Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial: Bezugsdaten, bei denen die Konzepte allgemeinbekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Die zweite Publikationsart, die Veröffentlichungen, wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet  
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well established, standardized, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylized motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in Videotext databases.

To help the user focus his research, Eurostat has created 'themes' i.e. a subject classification. The statistical documents and publications are listed by series, e.g. yearbooks, short-term trends or methodology, in order to facilitate access to the statistical data.

Y. Franchet  
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission des Communautés européennes a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'ensemble des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher, par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans lesquels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotex.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

Y. Franchet  
Directeur général

This report was prepared under the responsibility of :

Ernesto Azorin (act.), Head of Unit Eurostat-C2 "Transport statistics"

by

Sally Baker, Marion Biré, Michele Casarella, Longin Etoga, Kaisa Weckström-Eno

Luxembourg, April 1997.

## Introduction

"International Transport by Air (intra and extra EU): 1994 data" is a publication devoted solely to aviation statistics. The figures in this publication are derived from the voluntary Eurostat aviation database which is itself the product of close co-operation between Eurostat, the Member States of the European Union and Switzerland. The data published has been cross-checked by the Commission and the Member States.

The publication "International Transport by Air (intra and extra EU): 1994 Data" comprises:

- a relatively small printed volume containing summary data,
- a CUB.X diskette containing more detailed route data, and also the tables that appear in the printed volume,
- a diskette with the CUB.X software required to read the data diskette,
- a small printed manual containing instructions on the use of CUB.X.

This publication contains data for the year 1994 and is the second one of a series started recently with 1993 data. In order to bring the publication up to date, it is intended that a third publication containing data for 1995, should appear in November this year. The intention would be to publish 1996 data before the end of 1997 or early next year.

The database currently contains annual data provided by 14 Member States, the exception being Suomi/Finland which will provide data for 1997 onwards. In addition the database includes data for Switzerland. For a description of the database see Annex III.

# Methodological notes

## Definitions: Origin/Destination and Flight Stage Data - International Passengers and International Freight

Origin/destination data is On-Flight Origin and Destination (OFOD) information. ICAO defines On-Flight Origin and Destination traffic as traffic on a given flight with the same flight number subdivided by airport pairs in accordance with the point of embarkation and point of disembarkation on that flight. For passengers, freight or mail where the airport of embarkation is not known the aircraft origin should be deemed to be the point of embarkation; the same principle is used for the point of disembarkation. NB Since an individual passenger's air journey may consist of more than one flight, a passenger's on-flight origin and destination is not necessarily his true origin and destination. This is also the case for freight/mail consignments.

A flight stage is defined by ICAO as the operation of an aircraft from take-off to its next landing. Flight stage passengers and freight have been classified according to the flight stage flown.

The difference between origin/destination and flight stage data can be illustrated by the following example: a flight is operated on a route New York-London-Paris. The passenger traffic consists of 185 passengers travelling from New York to London, 135 from New York to Paris and 75 from London to Paris. Thus in terms of origin/destination data the figures recorded are 185 passengers New York-London, 135 passengers New York-Paris and 75 passengers London-Paris. New York would record the figures for New York-London and New York-Paris; London would record New York-London and London-Paris; Paris would record New York-Paris and London-Paris. In terms of flight stage data there are two flight stages and the figures recorded are; New York-London 320=(185+135) passengers; London-Paris 210=(135+75) passengers.

Passengers are defined as all passengers whose air journey begins or terminates at the reporting airport, plus connecting passengers who are counted twice at the reporting airport. Direct transit passengers are counted for flight stage data but not for origin/destination data. (In the above example the 135 passengers in transit in London are recorded by London in terms of flight stage data but would not be recorded by London in terms of origin/destination data.)

Freight is defined as any property loaded/unloaded onto/off aircraft other than stores and baggage; freight includes express and diplomatic bags but not passenger baggage. It is assumed that freight data does not include mail, defined as correspondence and other objects tendered by, and intended for delivery to, postal administrations.

Using ICAO codes "European Union and Switzerland" is composed of: LO, EB, LS, ED, ET, EK, EF, LE, GC, LF, TF, SO, FMEE, EG, LG, EI, LI, EL, EH, LP, ES. In 1994 the French "Département d'outre Mer (DOM) are included, but they were not included in 1993.

