### INLAND DELIVERIES OF HARD COAL AND COKE IN 1990

Provisional annual figures for 1990 show total inland deliveries of hard coal in the Member States of the Community at 316.1 million tonnes (1989: 313.2 million tonnes). Part of demand (36.5%) was met by imports of hard coal amounting to 115.4 million tonnes from outside the Community.

The main customers for coal were:

- Pithead and public supply coal-fired power plants, which took 201.4 million tonnes of steam coal; this amounts to an increase of 7.1 million tonnes and accounts for 63.7% of total deliveries (194.3 million tonnes, or 62.0%, in 1989);
- coking plants, which, at 67.3 million tonnes, showed a drop of 3.3 million tonnes, accounting for 21.3% of total deliveries in 1990, compared with 22.5% (70.6 million tonnes) in 1989.

According to the estimates available, the situation as regards hard coal deliveries in the individual Member States was as follows :

An increase in the use of steam coal in the power plants of many Member States, such as France (up by 1.3 million tonnes or 11.7%), the old Federal Republic of Germany (up by 2.5 million tonnes or 5.7%) and the United Kingdom (up by 1.6 million tonnes or 2.0%) was offset by the fall in deliveries of coking coal in most Member States, because of the decline in demand from the steel industry. The drop, which will probably have been more than 3 million tonnes, mainly affected the big steel-producing countries, namely the United Kingdom (-8.4%), Italy (-8.0%) and the old Federal Republic of Germany (-3.9%).

Coke deliveries to the iron and steel industry :

Total deliveries within the Community amounted to an estimated 44.3 million tonnes in 1990, which is 2.8 million tonnes down on the previous year.
