### *Extract from "Industrial Trends - October 1993"*

## Zero growth continues

Production continues to fall in European industry and **there is no sign of it bottoming out**. This diagnosis applies to all sectors of industrial goods. The Community's construction industry also shows economic weakness.

The rate of change of the **industrial production index**, adjusted for working days, was -4.5 % down for the Community in July 1993 over the corresponding month of the previous year; the figure in June was -4.2 %. The corresponding rate of change in July for capital goods was -5.7 %.

If one takes the figures for the last three available months, May to July 1993, the rate of change in the **seasonally-adjusted production index** for EUR 12 was -1.0 % compared to that of the three preceding months, February to April.

The recession is even more pronounced in Japan where the corresponding rate of change is -2.4 %. There is a levelling off in the USA where the figure is +0.2 %.

Hopes of a recovery in the **construction industry** (NACE 5) were dashed in the Community; the rate of change in the first quarter of 1993 was -6 % compared with the last quarter of the previous year, the estimated rate for the second quarter being -1 % compared with January to March.

At **Member State level**, the rates of change for the last three months compared with the previous months are as follows for the seasonally adjusted industrial production index: Greece +1.1 %, United Kingdom +0.8 %, Italy -0.1 %, Netherlands -0.6 %, Germany (West) -1.0 %, Ireland -1.0 % (estimated), France

-1.5 % (estimated), Belgium -2.0 % (estimated), Denmark -3.0 %. Production thus fell or remained at a low level with slight positive rates of change in most Member States

in the summer. Of the larger countries, only the United Kingdom shows signs of an upswing.

Industrial production fell in the **following sectors** of EC industry: manufacture of metal articles (NACE 31), food, drink and tobacco (NACE 41/42), textile industry (NACE 43) and footwear and clothing (NACE

45). There was a slight recovery in the production of metals (NACE 22), the non-metallic mineral industry (NACE 24) and the **motor vehicle industry** (NACE 35), though the latter was exclusively due to the rate of change of +6.7 in the United Kingdom (Germany -1.3 %, Italy -2.3 %, France -2.4 %).

Verarb. Gewerbe - Trendwachstum Monat zu Monat  
 Manufacturing - Monthly Change In Trend  
 Ind. manufacturières - var. mens. de la tendance

Saisonbereinigte Reihen enthalten irreguläre Effekte und Ausreißer, die die langfristige Konjunkturentwicklung überdecken. Der langfristige Trend dagegen zeigt allein die Richtung der konjunkturellen Entwicklung. Er wird durch mehrmalige Anwendung gleitender Durchschnitte berechnet, wodurch die irregulären Effekte eliminiert werden. Am aktuellen Rand können allerdings Fehlinterpretationen nicht ausgeschlossen werden, da hier die gleitenden Durchschnitte geschätzt werden müssen.

Seasonally adjusted series still contain irregularities and outliers which mask longer-term trends. Only the long-term trend, however, is an adequate indicator of economic evolution. It is calculated with the aid of repeatedly computing moving averages, thus eliminating the irregularities. As regards the latest figures, however, false interpretations cannot be ruled out, since here the moving averages have to be estimated.

Des séries corrigées des variations saisonnières contiennent toujours des effets irréguliers et des valeurs aberrantes qui masquent l'évolution conjoncturelle à long terme. En revanche, la tendance à long terme ne montre que l'orientation de l'évolution conjoncturelle. La tendance est déterminée à l'aide de calculs répétés de moyennes mobiles, qui permettent d'éliminer les effets "irréguliers". Néanmoins, il n'est pas exclu que les toutes dernières valeurs donnent lieu à des erreurs d'interprétation car ici les moyennes mobiles doivent être estimées.

**Produktionsindex: 12 Monate / 12 vorherige Monate**

**Production Index: 12 months / previous 12 months**

**Indice de production: 12 mois / 12 mois précédents**
