beziehungsweise 1950-1956 nicht vorhanden. Aus diesem Grunde sind für diese Zeiträume Preise aus vorhandenen Angaben errechnet worden.

1. Für Frankreich wird dabei ausgegangen von Preisen für lebende Schweine, Kat. I, auf dem Markt von "La Villette". Nach Umrechnung dieser Preise auf Basis Schlachtgewicht ($\times 1,3$) wurden die Ergebnisse umgerechnet ($\times 1,0235$), um den Qualitätsunterschied auszugleichen, da im Durchschnitt der Jahre 1958-1964 diese Preise von "La Villette" um 2,3 % niedriger gewesen sind, als diejenigen für die Referenzqualität ("belle coupe") in den "Halles centrales de Paris".
2. Für Italien wurden für den oben genannten Zeitraum die Notierungen auf dem Markt von Milano für Schweine mit 150 kg Lebendgewicht verwendet, die dann auf Basis Schlachtgewicht ($\times 1,3$) umgerechnet worden sind.

EXPLANATORY NOTE TO THE GRAPH : "TREND OF PIG PRICES

IN EEC COUNTRIES"

(sliding average over 12 months in u.s./100 kg slaughtered weight)

For the period preceding the introduction of a single market for pigmeat on 1 July 1967, the prices used to plot the graph relate to reference qualities on representative markets in Member States. These prices have been corrected where necessary to make them comparable. Please see the explanatory note on page ^a for prices valid from 1 July 1967.

o o o o o

NB : For France and Italy the prices for the reference quality for 1950-57 and 1950-56 respectively were not available. The calculations had therefore to be based on alternative data.

1. For France the prices for live pigs of cat. I on the La Villette market were taken into account. These were then converted into slaughtered weight prices ($\times 1.3$). Because of the difference in quality ("La Villette" quotations for the period 1958-64 were 2.3 % lower than those for the "Belle coupe" quality at "les Halles centrales de Paris"), it was necessary to adjust these prices ($\times 1.0235$)
2. For Italy, quotations on the Milan market for 150 kg live-weight pigs were taken into account. These were then converted into slaughtered weight prices ($\times 1.3$).

SPIEGAZIONI R'LATIVE AL GRAFICO : "EVOLUZIONE DEI PREZZI DEI SUINI NEI PAESI DELLA CEE"
(media mobile di 12 mesi-UC per 100 kg peso morto)

I prezzi presi come base per la realizzazione del grafico, si riferiscono, per il periodo precedente l'entrata in vigore, il 1^o luglio 1967, del mercato unico delle carni suine, alle qualità di referenza sui mercati rappresentativi degli Stati membri. Se del caso, detti prezzi sono stati corretti per renderli comparabili fra loro. Per i prezzi, in vigore a partire dal 1^o luglio 1967, riferirsi a chiarimenti della pagina 10.

o o o

Nota : I prezzi per la qualità di riferimento, per la Francia e l'Italia rispettivamente per gli anni 1950-1957 e 1950-1956, non erano disponibili. I calcoli sono stati dunque eseguiti sulla base di altri dati.

1. Per la Francia : sono stati presi in considerazione i prezzi dei suini vivi Cat. I sul mercato de "La Villette", i quali sono stati convertiti in prezzi peso morto ($\times 1,3$). E' stato necessario adattare questi prezzi ($\times 1,0235$) - vista la differenza di qualità (essendo le quotazioni de "La Villette", durante il periodo 1958-1964, inferiori di 2,3 % a quelle della qualità "Belle coupe" alle "Halles centrales de Paris").
2. Per l'Italia : sono state prese in considerazione le quotazioni sul mercato di Milano per i suini da 150 kg peso vivo, che, in seguito, sono state convertite in prezzi peso morto ($\times 1,3$).

TOELICHTING OP DE GRAFIK : "ONTWIKKELING VAN DE VARKENSPRIJZEN IN DE LANDEN VAN DE EEC"
(12-maandelijks voortschrijdend gemiddelde-RE per 100 kg geslacht gewicht)

Voor de samenstelling van de grafiek werden, voor de periode voor de inwerkingtreding van de gemeenschappelijke markt voor varkensvlees op 1 juli 1967, de prijzen genomen die betrekking hadden op de op de referentiemarkten van de Lid-Staten verhandelde referentiekwaliteiten, waarop eventueel correcties werden toegepast, ten einde ze onderling vergelijkbaar te maken. Voor de prijzen vanaf 1 juli 1967, zij verwezen naar de toelichting op blz. 11.

o o o

Nota : Voor Frankrijk en Italië waren de prijzen voor de referentiekwaliteit respectievelijk voor de jaren 1950-1957 en 1950-1956 niet beschikbaar. Daarom werden zij vastgesteld aan de hand van andere wel beschikbare gegevens.

1. Voor Frankrijk werd uitgegaan van de prijzen voor levende varkens cat. I op de markt van La Villette. Na omrekening van deze prijzen op basis geslacht gewicht ($\times 1,3$) vond een aanpassing voor verschil in kwaliteit plaats ($\times 1,0235$), omdat gemiddeld over de jaren 1958-1964 de prijzen van La Villette 2,3 % lager lagen dan die van "Belle coupe" in de "Halles centrales de Paris".
2. Voor Italië werden de noteringen op de markt van Milano voor varkens van 150 kg levend gewicht genomen, en omgerekend op basis geslacht gewicht ($\times 1,3$).

FORKLARINGER TIL DIAGRAMMET : "SVINEPRISERNES UDVIKLING I EØF-LANDENE"
(Variabelt 12 måneders gennemsnit - RE pr. 100 kg slagtevaegt)

De priser, der ligger til grund for dettediagram, var priser på medlemslandenes repræsentative markeder for svine af referencekvalitet for tiden før oprettelsen af et fælles marked for svinekjød den 1. juli 1967. Priserne er delvis justeret, for at de kan sammenlignes indbyrdes. For de priser, der er gyldige fra 1. juli 1967, gælder forklaringerne på side 12.

o o o

Bemerkning : For Frankrig og Italien foreligger priserne for referencekvalitetten for årene 1950-1957 henholdsvis 1950-1956 ikke. Priserne for disse perioder er derfor udregnet på grundlag af andre oplysninger.

1. For Frankrigs vedkommende er man gået ud fra priserne på levende svine, kat. I, på markedet "La Villette". Efter omregning af disse priser på grundlag af slagtevaegten ($\times 1,3$) blev resultaterne omregnet ($\times 1,0234$) for at udligne kvalitetsforskellen, da disse priser på "La Villette" i gennemsnit i årene 1958-1964 har været 2,3 % lavere end priserne for referencekvalitetten ("Belle Coupe") i "Halles centrales de Paris".
2. For Italiens vedkommende anvendtes for ovennævnte tidsrum noteringerne på markedet i Milano for svine af 150 kg levende vægt, som så er omregnet på grundlag af slagtevaegt ($\times 1,3$).

Etat circassements concernant les prix des oeufs (prix fixés et prix de marché) et les prélevements à l'importation repris dans cette publication

INTRODUCTION

Il a été prévu, par la voie du Règlement n° 21/62/CEE du 4/4/1962 (Journal Officiel n° 30 du 20.4.1962), que l'organisation commune des marchés serait, dans le secteur des œufs, établie graduellement à partir du 30 juillet 1962 et que cette organisation de marché comporterait principalement un régime de prélevements intracommunautaires et de prélevements envers les pays tiers, calculés notamment sur la base des prix des céréales fourragères.

L'institution, à partir du 1er juillet 1967, d'un régime de prix unique des céréales dans la Communauté a conduit à la réalisation à cette date d'un marché unique dans le secteur des œufs. Il en est résulté la suppression des prélevements intracommunautaires.

I. REGIME DES PRIX

Prix fixés

Prix d'écluse : (Règlement n° 122/67/CEE - art. 7)

Conformément à l'art. 7 du Règlement n° 122/67/CEE du 13.6.1966 (Journal Officiel du 19.6.1967 - 10ème année, n° 117) portant organisation commune des marchés dans le secteur des œufs, la Commission, après consultation du Comité de gestion, fixe pour la Communauté les prix d'écluse. Ces prix d'écluse sont fixés à l'avance pour chaque trimestre et sont valables à partir du 1er novembre, du 1er février, du 1er mai et du 1er août. Lors de leur fixation, il est tenu compte du prix sur le marché mondial de la quantité de céréales fourragères nécessaire à la production d'un kg d'œufs en coquille. Il est également tenu compte des autres coûts d'alimentation ainsi que des frais généraux de production et de commercialisation.

II. REGIME DES ECHANGES AVEC LES PAYS TIERS

Prélèvements à l'importation : (Règlement n° 122/67/CEE - art. 3)

Ils sont fixés à l'avance pour chaque trimestre et sont applicables aux produits visés à l'art. 1er du Règlement n° 122/67/CEE.

En ce qui concerne le calcul des divers prélevements à l'importation, il faut se référer aux art. 4 et 5 du Règlement n° 122/67/CEE.

Restitutions à l'exportation (Règlement n° 122/67/CEE - art. 9)

Pour permettre l'exportation des produits dans le secteur des œufs sur la base des prix de ces produits sur le marché mondial, la différence entre ces prix et les prix dans la Communauté peut être couverte par une restitution à l'exportation. Cette restitution est la même pour toute la Communauté et peut être différenciée selon les destinations.

III. PRIX SUR LE MARCHE INTERIEUR

Dans la mesure du possible, les cotations ont été établies pour des œufs de la catégorie A 4 (55 à 60g). Toutefois, il est à remarquer que ces prix ne sont pas nécessairement comparables, à cause des différentes conditions de livraison, de stade de commercialisation ... la qualité.

Erläuterungen zu den nachstehend aufgeführten Preisen für Eier (festgesetzte Preise und Marktpreise) und Abschöpfungen bei der Einführung

EINLEITUNG

In der Verordnung Nr. 21/62/EWG vom 4.4.1962 (Amtsblatt Nr. 30 vom 20.4.1962) wurde bestimmt, daß die gemeinsame Marktorganisation für Eier ab 30. Juli 1962 schrittweise errichtet wird, und daß die auf diese Weise errichtete Marktorganisation im wesentlichen eine Regelung von Abschöpfungen für den Warenverkehr zwischen den Mitgliedstaaten und mit dritten Ländern umfassen wird, bei derer Berechnung insbesondere die Futtergetreidepreise zugrunde gelegt werden. Im Zuge der Einführung einheitlicher Getreidepreise in der Gemeinschaft ab 1. Juli 1967 wird zu diesem Zeitpunkt ein gemeinsamer Markt für Eier hergestellt. Damit entfielen die innergemeinschaftlichen Abschöpfungen.

I. PREISREGELUNG

Festgesetzte Preise

Einschleusungspreise : (Verordnung Nr. 122/67/EWG, Art. 7)

Gemäß Art. 7 der Verordnung Nr. 122/67/EWG vom 13.6.1967 (Amtsblatt vom 19.6.1967, 10. Jahrgang Nr. 117) über eine gemeinsame Marktorganisation für Eier setzt die Kommission nach Anhörung des zuständigen Verwaltungsausschusses für die Gemeinschaft Einschleusungspreise fest. Die Einschleusungspreise werden für jedes Vierteljahr im voraus festgesetzt und gelten ab 1. November, 1. Februar, 1. Mai und 1. August. Bei der Festsetzung wird der Weltmarktpreis der für die Erzeugung von 1 kg Eier in der Schale erforderliche Futtergetreidemenge berücksichtigt. Außerdem sind die sonstigen Futterkosten sowie die allgemeinen Erzeugungs- und Vermarktungskosten berücksichtigt.

II. REGELUNG DES HANDELS MIT DRITTEN LÄNDERN

Abschöpfungen bei Einführung: (Verordnung Nr. 122/67/EWG, Art. 3)

Für die in Art. 1 der Verordnung Nr. 122/67/EWG genannten Zollpositionen wird vierteljährlich im voraus eine Abschöpfung festgesetzt.

Was die Berechnung der einzelnen Abschöpfungen betrifft, wird auf die Art. 4 und 5 der Verordnung Nr. 122/67/EWG hingewiesen.

Erstattungen bei der Ausfuhr (Verordnung Nr. 122/67/EWG - Art. 9)

Um die Ausfuhr der Erzeugnisse dieses Sektors auf der Grundlage der Weltmarktpreise dieser Erzeugnisse zu ermöglichen, kann der Unterschied zwischen diesen Preisen und den Preisen der Gemeinschaft durch eine Erstattung bei der Ausfuhr ausgeglichen werden. Die Erstattung ist für die gesamte Gemeinschaft gleich. Sie kann je nach Bestimmung oder Bestimmungsgebiet unterschiedlich sein.

