

ACQUISITION OF CITIZENSHIP BY NATURALISATION IN THE EUROPEAN UNION - 1993

In 1993, the European Union had 11.6 million residents who did not possess the citizenship of any of the 15 Member States.

The number of naturalisations increased steeply between 1990 and 1993: a million people acquired the nationality of one or other of the 15 Member States by naturalisation. Most of them were of Moroccan, Turkish, and former-Yugoslav origin.

During those four years 140 500 people who were already citizens of one Member State acquired the citizenship of another Member State.

France was the Member State which naturalised the greatest number of people between 1990 and 1993 (233 000), followed by the United Kingdom (218 000), the Benelux countries (204 000), Germany (129 000) and Sweden (116 000).

The Netherlands and Sweden have the highest ratios of naturalisations to their resident non-national population.

Naturalisations doubled in number between 1981 and 1993

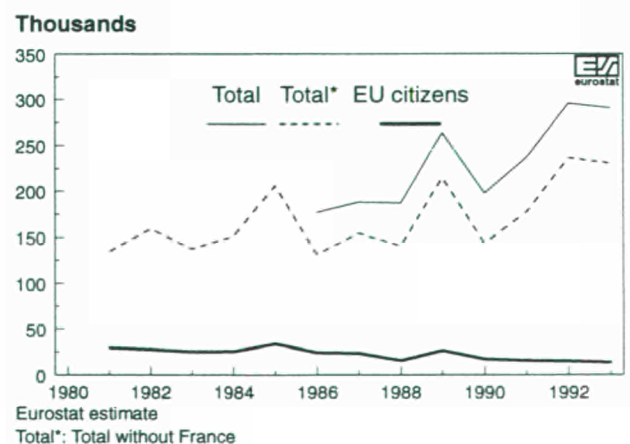

The number of naturalisations in the fifteen Member States of the European Union almost doubled between 1981 and 1993, exceeding 290 000 in both 1992 and 1993. This upward trend has not been a regular rise each year.

The increase in naturalisations recorded since the beginning of the 1990s (see Figure 1) has been due essentially to a doubling of their number in just three countries: Germany, Sweden and the Netherlands.

Two peaks in the number of naturalisations were observable in 1985 and 1989. These were the result mainly of changes in the law in Belgium and the United Kingdom respectively.

Overall there has been a decrease in the number of EU citizens acquiring the citizenship of another EU Member State, a fall of two-thirds since 1981. Moreover, whilst such naturalisations represented a quarter of the total in 1981, by 1993 they accounted for only 9%.

Irregular progress

The gradual increase in long-term immigration over the years has expanded the pool of people who may wish to seek naturalisation. Meanwhile, relaxation of certain countries' rules for acquisition of nationality has led to short but sharp rises in the number of naturalisations (See Table 1).

In the United Kingdom the effects of a law passed in 1981 became visible only in 1989. The British Nationality Act offered certain population groups the possibility of acquiring British citizenship, on condition that application was made before 31 December 1988. In consequence, some 300 000 extra applications were submitted in 1987 and 1988, resulting in an increase of 60 000 naturalisations in 1989 once the applications had been examined.

After 1989, the number of naturalisations returned to its previous level.

In Belgium, the Netherlands and Denmark, the effects of changes in the respective law became visible in the number of naturalisations in the year in which the law took effect. Since 1992, moreover, it has been possible in the Netherlands for those acquiring Dutch nationality to retain their nationality of origin. This led to a rise in the number of naturalisations in 1992 and again in 1993.

In Spain in 1987 and 1988, an upsurge occurred in the number of naturalisations concerning mostly non-EU citizens.

In the countries with a low number of naturalisations, there has been no significant increase over the past decade.

Turks, Moroccans and former Yugoslavs account for most naturalisations

The nationalities which accounted for most EU naturalisations in 1993 were Turkish (43 000 naturalisations) and Moroccan (31 000).

