EUROPEAN UNION HARD COAL AND COKE IMPORTS 1993-1995

1. Hard coal

The upward trend of hard coal imports into the European Union recorded in 1994 - there was an increase of 3.8% compared to 1993 - is maintained in 1995, showing a rise of 5.4 million tonnes (136.4 million tonnes in 1995 as against 131 million tonnes in 1994).

With respect to the various Member States, France continued a downward trend (-17.6% or -2.1 million tonnes) while the biggest rise in absolute terms was recorded in Italy (+19% or +3 million tonnes). In the coal producing countries the increase varied between 0.8 million tonnes for Germany and 1 million tonnes for Spain. The rise in imports is directly related to the increased demand for hard coal from the coal fired power stations.

The USA at 38 million tonnes was the Union's major supplier in 1995, leaving South Africa, in second place at 30.2 million tonnes. Both countries increased their exports in 1995 to the Union (USA +10 and South Africa +2.7 million tonnes) in comparison with 1994. As in 1994, Australia remained in third place at 17.6 million tonnes. Poland and the former USSR saw a decrease of 3.5 and 0.9 million tonnes down to 14.9 and 4.7 million tonnes respectively. Canada recorded a drop of 0.1 million tonnes with Colombia also showing a decrease of 1.3 million tonnes.

1. Coke

Due to the decrease of coke production hard coke imports from third countries for 1995 are expected to be some 2.2 million tonnes up on their 1994 level, at 6.6 million tonnes. Intra-Union imports saw a decline of 0.8 million tonnes.