III. PREISE AUF DEM INLAENDISCHEN MARKT

Die Notierungen der Eiernreihe beziehen sich soweit wie möglich auf Eier der Handelsklasse A 4 (55 bis 60 r). Die Preise sind jedoch infolge unterschiedlicher Lieferungsbedingungen, Handelsstufer und Qualitätsklassen nicht ohne weiteres zu vergleichen.

EXPLANATORY NOTE ON THE EGG PRICES (FIXED PRICES AND MARKET PRICES) AND IMPORT LEVIES SHOWN IN THIS PUBLICATION

INTRODUCTION

Regulation No 21 of 4.4.1962 (Official Journal No 30, 20.4.1962) provided that the common organization of the market in eggs should be established progressively from 30 July 1962 and that the main feature of the market organization would be a system of intra-Community levies and levies on imports from third countries. These levies would be calculated with particular reference to feed grain prices. The introduction of a single price system for cereals on 1 July 1967 led to the creation of a single market for eggs at the same time. This resulted in the abolition of intra-Community levies.

I. PRICESFixed pricesSluice-gate prices : (Regulation No 122/67/EEC - Article 7)

Article 7 of Regulation No 122/67/EEC of 13.6.1966 (Official Journal No 117, 19.6.1967) on the common organization of the market in eggs, stipulates that the Commission must fix sluice-gate prices for the Community following consultation with the Management Committee. These sluice-gate prices are fixed in advance for each quarter and are valid from 1 November, 1 February, 1 May and 1 August respectively. When they are being fixed, the price on the world market of the quantity of feed grain required for the production of one kilogramme of eggs in shell is taken into consideration. Other feeding costs and general production and marketing costs are also taken into account.

II. TRADE WITH THIRD COUNTRIESImport levies (Regulation No 122/67/EEC - Article 9)

These are fixed in advance for each quarter and apply to the products listed in Article 1 of Regulation No 122/67/EEC.

Rules for calculating the various import levies are contained in Articles 4 and 5 of Regulation No 122/67/EEC.

Export refunds (Regulation No 122/67/EEC - Article 9)

To enable egg products to be exported on the basis of prices for these products on the world market, the difference between those prices and prices within the Community may be covered by an export refund. This refund is the same for the whole Community and may be varied according to destination.

III. PRICES ON THE INTERNAL MARKET

Where possible, quotations have been established for category A 4 (55 to 60 g.) eggs. It should be noted however that these prices are not necessarily comparable because they relate to different delivery conditions, marketing stages and qualities.

Spiegazioni relative ai prezzi delle uova che figurano nel presente pubblicazione
(prezzi fissati e prezzi di mercato) e sui prelievi all'importazione

INTRODUZIONE

Con il Regolamento n. 21/62/CEE del 4.4.1962 (Gazzetta Ufficiale n. 30 del 20.4.1962) è stato stabilito che l'organizzazione comune dei mercati nel settore delle uova sarebbe stata gradualmente istituita a decorrere dal 30 luglio 1962 e che tale organizzazione di mercato comporta principalmente un regime di prelievi fra gli Stati membri e nei confronti dei paesi terzi, calcolati in particolare sulla base dei prezzi dei cereali da foraggio.

L'instaurazione, a decorrere dal 1° luglio 1967, di un regime di prezzi unici dei cereali nella Comunità comporta la realizzazione, alle stessa data, di un mercato unico nel settore delle uova. Di conseguenza sono venuti a cadere i prelievi intracomunitari.

I. REGIME DEI PREZZI

Prezzi fissati

Prezzi limite (Regolamento n. 122/67/CEE - art. 7)

Conformemente all'art. 7 del Regolamento n. 122/67/CEE del 13.6.1967 (Gazzetta Ufficiale del 19.6.1967-10e anno, n. 117) che prevede un'organizzazione comune dei mercati nel settore delle uova, la Commissione, sentito il parere del Comitato di gestione, fissa i prezzi limite. Detti prezzi limite sono fissati in anticipo per ciascun trimestre e sono applicabili a decorrere dal 1° novembre, 1° febbraio, 1° maggio e 1° agosto. Per la determinazione di tali prezzi si tiene conto del prezzo sul mercato mondiale della quantità di cereali da foraggio necessaria per la produzione di un Kg di uova in guscio. Inoltre si tiene conto degli altri costi di alimentazione e delle spese generali di produzione e di commercializzazione.

II. REGIME DEGLI SCAMBI CON I PAESI TERZI

Prelievi all'importazione : (Regolamento n. 122/67/CEE - art. 3)

Detti prezzi vengono fissati in anticipo per ciascun trimestre per le voci tariffarie indicate nell'articolo 1 del Regolamento n. 122/67/CEE:

Per il calcolo dei vari prelievi all'importazione si rinvia al Regolamento n. 122/67/CEE, art. 4 e 5.

Restituzioni all'esportazione (Regolamento n. 122/67/CEE - art. 9)

Per consentire l'esportazione dei prodotti nel settore delle uova in base ai prezzi di tali prodotti praticati su mercato mondiale, la differenza tra questi prezzi e i prezzi della Comunità può essere coperta da una restituzione all'esportazione. Detta restituzione è stessa per tutta la Comunità. Essa può essere differenziata secondo la destinazioni.

III. PREZZI SUL MERCATO INTERNO

Per le quotazioni delle uova vengono considerati, nella misura del possibile, i prezzi delle uova della classe A 4 (55 a 60 gr). Tuttavia va rilevato che a causa di differenze riscontrabili nelle condizioni di distribuzione, nello stadio di commercializzazione e nella qualità, tali prezzi non sono pienamente comparabili.

Belgio Mercato di Kruishoutem: prezzo d'acquisto del commercio all'ingrosso, franco mercato

Danimarca Prezzo all'esportazione per le uova di tutti le classi.

Germania (RF) 4 mercati : Colonia: prezzo d'acquisto del commercio all'ingrosso, franco magazzino Renania-Westfalia

Monaco : prezzo d'acquisto del commercio all'ingrosso, partenza centro di raccolta
Francoforte: prezzo d'acquisto del commercio all'ingrosso.

Niedersachsen : prezzo d'acquisto del commercio all'ingrosso, partenza magazzino

Francia Mercato di Parigi-Rungis: prezzo di vendita del commercio all'ingrosso, franco mercato

Irlanda Mercato di Dublin: prezzo di vendita del commercio all'ingrosso

Italia 2 mercati : Milano e Roma : prezzo d'acquisto del commercio all'ingrosso, franco mercato

Lussemburgo Prezzi di vendita di OVOLUX (Cooperativa di produttori): prezzo di vendita del commercio all'ingrosso, franco dettagliante

Paesi Bassi Prezzo di vendita del commercio all'ingrosso per le uova di tutte le classi (prezzi ricevuto dal produttore, (calcolato dal LET, "Landbouw-Economisch Instituut") maggiorato di un margine per il commercio all'ingrosso di 1,65 Fl per 100 pezzi o 0,287 Fl per Kg)

Mercato di Barneveld : prezzo d'acquisto del commercio all'ingrosso, franco mercato

Regno Unito Prezzo di vendita del commercio all'ingrosso per le uova "Standard".

(vastgestelde prijzen en marktprijzen) en invoerheffingen

INLEIDING

Bij Verordening Nr. 21/62/EEG van 4.4.1962 (Publicatieblad Nr 30 - dd. 20.4.1962) werd bepaald, dat de gemeenschappelijke ordening van de markten in de sector eieren met ingang van 30 juli 1962 geleidelijk tot stand zou worden gebracht en dat deze marktordering hoofdzakelijk een stelsel omvatte van intra-communautaire heffingen en heffingen tegenover derde landen, die onder meer berekend werden op basis van de voedergraanprijzen.

De invoering in de Gemeenschap, per 1 juli 1967, van een uniforme prijsregeling voor granen bracht met zich mee, dat op bedoelde datum ook een gemeenschappelijke markt in de sector eieren tot stand werd gebracht. De intracommunautaire heffingen kwamen daarmee te vervallen.

I. PRIJSREGELING

Vastgestelde prijzen

Sluisprijzen : (Verordening nr 122/67/EEG - art. 7)

Overeenkomstig artikel 7 van Verordening nr 122/67/EEG van 13.6.1967 (Publicatieblad van 19.6.1967 - 10e jaargang nr 117) houdende een gemeenschappelijke ordening der markten in de sector eieren, stelt de Commissie, na ingewonnen advies van het Beheerscomité, voor de Gemeenschap voor elk kwartaal van tevoren de sluisprijzen vast. Zij zijn van toepassing met ingang van 1 november, 1 februari, 1 mei en 1 augustus. Bij de vaststelling ervan wordt rekening gehouden met de wereldmarktprijs van de hoeveelheid voedergranen, benodigd voor de productie van 1 kg eieren in de schaal. Bovendien wordt rekening gehouden met de overige voerkosten en met de algemene productie- en commercialisatiekosten.

II. REGELING VAN HET HANDELSVERKEER MET DERDE LANDEN

Heffingen bij invoer : (Verordening nr 122/67/EEG - artikel 3)

Deze worden voor elk kwartaal van tevoren vastgesteld voor de in art. 1 van Verordening nr 122/67/EEG opgenomen tariefposten.

Wat de berekening van de diverse invoerheffingen betreft, zij verwezen naar Verordening nr 122/67/EEG art. 4 en 5.

Restituties bij uitvoer (Verordening nr 122/67/EEG - art. 9)

Om de uitvoer van de produkten in de sector eieren op basis van de wereldmarktprijzen mogelijk te maken, kan het verschil tussen deze prijzen en de prijzen van de Gemeenschap overbrugd worden door een restitutie bij uitvoer, die periodiek wordt vastgesteld. Deze restitutie is gelijk voor de gehele Gemeenschap en kan al naar gelang van de bestemming gedifferentieerd worden.

III. PRIJZEN OP DE BINNENLANDSE MARKT

Voor de noteringen van de eieren werden, waar dit mogelijk bleek, de prijzen genomen van de eieren Klasse A 4 (55 tot 60 g). Nochtans dient opgemerkt te worden, dat door verschillen in leveringsvoorraarden, handelsstadium en kwaliteit, deze prijzen niet zonder meer vergelijkbaar zijn.

Forklaringer til de i det følgende anførte anførte priser på aeg (festsatte priser og markedspriser) og importafgifter

INDLEDNING

I forordning nr. 20/62/EOEF af 4.4. 1962 (De europæiske Fællesskabers Tidende nr. 30 af 20.4.1962) er det bestemt, at den fælles markedsordning for aeg skal gennemføres gradvis fra 30. juli 1962, og at den saaledes oprettede markedsordning først og fremmest skulle omfatte et system af importafgifter for vareudvekslingen mellem medlemsstaterne og med tredjelande, som især beregnes på grundlag af priserne for foderkorn. Indførelsen fra 1. juli 1967 af fælles kornpriser inden for Fællesskabet medførte, at der på dette tidspunkt oprettedes et enhedsmarked for aeg. Dermed bortfaldt Fællesskabets interne importafgifter.

I. PRISREGLER

Fastsatte priser

Slusepriser: (Forordning nr. 122/67/EOEF, artikel 7)

I henhold til artikel 7 i forordning nr. 122/67/EOEF af 15.6.1967 (De europæiske Fællesskabers Tidende af 19.6.1967, 10. aarang nr. 117) om den fælles markedsordning for aeg fastsætter Kommissionen slusepriser for Fællesskabet efter høring af den kompetente forvaltningskomité. Slusepriserne fastsættes forud for hvert kvartal og gælder fra 1. november, 1. februar, 1. maj og 1. august. Ved fastsættelsen tages der hensyn til verdensmarkedsprisen for den foderkornsmaengde, der er nødvendig til produktion af 1 kg aeg med skal. Desuden er der taget hensyn til de øvrige foderomkostninger samt de almindelige produktions- og salgsomkostninger.

II. REGLER FOR SALGSHANDELSEN MED TREDJELANDE

Importafgifter: (Forordning nr. 122/67/EOEF, artikel 3)

For de i artikel 1 i forordning nr. 122/67/EOEF nævnte produkter fastsættes der forud for hvert kvartal en importafgift. Hvad angår beregningen af de enkelte importafgifter, henvises til artikel 4 og 5 i forordning nr. 122/67/EOEF.

Eksportrestitutioner: (Forordning nr. 122/67/EOEF, artikel 9)

For at muliggøre udfoersel af produkter inden for denne sektor på grundlag af verdensmarkedsprisen for disse produkter kan forskellen mellem disse priser og Fællesskabets priser udlignes ved en eksportrestitution. Denne restitution er den samme for hele Fællesskabet og kan differentieres alt efter bestemmelserne.

III. PRISER PÅ ØJELENMARKEDET

Noteringerne af aegpriserne sker så vidt muligt for aeg i handelsklasse A4 (55-60 g). Priserne kan dog ikke uden videre sammenlignes på grund af forskelle i leveringsbetingelser, handelstrin og kvalitetsklasser.