Amongst EU citizens, the Portuguese were the most numerous 6 500 to seek another EU citizenship. Most of them, 80%, acquired French citizenship (See Table 2).

The nationalities acquired generally reflect the numbers of non-national population, e.g.

- Virtually all Europe's Surinamese are resident in the Netherlands. 99% of naturalised Surinamese acquired Dutch citizenship;
- Algerian, Tunisian and Portuguese migrants live mainly in France. French citizenship was acquired by 88% of the Algerians, 80% of the Portuguese and 68% of the Tunisians who were naturalised;
- Moroccans are present in significant numbers in several Member States, including France, the Netherlands, Belgium and Germany. Their naturalisation rates do to some extent reflect their presence in those countries.

There are exceptions, however. Certain groups of citizens highly represented in certain countries do not habitually acquire citizenship (e.g. Filipinos in Italy, Iranians in Germany). The explanation seems to be simply that these are both recent waves of immigration, which have taken place within the past ten years. This is also the case for citizens of the former Yugoslavia, whose arrival is too recent yet to be reflected in naturalisation figures.

Of the Turkish citizens in the EU, almost three-quarters are resident in Germany. However, more have acquired Dutch citizenship (42%) than German (28%).

Although more than 400 000 United States citizens lived in Europe in 1993, very few had acquired the citizenship of any Member State. Vietnamese, on the other hand, had a high proportion of naturalisations in every country for which data are available.

Sweden: 7% of the non-national resident population naturalised in 1993

In 1993 it was Sweden and the Netherlands which naturalised the largest part of their non-national resident population, with 7% and 5% respectively. Naturalisations, like births, add to the total of citizens. In the Netherlands naturalisations represented a fifth of the total of births, and in Sweden, more than a third (see Table 3).

This significant trend towards naturalisation is perceptible in all groups of residents in each of these two countries, regardless of nationality of origin. It is also apparent, though to a lesser degree, in Denmark, United Kingdom and Norway.

In France and Germany, traditionally countries of destination for migrant workers, the rates of naturalisation for the most numerous groups (Algerian, Moroccan and Portuguese in France, Turkish in Germany) remain low.