## International Passengers: Origin/Destination and Flight Stage Data - Reporting Countries

In principle this publication is based on origin/destination data rather than flight stage data. Origin/destination data has been used where available, but flight stage data has been accepted for those countries where no origin/destination data was reported. That is, for all Charts and Tables, origin/destination data has been used for Austria, Belgium, Germany, Greece, Spain, France, Ireland, Italy, Netherlands, Portugal, United Kingdom, and flight stage data only for Luxembourg, Sweden and Switzerland. Denmark provided flight stage data for Kobenhaven airport and a mixture of origin/destination and flight stage data for other Danish airports - this data has been combined for the purposes of this publication. Belgium provided data (O/D) for Bruxelles only and Ireland provided data (O/D) for Dublin Shannon and Cork only. Finland was unable to provide data for 1994. Passengers are international passengers, i.e. national traffic has been excluded.

## International Freight: Origin/Destination and Flight Stage Data - Reporting Countries

Origin/destination freight data was provided by Belgium, Greece, Spain, France, Ireland, Italy, Netherlands, Portugal, United Kingdom and Switzerland. Flight stage freight data was provided by Germany and Luxembourg. No data was provided by Sweden, Denmark and Finland. Freight is international freight, i.e. national traffic has been excluded.

## Methodological notes (Cont.)

### Table cell contents "0", "-" and "number"

For the purposes of this publication the inclusion of an "-" in a table cell means that no data was provided for that cell by the reporting country. A "0" means that the reporting country provided a zero for that cell. Where a number was provided by the reporting country the number appears irrespective of size. This means therefore that if information was reported on a given route for a single diverted flight the relevant figure will appear even in a table of aggregated data.

### Bâle/Mulhouse Airport

This airport may appear twice within individual parts of tables 4 and 5. That is once showing the data reported by Switzerland, and once showing the data reported by France. All data received from Member States relating to Bâle/Mulhouse has been coded under the ICAO Swiss code LSZM except for data reported by France which has been coded under the ICAO French code LFSB. Swiss data appears under the name BALE and French data appears under the name BALE/MULHOUSE in tables 4 and 5. It will be seen that the Swiss figure is in every case greater than the corresponding French figure because the Swiss have counted certain French traffic at Bâle/Mulhouse as international while the French have counted the same traffic as domestic, and therefore it has been excluded by the French authorities.

### Map

The ICP (International Connecting Points) represent the top tier of airports in Trans-european Airport Network. See Official Journal No. C220, 08.08.1994.

Passengers units are passenger movements shown in millions to one decimal place. data on passenger movements were provided by DGVII of the European Commission except for Hamburg where data was taken from the Eurostat origin/destination database. Data for individual airports have been aggregated for mapping purposes where several airports are situated in a given town. Thus, Berlin (=Schönefeld, Tegel, Tempelhof); London (=Gatwick, Heathrow, Stansted); Milano (=Linate, Malpensa); Paris (=Charles de Gaulle, Orly); Roma (=Ciampino, Fiumicino). However for certain towns this is not the case. thus Kobenhaven and Lyon data relate to Kastrup and Satolas airports respectively.

### Chart 1

The component countries comprising the five world regions as defined for Chart 1 are listed in Annex I. The world regions of Asia and Australasia (including South Sea Islands and Antarctica) have been grouped together in the interests of clarity.

### Chart 2

Total market figures (e.g. America - Total Market, North America - Total Market etc.) quoted at the top of each bar chart include both arrivals and departures at airports in the EU and Switzerland. The exception is for Chart 2 part 1 where, in order to avoid double counting, departure figures only for the EEA countries (including the EU) and Switzerland have been used. For Finland, Norway and Iceland estimates were made of those countries' departures by taking the corresponding arrival figures reported by the other countries. The estimates for Finland, Norway and Iceland therefore do not take account of traffic between these three countries. In the case of Sweden the figure for departures to the UK was not given by Sweden, but as the figure was known to be over half a million passengers it was estimated using the corresponding UK arrival figure.

## Methodological notes (Cont.)

### Table 1

Using the same methodology as described for Chart 2, the basic figures used to calculate the percentages are departure figures or estimates thereof. For each pair of countries the total of the two countries' departure figures are divided by the sum of the EU departure figures (actual and estimated) to obtain the percentages shown in the table.

### Table 2

See above under "International Passengers: Origin/Destination and Flight Stage Data - Reporting Countries" for details on data reported.

### Table 3

See above under "International Passengers: Origin/Destination and Flight Stage Data - Reporting Countries" for details on data reported. The component countries comprising the world regions are listed in Annex I.