VIANDE DE VOLAILLE

Eclaircissements concernant les prix des volailles (prix fixés et prix de marché) et les prélevements à l'importation repris dans cette publication

INTRODUCTION

Il a été prévu, par la voie du Règlement no. 22/62/CEE du 4.4.1962 (Journal Officiel no. 30 du 20.4.1962), que l'organisation commune des marchés serait, dans le secteur de la viande de volaille, établie graduellement à partir du 30 juillet 1962, et que cette organisation de marché comporterait principalement un régime de prélèvements intracommunautaires et de prélèvements envers les pays tiers, calculés notamment sur la base des prix des céréales fourragères.

L'instauration, à partir du 1er juillet 1967, d'un régime de prix unique des céréales dans la Communauté a conduit à la réalisation à cette date d'un marché unique dans le secteur de la viande de volaille. Il en est résulté la suppression des prélevements intracommunautaires.

I. REGIME DES PRIX

Prix fixés

Prix d'écluse : (Règlement no. 123/67/CEE - art. 7)

Conformément à l'art. 7 du Règlement no. 123/67/CEE du 13.6.1967 (Journal Officiel du 19.6.1967 - 10ème année no. 117) portant organisation commune des marchés dans le secteur de la viande de volaille, la Commission, après consultation du Comité de gestion, fixe pour la Communauté les prix d'écluse. Ces prix d'écluse sont fixés à l'avance pour chaque trimestre et sont valables à partir du 1er novembre, du 1er février, du 1er mai et du 1er août. Lors de leur fixation, il est tenu compte du prix sur le marché mondial de la quantité de céréales fourragères nécessaire à la production d'un kg de volaille abattue.

Il est également tenu compte des autres coûts d'alimentation ainsi que des frais généraux de production et de commercialisation.

II. REGIME DES ECHANGES AVEC LES PAYS TIERS

Prélèvements à l'importation : (Règlement no. 123/67/CEE - art. 3)

Ils sont fixés à l'avance pour chaque trimestre et sont applicables aux produits visés à l'art. 1er du Règlement no. 123/67/CEE.

En ce qui concerne le calcul des divers prélevements à l'importation, il faut se référer aux art. 4 et 5 du Règlement no. 123/67/CEE.

Restitutions à l'exportation (Règlement no. 123/67/CEE - art. 9)

Pour permettre l'exportation des produits dans le secteur de la viande de volaille sur la base des prix de ces produits dans le marché mondial, la différence entre ces prix et les prix dans la Communauté peut être couverte par une restitution à l'exportation. Cette restitution est la même pour toute la Communauté et peut être différenciée selon les destinations.

III. PRIX SUR LE MARCHE INTERIEUR

Les cours indiqués ne sont pas nécessairement comparables en raison des conditions commerciales particulières aux divers Etats membres ainsi que des différences de qualité, de poids, de préparation et d'assortiment.

Erläuterungen zu den nachstehend aufgeführten Preisen für Schlachtgeflügel
(festgesetzte Preise und Marktpreise) und Abschöpfungen bei der Einfuhr

EINLEITUNG

In der Verordnung Nr. 22/62/EWG vom 4.4.1962 (Amtsblatt Nr. 30 vom 20.4.1962) wurde bestimmt, daß die gemeinsame Marktorganisation für Geflügelfleisch ab 30. Juli 1962 schrittweise errichtet wird, und daß die auf diese Weise errichtete Marktorganisation im wesentlichen eine Regelung von Abschöpfungen für den Warenverkehr zwischen den Mitgliedstaaten und mit dritten Ländern umfassen wird, bei deren Berechnung insbesondere die Futtergetreidepreise zugrunde gelegt werden. Im Zuge der Einführung einheitlicher Getreidepreise in der Gemeinschaft ab 1. Juli 1967 wird zu diesem Zeitpunkt ein gemeinsamer Markt für Geflügelfleisch hergestellt. Damit entfielen die innergemeinschaftlichen Abschöpfungen.

I. PREISREGELUNG

Festgesetzte Preise

Einschleusungspreise : Verordnung Nr. 123/67/EWG - Art. 7)

Gemäß Artikel 7 der Verordnung Nr. 123/67/EWG vom 13.6.1967 (Amtsblatt vom 19.6.1967, 10. Jahrgang Nr. 117) über die gemeinsame Marktorganisation für Geflügelfleisch setzt die Kommission nach Anhörung des zuständigen Verwaltungsausschusses für die Gemeinschaft Einschleusungspreise fest. Die Einschleusungspreise werden für jedes Vierteljahr im voraus festgesetzt und gelten ab 1. November, 1. Februar, 1. Mai und 1. August. Bei der Festsetzung wird der Weltmarktpreis der für die Erzeugung von 1 kg Geflügelfleisch erforderlichen Futtergetreidemenge berücksichtigt. Außerdem sind die sonstigen Futterkosten sowie die allgemeinen Erzeugungs- und Vermarktungskosten berücksichtigt.

II. REGELUNG DES HANDELS MIT DRITTEN LÄNDERN

Abschöpfungen bei Einfuhr : (Verordnung Nr. 123/67/EWG, Art. 3)

Für die in Art. 1 der Verordnung Nr. 123/67/EWG genannten Zollpositionen wird vierteljährlich im voraus eine Abschöpfung festgesetzt.

Was die Berechnung der einzelnen Abschöpfungen betrifft, wird auf die Artikel 4 und 5 der Verordnung Nr. 123/67/EWG hingewiesen.

Erstattungen bei der Ausfuhr (Verordnung Nr. 123/67/EWG - Artikel 9)

Um die Ausfuhr der Erzeugnisse dieses Sektors auf der Grundlage der Weltmarktpreise dieser Erzeugnisse zu ermöglichen, kann der Unterschied zwischen diesen Preisen und den Preisen der Gemeinschaft durch eine Erstattung bei der Ausfuhr ausgeglichen werden. Die Erstattung ist für die gesamte Gemeinschaft gleich. Sie kann je nach Bestimmung oder Bestimmungsgebiet unterschiedlich sein.

III. PREISE AUF DEM INLAENDISCHEN MARKT

Die Marktpreise sind infolge der besonderen Handelsbedingungen in den einzelnen Mitgliedstaaten, der Unterschiede in Qualität, Gewichtsklassierung, Zubereitung und Sortierung nicht ohne weiteres vergleichbar.

POULTRYMEAT

EXPLANATORY NOTE ON THE POULTRY PRICES (FIXED PRICES AND MARKET PRICES) AND IMPORT LEVIES SHOWN IN THIS PUBLICATION

INTRODUCTION

Regulation No 22 of 4.4.1962 (Official Journal No 30, 20.4.1962) provided that the common organization of the market in poultrymeat should be established progressively from 30 July 1962 and that the main feature of this market organization would be a system of intra-Community levies and levies on imports from third countries. These levies would be calculated with particular reference to feed grain prices.

The introduction of a single price system for cereals in the Community on 1 July 1967 led to the creation of a single market for poultrymeat at the same time. This resulted in the abolition of intra-Community levies.

I. PRICES

Fixed prices

Sluice-gate prices : (Regulation No 123/67/EEC - Article 7)

Article 7 of Regulation No 123/67/EEC of 13.6.1967 (Official Journal No 117, 19.6.1967) on the common organization of the market in poultrymeat stipulates that the Commission must fix sluice-gate prices for the Community following consultation with the Management Committee. These sluice-gate prices are fixed in advance for each quarter and are valid from 1 November, 1 February, 1 May and 1 August respectively. When they are being fixed, the price on the world market of the quantity of feed grain required for the production of one kilogramme of slaughtered poultry is taken into consideration. Other feeding costs and general production and marketing costs are also taken into account.

II. TRADE WITH THIRD COUNTRIES

Import levies : (Regulation No 123/67/EEC - Article 3)

These are fixed in advance for each quarter and apply to the products listed in Article 1 of Regulation No 123/67/EEC.

Rules for calculating the various import levies are contained in Articles 4 and 5 of Regulation No 123/67/EEC.

Export refunds (Regulation No 123/67/EEC - Article 9)

To enable poultrymeat products to be exported on the basis of prices for these products on the world market, the difference between those prices and prices within the Community may be covered by an export refund. This refund is the same for the whole Community and may be varied according to destination.

III. PRICES ON THE INTERNAL MARKET

The quotations given are not necessarily comparable because of marketing conditions specific to various Member States and because of differences in quality, weight, preparation and grading.

Spiegazioni relative ai prezzi del pollame che figurano nel presente pubblicazione
(prezzi fissati e prezzi di mercato) e sui prelievi all'importazione

INTRODUZIONE

Con il Regolamento n. 22/62/CEE del 4.4.1962 (Gazzetta Ufficiale n. 30 del 20.4.1962) è stato stabilito che l'organizzazione comune dei mercati nel settore del pollame sarebbe stata gradualmente istituita a decorrere dal 30 luglio 1962 e che tale organizzazione di mercato comporta principalmente un regime di prelievi fra gli Stati membri e nei confronti dei paesi terzi, calcolati in particolare sulle base dei prezzi dei cereali da foraggio.

L'instaurazione, a decorrere dal 1° luglio 1967, di un regime di prezzi unici dei cereali nella Comunità comporta la realizzazione, alla stessa data, di un mercato unico nel settore del pollame. Di conseguenza sono venuti a cadere i prelievi intracomunitari.

I. REGIME DEI PREZZI

Prezzi fissati

Prezzi limite : (Regolamento n. 123/67/CEE - art. 7)

Conformemente all'articolo 7 del Regolamento n. 123/67/CEE del 13.6.1967 (Gazzetta Ufficiale del 19.6.1967 10° anno, n. 117) che prevede un'organizzazione comune dei mercati nel settore del pollame, la Commissione, sentito il parere del Comitato di gestione, fissa i prezzi limite. Detti prezzi limite sono fissati in anticipo per ciascun trimestre e sono applicabili a decorrere dal 1° novembre, 1° febbraio, 1° maggio e 1° agosto. Per la determinazione di tali prezzi si tiene conto del prezzo sul mercato mondiale della quantità di cereali da foraggio necessaria per la produzione di un kg di pollame macellato. Inoltre si tiene conto degli altri costi di alimentazione e delle spese generali di produzione e di commercializzazione.

II. REGIME DEGLI SCAMBI CON I PAESI TERZI

Prelievi all'importazione : (Regolamento n. 123/67/CEE - art. 3)

Detti prezzi vengono fissati in anticipo per ciascun trimestre per le voci tariffarie indicate nell'articolo 1 del Regolamento n. 123/67/CEE .

Per il calcolo dei vari prelievi si rinvia al Regolamento n. 123/67/CEE, art. 4 e 5.

Restituzioni all'esportazione (Regolamento n. 123/67/CEE - art. 9)

Per consentire l'esportazione dei prodotti nel settore delle carni di pollame in base ai prezzi di tali prodotti praticati sul mercato mondiale, la differenza tra questi prezzi e i prezzi della Comunità può essere coperta da una restituzione all'esportazione. Detta restituzione è la stessa per tutta la Comunità. Essa può essere differenziata secondo le destinazioni.

III. PREZZI SUL MERCATO INTERNO

I prezzi di mercato, date le speciali condizioni di commercializzazione in vigore nei vari Stati membri, le differenze relative alla qualità, classificazione di peso, modo di presentazione ed assortimento, non sono piemontese comparabili.

Toelichting op de in deze publicatie voorkomende prijzen voor slachtpluimvee
(vastgestelde prijzen en marktprijzen) en invoerheffingen

INLEIDING

Bij Verordening nr 22/62/EEG van 4.4.1962 (Publicatieblad nr 30 dd 20.4.1962) werd bepaald dat de gemeenschappelijke ordening der markten in de sector slachtpluimvee met ingang van 30 juli 1962 geleidelijk tot stand zou worden gebracht en dat deze marktordening hoofdzakelijk een stelsel omvatte van intracommunautaire heffingen en heffingen tegenover derde landen, die onder meer berekend werden op basis van de voedergraanprijs.

De invoering in de Gemeenschap, per 1 juli 1967, van een uniforme prijsregeling voor granen bracht dat zich mee, dat op bedoelde datum ook een gemeenschappelijke markt in de sector slachtpluimvee tot stand werd gebracht. De intracommunautaire heffingen kwamen daarmee te vervallen.

I. PRIJSREGELING

Vastgestelde prijzen

Sluisprijzen : (Verordening nr 123/67/EEG - art. 7)

Overeenkomstig artikel 7 van Verordening nr 123/67/EEG van 13.6.1967 (Publicatieblad van 19.6.1967 - 10e jaargang nr 117) houdende een gemeenschappelijke ordening der markten in de sector slachtpluimvee, stelt de Commissie, na ingewonnen advies van het Beheerscomité, voor de Gemeenschap voor elk kwartaal van tevoren de sluisprijzen vast. Zij zijn van toepassing met ingang van 1 november, 1 februari, 1 mei en 1 augustus. Bij de vaststelling ervan wordt rekening gehouden met de wereldmarktprijs van de hoeveelheid voedergraren benodigd voor de productie van 1 kg geslacht pluimvee.