Naturalisations of other EU citizens: downward trend

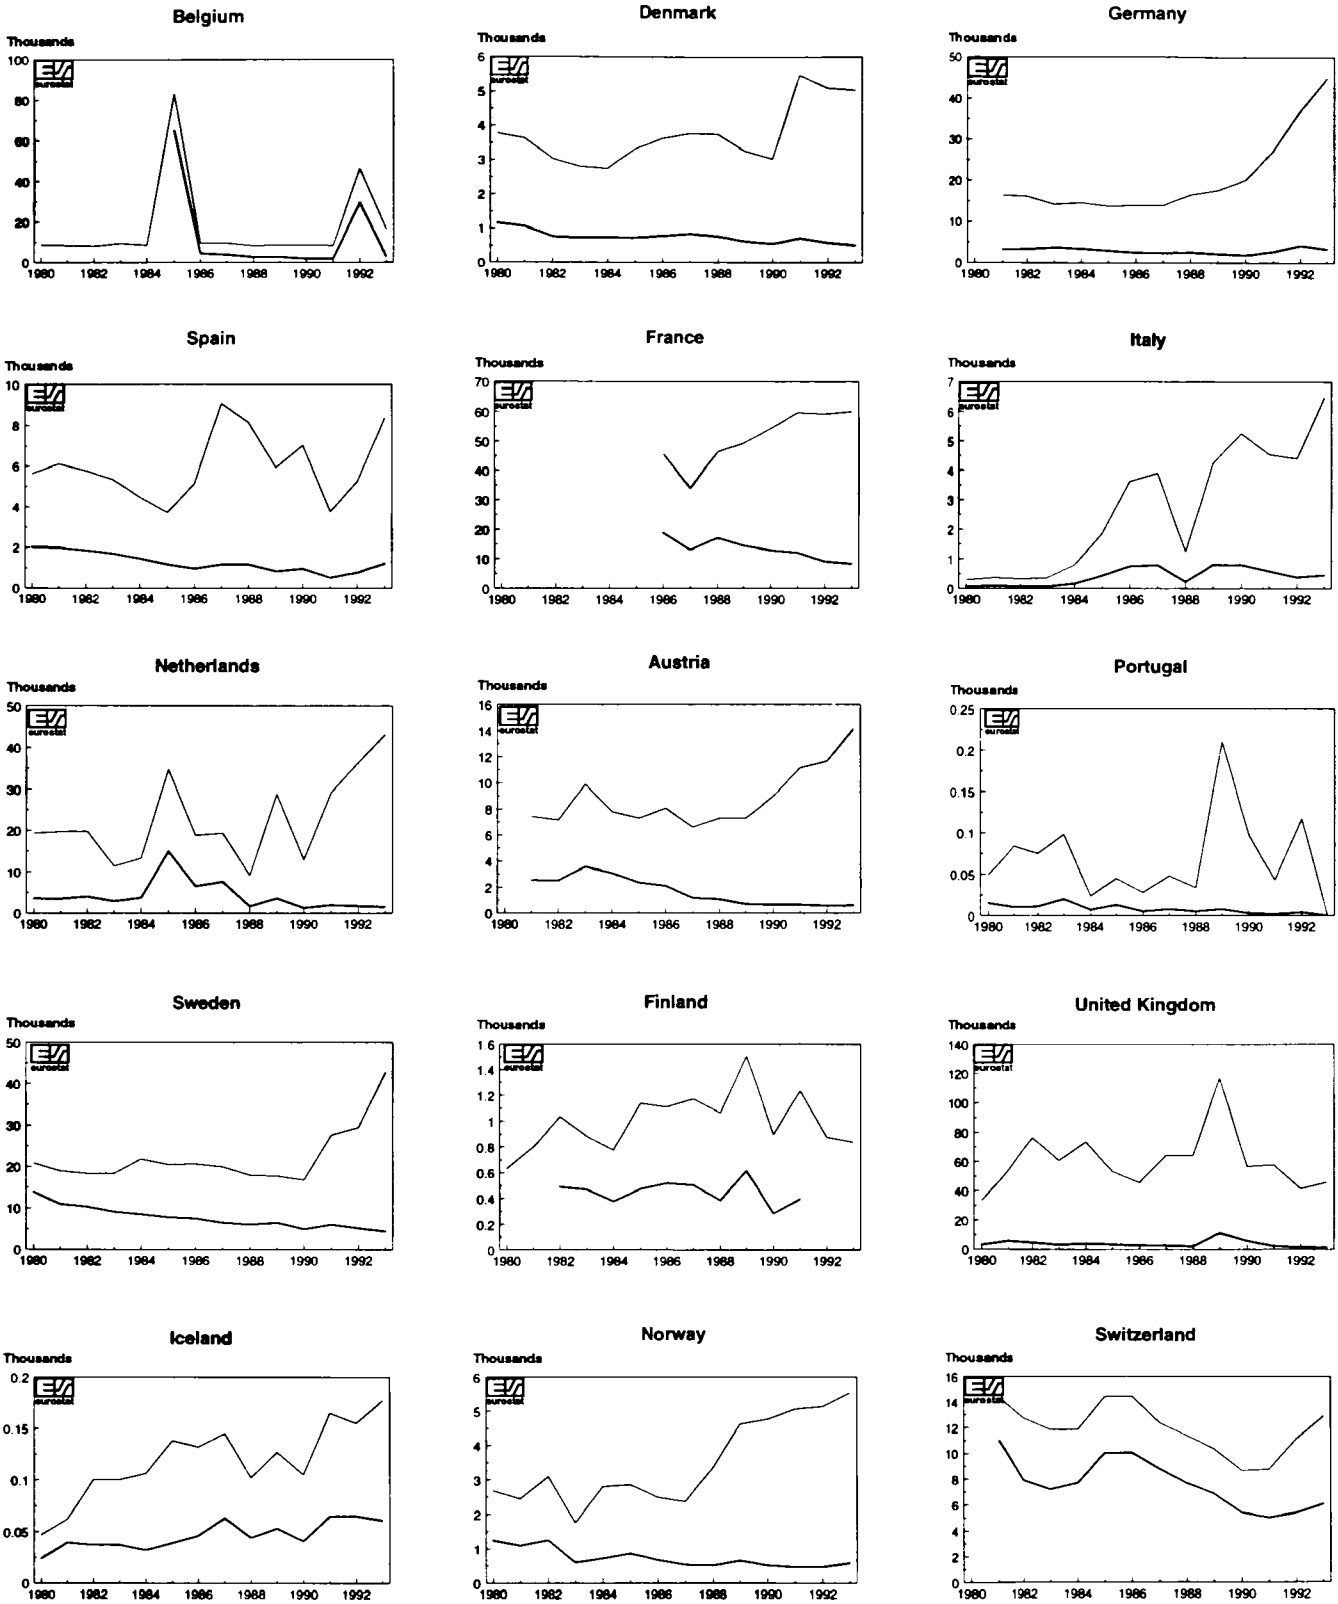

There has been a steady fall since 1981 in the number of citizens of one EU Member State obtaining the nationality of another by naturalisation (see Figure 2).

In France, the Netherlands, Sweden, Austria and Italy the share of EU nationals in the total of naturalisations has declined, due not only to the rising number of naturalisations of non-EU nationals, but also to the decline in the naturalisation of EU nationals. The only exception is Germany, where there has been no fall in the number of naturalisations of EU citizens.

In 1992 there was a wave of Italian applications for Belgian nationality, the result of a change in the law on the treatment of the second and third generations, for whom the acquisition of Belgian citizenship became little more than a formality.

