

ELECTRICITY PRICES (HOUSEHOLD CONSUMERS) 1 July 1993

The commentary is based on purchasing power standard (PPS); tables and graphics also mention the prices in ECU, which allows a comparison in both Units.

A study of the variations in VAT excluded prices since 1 January 1993 reveals that :

- Prices for Greece, Spain and Portugal remained stable, as well as those of most German regions. However, the strongest rises are recorded in Germany since in Leipzig the growth is between 7.2 and 11.7 %, in Munich between 6.9 and 9.2 % and in Hamburg between 3.3 and 7.1 %.
- In Belgium, a relative stability of prices can be mentioned (from 0 to +0.2 %).
- In France, the increase varies between 0.7 and 2.1 %, the highest rise being for the largest standard consumer, as in Italy, where there is a larger scale of variations (from 2.1 to 5.1 %). The same phenomenon can be observed in Luxembourg but in smaller proportions as the prices increase from 1.1 to 1.3 %.
- In the United Kingdom, strong disparities can be noticed : whereas in Glasgow prices increased by 1.9 to 3.2 % and in Leeds I₁ increased by 4.8 % and I₂ by 1.3 %, the other prices decreased (between 0.2 and 3.3 %).

As far as the comparison at the level of Member States is concerned, please refer to the graphics page 8.

Five household standard consumers, coded D_a to D_e were chosen:

Standard consumer	Annual consumption (kWh)		Approx. subscribed demand (in kW)
	Total	of which night	
D _a	600		3
D _b	1 200		3 - 4
D _c	3 500	1 300	4 - 9
D _d	7 500	2 500	6 - 9
D _e	20 000	15 000	9

Prices for the standard consumers are given in national currencies, PPS (purchasing power standard as at 13 October for 1993) and in ECU (average value for July 1993).