### Table 4

See under "International Passengers: Origin/Destination and Flight Stage Data - Reporting Countries" for details on data reported. Rankings are based on data reported by 15 countries, i.e. 14 EU countries (excluding Finland no data reported) plus Switzerland. Data for airports relate to individual airports except for Paris and Lyon where data relates to the airport system: Paris (Charles de Gaulle, Orly, Le Bourget airports), Lyon (Bron, Satolas airports). See above for Bâle/Mulhouse airport.

Note that as stated in the table titles the geographical analysis is "EU and Switzerland" and "Rest of the World", with a world-wide total in part 5. In part 4 the table total does not correspond to the sum of parts 2 and 3 because the latter tables do not include Swedish data. (The distinction between scheduled and non-scheduled traffic was not provided by Sweden).

### Table 5

German and Luxembourg data are flight stage data. No freight data was provided by Denmark, Sweden and Finland. Therefore, rankings are based on data reported by 13 countries i.e. 11 EU countries and Switzerland. Data relate to individual airports except for Paris and Lyon where data relates to the airport system (see Table 4 above). See above for Bâle/Mulhouse.

Note that as stated in the table titles the geographical dichotomy is "EU and Switzerland", and "Worldwide".

## COMMENTARY

### Chart 1 - EU Country and Switzerland: to/from world region origin/destination international passenger traffic.

This chart shows the share of each country's passenger traffic accounted for by individual world region. For most of the countries, the European Union's share of traffic is over 60%, except for Netherlands 55%, France 56% and Germany 57%. For Denmark, Österreich and Sweden the share of traffic to/from the World Region "Europe except EU" is higher than for other countries respectively 25%, 24% and 20%. Netherlands, UK and France are the countries which have the highest share of traffic to/from America, respectively 19%, 16% and 13%. Africa accounts for a much larger proportion of French traffic (13%) than is the case for other countries. Asia and Australia accounted for 11% of Netherlands traffic.

### Chart 2 - Total international passengers by EU country and Switzerland: to/from world regions.

This chart represents an alternative way of looking at the passenger traffic between EU countries and Switzerland and World Regions, with the emphasis being on the share of the market to/from each World region accounted for by individual countries.

The largest market is the EU with 128.9 million passengers. The EU chart shows that there are three countries shares which, when combined, represent more than 50% of the total passenger traffic; Those countries are UK 22.53%, Germany 14.65% and Spain 16.99%.

The position is similar in the Central and Eastern European market, 8.9 million passengers, but the three countries are Germany, UK and Switzerland. The German share, 29.62% is far greater than that of the UK 13.29%, and Switzerland 11.76%.

The market to/from the European Republics of the ex-USSR is recorded as 4.2 million passengers. Once again, three countries share over 50% of this total. Germany has 35.83%, the UK has 10.65%, and France 10.3%.

The greatest share of the American total market, 45.8 million passengers is accounted for by the UK with 34.48%. The next greatest share is accounted for by Germany with 17.88% followed by France 12.7%. If North America is considered separately (a market of 37.3 million passengers) the UK share rises to 38.3% while the German and French shares are almost unchanged. Conversely, if the Central and South American and Caribbean market (8.6 million passengers) is taken separately, the UK share falls to 17.84%, less than Spain 20.54% and Germany 19%.

In the Australasia, South sea islands and Antarctica market, of 1.3 million passengers, the UK share is vastly greater, 67.95% than other countries. Italy only accounts for 9.18% and Germany 8.91%.

In the total African market, of 18.2 million passengers, the French and the German shares represent more than 50%, 32.46% and 20.18% respectively. The next greatest share is UK, 16.28%. If North Africa, a market of 11.5 million passengers is considered separately the French share rises to 36.70% and the German share to 23.61% while the UK share falls to 9.36%.

For the Asian market, 24.5 million passengers, the largest share is for the UK 31.45%, followed by Germany 21.72%, France at 15.07% and Netherlands at 9.89% are significantly lower. In the Far East market, 12.7 million passengers, a similar dominance is shown with UK on 30.62% and Germany on 21.96%. This is repeated for the Indian Sub-Continent market, 3.2 million passengers, where UK share is 40.02% and Germany share is 28.33%. If the Near and Middle East, of 8.2 million passengers, is considered in isolation, the German share falls to 15.69% and the UK share falls to 30.42%.