The proportion of EU citizens acquiring Swiss citizenship remained high: in 1993 half of those naturalised Swiss were previously nationals of one or another EU Member State. Year in, year out, Italians account for at least a third of those.

Slow changes in the naturalisation of Asians

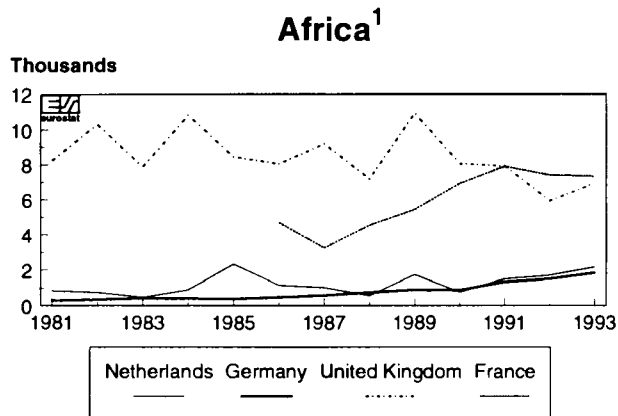

Most naturalisations of Asians and Africans (other than from the Maghreb) in 1993 occurred in the United Kingdom, France, Germany, Sweden and the Netherlands (see Figure 3).

Except in the case of Africans naturalised in France, naturalisations of members of these two major groups changed little between 1981 and 1993. The figure for naturalisation of Asians in the United Kingdom has always been high, and has oscillated between 12 000 and 35 000 during these 13 years, but over the long term the rate is stable. The corresponding figures for Africans (other than from the Maghreb) ranged from 6 000 to 11 000.

