

Farm structure in Sweden – 2005

Almost half of the agricultural land and livestock are in farms of 100 ha or more

.....
This Statistics in Focus is part of a series of country-specific publications on the results of the Farm Structure Survey (FSS) 2005. It provides a brief but nevertheless comprehensive insight into the farm structure in Sweden. A similar publication was issued in December 2004 presenting the results of the FSS 2003 in Sweden.

* * *

In June 2005 in Sweden, about 66 thousand* agricultural holdings had an economic size of at least 1 European Size Unit (ESU).

- These holdings employed 67 thousand AWUs (annual work units), the equivalent of 67 thousand persons working full time;
- they made use of about 3.1 million ha of agricultural area, which is on average 46.7 ha per holding (compared to 50.9 ha in 2003).

Among these 66 thousand agricultural holdings

- 60% made use of less than one AWU, while 13% made use of 2 or more AWUs;
- 11% used less than 5 ha agricultural area, while 12% used 100 ha or more;
- 39% were holdings of the type general field cropping, 21% specialist cereals, oil seed and protein crops, 12% were engaged in combined field cropping and grazing livestock, 12% were specialist dairy farming and 11% had specialised in cattle rearing and fattening;
- 47% of their agricultural area was situated in less favoured or mountain areas;
- 4% were organic farms;
- 6% benefited from direct investment aid.

Among the 63 thousand sole holders

- 11% were women;
- 50% were aged 55 or more, and only 6% were younger than 35 years;
- 48% had another gainful activity as their major occupation.

