

COMMISSION OF THE EUROPEAN COMMUNITIES

COM (89) 90 final - SYN 93

Brussels, 24 February 1989

Re-examined Proposal for a
COUNCIL DECISION

4412.1

TO ADOPT A FIRST

PLAN TO SUPPORT AND FACILITATE ACCESS TO LARGE-SCALE
SCIENTIFIC FACILITIES OF EUROPEAN INTEREST

(presented by the Commission pursuant to Article 149
paragraph 2, sub-section d) of the EEC Treaty)

Com 90

PART I

RE-EXAMINED PROPOSAL FOR A COUNCIL DECISION

TO ADOPT A FIRST

PLAN TO SUPPORT AND FACILITATE ACCESS TO LARGE-SCALE
SCIENTIFIC FACILITIES OF EUROPEAN INTEREST

THE COUNCIL OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty setting up the European Economic Community, and in particular to Article 130 Q(2),

Having regard to the proposal from the Commission (1),

In co-operation with the European Parliament (2),

Having regard to the Opinion of the Economic and Social Committee (3),

(1) OJ N°
(2) OJ N°
(3) OJ N°

Whereas the terms of Article 130 K of the Treaty provide that implementation of the Framework Programme be carried out by means of specific programmes developed within each of the action lines;

Whereas Council Decision 87/516/Euratom/EEC of 28 September 1987 ⁽¹⁾ adopting the multiannual Framework Programme 1987-1991 includes the use of major installations amongst the activities it provides for;

Whereas one of the objectives of the Community R&D efforts for 1987-1991 is to promote better use of human resources in the Community as a whole and to improve the utilization of large-scale scientific and technical installations through the addition of a European dimension:

Whereas the present plan whilst being consistent with the pursuit of scientific excellence will help to improve the Community's competitiveness in the field of research and at the same time strengthen economic and social cohesion in the Community

Whereas the Commission will ensure that the research carried out under this plan falls solely within the scope of the EEC Treaty, even in cases where the facility or installation used may not be wholly or partially covered by that Treaty;

Having regard to the opinion of the Scientific and Technical Research Committee (CREST) on the Commission proposal.

HAS ADOPTED THIS DECISION:

Article 1

An experimental Community plan to support and facilitate access to scientific and technical facilities and installations situated in the Community hereinafter referred to as the "Plan" - as defined in the Annex - is hereby adopted for a four-year period commencing on 1 January 1989.

(1) OJ N° L 302, 24.10.1987.

Article 2

1. The Plan consists of temporary financial support measures designed to facilitate access to and thereby develop the exploitation of large-scale scientific facilities situated in the European Community.

2. To achieve this objective, the Community will provide financial support for operations chosen on the basis of their scientific and technical quality. Such operations, which will be selected in conformity with the procedure laid down in Article 3 of the present decision, must be based on joint proposals from the Institutions or bodies responsible for the facilities and from the scientists or research workers wishing to acquire access to them.

3. Community financial support for the operations will be used to contribute as necessary to:
 - the operating costs of the facilities and, if necessary, the cost of adaptations and/or special features to meet the objectives set out in Paragraph 1;

 - incidental expenditure arising from the operations;

 - expenditure incurred by the scientists or research workers including expenditure on mobility and travel.

4. The scientists or research workers acquiring access to a facility as a result of Community financial support under this Plan shall be nationals of a Member State of the European Community. Financial support under this Plan shall only be granted to provide access to a scientific facility for scientists or research workers not normally enjoying access to the facility in question.

5. The Commission shall notify the Council and the Parliament, within a maximum period of three months from their selection, of the list of beneficiaries (scientific installations and researchers) of the Plan.
6. The precise objectives of the Plan, together with its detailed modalities for implementation, are set out in Annex I.

Article 3

1. The Commission shall be responsible for implementing the Plan.
2. The Commission shall be assisted by a committee of an advisory nature composed of the representatives of the Member States and chaired by the representative of the Commission.
3. The representative of the Commission shall submit to the Committee a draft of the measures to be taken. The Committee shall deliver its opinion on the draft, within a time limit which the Chairman may lay down according to the urgency of the matter, if necessary by taking a vote.

The opinion shall be recorded in the minutes; in addition, each Member State shall have the right to ask to have its position recorded in the minutes.

The Commission shall take the utmost account of the opinion delivered by the Committee. It shall inform the Committee of the manner in which its opinion has been taken into account.

Article 4

The funds estimated as necessary for the execution of the Plan amount to 30 MECU including expenditure on a staff of three.

Article 5

The Commission shall address a report to the Council and to the European Parliament after 30 months on the basis of an evaluation of the results so far achieved. This report shall be accompanied by suggestions for changes which may be necessary in the light of these results.

After completion of the Plan, the Commission shall send to the Council and the European Parliament a report on the performance and results of the Plan.

The abovementioned reports should be prepared in relation to the precise objectives set out in Annex I to this Decision and in conformity with the provisions of Article 252 of the Framework Programme.

Article 6

This Decision is addressed to the Member States.

Done at Brussels,

For the Council
The President

OBJECTIVES AND IMPLEMENTATION PROCEDURES

The Plan takes the form of a number of temporary financial support measures, aimed at encouraging access to large-scale scientific and technical installations within the Community. It is of potential benefit to all researchers in the exact and natural sciences who are nationals of one of the Community Member States.