Bovendien wordt rekening gehouden met de overige voederkosten en met de algemene productie- en commercialisatiekosten.

II. REGELING VAN HET HANDELSVERKEER MET DERDE LANDEN

Heffingen bij invoer : (Verordening nr 123/67/EEG - artikel 3)

Deze worden voor elk kwartaal van tevoren vastgesteld voor de in artikel 1 van Verordening nr 123/67/EEG opgenomen tariefposten.

Wat de berekening van de diverse invoerheffingen betreft zij verwezen naar Verordening nr 123/67/EEG - art. 4 en 5.

Restituties bij uitvoer (Verordening nr 123/67/EEG - art. 9)

Om de uitvoer van de producten in de sector slachtpluimvee op basis van de wereldmarktprijzen mogelijk te maken, kan het verschil tussen deze prijzen en de prijzen van de Gemeenschap overbrugd worden door een restitutie bij uitvoer, die periodiek wordt vastgesteld. Deze restitutie is gelijk voor de gehele Gemeenschap en kan al naar gelang van de bestemming gedifferentieerd worden.

III. PRIJZEN OP DE BINNENLANDSE MARKT

De vermelde marktprijzen zijn ten gevolge van de speciale handelsvoorraarden in de onderscheiden Lid-Staten, het verschil in kwaliteit, gewichtsklassering, bereidingswijze en sortering, niet zonder meer vergelijkbaar.

Forklaringer til de i det følgende anførte priser på fjerkrækoed (fastsatte priser og
markedspriser) og importafgifter

INDLEDNING

I forordning nr. 22/62/EOEF af 4.4.1962 (De europæiske Fællesskabers Tidende nr. 30 af 20.4.1962) er det bestemt, at den fælles markedsordning for fjerkrækoed skal gennemføres gradvis fra 30. juli 1962, og at den saaledes oprettede markedsordning først og fremmest skulle omfatte et system af importafgifter for vareudvekslingen mellem medlemsstaterne og med tredjelande, som især beregnes på grundlag af priserne for foderkorn. Indførelsen fra 1. juli 1967 af fælles kornpriser inden for Fællesskabet medførte, at der på dette tidspunkt oprettedes et enhedsmarked for fjerkrækoed. Dermed bortfaldt Fællesskabets interne importafgifter.

I. PRISREGLER

Fastsatte priser

Slusepriser: (Forordning nr. 123/67/EOEF, artikel 7)

I henhold til artikel 7 i forordning nr. 123/67/EOEF af 13.6.1967 (De europæiske Fællesskabers Tidende af 19.6.1967, 10. afgang nr. 117) om den fælles markedsordning for fjerkrækoed fastsætter Kommissionen slusepriser for Fællesskabet efter høring af den kompetente forvaltningskomité. Slusepriserne fastsættes forud for hvert kvartal og gælder fra 1. november, 1. februar, 1. maj og 1. august. Ved fastsættelsen tages der hensyn til verdensmarkedsprisen for den foderkornsmængde, der er nødvendig til produktion af 1 kg fjerkrækoed.

Desuden er der taget hensyn til de øvrige foderomkostninger samt de almindelige produktions- og salgsomkostninger.

II. REGLER FOR SAMHANDELEN MED TREDJELANDE

Importafgifter: (Forordning nr. 123/67/EOEF, artikel 3)

For de i artikel 1 i forordning nr. 123/67/EOEF nævnte toldpositioner fastsættes der forud for hvert kvartal en importafgift.

Hvad angår beregningen af de enkelte importafgifter, henvises til artikel 4 og 5 i forordning nr. 123/67/EOEF.

Eksportrestitutioner: (Forordning nr. 123/67/EOEF, artikel 9)

For at muliggøre udfoersel af produkter inden for denne sektor på grundlag af verdensmarkedspriserne for disse produkter kan forskellen mellem disse priser og Fællesskabets priser udlignes ved en eksportrestitution. Denne restitution er den samme for hele Fællesskabet og kan differentieres alt efter bestemmelserne.

III. PRISER PAA HJEMMEMARKEDET

Markedspriserne kan ikke uden videre sammenlignes på grund af de særlige handelsbetingelser i de enkelte medlemsstater som forskelle i kvalitet, vægt, forarbejdning og udvalg.

VIANDE BOVINE

Eclaircissements concernant les prix de la viande bovine (prix fixés et prix de marché) et les prélevements à l'importation, repris dans cette publication.

INTRODUCTION

Il a été prévu, par la voie du Règlement n° 14/64/CEE du 5.2.1964 (Journal Officiel n° 34 du 27.2.1964) que l'organisation commune des marchés serait, dans le secteur de la viande bovine, établie graduellement à partir de 1964 et que cette organisation comporte principalement un régime de droits de douane et, éventuellement, un régime de prélevements, applicables aux échanges entre les Etats membres ainsi qu'entre les Etats membres et les pays tiers.

Ce marché unique pour la viande bovine établi dans le Règlement (CEE) n° 805/68 du 27 juin 1968, portant organisation commune des marchés dans le secteur de la viande bovine (Journal Officiel du 28.6.1968 11e année, n° L 148) est entré en vigueur le 29 juillet 1968 et comporte entre autre le régime des prix (prix d'orientation et mesures d'intervention), ainsi que le régime des échanges avec les pays tiers (prélevements à l'importation et restitutions à l'exportation).

RÉGIME DES PRIX (Règlement (CEE) n° 805/68, Art. 2 jusqu'à 8)

A. Prix fixés

Conformément à l'art. 3 du Règlement (CEE) n° 805/68, il est fixé annuellement, avant le 1er août, pour la campagne de commercialisation débutant le premier lundi du mois d'avril et se terminant la veillée de ce jour l'année suivante, un prix d'orientation pour les veaux et une prix d'orientation pour les gros bovins.

Sont considérés comme veaux : les animaux vivants de l'espèce bovine des espèces domestiques dont le poids vif est inférieur ou égal à 220 kg et qui n'ont encore aucune dent de remplacement. Sont considérés comme gros bovins : les autres animaux vivants de l'espèce bovine des espèces domestiques, à l'exception des reproducteurs de race pure. Ces prix sont fixés en tenant compte notamment des perspectives de développement de la production et de la consommation de viande bovine, de la situation du marché du lait et des produits laitiers et de l'expérience acquise.

B. Mesures d'intervention (Règlement (CEE) n° 805/68, art. 5 jusqu'à 8)

Pour éviter ou atténuer une baisse importante des prix, les mesures d'intervention suivantes peuvent être prises :

1. Aides au stockage privé
2. Achats effectués par les organismes d'intervention

RÉGIME DES ÉCHANGES AVEC LES PAYS TIERS (Règlement (CEE) n° 805/68, art. 9 jusqu'à 21)

Le marché unique dans le secteur de la viande bovine implique l'établissement d'un régime unique d'échanges avec les pays tiers, s'ajoutant au système des interventions. Ce régime comporte un système de droits de douane, de prélevements à l'importation et de restitutions à l'exportation, tendant, en principe, à stabiliser le marché communautaire.

Il en résulte un équilibre des prix assez stable à l'intérieur de la Communauté.

Prélevements à l'importation (Règlement (CEE) n° 805/68, art. 10)

Pour les veaux et les gros bovins, il est calculé un prix à l'importation à partir des cours enregistrés sur les marchés les plus représentatifs des pays tiers. De plus, et dans certaines conditions, un prix spécial à l'importation est calculé (Règlement (CEE) n° 1026/68).

Dans le cas où le prix à l'importation, majoré de l'incidence du droit de douane, est inférieur au prix d'orientation, la différence est compensée par un prélèvement à l'importation dans la Communauté. Ce prélevement est applicable dans sa totalité, quand la moyenne du prix constaté sur les marchés représentatifs de la Communauté (Règlement (CEE) n° 320/73) se situe en dessous du prix d'orientation. Il est diminué graduellement s'il est constaté que le prix de marché est supérieur au prix d'orientation.

Restitutions à l'exportation (Règlement (CEE) n° 805/68, art. 18)

Si le niveau des prix dans la Communauté est plus élevé que celui des cours ou des prix sur le marché mondial, la différence peut être couverte par une restitution à l'exportation. Cette restitution est la même pour toute la Communauté et peut être différenciée selon les destinations.

III. PRIX SUR LE MARCHE INTERIEUR

Conformément à l'art. 10, paragraphe 4 du Règlement (CEE) n° 805/68 (modifié en dernier lieu par le Règlement (CEE) n° 320/73) et notamment son art. 10, paragraphe 5, la Commission fixe chaque semaine un prix de marché communautaire pour les veaux et pour les gros bovins. Ce prix est égal à la moyenne, pondérée par les coefficients, fixés à l'annexe I du Règlement (CEE) n° 320/73, des prix constatés sur le ou les marchés représentatifs de chaque Etat membre, visés à l'annexe II du même Règlement. Ces prix de marché sont égaux à la moyenne, pondérée par des coefficients de pondération cités dans l'annexe II précité, des prix qui se sont formés pour les qualités de veaux, de gros bovins et des viandes de ces animaux, pendant une période de sept jours dans cet Etat membre à un même stade du commerce de gros.

Les prix de marché constatés dans les Etats membres se portent sur:

IV. PRIX A L'IMPORTATION

Conformément à l'article 10, paragraphe 1 du Règlement (CEE) n° 805/62 et conformément à l'article 6 du Règlement (CEE) n° 218/73, la Commission fixe le premier et troisième jeudi de chaque mois, un prix à l'importation pour les veaux et les gros bovins.

Ce prix à l'importation est calculé sur la base des prix d'offre franco frontière de la Communauté en fonction des possibilités d'achat les plus représentatives en ce qui concerne la qualité et la quantité et du développement du marché de ces produits.

Erläuterungen zu den nachstehend aufgeführten Preisen (festgesetzte Preise und Marktpreise) und Abschöpfungen für Rindfleisch

EINLEITUNG

In der Verordnung Nr. 14/64/EWG vom 5.2.1964 (Amtsblatt Nr. 34 vom 27.2.1964) wurde bestimmt, daß die gemeinsame Marktorganisation für Rindfleisch ab 1964 schrittweise errichtet wird; die auf diese Weise errichtete Marktorganisation umfaßt im wesentlichen eine Regelung von Zöllen und gegebenenfalls eine Regelung von Abschöpfungen für den Warenverkehr zwischen den Mitgliedstaaten und den dritten Ländern.

Der gemeinsame Markt für Rindfleisch wurde in der Verordnung (EWG) Nr. 805/68 vom 27. Juni festgelegt. Die gemeinsame Marktorganisation für Rindfleisch (Amtsblatt vom 28.6.1968, 11. Jahrgang, Nr. L 148) ist am 29. Juli 1968 in Kraft getreten, und sie umfaßt außer der Preisregelung (Richtpreis und Interventionsmaßnahmen) ebenfalls eine Regelung für den Handel mit dritten Ländern (Abschöpfungen bei der Einfuhr und Erstattungen bei der Ausfuhr).

I. PREISREGELUNG (Verordnung (EWG) Nr. 805/68, Art. 2 bis 8)

A. Festgesetzte Preise

Gemäß Artikel 3 der Verordnung (EWG) Nr. 805/68 wird jährlich vor dem 1. August für das Wirtschaftsjahr, das am ersten Montag des Monats April beginnt und am Vorabend dieses Tages in dem darauffolgenden Jahr endet, ein Orientierungspreis für Kälber und ein Orientierungspreis für ausgewachsene Rinder festgesetzt.

Als Kälber sind zu betrachten: lebende Hausrinder mit einem Lebendgewicht bis zu 220 Kilogramm, die noch keine zweiten Zähne haben.

Als ausgewachsene Rinder sind zu betrachten: andere Hausrinder, ausgenommen reinrassige Zuchttiere. Diese Preise werden unter Berücksichtigung der Vorausschätzungen für die Entwicklung der Erzeugung und des Verbrauchs von Rindfleisch, der Marktlage bei Milch und Milcherzeugnissen und der gewonnenen Erfahrung festgesetzt.