## COMMENTARY (CONT.)

### **Table 1 - Country to country flows within the EU: International passengers (departures) in both directions as a percentage of EU total.**

This table shows country to country passenger flows within the EU. Of the 105 flows between the 15 Member States which in 1994 totalled 128.9 million passengers, only 4 flows are each 4% or more of the total (i.e 4.6 million or more). These 4 country to country flows, account for 33.9% of the total. The largest single flow is Spain-UK with 13.6% (i.e million passengers), the next largest is Germany-Spain, (i.e million passengers), followed by France-UK 5.72% and Germany-UK.

The table shows the dominant position of three countries (UK, Spain and Germany) in terms of intra-EU passenger traffic. Of the total passenger traffic, 44.8% fly to/from UK, 34.1% to/from Spain and 29.7% to/from Germany.

### **Table 2 - EU country and Switzerland to EEA and Switzerland origin/destination international passenger traffic.**

This table is clearly closely related to Table 1, but the emphasis is on the data received from the states without the adjustments described in the Methodological Notes for Chart 2. No adjustment has been made to remove double counting.

### **Table 3 - EU country and Switzerland to world region origin/destination international passenger traffic.**

This table contains the data used to create the bar charts in for Chart 2 as reported by the countries, and without the adjustments described in the Methodological Notes for Chart 2. No adjustment has been made to remove double counting.

### **Table 4 - Ranking of top 50 airports in EU and Switzerlands in terms of international O/D passenger.**

This table gives the ranking of the top 50 airports in the EU and Switzerland in terms of international passengers carried within the EU and Switzerland; passengers carried to/from the rest of the world (scheduled, non-scheduled, total); and of passengers carried worldwide. London/Heathrow is clearly the largest airport for traffic within EU and Switzerland, for scheduled passengers carried to/from the rest of the world and for world wide passengers. In terms of non-scheduled passengers carried to/from the rest of the world, London/Gatwick and Manchester occupy the first two places, London/Heathrow is not present in the top 50. In terms of worldwide traffic The Frankfurt/Main airport comes second, the Paris airport system comes third and Amsterdam/Schipol fourth.

### **Table 5 - Ranking of top 50 airports in EU and Switzerlands in terms of international O/D freight.**

This table gives the ranking of the top 50 airports in terms of freight loaded/unloaded within the EU and Switzerland, and of freight loaded/unloaded worldwide. Frankfurt/Main occupies the first position in both tables, London/Heathrow comes second and the Paris airport system third. In terms of worldwide freight the Paris airport system is only just behind London/Heathrow. The worldwide table shows the concentration of long-haul freight at a few large airports.

**TOTAL INTERNATIONAL PASSENGERS (O/D) BY EU COUNTRY AND SWITZERLAND: TO/FROM WORLD REGIONS**

part 5/7

**Africa - Total Market = 18,2 Mio PAX**

**North Africa - Total Market = 11,5 Mio PAX**

Note: Luxembourg, Sweden, Switzerland - Flight stage data used.

Denmark - Flight stage data for Kobenhavn, O/D data for other airports. Finland - No data provided.

## CHART 2:

**TOTAL INTERNATIONAL PASSENGERS (O/D) BY EU COUNTRY  
AND SWITZERLAND: TO/FROM WORLD REGIONS**

part 6/7

**Asia - Total Market = 24,5 Mio PAX**

**Far East - Total Market = 12,7 Mio PAX**

Note: Luxembourg, Sweden, Switzerland - Flight stage data used.

Denmark - Flight stage data for Kobenhavn, O/D data for other airports. Finland - No data provided.

**CHART 2:**
**TOTAL INTERNATIONAL PASSENGERS (O/D) BY EU COUNTRY AND SWITZERLAND: TO/FROM WORLD REGIONS**

part 7/7

**Indian Sub-Continent - Total Market = 3,2 Mio PAX**

**Near and Middle East - Total Market = 8,2 Mio PAX**

Note: Luxembourg, Sweden, Switzerland - Flight stage data used.

Denmark - Flight stage data for Kobenhavn, O/D data for other airports. Finland - No data provided.

**ANNEX III:**

**THE EUROSTAT AVIATION DATABASE**

The database is derived from a set of records submitted by the states, if possible in the standard format (see below). Each record relates to a single route (a pair of airports) and contains the aggregate value for that route of one of the indicators listed below, for a specified year. "Arrivals" and "departures" are defined in terms of the reporting airport. The field in which an indicator is located determines whether it relates to flight stage or origin/destination data.

