

Extract from "Industrial Trends - September 1993"

Still no sign of recovery

Production in European industry is still falling, **with no signs of levelling off**. Particularly **production of capital goods**, which should provide momentum for the next upturn, is declining notably.

The rate of change of the **production index** adjusted for the number of working days for the European

Community (EUR 12) was -3.8% in June 1993 and -4.2% in May 1993 compared with the same months in 1992. The corresponding figures for West Germany are -8.0% in June and -9.4% in May.

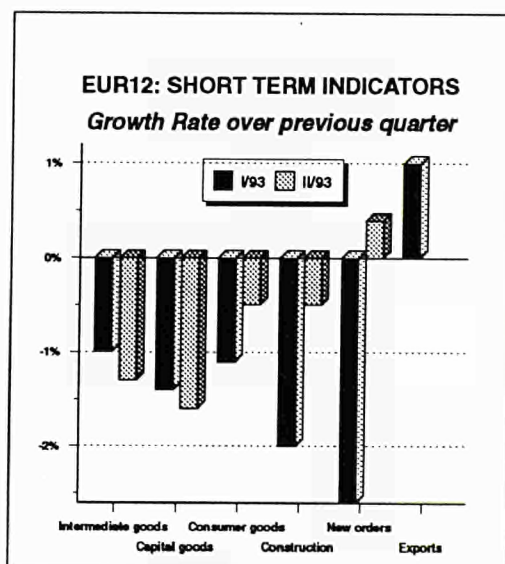

The figures for the most recent three-month period, i.e. April to June 1993, show a rate of change in the **seasonally-adjusted production index**

for EUR 12 which is 0.6% down on the previous three months (January to March).

The picture is as follows for the major goods categories (change in the last three months compared with the previous three months):

- Intermediate goods: EUR 12 -1.3%, USA 0.6%
- Capital goods: EUR 12 -1.6%, USA +1.1%,
- Consumer goods: EUR 12 -0.5%, USA -0.4%.

Production in **construction** (NACE 5) in the European Community saw a slight recovery: whilst the rate of change in the first quarter of 1993 compared with the last quarter in 1992 was -2%, the (estimated) rate for the second quarter of 1993 compared with the first quarter is +0.5%.

The rate of change in seasonally-adjusted **industrial** production for the individual **Community Member States** in the last three months compared with the previous three months is as follows: Greece +3.1%, Luxembourg +2.1% [estimated], Belgium +1.4% [estimated], Ireland +1.3% [estimated], United Kingdom +0.8%, Italy -0.5%, Germany (West) -0.9%, Spain -0.9% [estimated], Netherlands -1.2%, France -1.1%, Portugal -2.2% [estimated], Denmark -3.0%. Thus production in the summer months is falling in **many Member States** or showing only very slight positive rates of change. The United Kingdom is the only major Member State to show signs of an upturn.

Production fell in the following individual sectors of EC industry: manufacture of metal articles (NACE 31), food, drink and tobacco (NACE 41/42), textile industry (NACE 43) and footwear and clothing (NACE 45). There was a slight recovery in production and preliminary processing of metals (NACE 22), manufacture of non-metallic mineral products (NACE 24) and chemical industry (NACE 25). Production also ceased to decline in the motor vehicle manufacturing sector (NACE 35).

Saisonbereinigte Reihen enthalten irreguläre Effekte und Ausreißer, die die langfristige Konjunktorentwicklung überdecken. Der langfristige Trend dagegen zeigt allein die Richtung der konjunkturellen Entwicklung. Er wird durch mehrmalige Anwendung gleitender Durchschnitt berechnet, wodurch die irregulären Effekte eliminiert werden. Am aktuellen Rand können allerdings Fehlinterpretationen nicht ausgeschlossen werden, da hier die gleitenden Durchschnitte geschätzt werden müssen.

Seasonally adjusted series still contain irregularities and outliers which mask longer-term trends. Only the long-term trend, however, is an adequate indicator of economic evolution. It is calculated with the aid of repeatedly computing moving averages, thus eliminating the irregularities. As regards the latest figures, however, false interpretations cannot be ruled out, since here the moving averages have to be estimated.

Des séries corrigées des variations saisonnières contiennent toujours des effets irréguliers et des valeurs aberrantes qui masquent l'évolution conjoncturelle à long terme. En revanche, la tendance à long terme ne montre que l'orientation de l'évolution conjoncturelle. La tendance est déterminée à l'aide de calculs répétés de moyennes mobiles, qui permettent d'éliminer les effets irréguliers. Néanmoins, il n'est pas exclu que les toutes dernières valeurs donnent lieu à des erreurs d'interprétation car ici les moyennes mobiles doivent être estimées.