B. Interventionsmaßnahmen (Verordnung (EWG) Nr. 805/68, Art. 5 bis 8)

Um einen wesentlichen Preisrückgang zu verhindern oder zu mildern, können folgende Interventionsmaßnahmen ergriffen werden:

1. Beihilfen zur privaten Lagerhaltung
2. Aufkäufe durch die Interventionsstellen

II. REGELUNG DES HANDELS MIT DRITTFÄLNDERN (Verordnung (EWG) Nr. 805/68, Art. 9 bis 21)

Die Verwirklichung eines gemeinsamen Marktes für Rindfleisch erfordert die Einführung einer einheitlichen Handelsregelung, die zum Interventionssystem hinzugefügt wird. Diese Regelung umfaßt ein Zollsystem, Abschöpfungen bei der Einfuhr und Erstattungen bei der Ausfuhr, die, grundsätzlich, einer Stabilisierung des Gemeinschaftsmarktes dienen. Daraus ergibt sich ein ziemlich beständiges Preisgleichgewicht innerhalb der Gemeinschaft.

Bei der Einfuhr erhobene Abschöpfungen (Verordnung (EWG) Nr. 805/68, Art. 10)

Für Kälber und für ausgewachsene Rinder wird ein Einfuhrpreis berechnet, ausgehend von den Preismotierungen auf den repräsentativsten Märkten der dritten Länder, ermittelt wird. Außerdem, und unter bestimmten Bedingungen, wird ein Sonderpreis bei der Einfuhr berechnet (Verordnung (EWG) Nr. 1026/68). Falls für eines dieser Erzeugnisse der um den Zoll erhöhte Einfuhrpreis niedriger ist als der Orientierungspreis, wird der Unterschied durch eine Abschöpfung ausgeglichen, die bei der Einfuhr dieses Erzeugnisses in die Gemeinschaft erhoben wird.

Diese Abschöpfung ist in ihrer Gesamtheit anwendbar, wenn festgestellt wird, daß der Preis auf den repräsentativen Märkten der Gemeinschaft (Verordnung (EWG) Nr. 320/73) niedriger als der Orientierungspreis ist. Die Abschöpfung wird schrittweise vermindert, wenn festgestellt wird, daß der Marktpreis höher als der Orientierungspreis ist.

Erstattungen bei der Ausfuhr (Verordnung (EWG) Nr. 805/68, Art. 18)

Wenn das Niveau der Preise innerhalb der Gemeinschaft höher ist als das auf dem Weltmarkt, kann der Unterschied durch eine Erstattung bei der Ausfuhr ausgeglichen werden. Die Höhe dieser Erstattung ist für die gesamte Gemeinschaft einheitlich, sie kann jedoch je nach Bestimmung oder Bestimmungsgebiet unterschiedlich sein.

III. PREISE AUF DEM INLAENDISCHEN MARKT

Gemäß Artikel 10, Absatz 4 der Verordnung (EWG) Nr. 805/68 (zuletzt geändert durch die Verordnung (EWG) Nr. 320/73) insbesondere auf Art. 10, Absatz 5, setzt die Kommission jede Woche einen innergemeinschaftlichen Marktpreis für Kälber und ausgewachsene Rinder fest. Dieser Preis entspricht dem zuvor mit den Koeffizienten des Anhangs I der Verordnung (EWG) Nr. 320/73 gewogenen Durchschnitt, der auf dem oder den repräsentativen Märkten der einzelnen Mitgliedstaaten festgestellten Preise, auf die im Anhang II der gleichen Verordnung hingewiesen wird. Diese Marktpreise entsprechen dem mit Gewichtungskoeffizienten gewogenen Durchschnitt, aufgeführt im vorgenannten Anhang II der Preise, die sich für die betreffenden Qualitäten von Kälbern, ausgewachsenen Rindern und Fleisch dieser Tiere in dem betreffenden Mitgliedstaat während eines Zeitraums von sieben Tagen auf der gleichen Großhandelsstufe gebildet haben.

Die festgestellten Marktpreise in den Mitgliedstaaten gelten für:

BEEF AND VEAL

EXPLANATORY NOTE ON THE BEEF AND VEAL PRICES (FIXED PRICES AND MARKET PRICES) AND THE IMPORT LEVIES SHOWN IN THIS PUBLICATION

INTRODUCTION

Regulation No 13/64/EEC of 5 February 1964 (Official Journal No 34, 27 February 1964) provided that the common organization of the markets in beef and veal should be established gradually from 1964 and that the main feature of this organization would be a system of customs duties and, if appropriate, a system of levies to be applied in trade between Member States and between Member States and third countries.

This single market for beef and veal established by Regulation (EEC) No 805/68 of 27 June 1968 on the common organization of the market in beef and veal (Official Journal No L 148, 28 June 1968) entered into force on 29 July 1968 and includes, inter alia, a price system (guide prices and intervention measures) and arrangements for trade with third countries (import levies and export refunds).

I. PRICES (Regulation (EEC) No 805/68, Articles 2 to 8)

A. Fixed prices

Article 3 of Regulation (EEC) No 805/68 stipulates that a guide price for calves and a guide price for adult bovine animals must be fixed before the 1 August of each year for the marketing year beginning on the first Monday in April and ending on the eve of this day the following year.

"Calves" means live animals of the domestic bovine species not exceeding a live weight of 220 kilogrammes and not yet having any permanent teeth. "Adult bovine animals" means live animals of the domestic bovine species, other than calves, with the exception of pure-bred breeding animals. These prices are fixed with particular reference to future production and consumption trends for beef and veal, the situation in the market in milk and milk products and past experience.

B. Intervention (Regulation (EEC) No 805/68, Articles 5 to 8)

The following intervention measures may be taken to prevent or mitigate a substantial fall in prices :

1. Aid for private storage
2. Buying-in by intervention agencies.

II. TRADE WITH THIRD COUNTRIES (Regulation (EEC) No 805/68, Articles 9 to 21)

The single market in beef and veal implies uniform arrangements for trade with third countries in addition to intervention arrangements. These include a system of customs duties, import levies and export refunds aimed at stabilizing the market. The result is relatively stable price equilibrium within the Community.

Imports levies (Regulation (EEC) No 805/68, Article 10)

Import prices are calculated for both calves and adult bovine animals on the basis of quotations recorded on the most representative markets of third countries. A special import price is also calculated for calves and adult bovine animals in certain circumstances (Regulation (EEC) No 1026/68).

Should the import price, after addition of the customs duty, be lower than the guide price, the difference is offset by an import levy. This levy is charged in full when the average of prices recorded on the representative markets of the Community (Regulation (EEC) No 320/73) is lower than the guide price. If the market price moves above the guide price, the levy is gradually reduced.

Export refunds (Regulation (EEC) No 805/68, Article 18)

If the level of prices in the Community is higher than that of quotations or prices on the world market, the difference may be covered by an export refund. This refund is the same for the whole Community and may be varied according to destination.

III. PRICES ON THE INTERNAL MARKET

Under Art. 10 (4) of Regulation (EEC) No 805/68 (as last amended by Regulation (EEC) No 320/73) the Commission fixes a Community market price for calves and adult bovine animals each week. This price represents the average, weighted by the coefficients listed in Annex I to Regulation (EEC) No 320/73, of prices on the representative market(s) of each Member State shown in Annex II to the same Regulation. These market prices are themselves the average, weighted by the weighting coefficients listed in Annex II to Regulation (EEC) No 320/73, of prices recorded for the various qualities of calves, adult bovine animals and beef and veal, at the same wholesale stage over a seven-day period in each Member State.

Market prices recorded in the Member States relate to :

A corrective amount of £ 0,02/lb must be added to slaughtered weight quotations before conversion to live weight (x 61).

IV. IMPORT PRICES

Article 10 (1) of Regulation (EEC) No 805/68 and Article 6 of Regulation (EEC) No 218/73 require the Commission to fix import prices for calves and adult bovine animals on the first and third Thursday of each month.

This import price is calculated on the basis of the free-at-Community-frontier offer price in the light of the purchasing opportunities which are most representative as regards quality, quantity, and the market trend for these products.

Spiegazioni relative ai prezzi delle carni bovine (prezzi fissati e prezzi di mercato) e ai prelievi all'importazione che figurano in questa pubblicazione

INTRODUZIONE

Nel Regolamento n. 14/64/CEE del 5.2.1964 (Gazzetta Ufficiale n. 34 del 27.2.1964) è stato previsto che l'organizzazione comune dei mercati, nel settore delle carni bovine, sarebbe istituita gradualmente a decorrere dal 1964 e che questo organizzazione comporta principalmente un regime di dazi doganali ed, eventualmente, un regime di prelievi, applicabili agli scambi tra gli Stati membri, nonché tra gli Stati membri ed i paesi terzi.

Questo mercato unico delle carni bovine stabilito nel Regolamento (CEE) n. 805/68 del 27 giugno 1968, che istaura l'organizzazione comune dei mercati nel settore delle carni bovine (Gazzetta Ufficiale del 28.6.1968, anno 11, n. L 148) è entrato in vigore il 29 luglio 1968 e comporta inoltre il regime dei prezzi (prezzi di orientamento e misure di intervento) come il regime degli scambi con i paesi terzi (prelievi all'importazione e restituzioni all'esportazione).

I. REGIME DEI PREZZI (Regolamento (CEE) n. 805/68, art. 2 a 8)

A. Prezzi fissati

Conformemente all'articolo 3 del Regolamento (CEE) n. 805/68 viene fissato ogni anno, anteriormente al 1° agosto, per la campagna di commercializzazione che inizia il primo lunedì del mese di aprile e che termina alla vigilia di questo giorno l'anno seguente, un prezzo di orientamento per i vitelli e un prezzo di orientamento per i bovini adulti.

Sono considerati come vitelli: gli animali vivi della specie bovina delle specie domestiche il cui peso vivo è inferiore o uguale a 220 Kg e che non hanno alcun dente d'adulto.

Sono considerati come bovini adulti: gli altri animali vivi della specie bovina delle specie domestiche, eccettuati i riproduttori di razza pura. Questi prezzi sono fissati tenendo conto particolarmente delle prospettive di sviluppo della produzione e del consumo di carni bovine, della situazione del mercato del latte, dei prodotti lattiero-caseari e dell'esperienza acquisita.

B. Misura d'intervento (Regolamento (CEE) n. 805/68, art. 5 a 8)

Per evitare o attenuare una rilevante flessione dei prezzi, possono essere prese le seguenti misure d'intervento :

1. aiuti all'ammasso privato ;
2. acquisti effettuati dagli organismi d'intervento.

II. REGIME DEGLI SCAMBI CON I PAESI TERZI (Regolamento (CEE) n. 805/68, art. 9 a 21)

Il mercato unico nel settore delle carni bovine implica l'instaurazione di un regime unico di scambi con i paesi terzi che si aggiunge al sistema degli interventi. Questo regime comporta un sistema di dazi doganali, di prelievi all'importazione e di restituzioni all'esportazione che tendono, in linea di massima, a stabilizzare il mercato comunitario.

All'interno della Comunità ne risulta un equilibrio dei prezzi sufficientemente stabile.

Prelievi all'importazione (Regolamento (CEE) n. 805/68, art. 10)

Per i vitelli ed i bovini adulti è calcolato un prezzo all'importazione in base ai corsi registrati sui mercati più rappresentativi dei paesi terzi. Inoltre, ed in certe condizioni, è calcolato un prezzo speciale all'importazione (Regolamento (CEE) n. 1026/68).

Qualora il prezzo all'importazione, maggiorato della incidenza del dazio doganale, sia inferiore al prezzo di orientamento, la differenza è compensata da un prelievo riscosso all'importazione nella Comunità. Questo prelievo è applicabile nella sua totalità quando la media del prezzo costatato sui mercati rappresentativi della Comunità (Regolamento (CEE) n. 320/73), si situa al discotto del prezzo di orientamento. Viene diminuito gradatamente se si constata che il prezzo di mercato è superiore al prezzo di orientamento.

Restituzioni all'esportazione (Regolamento (CEE) n. 805/68, art. 18)

Se il livello dei prezzi nella Comunità è più elevato che quello dei corsi e dei prezzi sul mercato mondiale. La differenza può essere coperta da una restituzione all'esportazione. Questa restituzione è la stessa per tutta la Comunità e può essere differenziata secondo le destinazioni.

III. PREZZI SUL MERCATO INTERNAZIONALE

In conformità all'art. 10, paragrafo 4 del Regolamento (CEE) n. 805/68, (modificato per ultimo dal Regolamento (CEE) n. 320/73) il Commissario fissa ogni settimana un prezzo di mercato comunitario per i vitelli e per i bovini adulti. Questo prezzo è uguale alla media, ponderata con i coefficienti, fissati nell'allegato II del Regolamento (CEE) n. 320/73, dei prezzi constatati sul o sui mercati rappresentativi di ciascuno Stato membro, riportati nell'allegato II dello stesso Regolamento. Questi prezzi di mercato sono uguali alla media, ponderata con i coefficienti di ponderazione citati nell'allegato II su citato, dei prezzi formatisi per le qualità di vitelli, di bovini adulti e delle rispettive carni, durante un periodo di sette giorni in questo Stato membro in ur'identica fase del commercio all'ingrosso.