**DESIRED FORMAT FOR EACH RECORD IN AN ASCII FILE:**

XX;XXXX;XXXX;XX;XXXXXXXXXXXX;XXXXXXXXXXXX;XX

**EUROSTAT AVIATION DATABASE CLASSIFICATION PLAN**

ELEMENTS	CODING DETAIL	NOMENCLATURE
REPORTING COUNTRY	2-ALPHA	ISO COUNTRY CODE
REPORTING AIRPORT	4-ALPHA	ICAO 4-LETTER LOCATION INDICATORS
AIRPORT TWO	4-ALPHA	ICAO 4-LETTER LOCATION INDICATORS
INDICATOR	2-DIGIT	EUROSTAT CLASSIFICATION PLAN
VALUE ORIGIN/DESTINATION		VALUE FOR ORIGIN/DESTINATION DATA
VALUE FLIGHT STAGE		VALUE FOR FLIGHT STAGE DATA
YEAR	2-DIGIT	2-DIGIT YEAR CODE

**SAMPLE RECORD TRANSMITTED TO EUROSTAT**

LF;LFMN;EDDF;11;1320256;;93

I	REPORTING COUNTRY	FR	FRANCE
II	REPORTING AIRPORT	LFMN	NICE/COTE D'AZUR
III	AIRPORT TWO	EDDF	FRANKFURT
IV	INDICATOR	11	NUMBER SCHEDULED PAX ARRIVALS
V	VALUE ORIGIN/DESTINATION	1320256	VALUE FOR ORIGIN/DESTINATION DATA
VI	VALUE FLIGHT STAGE		NO FLIGHT STAGE DATA GIVEN
VII	YEAR	93	YEAR FOR WHICH DATA REPORTED

## ANNEX III (CONT.):

DESCRIPTION OF STANDARD FORMAT FOR DATA TRANSFER  
TO EUROSTAT AVIATION DATABASE

## LIST OF EUROSTAT INDICATORS FOR AVIATION DATABASE

EUROSTAT INDICATOR	DATA TYPE
11	Number of Scheduled Passengers Carried - Arrivals
12	Number of Scheduled Passengers Carried - Departures
13	Number of Scheduled Passengers Carried - Total
14	Number of Non-Scheduled Passengers Carried - Arrivals
15	Number of Non-Scheduled Passengers Carried - Departures
16	Number of Non-Scheduled Passengers Carried - Total
17	Number of Passengers Carried - Total - Arrivals
18	Number of Passengers Carried - Total - Departures
19	Number of Passengers Carried - Total
31	Tonnes Freight Carried - Scheduled - Arrivals
32	Tonnes Freight Carried - Scheduled - Departures
33	Tonnes Freight Carried - Scheduled - Total
34	Tonnes Freight Carried - Non-Scheduled - Arrivals
35	Tonnes Freight Carried - Non-Scheduled - Departures
36	Tonnes Freight Carried - Non-Scheduled - Total
37	Tonnes Freight Carried - Total - Arrivals
38	Tonnes Freight Carried - Total - Departures
39	Tonnes Freight Carried - Total - Total
51	Number Aircraft Movements - Scheduled - Arrivals
52	Number Aircraft Movements - Scheduled - Departures
53	Number Aircraft Movements - Scheduled - Total
54	Number Aircraft Movements - Non-Scheduled - Arrival
55	Number Aircraft Movements - Non-Scheduled - Departures
56	Number Aircraft Movements - Non-Scheduled - Total
57	Number Aircraft Movements - Total - Arrivals-
58	Number Aircraft Movements - Total - Departures
59	Number Aircraft Movements - Total

Note: Not all indicators were received for 1993 data, in particular very few countries supplied aircraft movement data.

ISBN 92-828-1198-0 (printed version)

ISBN 92-828-1197-2 (printed and electronic version)

Price (excluding VAT) in Luxembourg: ECU 65

This publication is devoted solely to aviation statistics. It contains data on international passenger and freight traffic for 14 out of 15 Member States plus Switzerland. The figures in this publication are derived from the voluntary Eurostat aviation database and relate to the year 1994. A similar publication was published for the first time last year for 1993 aviation statistics. The publication takes the form of a paper product containing a limited number of tables and charts together with explanatory notes and definitions, plus two diskettes: one containing a statistical supplement in the form of CUB.X files, the other containing the CUB.X software which is developed by Eurostat and is required to read the files in the statistical supplement. The statistical supplement contains tables showing the most important routes for the major EU airports, plus the tables also included in the paper publication showing the top 50 airports in the EU in terms of international passenger traffic within the EU, and in terms of passenger traffic worldwide, as well as the top 50 airports in terms of international freight traffic. It also includes a table showing country to country passenger traffic. The publication containing data for 1995 is intended to be published early next year.