Table 1 – Labour force by size of the farms.....3

Table 2 – Agricultural holdings by size.....4

Table 3 – Land use by size of the farms.....5

Table 4 – Livestock by size of the farms.....6

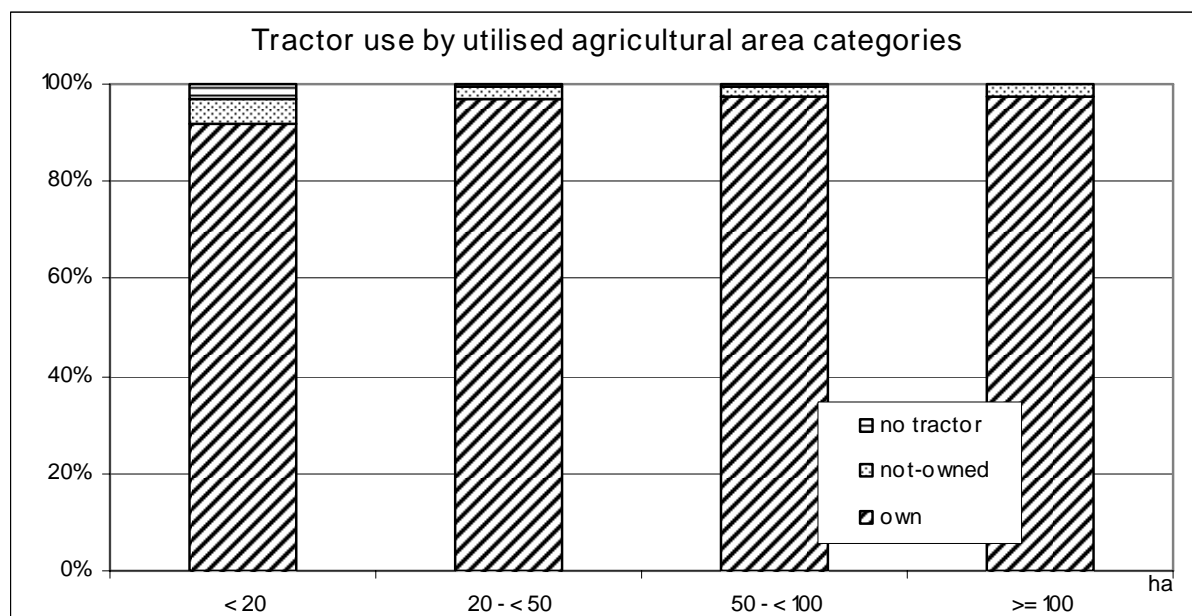

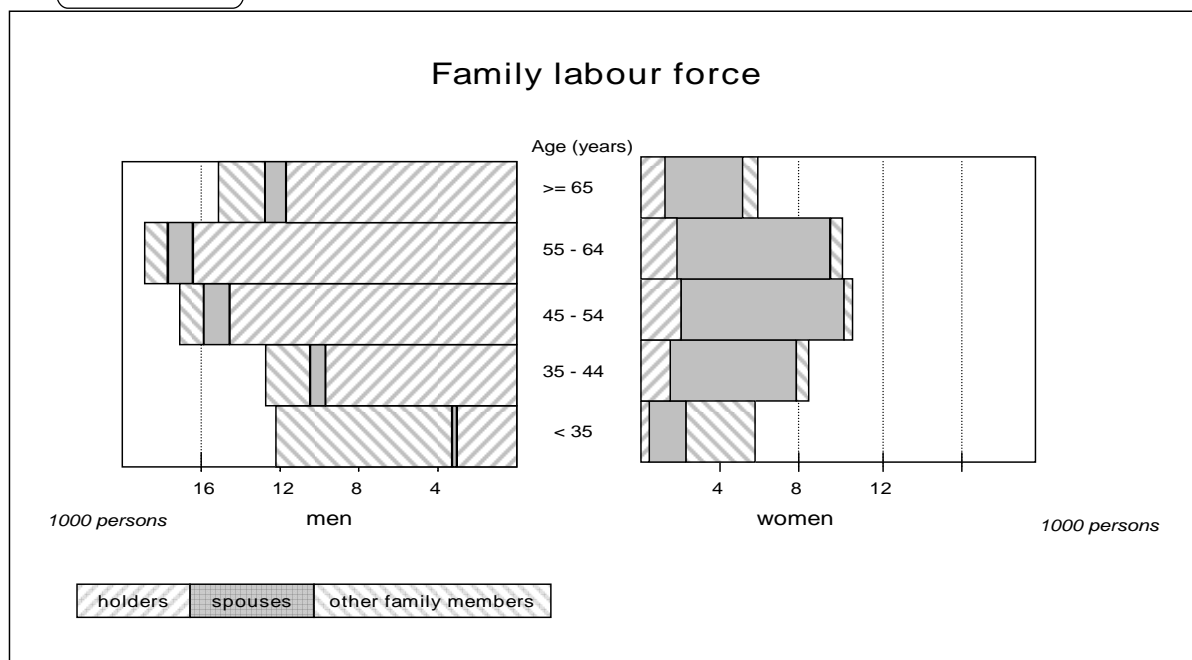

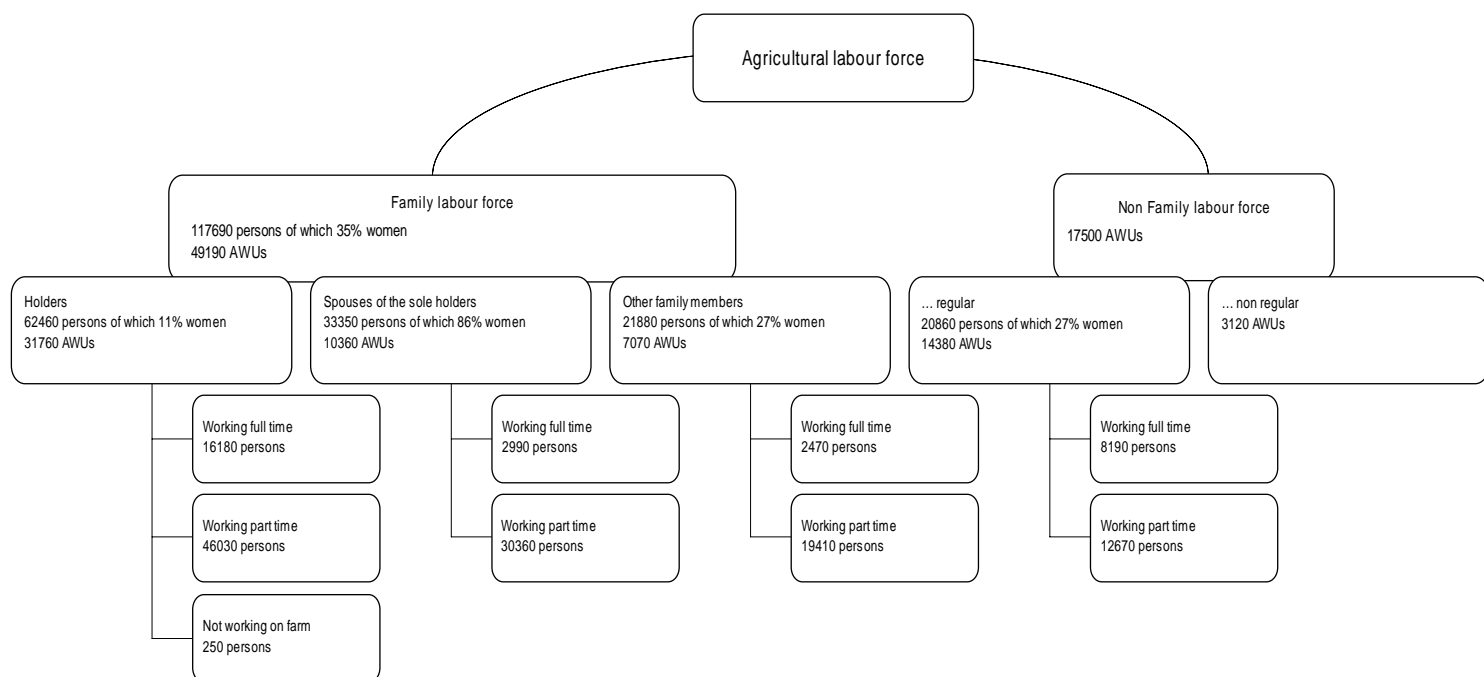

Table 5 – Subsistence farming.7

Due to differences in the threshold across Member States, the total number of farms is not comparable between countries. This is why the present analysis, including Tables 1-4 and the graphs focus on the holdings of at least one ESU. See methodological notes for more information on the concept of the ESU.

Sweden 2005 – Holdings of at least 1 ESU

► METHODOLOGICAL NOTES

The 2005 survey on the structure of agricultural holdings in Sweden was carried out with the reference day of 2 June 2005. It was a combination of an exhaustive and a sample survey according to EU requirements. A prior full-scale agricultural census was conducted in 2000. The reference period for characteristics related to farm labour force, machinery and irrigation was June 2004 to May 2005.

The target population was all the holdings operating in agriculture, horticulture or in animal husbandry, and reaching at least one of the thresholds applied (at least 2 ha arable land; 200 m² under glass or 2500 m² outdoor horticulture; 50 cows, sows or ewes; 250 other cattle, pig; 1000 chicken). These holdings are included in the statistical farm register, which is updated on an annual basis (from statistical surveys and from administrative sources like IACS). The frame was stratified by regions, by arable land area and by number of different livestock. In practice 119 strata were used. In 85 strata simple random sampling with Neyman-allocation was applied based on arable land area and on number of different livestock. In the remaining 34 strata the selection ratio is 100% (for example for large size holdings). The sample size was about 32 thousand.