I prezzi di mercato constatati negli Stati membri ci riferiscono a:

IV. PREZZO ALL'IMPORTAZIONE

In conformità dell'art. 10 paragrafo 1 del Regolamento (CEE) n. 805/68 e all'art. 6 del Regolamento (CEE) no. 218/73 la Commissione fissa il primo e il terzo giovedì di ogni mese un prezzo all'importazione per i vitelli ed i bovini adulti.

Tale prezzo all'importazione è calcolato sulla base dei prezzi d'offerta franco frontiera della Comunità, in funzione delle possibilità d'acquisto più rappresentative per qualità e quantità e dello sviluppo del mercato di questi prodotti.

R U N D V L E E S

Toelichting op de in deze publicatie voorkomende prijzen voor rundvlees (vastgestelde prijzen en marktprijzen) en invoerheffingen.

INLEIDING

Bij Verordening nr. 14/64/EEG van 5.2.1964 (Publicatieblad nr. 34 dd 27.2.1964) werd bepaald dat de gemeenschappelijke ordening van de markten in de sector rundvlees met ingang van 1964 geleidelijk tot stand zou worden gebracht en dat de aldaar tot stand gebrachte marktordering hoofdzakelijk een stelsel van douanerechten en eventueel van heffingen omvat, die van toepassing zijn op het handelsverkeer tussen de Lid-Staten onderling, alsmede tussen de Lid-Staten en derde landen.

Deze gemeenschappelijke ordening, die tot stand kwam bij Verordening (EEG) nr. 805/68 van 27 juni 1968 houdende de gemeenschappelijke ordening der markten in de sector rundvlees (Publicatieblad dd 28.6.1968, IIe jaargang, nr. L 148) trad op 29 juli 1968 in werking en bevat o.a. de prijsregeling (oriëntatieprijzen en interventiemeatregelen), alsmede de regeling van het handelsverkeer ten opzichte van derde landen (invoerheffingen en restituties bij uitvoer).

I. PRIJSREGELING (Verordening (EEG) nr. 805/68, Art. 2 t/m 8)

A. Vastgestelde prijzen

Overeenkomstig Art. 3 van Verordening (EEG) nr. 805/68 worden jaarlijks voor 1 augustus voor het daaropvolgende verkoopseizoen, dat aanvangt op de eerste maandag van april en eindigt op de dag voor deze dag van het daarop volgende jaar een oriëntatieprijs voor kalveren en een oriëntatieprijs voor volwassen runderen vastgesteld.

Worden beschouwd als kalveren : levende runderen, huisdieren, waarvan het levend gewicht 220 kilogram of minder bedraagt en die nog geen enkele tand van het vast gebit hebben. Worden beschouwd als volwassen runderen : de andere levende runderen, huisdieren, met uitzondering van fokdieren van zuiver ras. Bij de vaststelling van de oriëntatieprijzen wordt inzonderheid rekening gehouden met de vooruitzichten voor de ontwikkeling van de productie en het verbruik van rundvlees, de toestand op de markt voor melk en zuivelprodukten en de opgedane ervaring.

B. Interventiemeatregelen (Verordening (EEG) nr. 805/68 art. 5 t/m 8)

Ten einde een aanzienlijke daling der prijzen te vermijden of te beperken, kunnen de volgende interventiemeatregelen worden genomen :

1. Steilverhoging aan de particuliere opslag,
2. Aankopen door de interventiebureaus.

II. REGELING VAN HET HANDELVERKEER MET DERDE LANDEN (Verordening (EEG) nr. 805/68, art. 9 t/m 21)

De gemeenschappelijke markt in de sector rundvlees maakte het noodzakelijk, dat naast de eventueel te nemen interventiemeatregelen, het handelsverkeer met derde landen werd geregeld. Deze regeling bestaat uit een stelsel van douanerechten en heffingen bij invoer en restituties bij uitvoer, die, in beginsel, tot stabilisatie van de gemeenschappelijke markt kan bijdragen. Hierdoor wordt bereikt, dat de prijzen binnen de Gemeenschap op een betrekkelijk stabiel niveau kunnen worden gehandhaafd.

Heffingen bij invoer (Verordening (EEG) nr. 805/68, Art. 10)

Voor kalveren en volwassen runderen wordt een prijs bij invoer berekend die wordt vastgesteld aan de hand van de noteringen op de meest representatieve markten van derde landen. Bovendien wordt, in bepaalde omstandigheden, een bijzondere prijs bij invoer berekend (Verordening (EEG) nr. 1026/68). Wanneer de prijs bij invoer, verhoogd met het douanerecht, beneden de oriëntatieprijs ligt, wordt het verschil overbrugd door een bij invoer in de Gemeenschap toe te passen heffing, met dien verstande dat, indien de gemiddelde prijs op de representatieve markten van de Gemeenschap (Verordening (EEG) nr. 320/73) lager is dan de oriëntatieprijs, de heffing in zijn geheel wordt toegepast en geleidelijk wordt verlaagd naarmate de marktprijs meer boven de oriëntatieprijs ligt.

Restituties bij uitvoer (Verordening (EEG) nr. 805/68, Art. 18)

Indien het prijspeil in de Gemeenschap hoger ligt dan de noteringen of de prijzen op de wereldmarkt, kan dit verschil voor de desbetreffende produkten overbrugd worden door een restitutie bij de uitvoer.

Deze restitutie is gelijk voor de gehele Gemeenschap en kan naar gelang van de bestemming gedifferentieerd worden.

III. PRIJZEN OP DE BINNENLANDSE MARKT

Overeenkomstig art. 10, lid 4 van Verordening (EEG) nr. 805/68, (laatstelijk gewijzigd bij Verordening (EEG) nr. 320/73) inzonderheid art. 10, lid 5, stelt de Commissie elke week een communautaire marktprijs vast voor kalveren en voor volwassen runderen. Deze prijs is gelijk aan het met de in bijlage I van Verordening (EEG) nr. 320/73 vastgestelde wegings-coëfficiënten gewogen gemiddelde, van de prijzen geconstateerd op de representatieve markten, genoemd in bijlage II van dezelfde Verordening. Bedoelde marktprijzen vormen het gewogen gemiddelde, berekend aan de hand van de in vooroemde bijlage II vermelde wegingscoëfficiënten, van de prijzen voor de kwaliteiten kalveren of volwassen runderen of het vlees van deze dieren, die gedurende een periode van zeven dagen in iedere Lid-Staat in hetzelfde stadium van de groothandel tot stand zijn gekomen.

De marktprijzen voor de Lid-Staten hebben betrekking op:

Forklaringer til de i det følgende anførte priser (fastsatte priser og markedspriser)
og importafgifter for oksekød

INDLEDNING

I forordning nr. 14/64/EØF af 5.2.1964 (De europæiske Fællesskabers Tidende nr. 34 af 27.2.1964) er det bestemt, at den fælles markedsordning for oksekød gennemfores gradvis fra 1964; den saaledes gennemfoerte markedsordning omfatter først og fremmest regler om told og i givet fald regler om afgifter i samhandelen mellem medlemsstaterne samt mellem medlemsstaterne og tredjelande.

Det fælles marked for oksekød blev fastlagt i forordning (EØF) nr. 805/68 af 27. juni 1968. Den fælles markedsordning for oksekød (De europæiske Fællesskabers Tidende af 28.6.1968, 11. aergang, nr. L 148) trådte i kraft 29. juli 1968, og omfatter foruden prisreglerne (indikativpris og interventionsforanstaltninger) en ordning for handelen med tredjelande (importafgifter og eksportrestitutioner).

I. PRISREGLER (Forordning (EØF) nr. 805/68, artikel 2 til 8)

A. Fastsatte priser

I overensstemmelse med artikel 3 i forordning (EØF) nr. 805/68 fastsaettes hvert år før 1. august for det produktionsår, der begynder den første mandag i april måneden og slutter aftenen forud for denne dag i det derpaa følgende år, en orienteringspris for kalve og en orienteringspris for voksent kvaeg.

Ved kalve forstaas: levende hornkvaeg, der endnu ikke har faeldet taender, med en levende vægt af indtil 220 kilogram.

Ved voksent kvaeg forstaas: andet hornkvaeg, undtagen avlsdyr af ren race. Disse priser fastsaettes under hensyntagen til fremtidsudsigterne for udviklingen af produktion og forbrug af oksekød, markedssituationen for mælk og mejeriprodukter og de indvundne erfaringer.

B. Interventionsforanstaltninger: (Forordning (EØF) nr. 805/68, artikel 5 til 8)

For at hindre et betydeligt prisfald eller afdaemppe dets virkning kan følgende interventionsforanstaltninger træffes:

1. støtte til privat oplagring
2. opkøb gennem interventionsorganerne

II. REGLER FOR SAMHANDELEN MED TREDJELANDE (Forordning (EØF) nr. 805/68, artikel 9 til 21)

Virkeliggørelsen af et fælles marked for oksekød kraever, at der indføres ens regler for handelen med tredjelande i tilslutning til interventionssystemet. Disse regler omfatter et toldsystem, importafgifter og eksportrestitutioner, som principielt tjener til at stabilisere Fællesskabets marked.

Deraf følger en ganske stabil prislivsvegt inden for Fællesskabet.

Importafgifter: (Forordning (EØF) nr. 805/68, artikel 10)

For kalve og for voksent kvaeg beregnes en importpris, der fastsaettes på grundlag af prisnoteringerne på de mest repræsentative markeder i tredjelande. Desuden - og på bestemte betingelser - beregnes en saerlig importpris (Forordning (EØF) nr. 1026/68).

Saaftrent importprisen, forhoejet med tolden for et af disse produkter, er lavere end orienteringsprisen, udlignes forskellen ved en importafgift, som kraeves ved indførsel til Fællesskabet. Denne importafgift anvendes i sin helhed, naar det konstateres, at prisen på Fællesskabets repræsentative markeder (Forordning (EØF) nr. 320/73) er lavere end orienteringsprisen. Importafgifterne nedsaettes gradvis, hvis det konstateres, at markedsprisen er højere end orienteringsprisen.

Eksportrestitutioner: (Forordning (EØF) nr. 805/68, artikel 18)

Hvis prisniveauet inden for Fællesskabet er højere end på verdensmarkedet, kan forskellen udlignes ved en eksportrestitution. Denne restitution er ens for hele Fællesskabet, men kan differentieres alt efter bestemmelsersted.

III. PRISER PAA HJEMMEARKEDET

I henhold til artikel 10, stk. 4 i forordning (EOEF) nr. 205/68 (senest aendret ved forordning (EOEF) nr. 320/73) saerlig artikel 10, stk. 5, fastsaetter Kommissionen hver uge en markedspris inden for Faellesskabet for kalve og voksent kvaeg. Denne pris svarer til gennemsnittet - som tidligere er tildelt vaegt ved koeficienterne fastsat i bilag I til forordning (EOEF) nr. 320/73 - af de priser, der er konstateret paa det eller de repraesentative markeder i de enkelte medlemsstater, som der henvises til i bilag II til samme forordning. Disse markedspriser svarer til det ved vejningskoeficienter vejede gennemsnit, anfoert i foernevnte bilag II, af de priser, der har dannet sig for de paagaeldende kvaliteter af kalve, voksent kvaeg og koed af disse dyr i en periode paa syv dage i samme engrosled i den paagaeldende medlemsstat.

De fastsatte markedspriser i medlemsstaterne gaelder for:

PRODUITS LAITIERS

Eclaircissements concernant les prix des produits laitiers (prix fixés) et les prélèvements à l'importation repris dans cette publication

INTRODUCTION

Il a été prévu, par la voie du Règlement n° 13/64/CEE du 5.2.1964 (Journal Officiel n° 34 du 27.2.1964) que l'organisation commune des marchés serait, dans le secteur du lait et des produits laitiers, établie graduellement à partir de 1964 et que cette organisation de marché ainsi établie comporte principalement la fixation annuelle d'un prix indicatif pour le lait, de prix de seuil déterminés pour les produits pilotes des produits laitiers répartis en groupes et au niveau desquels le prix des produits laitiers importés doit être amené au moyen d'un prélèvement variable, et d'un prix d'intervention pour le beurre.

Ce marché unique pour le lait et les produits laitiers établi dans le Règlement (CEE) n° 804/68 du 27 juin 1968, portant organisation commune des marchés dans le secteur du lait et des produits laitiers, (Journal Officiel du 28.6.1968, 11e année, n° L 148) est entré en vigueur le 29 juin 1968.