1. OBJECTIVES

The precise objectives of the plan take the following form:

- to encourage access by researchers who are nationals of Community Member States to major scientific and technical installations within the Community to which they would not normally enjoy access;
- to increase training opportunities available to European researchers so as to enable them to make better use of major scientific and technical installations;
- to develop the use of large-scale scientific and technical facilities within the Community, where necessary by adaptation and/or the addition of special features.

2. POTENTIAL BENEFICIARIES

Community financial support may be made available to:

- any organisation within the Community which possesses major scientific and technical equipment or an installation of interest to the exact and natural sciences;
- any researcher or engineer who is a national of one of the Community Member States and is currently working in a public or private sector laboratory in one of the Member States. All fields of the exact and natural sciences are eligible.

3. PROCEDURAL ARRANGEMENTS

3.1 Call for proposals and selection procedure

- (a) The Commission will publish a call for preliminary proposals from organisations or groups of organisations within the Community having one or more major scientific and technical installations with experimental and/or test facilities which could be made available to scientists or research workers who have hitherto been unable to use them.

The Commission will also ensure that scientists and research workers who could potentially benefit under the Plan from access to the facilities in question are informed of the possibilities likely to become available.

The preliminary proposals received from those responsible for the large-scale facilities should be accompanied by a written statement of interest expressed by potential new users.

- (b) The Commission will draw up a draft preselection list of preliminary proposals to be retained. The Committee referred to in Article 3 will be informed of the proposals received and will give an opinion on the draft preselection list according to the procedure set out in Article 3§3. The Commission will then establish a preselection list of facilities which will be published in the Official Journal.
- (c) On the basis of the preselection list, the Commission will ask for "joint proposals" from the installations and potential users concerned. The Commission may, if necessary, assist in the organisation of meetings between those responsible for the installations and potential users (financing of joint meetings, etc.).
- (d) The Commission will submit the list of joint proposals received to the Committee, which shall, in accordance with the procedure set out in Article 3§3, give an opinion on the operations with a view to financial support from the Plan. The Commission will then proceed to the final selection of the operations to benefit from Community support.

3.2. Choice of installations to receive Community support

Criteria of selection

The assessment of the value of Community support will be based upon an evaluation of the proposal put forward, on the basis of the following criteria:

(a) Quality of the facility:

- specific characteristics
- originality or uniqueness
- up-to-dateness
- range of experiments or tests possible
- backup and technical support available.

(b) Interest shown by potential users:

- Priority will be given to researchers from Member States other than that in which the major installation is situated.

(c) Cost/Benefit ratio of Community support:

- the number and quality of opportunities made available at the facility in return for Community support.

(d) Value to the Community:

- importance of the facility in respect of the Community's overall scientific and technical potential

- value of the experimental opportunities made available in terms of achieving the Community's scientific and technical objectives (potential links with sectoral R&D objectives)
- value of the facility in terms of strengthening the scientific and technical potential of certain countries or regions of the EEC.

3.3. Mechanisms for giving Community support to selected installations

The Commission will conclude an agreement with the recipient organisation or institution which will set out:

- the level of Community funding;
- the uses to which it may be put, including a quantification of the opportunities for access to visiting scientists;
- the obligations imposed upon the recipient organisation.

The obligations imposed on the recipient organisation include, inter alia:

- enabling the use of the equipment and installations forming the subject of the agreement at no extra charge by researchers not belonging to the recipient organisation or institution, this being for a fixed period of time over the year;

- ensuring access by visiting scientists to the scientific and technical back-up services on site.

The contracts will also specify:

- the payment from Community funds to visiting scientists and research workers of all eligible expenditure covered by the Plan;
- the methods by which the results arising from research carried out under the agreement are to be protected, disseminated and exploited.

Finally, the Commission will, in co-operation with the Installations concerned, take all appropriate measures to ensure the best possible implementation of the operations selected (programming, availability of machine time, etc.).

3.4. Implementation report

At the end of each year of Community support, the beneficiary organisation or institute will make a report to the Commission upon the use to which the funds awarded to them were put, and the results arising from the use which outside researchers made of the facilities made available to them in the context of the agreement signed with the Commission.

PART II

COMMENT OF THE COMMISSION ON THE AMENDMENT OF PARLIAMENT WHICH ARE NOT ACCEPTED BY THE COMMISSION

1. During its meeting of 15 February 1989, the European Parliament, in its second reading of the Common Position on the Plan to support and facilitate access to large-scale scientific facilities of european interest, adopted the attached one Amendment.
2. The Commission can not accept this amendement because of the following reasons:

The amendment refers to the annual budgetary procedures and has been tabled repeatedly. The Commission believes that this amendment is not necessary as Art. 130 P of the EEC Treaty already covers this issue.

PART II - ANNEX

AMENDMENT OF PARLIAMENT WHICH IS NOT ACCEPTED BY THE COMMISSION

Amendment No. 7

Article 4

The funds estimated as necessary for the execution of the Plan amount to 30 000 ECU including expenditure on a staff of three.

Each year, as part of the annual budgetary procedure, the Commission shall propose to the Budgetary Authority that these funds be allocated to the title covering the programme in accordance with the real needs for the financial year in question and the financial estimates contained in the Interinstitutional Agreement.
