QUARTERLY ACCOUNTS

Fourth Quarter 1998

First Eurostat estimates

Gian Luigi MAZZI

The first Eurostat estimates¹ for the fourth quarter of 1998 indicate that economic growth in real terms within the euro-zone² and the European Union slowed down compared to the previous quarter, showing a GDP growth rate of +0.2%, against +0.7% and +0.6% respectively. This was caused principally by a slowdown in gross fixed capital formation (+0.1 of the GDP variation) and also by a fall in exports (-0.5 of the GDP variation).

Among the most important trading partners of the European Union, the economy of the United States accelerated during the fourth quarter (+1.5%), while Japan remained in its negative phase dropping by 0.8%.

Compared to the fourth quarter of the previous year the GDP of the euro-zone and of the European Union increased by 2.4% and 2.3% respectively, while the US economy grew by 4.3%. On the other hand, Japan's GDP registered a fall by 3.0%.

During the year 1998 the GDP of the euro-zone rose by 3.0%, while that of the European Union reached 2.9%. During the same period the GDP of the United States recorded a rise of 3.9%, while Japan registered a fall of 2.9%.

¹ Methodological note: data for EUR-11 and EU-15 are calculated with a coherent and consistent statistical technique using the data available from the Member States. Given that some Member States have not published their quarterly accounts, and that some data are provisional, the EUR-11 and EU-15 data must also be considered provisional. Revisions are likely in the weeks to come.

² The euro-zone consists of the following countries: Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland.

The preliminary estimates for the fourth quarter 1998 are still based on the aggregates of ESA 79. By contrast, the final estimates will be based on the aggregates of ESA 95. This methodological change could imply higher revisions between preliminary and final estimates of this quarter.

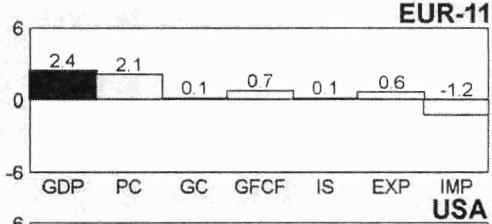

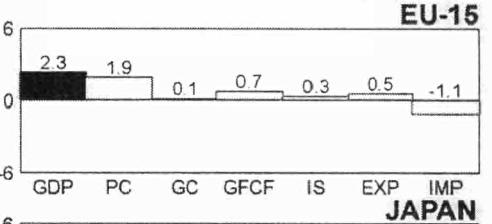

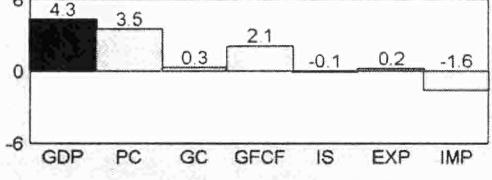

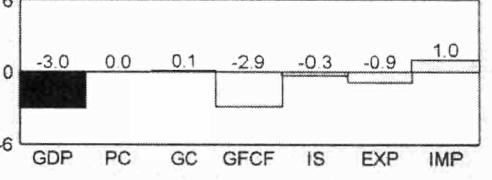

¹ Percentage of GDP (seasonally adjusted)