I. PRIX FIXES

Nature des prix

Conformément aux articles 3,4 et 5 du Règlement (CEE) n° 804/68, il est fixé chaque année, pour la Communauté avant le 1er août pour la campagne laitière débutant l'année suivante, qui commence le 1er avril et se termine le 31 mars, un prix indicatif pour le lait, un prix d'intervention pour le beurre et un prix d'intervention pour le lait écrémé en poudre et des prix d'intervention pour les fromages Grana-Padano et Parmigiano-Reggiano. D'autre part, le Conseil, statuant sur proposition de la Commission, fixe chaque année des prix de seuil de certains des produits dénommés "produits pilotes".

Prix indicatif pour le lait

Le prix indicatif est le prix du lait que l'on tend à assurer pour la totalité du lait vendu par les producteurs au cours de la campagne laitière dans la mesure des débouchés qui s'offrent sur le marché de la Communauté et les marchés extérieurs. Le prix indicatif est fixé pour le lait contenant 3,7% de matières grasses, rendu laiterie.

Prix d'intervention

Ils sont fixés tels que la recette de l'ensemble des ventes de lait tende à assurer le prix indicatif commun franco laiterie pour le lait.

Prix de seuil

Les prix de seuil sont fixés pour les produits pilotes de chaque groupe de produits (Règlement (CEE) n° 823/68, annexe 1) de telle sorte que, compte tenu de la protection nécessaire de l'industrie de transformation de la Communauté, les prix des produits laitiers importés se situent à un niveau correspondant au prix indicatif du lait.

II. MESURES D'AIDE

Conformément aux art. 10 et 11 du Règlement (CEE) n° 804/68, des aides sont accordées au lait écrémé et au lait écrémé en poudre, produits dans la Communauté et utilisés pour l'alimentation des animaux. Les montants de ces aides sont fixés chaque année en même temps que le prix indicatif. D'autre part, une aide est accordée pour le lait écrémé, produit dans la Communauté et transformé en caséine et en casénates.

III. ECHANGES AVEC LES PAYS TIERS

Pour les échanges avec les pays tiers, un régime unique est établi, comportant un système de prélèvements à l'importation et de restitutions à l'exportation et tendant, l'un comme l'autre, à couvrir la différence entre les prix pratiqués à l'extérieur et à l'intérieur de la Communauté. La stabilisation du marché qui en résulte évite que les fluctuations des prix sur le marché mondial ne se répercutent sur le prix pratiqué à l'intérieur de la Communauté.

Prélèvements à l'importation (Règlement (CEE) n° 804/68, art. 14)

Les prélèvements sont, en principe, égaux aux prix de seuil, diminués du prix franco-frontière. Les prix franco-frontière sont établis, pour chaque produit pilote, sur la base des possibilités d'achat les plus favorables dans le commerce international.

En ce qui concerne le calcul des prélèvements de certains produits assimilés il faut se référer au Règlement (CEE) n° 823/68.

Restitutions à l'exportation (Règlement (CEE) n° 804/68, art. 17)

Pour permettre l'exportation des produits laitiers sur la base des prix de ces produits dans le commerce international, la différence entre ces prix et les prix dans la Communauté peut être couverte par une restitution à l'exportation, fixée périodiquement. Cette restitution est la même pour toute la Communauté et peut être différenciée selon la destination.

MILCHERZEUGNISSE

Erläuterungen zu den nachstehend aufgeführten Preisen für Milcherzeugnisse (festgesetzte Preise) und den bei der Einfuhr festgesetzten Abschöpfungen

EINLEITUNG

In der Verordnung Nr. 13/64/EWG vom 5.2.1964 (Amtsblatt Nr. 34 vom 27.2.1964) wurde bestimmt, daß die gemeinsame Marktorganisation für Milch und Milcherzeugnisse ab 1964 schrittweise errichtet wird; die auf diese Weise errichtete Marktorganisation umfaßt im wesentlichen die jährliche Festsetzung eines Richtpreises für Milch, von Schwellenpreisen für die Leiterzeugnisse der zu Gruppen zusammengefaßten Milcherzeugnisse, auf deren Höhe der Preis der eingeführten Milcherzeugnisse an Hand einer veränderlichen Abschöpfung gebracht werden muß, und eines Interventionspreises für Butter.

Dieser einheitliche Markt für Milcherzeugnisse wurde in der Verordnung (EWG) Nr. 804/68 vom 27. Juni 1968 festgesetzt; diese Verordnung zur Errichtung einer gemeinsamen Marktorganisation für Milch und Milcherzeugnisse (Amtsblatt vom 28.6.1968, 11. Jahrgang, Nr. L 148) ist am 29. Juni 1968 in Kraft getreten.

I. FESTGESETZTE PREISE

Art der Preise

Gemäß Artikel 3, 4 und 5 der Verordnung (EWG) Nr. 804/68 werden für die Gemeinschaft jährlich vor dem 1. August für das im folgenden Kalenderjahr beginnende Milchwirtschaftsjahr, das am 1. April beginnt und am 31. März endet, ein Richtpreis für Milch, ein Interventionspreis für Butter, ein Interventionspreis für Magermilchpulver und Interventionspreise für die Käsesorten Grana-Padano und Parmigiano-Reggiano festgesetzt. Andererseits setzt der Rat auf Vorschlag der Kommission jährlich Schwellenpreise für einige sogenannte "Leiterzeugnisse" fest.

Richtpreis für Milch

Der Richtpreis ist der Milchpreis, der für die von den Erzeugern im Milchwirtschaftsjahr insgesamt verkaufte Milch angestrebt wird, und zwar entsprechend den Absatzmöglichkeiten, die sich auf dem Markt der Gemeinschaft und den Märkten außerhalb der Gemeinschaft bieten. Der Richtpreis wird für Milch mit 3,7 v.H. Fettgehalt frei Molkerei festgesetzt.

Interventionspreise

Die Interventionspreise müssen so festgesetzt werden, daß durch die Erlöse für die insgesamt verkaufte Milch der gemeinsame Richtpreis für Milch frei Molkerei angestrebt wird.

Schwellenpreise

Die Schwellenpreise für die Leiterzeugnisse jeder Produktengruppe (Verordnung (EWG) 823/60/68 Anlage I) werden so festgesetzt, daß unter Berücksichtigung des für die verarbeitende Industrie der Gemeinschaft notwendigen Schutzes die Preise der eingeführten Milcherzeugnisse eine Höhe erreichen, die dem Richtpreis für Milch entspricht.

II. GEWAHRUNG VON BEIHILFEN

Gemäß Artikel 10 und 11 der Verordnung (EWG) Nr. 804/68 werden für Magermilch und Magermilchpulver, die in der Gemeinschaft hergestellt worden sind und für Futterzwecke verwendet werden, Beihilfen gewährt. Die Beträge dieser Beihilfen werden jedes Jahr gleichzeitig mit dem Richtpreis festgesetzt. Für Magermilch, die in der Gemeinschaft hergestellt und zu Kasein und Kaseinaten verarbeitet worden ist, wird ebenfalls eine Beihilfe gewährt.

III. HANDEL MIT DRITTEN LÄNDERN

Für den Handel mit dritten Ländern wurde eine Regelung geschaffen, die die Erhebung einer Abschöpfung bei der Einfuhr und die Zahlung einer Erstattung bei der Ausfuhr vorsieht, die beide den Unterschied zwischen den innerhalb und außerhalb der Gemeinschaft geltenden Preisen ausgleichen soll. Die sich daraus ergebende Marktstabilisierung vermeidet, daß sich die Schwankungen der Weltmarktpreise auf die Preise innerhalb der Gemeinschaft übertragen.

Abschöpfungen bei der Einfuhr (Verordnung (EWG) Nr. 804/68, Art. 14)

Im allgemeinen sind die Abschöpfungen gleich dem Schwellenpreise, vermindert um dessen Preis frei Grenze. Für jedes Leiterzeugnis wird der Preis frei Grenze unter Zugrundelegung der günstigsten Einkaufsmöglichkeiten im internationalen Handel ermittelt.

Für die Errechnung der Abschöpfungen für einige gekoppelte Erzeugnisse wird auf die Verordnung (EWG) Nr. 823/68 hingewiesen.

Erstattungen bei der Ausfuhr (Verordnung (EWG) Nr. 804/68, Art. 17)

Um die Ausfuhr der Milcherzeugnisse auf der Grundlage der Preise zu ermöglichen, die im internationalen Handel für diese Erzeugnisse gelten, kann der Unterschied zwischen diesen Preisen und den Preisen in der Gemeinschaft durch eine Erstattung bei der Ausfuhr, die periodisch festgesetzt wird, ausgeglichen werden. Die Höhe der Erstattung ist für die gesamte Gemeinschaft einheitlich, sie kann jedoch je nach Bestimmung oder Bestimmungsgebiet unterschiedlich sein.

EXPLANATORY NOTE ON THE MILK PRODUCTS PRICES (FIXED PRICES) AND THE IMPORT LEVIES SHOWN IN THIS PUBLICATION

INTRODUCTION

Regulation No 13/64/EEC of 5 February 1964 (Official Journal No 34, 27 February 1964) provided that the common organization of the market in milk and milk products should be established progressively from 1964 and that the main features of this market organization would be the annual fixing of a target price for milk; threshold prices for pilot products of milk product groups to which the price of imported milk products must be raised by means of a variable levy; and an intervention price for butter.

This single market for milk and milk products was established by Regulation (EEC) No 804/68 of 27 June 1968 on the common organization of the market in milk and milk products (Official Journal No L 148, 28 June 1968) and entered into force on 29 June 1968.

I. FIXED PRICES

Types of prices

Articles 3, 4 and 5 of Regulation (EEC) No 804/68 stipulates that, before 1 August of each year, a target price for milk, an intervention price for butter, an intervention price for skimmed milk powder, and intervention prices for Grana Padano and Parmigiano Reggiano cheeses must be fixed for the following milk year running from 1 April to 31 March. The Council, acting on a proposal from the Commission, fixes threshold prices for certain pilot products.

Target price for milk

The target price is the price which it is hoped to obtain for the aggregate of producers' milk sales, on the Community market and on external markets, during the milk year. The target price is fixed for milk with a 3.7 % fat content, delivered to dairy.

Intervention prices

These are fixed in such a way that the proceeds of aggregate milk sales tend to correspond to the common target price for milk delivered to dairy.

Threshold price

Threshold prices are fixed for pilot products for each group of products (Regulation (EEC) No 823/68, Annex 1) in such a way that, bearing in mind the protection required for the Community processing industry, prices of imported milk products are at a level which corresponds to the target price for milk.

II. AIDS

Articles 10 and 11 of Regulation (EEC) No 804/68 allow aid to be granted for skimmed milk and skimmed milk powder produced in the Community and used as animal feed. The amount of the aid is fixed annually at the same time as the target price. Aid is also granted for Community-produced skimmed milk processed into casein and caseinates.

III. TRADE WITH THIRD COUNTRIES

There are uniform arrangements for trade with third countries. These include a system of import levies and export refunds, both designed to cover the difference between prices inside and outside the Community. The resulting market stabilization prevents price fluctuations on the world market affecting prices within the Community.

Import levies (Regulation (EEC) No 804/68, Article 14)

As a rule import levies are equal to the threshold price less the free-at-frontier price. Free-at-frontier prices are determined for each pilot product on the basis of the most favourable purchasing opportunities in international trade.

Rules for calculating import levies for various assimilated products are contained in Regulation (EEC) No 823/68.

Export refunds (Regulation (EEC) No 804/68, Article 17)

To enable milk products to be exported on the basis of prices for those products in international trade, the difference between those prices and prices within the Community may be covered by an export refund fixed at regular intervals. The refund is the same for the whole Community and may be varied according to destination.

PRODOTTI LATTIERO-CASEARI

Spiegazioni relative ai prezzi dei prodotti lattiero-caseari (prezzi fissati) ed ai prelievi all'importazione che figurano nella presente pubblicazione

INTRODUZIONE

E' stato previsto, dalle disposizioni del Regolamento n. 13/64/CEE del 5.2.1964 (Gazzetta Ufficiale del 27.2.1964, n. 34) che l'organizzazione comune dei mercati sarebbe, nel settore del latte e dei prodotti lattiero-caseari, stabilita gradualmente a decorrere dal 1964 e che questa organizzazione di mercato così istituita comporta principalmente la fissazione annuale di un prezzo indicativo del latte, di prezzi d'entrata determinati per i prodotti pilota dei prodotti lattiero-caseari ripartiti in gruppi ed al cui livello il prezzo dei prodotti lattiero-caseari importati deve essere riportato a mezzo di prelievo variabile, nonché di un prezzo di intervento per il burro.

Questo mercato unico del latte e dei prodotti lattiero-caseari previsto nel Regolamento (CEE) n. 804/68 del 27 giugno 1968, che comporta l'organizzazione comune dei mercati nel settore del latte e dei prodotti lattiero-caseari, (Gazzetta Ufficiale del 28.6.1968, 11° anno, n. L 148) è entrato in vigore il 29 giugno 1968.