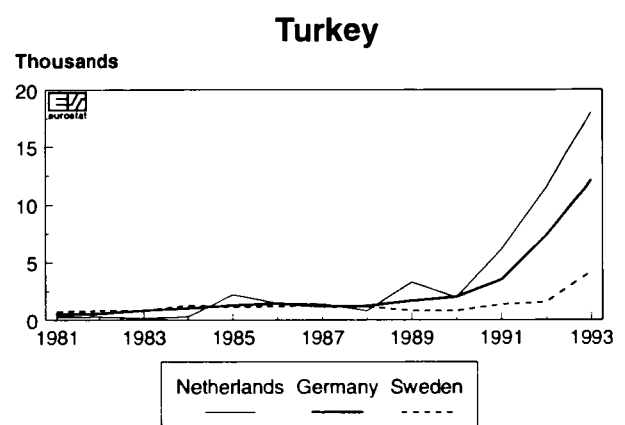

There has been a sharp rise in the number of Asians naturalised in Sweden, most of them having arrived as refugees. This development has not been observed elsewhere.

Naturalisations of Moroccans and Turks have increased substantially in certain countries during the period under review. This rise is not new in the case of Moroccans and is visible in the countries most concerned, but naturalisations of Turkish citizens was limited until 1990 and then climbed steeply, principally in the Netherlands and Germany, and to a lesser extent in Belgium and Sweden.

Naturalisations of major groups

¹ Excluding Algeria, Tunisia and Morocco

Principal conditions governing acquisition of the nationality of the Member States of the European Union

Belgium

Constitution (Articles 810, 64, 69, 74, 97, 104 and 191) and the Belgian Citizenship Code established by the Law of 28 June 1984, most recently amended by the Law of 6 August 1993

- Facilitated access to Belgian citizenship for foreigners of the second generation (virtually automatic) and third generation (automatic);
- Possibility of acquiring citizenship after five years' residence;
- Minimum three years of marriage required before the foreign spouse of a Belgian may acquire Belgian nationality.

Denmark

Consolidated Law No 457 of 17 June 1991 on the acquisition of Danish citizenship

- Danish citizenship is acquired by birth, by adoption (under certain conditions), by declaration (under certain conditions) and by naturalisation in accordance with the Constitution, normally after seven years' residence;
- Danish citizenship is not acquired by marriage. The equality of the sexes is selected in the rules for naturalisation.

Germany

Law on Citizenship of 22 July 1913, and Law of 29 July 1990 amending the law on aliens

- German citizenship is acquired by descent, and aliens can only therefore acquire German citizenship by naturalisation. Specific provisions in the law exist for younger aliens (age, eight years' continuous residence, schooling) and other non-Germans (formal application, loss or renunciation of former citizenship, minimum of 15 years' *de jure* residence).

Greece

Law No 1438/84, as amended by Law No 2130/93; Decree-Law 3370/55, which constitute the Hellenic Citizenship Code; Constitution of 1975/1986, Article 4.13 and 166.1)

- Equality of citizens before the law, and of men and women;
- Combined application of *jus sanguinis* and *jus soli*;
- Hellenic citizenship may be acquired by declaration on fulfilling certain conditions (formal declaration, minimum eight years' residence).

Spain

Constitution of 1978 (Article 11); Civil Code Title 1 (Articles 1726); Law No 15 of 23 December 1993 and Law No 18 of 17 December 1990

- A combination of *jus sanguinis* and *jus soli*: in addition to the children of a Spanish father or mother, children born on Spanish territory are deemed to be Spanish if either parent was born in Spain or if their descent is unclear;
- Spanish citizenship is acquired by marriage under certain conditions;
- Citizenship may be granted under certain conditions: 10 years' residence (excluding certain cases), honourability, and adaptation to Spanish society.

France

Civil Code (Articles 1733.2) and Decree 93/1362 of 30 December 1993

- Combined application of *jus sanguinis* and *jus soli*;
- No distinction between the sexes in application of the laws on nationality;
- French citizenship may be acquired by declaration (and cannot be refused if the conditions in law for an application, e.g. birth on French territory, or marriage to a French national, are met), or by official decision (under stated conditions, including age, a minimum of five years' residence, assimilation into the French community, and a clean criminal record).