For each activity ('enterprise') on a farm (for instance wheat, dairy cow or vineyard), a standard gross margin (SGM) is estimated, based on the area (or the number of heads) and a regional coefficient. The sum of such margins in a farm is its economic size, expressed in European Size Units (ESU). 1 ESU is equal to 1200 euros.

Each farm is classified in the community typology by its economic size and its type of farming, depending on the share of each enterprise in its economic size. For instance, a farm where breeding sows account for more than 2/3 of the economic size is classified as

specialist pig rearing (type 5011). Depending on the level of aggregation, farms are grouped into 8 to 70 types.

Annual work unit (AWU) is equivalent to a worker employed on a full time basis for one year. In Sweden it is 1800 hours (225 working days of 8 working hours per day).

Livestock Unit (LU) is equivalent to a dairy cow. The number of animals (number of heads) is converted into LU using a set of coefficients reflecting the feed requirements of the different animal categories.

Subsistence farming refers here to all farms below 1 ESU economic size. Note that the number of farms cannot be compared between countries due to the differences in coverage of FSS.

European Statistical Data Support:

Eurostat set up with the members of the 'European statistical system' a network of support centres, which will exist in nearly all Member States as well as in some EFTA countries.

Their mission is to provide help and guidance to Internet users of European statistical data.

Contact details for this support network can be found on our Internet site: <http://ec.europa.eu/eurostat/>

A list of worldwide sales outlets is available at the:
Office for Official Publications of the European Communities.