I. PREZZI FISSATI

Natura dei prezzi

In conformità agli articoli 3, 4 e 5 del Regolamento (CEE) n. 804/68, vengono fissati ogni anno, della Comunità, anteriormente al 1° agosto per la campagna lattiera, dell'anno successivo, che inizia il 1° aprile e termina il 31 marzo, un prezzo indicativo per il latte, un prezzo d'intervento per il burro e un prezzo d'intervento per il latte scremato in polvere e dei prezzi d'intervento per i formaggi Grana Padano e Parmigiano Reggiano. Inoltre, il Consiglio, che delibera su proposta della Commissione, fissa ogni anno i prezzi di entrata per alcuni prodotti denominati "prodotti pilota".

Prezzo indicativo per il latte

Il prezzo indicativo è il prezzo del latte che si tende ad assicurare per la totalità del latte venduto dai produttori durante la campagna lattiera, compatibilmente con le possibilità di smercio esistenti sul mercato della Comunità e sui mercati esterni. Il prezzo indicativo è fissato per latte contenente il 3,7% di matiere grasse, franco latteria.

Prezzi d'intervento

I prezzi di intervento sono fissati tali che il ricavato delle vendite di latte tenda ad assicurare il prezzo indicativo comune del latte franco latteria.

Prezzi di entrata

I prezzi d'entrata sono fissati per i prodotti pilota di ogni gruppo di prodotti (Regolamento (CEE) n. 823/68, allegato 1) in modo che, tenuto conto della necessaria protezione dell'industria di trasformazione della Comunità, i prezzi dei prodotti lattiero-caseari importati raggiungano un livello corrispondente al prezzo indicativo del latte.

II. MISURE D'AIUTO

Conformemente agli articoli 10 e 11 del Regolamento (CEE) n. 804/68 vengono concessi aiuti al latte scremato ed al latte scremato in polvere, prodotti nella Comunità e utilizzati per l'alimentazione degli animali. Gli importi di questi aiuti vengono fissati ogni anno contemporaneamente al prezzo indicativo. Anche un aiuto viene concesso per il latte scremato, prodotto nella Comunità e trasformato in caseina e in caseinati.

III. SCAMBI CON I PAESI TERZI

Per gli scambi con i paesi terzi, un regime unico è instaurato che comporta un sistema di prelievi all'importazione e di restituzioni all'esportazione, arbedue volti a coprire la differenza tra i prezzi praticati all'esterno e all'interno della Comunità. La stabilizzazione del mercato che ne risulta, evita che la fluttuazione dei prezzi sul mercato mondiale si ripercuota sui prezzi praticati all'interno della Comunità.

Prelievi all'importazione (Regolamento (CEE) n. 804/68, art. 14)

I prelievi sono, in principio, uguali ai prezzi di entrata, diminuiti del prezzo franco frontiera. I prezzi franco frontiera sono determinati, per ciascun prodotto pilota, sulla base delle possibilità di acquisto le più favorevoli nel commercio internazionale.

Per quanto concerne il calcolo dei prelievi di certi prodotti assimilati risogna riferirsi al Regolamento (CEE) n. 823/68.

Restituzioni all'esportazione (Regolamento (CEE) n. 804/68, art. 17)

Per permettere l'esportazione dei prodotti lattiero-caseari sulla base dei prezzi di tali prodotti nel commercio internazionale, la differenza tra questi prezzi ed i prezzi nella Comunità può essere comperta da una restituzione all'esportazione, fissate periodicamente. Tale restituzione è la stessa per tutta la Comunità e può essere differenziata secondo la destinazione.

ZUIVELPRODUKTEN

Toelichting op de in deze publicatie voorkomende prijzen voor zuivelprodukten (vastgestelde prijzen) en invoerheffingen

INLEIDING

Bij Verordening nr. 13/64/EWG van 5.2.1964 (Publiekblad nr. 34 dd. 27.2.1964) werd bepaald, dat de gemeenschappelijke ordening der markten in de sector melk er zuivelprodukten met ingang van 1964 geleidelijk tot stand zou worden gebracht en dat deze marktordering hoofdzakelijk de jaarlijkse vaststelling omvat van een richtprijs voor melk, van dremelprijzen voor de hoofdprodukten van de in groepen ingedeelde zuivelprodukten, op het peil waarvan de prijs van de ingevoerde zuivelprodukten door een variabele heffing moet worden gebracht, en van een interventieprijs voor boter.

Dese gemeenschappelijke zuivelmarkt, die geregeerd wordt in Verordening (EEG) nr. 804/68 van 27 juni 1968, houdende een gemeenschappelijke ordening der markten in de sector melk en zuivelprodukten (Publiekblad dd. 28.6.1968, 11e jaargang nr. L 148), trad op 29 juni 1968 in werking.

I. VASTGESTELDE PRIJZEN

Aard van de prijzen

Overeenkomstig art. 3,4 en 5 van Verordening (EEG) nr. 804/68 worden jaarlijks voor 1 augustus voor het daaropvolgende melkprijsjaar, dat aanvangt op 1 april en eindigt op 31 maart, voor de Gemeenschap een richtprijs voor melk, een interventieprijs voor boter, een interventieprijs voor mager melkpoeder en interventieprijzen voor Grana-Padano kaas en Parmigiano-Reggiano kaas vastgesteld. Bovendien worden jaarlijks door de Raad, op voorstel van de Commissie, voor de zgn. "Hoofdprodukten" dremelprijzen vastgesteld.

Richtprijs voor melk

De richtprijs is de milkprijs, welke wordt nagestreefd voor de totale hoeveelheid melk, die door de producenten tijdens het melkprijsjaar wordt verkocht en wel in die mate, waarin de afzetmogelijkheden op de markt van de Gemeenschap en op de markten daarbuiten dit toelaten. De richtprijs wordt vastgesteld voor melk met een vetgehalte van 3,7% in het stadium franco-melkfabriek.

Interventieprijzen

Deze worden op zodanige wijze vastgesteld, dat de opbrengst van alle verkochte melk de gemeenschappelijke richtprijs voor melk franco-melkfabriek zoveel mogelijk benadert.

Dremelprijzen

Deze worden vastgesteld voor de zgn. hoofdprodukten van iedere produktengroep (Verordening (EEG) nr. 823/68 van 28.6.1968, bijlage 1) en wel zodanig, dat de prijzer van de ingevoerde zuivelprodukten, rekening houdend met de voor de verwerkende industrie van de Gemeenschap noodzakelijke bescherming, op een niveau ligt, dat overeenkomt met de richtprijs voor melk.

II. STEUNMAATREGELEN

Overeenkomstig art. 10 en 11 van Verordening (EEG) nr. 804/68 wordt steun verleend voor de in de Gemeenschap geproduceerde en als voeder voor dieren gebruikt mager melkpoeder en ondermelk. De steunbedragen worden jaarlijks, tegelijk met de vaststelling van de richtprijs voor het volgend melkprijsjaar vastgesteld. Daarnaast wordt ook steun verleend aan de in de Gemeenschap geproduceerde en tot caseïne en caseïnaten ververkte ondermelk.

III. HANDELSVERKEER MET DERDE LANDEN

Voor het handelsverkeer met derde landen wordt een uniforme regeling toegepast die een stelsel van heffingen bij de invoer en van restituties bij de uitvoer omvat, beide ter overbrugging van het verschil tussen de buiten en binnen de Gemeenschap geldende prijzen. De hiervan uitgaande stabiliserende werking voorkomt, dat de schommelingen van de wereldmarktprijzen een terugslag hebben op de binnen de Gemeenschap toegemachte prijzen.

Heffingen bij invoer (Verordening (EEG) nr. 804/68 art. 14)

Deze zijn in principe gelijk aan het verschil tussen de dremelprijzen en de franco-grenslijnen. De franco-grenslijnen worden voor ieder hoofdproduct berekend op basis van de meest gunstige aankoopmogelijkheden op de wereldmarkt.

Wat de berekening van de invoerheffingen van sommige gekoppelde produkten betreft, zij verwezen naar Verordening (EEG) nr. 823/68.

Restituties bij uitvoer (Verordening (EEG) nr. 804/68, art. 17)

Om de uitvoer van zuivelprodukten, op basis van de prijzen van deze produkten in de internationale handel, mogelijk te maken, kan het verschil tussen deze prijzen en de prijzen in de Gemeenschap overbrugd worden door een restitutie, die periodiek wordt vastgesteld. Deze restitutie is gelijk voor de gehele Gemeenschap en kan al naar gelang de bestemming gedifferentieerd worden.

Forklaringer til de i det følgende anførte priser på mejeriprodukter (fastsatte priser)
og importafgifter

INDLEDNING

I forordning nr. 13/64/ECEP af 5.2.1964 (De europæiske Fællesskabers Tidende nr. 34 af 27.2.1964) er det bestemt, at den fælles markedsordning for mælk og mejeriprodukter skal gennemføres gradvis fra 1964; den saaledes gennemførte markedsordning omfatter først og fremmest årlig fastsaetelse af en indikativpris for mælk, af taerskelpriser for ledprodukterne for de i grupper sammenstillede mejeriprodukter, til hvil niveau prisen på indførte mejeriprodukter må hæves ved anvendelse af en variabel importafgift, og af en interventionspris for smør.

Dette enhedsmarked for mejeriprodukter blev fastsat i forordning (EOEF) nr. 804/68 af 27. juni 1968; denne forordning til gennemførelse af en fælles markedsordning for mælk og mejeriprodukter (De europæiske Fællesskabers Tidende af 28.6.1968, 11. aar-gang, nr. L 148) trådte i kraft den 29. juni 1968.

I. FASTSATTE PRISER

Friserne art

I henhold til artikel 3, 4 og 5 i forordning (ECEP) nr. 804/68 fastsaettes for Fællesskabet årligt inden 1. august for det i det følgende kalenderaar begyndende mejeriaar, der begynder 1. april og slutter 31. marts, en indikativpris for mælk, en interventionspris for smør, en interventionspris for skummetmaelkpulver og interventionspriser for ostesorterne Grana-Padano og Parmigiano-Reggiano. På den anden side fastsaetter Raadet på forslag fra Kommissionen årligt taerskelpriser for nogle saakaldte "ledprodukter".

Indikativpris for mælk

Indikativprisen er den mælkpris, der souges opnæaret af producenterne i mejeriaaret for al solgt mælk i forhold til afsætningsmulighederne på Fællesskabets marked og på markederne uden for Fællesskabet. Indikativprisen fastsaettes for mælk med 3,7% fedtindhold frit leveret til mejeri.

Interventionspriser

Interventionspriserne må fastsaettes saaledes, at den fælles indikativpris for mælk frit leveret til mejeri souges opnæaret gennem indtaegterne fra al solgt mælk.

Taerskelpriser

Taerskelpriserne for ledprodukterne i hver produktgruppe (forordning (EOEF) 823/60/68 bilag I) fastsaettes saaledes, at priserne på de indførte mejeriprodukter under hensyntagen til den for Fællesskabets forarbejdningsindustri nødvendige beskyttelse hæves til et niveau, der svarer til indikativprisen for mælk.

II. YDELSE AF STOETTE

I henhold til artikel 10 og 11 i forordning (ECEP) nr. 804/68 ydes der stoette til skummetmaelk og skummetmaelkpulver, som er fremstillet inden for Fællesskabet og anvendes til foder. Beløbene til denne stoette fastsaettes hvert år samtidig med indikativprisen. For skummetmaelk, der er fremstillet inden for Fællesskabet og forarbejdet til kassein og kaseinater, ydes der ligeledes stoette.

III. HANDEL MED TREDJELANDE

For handel med tredjelande er der oprettet en ordning, som fastsaetter opkraevning af en importafgift og betaling af en eksportrestitution, der begge skal udligne forskellen mellem de priser, som er gældende inden for og uden for Fællesskabet. Den deraf følgende markedsstabilisering bevirkede, at prissvingningerne på verdensmarkedet ikke indvirker på priserne inden for Fællesskabet.

Importafgifter:(Forordning (EOEF) nr. 804/68, artikel 14)

I almindelighed er importafgifterne lig med taerskelprisen, nedsat med prisen franko graense. For hvert ledprodukt fastsaettes prisen franko graense på grundlag af de gunstigste indkøbsmuligheder i den internationale handel.

Angaaende beregning af importafgifterne for nogle assimilerede produkter henvises til forordning (EOEF) nr. 823/68.

Eksportrestitutioner:(Forordning (EOEF) nr. 804/68, artikel 17)

For at muliggøre udførsel af mejeriprodukter på grundlag af de priser, som gælder for disse produkter i den internationale handel, kan forskellen mellem disse priser og priserne inden for Fællesskabet udlynes ved en eksportrestitution, som fastsaettes med regelmaessige tidsintervalle.

Restitutionen er ens for hele Fællesskabet og kan differentieres alt efter bestemmelsesssted.