Italy

Law No 91 of 5 February 1992, plus Decree No 572 of 12 October 1993

- *Jus sanguinis*, combined with the principle of equality of men and women;
- Italian citizenship may be acquired by descent, by birth on Italian territory, or voluntarily by declaration, by marriage, (after six months' *de jure* residence or after three years' marriage) or by naturalisation, as a rule after a minimum 10 years' *de jure* residence.

Luxembourg

Constitution (Articles 9 and 10); Law on Luxembourg citizenship of 22 February 1968, most recently amended on 11 December 1986

- *Jus sanguinis* applies, *jus soli* applying only incidentally;
- Equal treatment of men and women;
- Previous citizenship must be forfeit if Luxembourg nationality is acquired.

Netherlands

Law of 19 December 1984, as amended by the Law of 12 December 1992

- *Jus sanguinis*, plus *jus soli* for the third generation;
- Equal treatment of men and women;
- Right to naturalisation provided certain conditions are met, including minimum five years' residence.

Austria

Law on Citizenship of 1985 (BGB1. 311/1985)

- Citizenship by descent, with the principle of equality of men and women. Austrian nationality may be acquired from either parent, from an unmarried mother, or by legitimation if the father is Austrian;
- Personal independence of spouses, in particular by the right in law to acquire Austrian nationality by marriage, and also less strict conditions for naturalisation;
- Austrian citizenship may be acquired by birth, by legitimation or by naturalisation, as a rule after 10 years' residence.

Portugal

Law No 37 of 3 October 1981, amended by Law No 25 of 19 August 1994 and Decree-Law No 253 of 20 October 1994

- *Jus sanguinis*, with a statement of intent in the case of children born abroad, plus *jus soli* for children born in Portugal of Portuguese parents and foreign parents if they have been habitually resident for not less than six and ten years respectively;
- Citizenship is not acquired automatically on marriage.

Finland

Constitution (94/19: Articles 4 and 31); Law No 401/68 on Citizenship as amended by Law No 584/84; Decree No 699/85 on Citizenship

- *Jus sanguinis* takes precedence over *jus soli*;
- Finnish citizenship may be acquired by marriage, by declaration or on application after five years' residence;
- Finnish citizenship may be accorded to an alien on application, as a rule on condition that the alien nationality is renounced within a stated time-limit.

Sweden

Law SFS 1984/682 of 10 July 1984 amending Law 1950/382 on nationality

- Single governing principle for citizenship: an individual wishing to obtain Swedish citizenship by naturalisation must, after a minimum five years' residence, provide documentary proof of loss of the previous nationality.

United Kingdom

British Citizenship Act, 1981 and subsequent minor amendments

- A combination of *jus sanguinis* and *jus soli*: a child born in the United Kingdom is deemed British if either parent is British or resident in the United Kingdom;
- Equal treatment of men and women;
- Independence of spouses: citizenship is neither acquired nor lost automatically on marriage, but the spouse of a British subject may be naturalised under simplified conditions;
- British citizenship may be acquired by naturalisation under certain conditions five years' regular prior residence, intention to adopt domicile or permanent residence in the United Kingdom.

The data

Eurostat collects annual data on naturalisations according to previous citizenship. The series cover the years 1980 - 1993 and 19 countries: the 15 Member States of the European Union, the other countries of the EEA, and Switzerland.

Abbreviations and symbols

EU or EUR15: the 15 Member States of the European Union, comprising: Belgium (B), Denmark (DK), Germany (D), Greece (GR), Spain (E), France (F), Ireland (IRL), Italy (I), Luxembourg (L), the Netherlands (NL), Austria (A), Portugal (P), Finland (FIN), Sweden (S) and United Kingdom (UK).

EEA: the European Economic Area, comprising EUR15 plus Iceland (IS), Liechtenstein (FL) and Norway (N).
