

European system of integrated social protection statistics  
(ESSPROS)

11.12.1984

## UNEMPLOYMENT FUNCTION

### I. - Introduction

1. Statistics drawn up on the ESSPROS system have been described as integrated because the system "links the recording of the persons concerned with flows in receipts and expenditure"<sup>1</sup>. So far only the first section (Receipts and Expenditure) of the social protection statistics has been published because Part II (Persons and Benefits) has required (and still requires) time and effort; there have always been a great many figures in this category and it was the last to be processed at international level.
2. A lengthy research project, started two years ago, comprised a detailed analysis of the content of the Unemployment function. This study, conducted by the Working Party on Social Protection, dealt first and foremost with all types of benefit included by all countries in this function. As a result of this work the function has been more clearly defined and the results published should be greatly improved. Some of the amendments made to the statistical series published (receipts and expenditure) also affect the content of other functions; in view of the success achieved these other functions will be treated in the same way in their turn.

1

cf Eurostat - ESSPROS - Methodology, Part 1

3. As all this implies, the establishment of a list of basic types of benefit is as important for the analysis in Part II (Persons and Benefits) as for Part I of the system. It is in fact only with this degree of detail that consistent quantitative information can be collected on the number of persons receiving benefits under any given function.

## II.- Types of benefit in the Unemployment function

4. With regards to benefits the ESSPROS methodology proposes three divisions, by category, by function and by abbreviated types. The latter division is based on a classification with three-digit heading 1) in which each heading is an aggregation of "types". In isolation these types do not lend themselves well to international comparisons as they represent specific national items, often without direct equivalents in other countries.

The typological analyses conducted by the member States at the request of the SOEC have shown that variations exist at a number of levels, e.g. category of protected persons, conditions of award, reference chosen for the calculation of the benefit.

In drawing up the classification, these criteria were disregarded; thus it provides information on the nature of the corresponding benefits, but no more, for this was the only way of ensuring consistency and homogeneity. It is also completely independent of the classification of function.

The results of a similar study in this field between 1971 and 1975 had encouraged most of the countries to make a more detailed analysis of their benefits and break them down further by basic type. This action both increased the amount of the overall information at national level on the structure of the measures taken and considerably improved the quality of the data submitted to the SOEC.

A number of countries have since expressed regret that the degree of detail achieved in this way has not been fully used at Community level. Clearly the types of benefit, apart from their use for breakdowns by nature of benefit, could also be used in connection with functions for a different breakdown not based on their economic character; this could, however, only be done if their diversity, as noted above, were no longer a stumbling-block

5. Research conducted in connection with the Unemployment function has shown that, with a few additional agreements, it would be possible to draw up new functional subgroups on the basis of types of benefit. These could be general (i.e. applicable to several functions, e.g. a basic allowance) or specific (e.g. a short-time working benefit).

III. - The results

6. A summary of the qualitative informations collected by the countries for the Unemployment function is therefore presented as follows:
  - a) revised definition of the function (Annex I);
  - b) list and general description of subgroups of type of benefit (Annex II);
  - c) classification of existing types of benefit for nine member countries by subgroups (Annex III);
  - d) systematic summary of the information applying to each type (Annex IV) covering in order: category of protected persons and beneficiaries, conditions for the award of the benefit, its amount, duration and, if appropriate, the duration of the scheme itself. (1)
  
7. The note has also involved collecting and testing of data reproduced below, for the period 1975-1982/83:
  - a) Table 1 - Number of beneficiaries by type of benefit.

Those tables represent the first even publication of this type of data and the information should therefore be treated with caution. In particular it should be noted that the data for a given country should not be aggregated as:

    - firstly, figures are not necessarily given for every type that exists
    - secondly, certain persons are in receipt of several types of benefit simultaneously which means there is a strong probability of double counting.
  
  - b) Table 2 - Amount benefits by type.

---

(1) Annex IV will be published in a future issue of this Bulletin.

ESSPROS - Methodology, Part I

AMENDMENT

Unemployment function (Code 52)

534. This function includes all benefits designed to provide some income for protected persons who have lost part or all of their wages or salary as a result of unemployment

535. This function includes:

- a) basic or compensatory unemployment benefits;
- b) allowances for short-time working for operational, technical or economic reasons;
- c) allowances for short-time working resulting from bad weather;
- d) redundancy payments;
- e) other expenditure to the benefit of unemployed persons.

535a. This function does not include:

- a) medical care given to unemployed persons and members of their families<sup>1</sup>
- b) removal expenses and installation allowance for unemployed persons who have agreed to move house and work in another region<sup>2</sup>
- c) various payments made, under specific conditions, to the elderly unemployed<sup>3</sup>

-----  
<sup>1</sup>These benefits are classified under the Sickness function

<sup>2</sup>These benefits are classified under the Promotion of employment function

<sup>3</sup>These benefits are classified under the Old Age function

Unemployment function - Nature and description of the subgroups of types of benefits

I. Cash benefits

- |  |   |
|--|---|
| 1. Basic allowance                                   | General cash benefit for those persons who have become unemployed, including for economic reasons affecting the sector as a whole or the undertaking only.  |
| 2 Allowance in lieu of a basic allowance             | General cash benefit for those persons who have become unemployed, who do not fulfil the conditions for award of a basic allowance.   |
| 3. Benefit for short-time working                    | Cash benefit for those persons prevented from working normal hours for operational reasons (irregular work in, for example, ports), technical reasons (equipment breakdowns, etc) or economic reasons (reduced working hours) affecting the sector as a whole or the undertaking. |
| 4. Employment benefit for 'bad weather' unemployment | Cash benefit for those persons prevented from working normal hours because of bad weather   |
| 5. Redundancy payment                                | Cash benefit for those persons who have become unemployed specifically because they have been made redundant (possibly for economic reasons).   |
| 6. Other cash benefit                                | Cash benefit paid to persons who have become unemployed which cannot be allocated to any of the subheadings 1 to 5  |
